Re: Mountain Valley Pipeline and Equitrans Expansion Project Draft  
Supplemental EIS # 50036

Dear Dr. Wilkes,

On behalf of Appalachian Voices, 7 Directions of Service and the signatories below, we respectfully submit the following petition signed by 12,555 individuals and including 1807 personalized messages, in response to the Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental EIS # 50036.

Thank you for time and consideration of our comments.

Sincerely,

Jessica Sims  
Virginia Field Coordinator

February 21, 2023

Dr. Homer Wilkes, Under Secretary, U.S. Department of Agriculture. George Washington & Jefferson National Forests, MVP Project, 5162 Valleypointe Parkway, Roanoke, VA 24019

Re: Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental EIS # 50036

Dear Dr. Wilkes:

The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.

We maintain that the proposed changes to standards for soil health, old-growth forest, forest edge, species competition and scenic viewshed standards would bring significant harmful impacts to the Jefferson National Forest. The proposed changes serve as conveniences for the developer of one fossil fuel project, to the detriment of lands held in the public trust.

Allowing the Forest Service to break 11 of its own rules to accommodate Mountain Valley Pipeline, LLC, sets an alarming precedent for similar rule-breaking on national forests across the country. These exceptions run counter to the Forest Service's mandate to "sustain healthy, diverse and productive forests and grasslands for present and future generations."

**We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.**

The applicant has a demonstrated history of improper and inadequate sediment and erosion control practices during construction, leading to more than 500 violations of permit conditions and environmental standards in Virginia and West Virginia. It is reasonable to expect that new construction would cause additional adverse impacts to riparian zones, which serve an important role as buffers for waterways from sedimentation within the Jefferson National Forest.

The SEIS continues to minimize the severity of impacts on scenic viewsheds and vulnerable forest ecosystems. The loss of old-growth forest, which plays a crucial role creating topsoil, cannot be mitigated and would impair biodiversity.

Additionally, the alleged need for the Mountain Valley Pipeline is speculative and unproven, given existing supply alternatives and market shifts towards non-fossil alternatives. It is inaccurate for the agency to equate the damage done to treasured national forest land with "economic benefit."

For the reasons stated above, we again ask that the U.S. Forest Service select Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.

Sincerely,

USFS Petition Signatures Appalachian Voices and 7 Directions of Service 2/21/2023

<b>Jerry</b>	<b>Allen</b>		<i>OR</i>	97538	Dear Dr. Wilkes, Please act to reject the 11 proposed changes in the Mountain Valley Pipeline Project Draft EIS and choose alternative #1, No Action in order to protect our critical environment. Fossil fuel projects will drive our children to extinction. Please stop it now!
<b>Kaitlyn</b>	<b>Allen</b>	<i>Midlothian</i>	<i>VA</i>	23112	

**Kathleen Allen**      *Seattle*      *WA*      98118 Some people love this globe like their own mother - have called it home for thousands of years. In fact, some recognize themselves, and this earth as part of a vast web of life that reaches far beyond the horizons of our world ... a sanctuary of life ... sacred grounds where dreams are born and we, as children of life, are held and nurtured.

When we desecrate these sacred grounds, we rip that web to shreds - pollute the waters, foul the air, strip once fertile soils bare and dump our garbage everywhere - raping the beloved mother of life, destroying the cherished home.

Is that how you treat your mother?

Is that what you want for your home?

Humans were created to care for this garden planet - not to pollute and destroy it.

For the moment, we still have a choice. That moment will pass. Will we pass with it, or will we choose to heal the wounds and stop the wounding of these treasured grounds?

<b>Tabitha</b>	<b>Allen</b>	<i>Morganton</i>	<i>NC</i>	28655	This is absolutely unacceptable! Our mountains are the home to many animals and plants that are VITAL to our ecosystem. It is not a matter of IF the pipeline will leak, but rather WHEN it will happen. MVP (from what I understand) has already been sighted for many violations in NC and Gov Cooper has put a stop to it going through in his state. The courts have rejected MVP from going through Jefferson two times prior to now, so why is it being entertained AGAIN? Please protect our wildlife, water, beautiful forest that can not protect itself. Thank you for your time.

