

Linda Jackson, Payette Forest Supervisor
Stibnite Gold Project
500 N. Mission Street, Building 2
McCall, Idaho 83638

Ms. Jackson,

I am writing to express my views on Perpetua Resources' Stibnite Gold Project. The opportunity presented by the project is compelling for many reasons and I am committed to seeing this project come to fruition. This is the best opportunity to clean up legacy tailings and waste, reconnect fish to miles of spawning grounds that they have been blocked from for 80 years and restore a river all at the cost of a public mining company, I think this is a big win. Without Perpetua Resources, the site will likely never get the environmental attention it deserves. Valley County deserves better than that, let's get this site cleaned up at the cost of another mine, not the taxpayers.

Last summer, Perpetua agreed to provide antimony to largescale battery maker Ambri. The agreement establishes a foundation to help facilitate the decarbonization of energy grids in the U.S. as well as around the globe. Ambri's batteries could fundamentally change how our energy system operates by making it possible for power grids to rely on more power from the wind and sun and store it instead of the current use it or lose it option. The Stibnite Gold Project is key to making this happen because it would be America's only mined source of antimony. Without it, we will continue to have to rely on China and Russia for this critical mineral. I want to support America's clean energy transition and support the Stibnite Gold Project using Burntlog Road. Cascade strongly supports this project!

Perpetua Resources has also taken the time to work closely with the Valley County Snowmobile committee to work through alternative OSV parking and access from the beginning. They have also taken the time to visit with the local clubs as well. I support the Johnson Creek access during construction, but support Burntlog route life of mine so that those of us that snowmobile can have northern access between Cabin/Trout Creek and Yellow Pine after construction.

This Stibnite Gold Project is a huge opportunity for Idaho. Please permit the 2021 Modified Mine Plan and move the project forward so America and our local community can reap the positive impacts.

Cordially,

Anna Eueland
