Subject: Santa Fe MountainsLand scapeResiliency project

I request the SFNS do a Environmental Impact Statement (EIS) before taking any action on this project. Evidentially only if there is an EIS will we citizens know where you plan to burn and log exactly, and what precautions you are taking to keep the integrity of the forest(will you be creating roads to get your machinery in., for instance.

What is the plan to protect animals and endangered species?

And , what precautions are you taking to prevent your controlled fire to not get out of control?