<b>Sarah</b>	<b>Bayldon</b>	<i>Falls Church</i>	<i>VA</i>	22046	National forests are a treasure for everyone in America to enjoy. Last year we spent a couple weeks camping in Fishlake National Forest. This year it could be Washington. These forests were preserved so nature would continue to exist while development continues across the country. Putting a pipeline through a national forest defeats this goal.. While the pipeline may not be wide, the area that must be cleared to install and maintain it consumes a wide swath. Leaks happen. We need to move away from fossil fuels anyway.
					Do not allow this pipeline to go through the national forests.
<b>Anna</b>	<b>Bayles</b>			48220

As I see it, your job is to protect the forest. Period. It is NOT your job to accommodate economic development interests.

Allowing this purely for-private-profit project to go through, when no one is suffering for lack of the natural gas it would carry, and when approval would be the equivalent of 50 new coal-fired power plants burning coal for the next 20 years, at a time when we desperately need to STOP burning fossil fuels, is simply unconscionable.

Yes, I understand that millions of dollars in downstream business development investments will not happen, and hundreds of jobs will not be created, and who knows how many potential new customers will not be served. But none of those businesses currently exist, and no one is suffering any hardship without this gas. So, selling ANY rights -- no matter how contained or limited - to violate ANY part of a National Forest is simply unnecessary and unjustified. There are reasons, but they are purely profit motivated. There are NO good reasons to allow this project to violate the forest..

<b>Chris</b>	<b>Berg</b>	<i>Flat Rock</i>	<i>NC</i>	28731-953	I am not aware of any underlying compensatory offers from Mountain Valley Pipeline LLC, to make a case for special rule exceptions to be granted by the Forest Service. If there are none, I believe it is poor public policy to play favorites on the behalf of the LLC. Their prior investments in aborted activities is a marker, but only a marker, and granting the liberty to leave such investments unstranded is a fresh policy decision, which should attempt to offer equity to all other parties. A No Action determination is by far the simplest way to do that.

					Thanks.
<b>Ron</b>	<b>Bolster</b>		<i>MI</i>	48161	
<b>James</b>	<b>Bolton</b>	<i>Lovingston</i>	<i>VA</i>	22949	It is my understanding that then stated mission of the USDA Forest Service is to protect our national forests and safeguard them for the public, and to authorize the use of NFS lands only if a proposed use is consistent with the this mission to manage NFS land and resources in a manner that will best meet the needs of the American people. According to this policy, the Forest Service has developed its Forest Plan to provide a set of appropriately consistent criteria on which such decisions are to be based, and to amend these criteria to allow a corporate entity, especially one which has, from the start of construction, repeatedly shown itself to be an untrustworthy partner in following through on its commitments to safeguard the environment that through which the project passes, cannot be reasonably deemed justifiable. Please abstain from changing the rules to accommodate a project, that will, especially when considering both its immediate effects on the forest environment as well as its larger negative effects on climate change, only serve work against the present and future needs of the American people.
					James Bolton
<b>Robyn</b>	<b>Bolton</b>	<i>Athens-Clarke Cou</i>	<i>GA</i>	30606

<b>Nancy</b>	<b>Bouldin</b>	<i>Greenville</i>	<i>WV</i>	24945	The Forest Service should not allow MVP to cross the Appalachian Trail anywhere on national forest land, but especially not here on top of Peters Mountain. 1- This is not some out-of-the-way crossing spot; it's next to Symms Gap, an important scenic viewpoint with prize views into West Virginia. 2-This crossing location has major safety risks that boring under the trail won't solve -- including being located in an ACTIVE EARTHQUAKE ZONE! 3-MVP has not provided any alternate route contingency plans if its bore attempts fail. Those plans need to be part of the DSEIS, evaluated by both the FS and the public. Without that information this is a dangerously incomplete assessment.

<b>Mark</b>	<b>Canright</b>		<i>NJ</i>	8802	The U.S. Forest Service, the agency charged with protecting and managing national forests, must stop breaking its own rules. The US Forest Service needs to follow its own important conservation rules governing old-growth forests, scenic viewsheds and soil health! It is time for the US Forest Service to reject and halt the Mountain Valley Pipeline forever. The courts already rejected this free pass to cut through the protected Jefferson National Forest two separate times — in 2018 and in 2022.
					The Forest Service should not rewrite that same permit for this destructive pipeline, which will harm people even more by worsening the climate crisis. It is critical that the U.S. Forest Service understand there should be NO special exceptions for this harmful project. Changing the rules for corporate profit is NOT acceptable.

