

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. The project would finally address legacy mining issues that have been plaguing the site for decades and help secure the minerals we need for America's future. The company has shown its commitment to Valley County and the state of Idaho and I encourage you to adopt the proposed activities outlined in the company's 2021 Modified Mine Plan during the permitting process.

Today, steelhead and Chinook salmon cannot access spawning grounds because they are blocked by an abandoned mining pit. Perpetua will address this issue before mining even begins – reconnecting fish for the first time in more than 80 years. The company will build a fish passageway in the short term. Based on professional judgement and similar or longer tunnels, the SDEIS concludes Perpetua's tunnel would provide passage for all four special status fish species at site. It is important to note Perpetua will eventually restore full access to 25 miles of perennial stream and 6 miles of fish spawning habitat above the Yellow Pine pit. If we do not allow Perpetua to move forward with their plans, it is highly unlikely anyone else will provide the funds needed to reconnect fish to this currently lost habitat.

Perpetua Resources wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. After reviewing the project for six years, I highly encourage the U.S. Forest Service to move the project forward with the improvements laid out in the SDEIS.
