

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. Perpetua has shown they are committed to Idaho and want to take care of the environment. I personally visited the Stibnite site and it is need of clean-up. It is presently and open sore and the proposed project would clean up the site. The Stibnite Gold Project would leave water quality, wetlands and the river better than they are today. I hope you move forward and permit this project as quickly as possible.

The alimony that will be mined from the site in my mind is a strategic necessity. The USA should not be reliant on other countries for this strategic mineral.

The plan for the Stibnite Gold Project is improved. Now, it is time to move this project forward to a final record of decision.
