

Supervisor Jackson,

I am writing to express my views on Perpetua Resources' Stibnite Gold Project. The opportunity presented by the project is compelling for many reasons and, as a member of the mining industry, I am committed to seeing come to fruition. This is the best opportunity to clean up legacy tailings and waste, reconnect fish to miles of spawning grounds that they have been blocked from for 80 years and restore a river. Without Perpetua Resources, the site will likely never get the environmental attention it deserves.

When regulators are reviewing a project, they are considering all the worst-case scenarios. Which is why I was pleased when I saw the SDEIS concluded that the risk of a spill large enough to have a negative impact on fish would be low. Additionally, regulators said they believe with Perpetua's planned spill response resources and trained responders that a spill from a vehicle traveling up to site would be promptly contained and cleaned up. These things are important and signal a larger cultural of safety and commitment to the environment. These are just two small examples of why I hope you will permit the Stibnite Gold Project using the preferred alternative.

Perpetua Resources wants to restore the rivers, wildlife and habitat near the Stibnite Gold Project site. We should let them, especially considering the permitting process has worked and helped the company identify how to improve water quality and temperature in the SDEIS. Please permit the Stibnite Gold Project and continue to move this important project forward.

Sincerely,

Jesse McCambridge
