

Ms. Linda Jackson, Payette Forest Supervisor
Stibnite Gold Project
500 N. Mission Street, Building 2
McCall, Idaho 83638

Attn: Linda Jackson

Dear Ms. Jackson,

I am proud to submit my comments in support of Perpetua Resources' Stibnite Gold Project. This project presents our state with an incredible opportunity to bring well-paying jobs to rural Idaho, boost our state's economy and provide our nation with the much-needed critical mineral antimony. Today, America relies on China and Russia to provide us with antimony. The Stibnite Gold Project could help us secure a domestic source of antimony.

The Stibnite project is important to me because it will strengthen our national security through the production of antimony. Right now, the U.S. relies on foreign countries for this mineral. These days, I think Americans value a domestic supply chain for such important minerals more than ever. The project at Stibnite could produce over 100 million pounds of antimony and become our only domestically mined source in the entire country. Antimony is used to make electronics and batteries and is also a critical mineral for national defense and the energy industry. With the uncertainties that the Coronavirus brought to our world and current war in Ukraine, I want our country to do everything it can to protect us from the uncertainty of changing markets and trade wars. I also feel confident in the company's 2021 Modified Mine Plan. In the SDEIS, the company has managed to eliminate the need for long-term water treatment, improve water quality and shrink the size of the project footprint by 13 percent.

Perpetua Resources wants to help America secure a domestic supply of the critical mineral antimony and clean up a brownfield site. They've made great improvements to the project from the original documents they submitted - this shows the permitting process has done its job. It is time to permit the Stibnite Gold Project and continue to move this important project forward.

Sincerely,

MARK ARVIN
