

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project. There are many reasons why I am excited for Perpetua's project to come to life. It would provide America with our only mined supply of antimony, a mineral critical to our national defense and energy sectors. I hope through my comments you will understand why I want to see this project move forward.

The SDEIS concludes there will be net benefits associated with the Stibnite Gold Project. Some of those benefits will occur before mining even starts. For example, Perpetua Resources will construct a fishway that allows fish to travel to upstream habitat that they have been unable to reach for decades. Because of this the SDEIS said the greatest benefit to Chinook salmon and steelhead passage will occur during construction, when the fishway is built. Perpetua eventually plans to restore the East Fork of the South Fork of the Salmon River, so access to upstream waters is permanently restored for fish. I want to see the conditions at Stibnite improve. I know Perpetua Resources can make it happen.

I encourage the U.S. Forest Service to move the Stibnite Gold Project forward. The permitting process is designed to advance the best plans possible. I believe the work of regulators over the past six years is proof this is what is happening with the Stibnite Gold Project. The thorough review process has been beneficial but there should be no more delays. The project should move forward in a timely manner.
