

Sir/Madam:

I support the Perpetua Resources Stibnite Gold Project. They are proving themselves as a responsible and reliable partner with local government and non-profits. In addition, they have listened to the community and sought to address the concerns raised during scoping and development of the NEPA documents. Finally, as a mining company, I believe they have demonstrated good faith toward their responsibility of environmental cleanup. In addition, they have declared they will clean up and restore the site which was degraded by previous mining operations.

Jonne Hower
