

I am writing in support of the Stibnite Gold Project. The project will help restore the site, secure the minerals we need for our national security and strengthen America's supply chains. Thank you for the opportunity to provide my feedback as part of the National Environmental Policy Act.

There are many reasons to support Perpetua Resources improved mine plan. However, this lined in the SDEIS stood out to me: "The restoration activities, particularly providing volitional passage in the East Fork SFSR, would result in a major, permanent, regional, and beneficial effect on Chinook salmon, steelhead, bull trout, and westslope cutthroat trout within the vicinity of mine." Reviewing the SDEIS makes me confident Perpetua can make it good on its promise and show all of us how mining and the environment can work hand in hand.

I encourage the U.S. Forest Service to move the Stibnite Gold Project forward, especially now with the further improvements to water quality conditions on site. This is just one example of how the permitting process has worked to improve the plan.

This project is a win win for everybody. Let's move on now, and make it happen.

Frank D'Angelo
