

Perpetua Resources' Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. The company has a plan to improve water quality, wetlands and the river and leave the site better than it is today. I am writing to encourage you to permit the project as quickly as possible.

The SDEIS concludes there will be net benefits associated with the Stibnite Gold Project. Some of those benefits will occur before mining even starts. For example, Perpetua Resources will construct a fishway that allows fish to travel to upstream habitat that they have been unable to reach for decades. Because of this the SDEIS said the greatest benefit to Chinook salmon and steelhead passage will occur during construction, when the fishway is built. Perpetua eventually plans to restore the East Fork of the South Fork of the Salmon River, so access to upstream waters is permanently restored for fish. I want to see the conditions at Stibnite improve. I know Perpetua Resources can make it happen.

The Stibnite Gold Project has been under federal review for the last six years. That has given regulators and the public plenty of time to review the company's plan. I know this project will transform an area in need of environmental repair and secure a domestic supply of antimony. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward.
