

This letter is to express my support of Perpetua's Stibnite Gold Project. America needs this project to be permitted. It would produce our country's only source of antimony, a mineral we need for a secure and sustainable future. I hope after reading my thoughts you will understand why my support for this project is so strong.

I agree with regulators and feel strongly that the preferred alternative is the best option for the Stibnite Gold Project moving forward. This option utilizes Burntlog Road. According to the SDEIS, this route would avoid environmental and safety risks associated with the avalanche and landside prone Johnson Creek Road. We need the minerals from Stibnite and Burntlog will allow mining to move forward while minimizing the impacts of mining on the community. Burntlog will reduce mine traffic interactions with the public and decrease the potential for spills near fish-bearing streams.

Reviewing Perpetua Resources' improved plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. That is why they reduced water temperatures, improved water quality and shrunk the project footprint by 13 percent. I urge you to trust in your own review process and permit the Stibnite Gold Project.

Charlotte Doherty