<b>Carol</b>	<b>Claflin</b>		<i>MO</i>	64068	
<b>Gwendolyn</b>	<b>Claflin</b>	<i>Lexington</i>	<i>MA</i>	2420	For all the reasons listed in this letter, don't allow the Mountain Valley Pipeline to go forward. It's more important than ever to "sustain healthy, diverse and productive forests and grasslands for present and future generations". Ultimately, the real wealth in society is the planet we live on. And besides, renewable and alternative energy is the winning economic path--as it's the only viable path, and it's where we're headed one way or another. The only question is just how much self inflicted damage to the environment we're going to do in the meantime. So don't compromise on protecting our forests. We need them.

<b>MJ</b>	<b>Clark</b>	<i>sutton</i>	<i>WV</i>	26601	Gov Justice attempted to allow Gas Oil and Coal companies take over OUR forest in order for self gain. OUR WV forest are protected and will remain that way for the rest of eternity from the Governors greed. Justice would like to also see to it that Gas fracking oil drilling and coal digging takes place within OUR forest, tax free, no taxes on equipment brought into our state from other states. This would be a travesty. We have watched Voor of Engineers and DEP fail miserably at protecting our air land water and now we face the attack of our forest. For what reason would anyone think the risk of destroying our natural resources for self gain is a good idea. Our water is already in an emergency state of ill repair.

<b>Dori</b>	<b>Dietz</b>	<i>New York</i>	<i>NY</i>	11218	I am offended and very upset that the Mountain Valley Pipeline is even being considered. Fossil fuels are primarily responsible for climate change, and the U.S. Forest Service, charged with protecting national forests, have the responsibility to conserve our forests. The agency should in no way allow special exceptions for the Mountain Valley Pipeline. This pipeline is primarily for corporate profit - it is certainly not to the benefit of the national forests, nor for the people of this country. Our national forests are held in the public trust as special lands, and must not be destroyed by the fossil fuel industry for their own private monetary gain. Please be responsible and protect our forests. Dori Dietz

<b>Debra</b>	<b>Dunson</b>	<i>Spring Hill</i>	<i>TN</i>	37174	As a chemist, I fully oppose fossil fuel pipelines because of the evidence of continued climate and environmental damage. I completely object to the Mountain Valley Pipeline because it will damage our treasured land, the Jefferson National Forest, which is an important habitat for endangered plants and animals. Scientific data has shown the perpetual damages inflicted by fossil fuels on our lands and waters. Oil spills pollute streams and riparian areas. Furthermore, the pollution is carried by currents and runoff to local campgrounds, towns and visitors centers. The role of the U.S. Forest Service is to protect our National Forests for the benefit of wildlife and visitors. Please do not violate the rules historically adopted by the U.S.F.S. that facilitate this protection. There are no benefits from violating our National Forest with an oil-conduit pipeline other than those reaped by MVP LLC.

<b>Betty</b>	<b>Duson</b>	<i>Houston</i>	<i>TX</i>	77030	Dear Mr. Wilkes, Please forgive the emotional and impassioned tone of this email, but I do cherish our forests! That you would even consider violating the whole reason for nationalizing these forests is abhorrent and appalling. Do you not understand what "protected" means, and do you not take seriously your responsibility as protector? This doesn't mean just protecting when it's easy; it means protecting in the face of challenge and attack and not abdicating when confronted by competing interests. It means standing up, not lying down. In addition, our forests are our greatest protection against the climate crisis. Don't let the short-sighted promoters of fossil fuels falsely frighten or bribe you into jeopardizing the earth's long-term well-being by destroying our greatest allies in our battle for carbon capture and those who would preserve "America the Beautiful". Please do the job you were meant to do, please do the moral and sensible thing and please stand on the right side of history! Thank you.

<b>Susann</b>	<b>Eastridge</b>	<i>warrenton</i>	<i>VA</i>	20186	Once the pipeline is allowed, the land is destroyed forever. It must not be allowed.

<b>Kathleen</b>	<b>Eaton</b>	<i>Middletown</i>	<i>DE</i>	19709	America's national forests are held in the public trust as special lands — they harbor headwaters for drinking water supplies, habitat for rare animals and plants, scenic beauty and recreational spots where we rejuvenate our spirits.  The U.S. Forest Service, the agency charged with protecting and managing national forests, broke 11 of its own conservation rules governing old-growth forests, scenic viewsheds, soil health and more to accommodate one project — the Mountain Valley Pipeline. The courts rejected this free pass to cut through the protected Jefferson National Forest two separate times — in 2018 and in 2022. Now, the agency is again trying to rewrite that same permit for the MVP. Changing the rules for corporate profit is NOT acceptable.

