

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the National Environmental Policy Act. I believe the project can help stop America's import reliance on antimony and address legacy impacts in the historic Stibnite Mining District. I hope my letter will help as you evaluate the recently published SDEIS.

When regulators are reviewing a project, they are considering all the worst-case scenarios. Which is why I was pleased when I saw the SDEIS concluded that the risk of a spill large enough to have a negative impact on fish would be low. Additionally, regulators said they believe with Perpetua's planned spill response resources and trained responders that a spill from a vehicle traveling up to site would be promptly contained and cleaned up. These things are important and signal a larger cultural of safety and commitment to the environment. These are just two small examples of why I hope you will permit the Stibnite Gold Project using the preferred alternative.

As the U.S. Forest Service and other state and federal agencies review the 2021 Modified Mine Plan and determine the course of action, I encourage you to consider the positive benefits Perpetua Resources will have on Idaho, especially now that the company has reduced its environmental footprint and made further improvements to water quality. This truly is a win-win opportunity for Idahoans and the environment. After years of careful scrutiny by regulators and the community, it is time for us to make these benefits a reality.
