Subject: WWW Mail: Pipeline

I find it reprehensible that a supposed "Caring for the land . . . would allow a pipeline through one of the last of the diminishing areas where humans do not destroy. Everyone caves in to the almighty dollar. Where I live in Ct, innocent bears and a myriad of other species struggle to avoid humans. You should all look in the mirror. If you TRULY care about the land, you will fight this disgusting proposal. Unfortunately, politicians will figure out wording or other nonsense, to get this done. However, you can take a stand for what is right. You can and should fight evil. Thanks for reading.
