

Dear Payette National Forest Supervisor,

As a member of the mining industry, I am writing in support of the Stibnite Gold Project and the benefits it will bring to Idaho. This project has the potential to put hundreds of Idahoans to work, bring a \$1 billion investment into our state and restore an area of Idaho's backcountry desperately in need of repair. Today, fish cannot swim past the Yellow Pine pit and heavy metals are leaching into the ground and surface water. The Stibnite Gold Project can leave the conditions better than they are today.

I am supportive of Perpetua Resources' refined plan in large part because regulators named it as their preferred alternative. The USFS indicated it was the best option for mining the site because it eliminated the need for perpetual water treatment, had a better access route and did a better job managing stream temperatures. Regulators would not have identified Perpetua's plan as their favorite unless they were confident the company could minimize impacts to the environment and community while mining for gold and the critical mineral antimony.

I urge you to approve Perpetua Resources' project. The Stibnite Gold Project will provide a huge benefit to our community and the local environment and the company has taken the time to reduce its footprint and improve water quality at site. The permitting process is designed to move the best plans forward and I feel that is what we will do with the 2021 Modified Mine Plan.

Sincerely,

 12-21-22
