

Thank you for the opportunity to comment on the plans for the Stibnite Gold Project. Over the last several years, I've had the opportunity to hear a handful of presentations on the project, sit down with members of Perpetua Resources and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to move the project forward.

Perpetua Resources made a lot of improvements to its plan after the last comment period. The community's feedback made the Stibnite Gold Project better. In fact, regulators identified Perpetua's plan as their preferred alternative in the SDEIS. This is a big deal and signals that regulators believe Perpetua can safely mine the site and limit its impact on the environment and surrounding communities. We need the minerals from this project. Now that Perpetua has eliminated the need for long-term water treatment, improved water temperatures on site and reduced the size of the project, the Stibnite Gold Project should move forward.

The SDEIS reduces the size of the project footprint, improves water quality, eliminates the need for long-term water treatment and makes sure water temperature on site does not exceed baseline conditions – all while providing our nation with access to a mineral we desperately need. The permitting process has been thorough and complete. Now, I hope the U.S. Forest Service will realize the benefits this project and permit the Stibnite Gold Project using the 2021 Modified Mine Plan.
