Forest supervisor -

I live in rural Montana & have worked on the Stibnite project as a driller/operator for T& J enterprises. Valley county has a lot in common with where I live in Montana; beautiful scenery, a history of mining & logging, & hard working people struggling to make ends meet. I'm fortunate to have a good-paying job for a company that offers benefits and cares about my safety. The stibnite project can provide what I've got to many hundreds of people, offering not only site restoration, but high paying jobs in the mining industry for hard working americans just trying to get by. Even without the site restoration and critical mineral production aspects, this is a project worth supporting. With the ancillary benefits its' a no-brainer; I urge you to approve the stibnite project by finalizing the EIS without haste.

Thanks,

Sincerely,
