Ms. Linda Jackson, Payette Forest Supervisor,

I am writing in support of the Stibnite Gold Project. The project will help restore the site, secure the minerals we need for our national security and strengthen America's supply chains. Thank you for the opportunity to provide my feedback as part of the National Environmental Policy Act.

There are many checks and balances in place to ensure Perpetua Resources follows through on its promises to restore the site. In fact, the company is required by law to set aside all of the money it needs for restoration before mining can begin. However, I am not worried about Perpetua staying true to its word. The company has already started restoration work at the site. They have planted more than 60,000 trees to help reduce the amount of sediment going into the river, installed solar energy panels at site to reduce greenhouse gas emissions and improved miles of road along the river to protect fish habitat. However, what's more impressive to me is the changes the company has made following the comments they received on the DEIS. They took the feedback from stakeholders to heart and looked at ways to further improve the plan. In the 2021 Modified Mine Plan, the company has eliminated the Fiddle Development Rock Storage Facility, which shrinks the footprint by 168 acres, the size of the Hanger Flats pit was reduced by 70%, mined material was reduced by 10% and there is no longer the need for long-term water treatment. With the additional improvements, I feel strongly that the project should move forward – especially because it would allow us to secure a domestic source of antimony.

In addition, Perpetua Resources has also taken the time to work closely with the Valley County Snowmobile committee to work through alternative OSV parking and access from the beginning. They have also taken the time to visit with the local clubs as well. I support the Johnson Creek access during construction, but support Burntlog route life of mine so that those of us that snowmobile can have northern access between Cabin/Trout Creek and Yellow Pine after construction.

Reviewing Perpetua Resources' improved plans it is clear to me the company is listening to the community and cares about what they say. They have worked well with Cascade and we appreciate their willingness to help our local 501©3's which supports programming throughout Cascade. Get this project permitted so they can start this mining project.

Thank you,

Kelsie Van Komen
