

Ms. Jackson,

Perpetua Resources has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of Idaho. They've volunteered their time in our schools and given generously to community causes. Besides their community giving, they also established the Stibnite Foundation and the Foundation has awarded more than \$158K to local 501©3 organizations. Perpetua has given generously to our region and yet the Idaho Headwaters group wants you to believe none of Perpetua's money is going to make an impact right here at home, their study is not based on facts!

In addition, Perpetua has utilized us as a local vendor for over 10 years now, we can tell you this has definitely had a positive impact on our bottom line.

Perpetua has developed a plan to provide our nation with a domestic supply of antimony and protect the environment in the process. Perpetua is mindful of its impact and has designed its project to meet or exceed environmental thresholds. For example, modeling in the SDEIS showed the Operations Area Boundary would not exceed the National Ambient Air Quality Standards and mercury, nitrogen and sulfur would fall below significant impact levels. I believe Perpetua Resources can strike the balance of mining the materials we need safely, while also protecting and restoring the environment. As an American we should all support this project.

Perpetua Resources wants to restore the rivers, wildlife and habitat near the Stibnite Gold Project site. We should let them, especially considering the permitting process has worked and helped the company identify how to improve water quality and temperature in the SDEIS. Please permit the Stibnite Gold Project and continue to move this important project forward.

Sincerely,

NAPA

George Roberts