<b>Allison and Ja Falls</b>	<b>Falls</b>	<i>Pembroke</i>	<i>VA</i>	24136	Mvp has nor shown they can keep erosion from their construction at bay. We are having runoff and it has destroyed our rd up to back of our farm plus our pond has went dry . Cave down below us has opened up with the land around it has sunk which shows shelves of land . They have blocked us off of 6 to acres of our own land. The erosion has water standing in these holes they dug. In summer we have mosquitoes . We have horses which we don't need stagnant water. I have to know what does temporary mean? They(mvp) don't know what it means . We bought this land 2016 and theod land owners are the ones mvp paid . All in contract has not even adhered to . Please help us get mvp to fix heat they've done and we would like to get our fence completed and our wells put in for cattle but they continue to make our lives on hold . Thank you Allison and James Falls

<b>Giovanna</b>	<b>Fioravante</b>	<i>Jardim Raposo Tavares</i>		05551-250	
<b>Bradley</b>	<b>Firchow</b>	<i>Lexington-Fayette</i>	<i>KY</i>	40508	A pipeline crossing national forest land can have a negative impact on the environment and wildlife. National forests are protected lands that serve as habitats for numerous plant and animal species, and any construction or excavation activities can disrupt their ecosystems. Additionally, if there is a spill or leak from the pipeline, it can contaminate the soil and water sources, leading to long-term damage to the delicate balance of the forest environment. Furthermore, pipelines can also impede the natural migration patterns of wildlife and cause harm to their populations. It's important to preserve national forests for future generations, and avoiding pipeline crossings is one way to help ensure their conservation.

<b>Kathe</b>	<b>Gowland</b>		<i>GA</i>	30047	<p>Please prevent unnecessary damage to this old growth forest. Protect the water and habitat for species and people. We need to invest in clean, renewable sources of energy and transition completely from fossil fuels for the health and welfare of all species on our planet.</p> <p>Changing the rules to accommodate this unneeded pipeline compromises standards and ethics , while using resources and money that could be used for things we actually need to build our energy infrastructure - transmission lines, EV charging stations, etc. Please look to the future and not to the past - that we have needed to change, for decades. Select alternative 1 - no action - for the dangerous and ruinous MVP.</p>
<b>Lucy</b>	<b>Gowrie</b>	<i>Mount Sinai</i>	<i>NY</i>	11766	<p>Let us not follow the world and be in a hurry to desecrate old growth forests in order to accommodate a fossil fuel pipeline! The last thing this planet needs are pipelines supporting the transportation and consumption of fossil fuels to further damage our climate, old growth forests and indigenous land. Protect flora and fauna...let us not decimate life for a lousy profit! Why cater to an energy means that is specifically killing and changing life on this planet, as we know it. We are at the edge of the 6th greatest mass extinction and I do not want my tax dollars supporting this madness.</p>

<b>Ronald</b>	<b>Gulla</b>	<i>Waukon</i>	<i>IA</i>	52172	I moved out of Pa in 2019, where I was a lifetime resident. Range Resources destroyed my 142 acre farm and polluted my 3 acre pond. My water well turned yellow. I also worked in the O&G Industry for 7 years. I worked for Hughes Tool Co now Baker Hughes. My life and dreams were destroyed and I'm still in litigation since July of 07. My wife has also been diagnosed with acute myeloid leukemia at the age of 52. I contribute this to exposures from Range Resources. Everytime I asked questions concerning their operations they LIED and they didn't know I had a back ground in O&G. This Industry needs to be stop and HELD ACCOUNTABLE.

<b>Elisabeth</b>	<b>Gwinn</b>		<i>AZ</i>	86303	I grew up backpacking in National Forests throughout Appalachia. They are a precious, irreplaceable refuge for forests and wildlife, and for people seeking solitude and wonder at the magnificence of these wild places. It would be a terrible mistake to allow the MVP, not only for the despoilation it would bring to the Jefferson and Washington National Forests, but also for our climate future. The US should be moving away from fossil fuels as fast as possible, so putting in another gas pipeline is not only destructive to National Forests, it is just plain foolish, wasteful and destructive to the climate.

<b>Meredith</b>	<b>Haines</b>	<i>Vienna</i>	<i>VA</i>	22181-3235	

<b>Sue</b>	<b>Haines</b>		<i>OR</i>	97034	The Mountain Valley Pipeline through Jefferson National Forest is dangerous and unneeded. It threatens old-growth forests, protected species and headwater streams for drinking water supplies. The United States Forest Service cannot continue to try and give passes to this polluting project. Stop putting profits and power before the living things on this earth, people included! It matters to me because I'd like to be able to continue living on this planet along with at least some of the plant and wildlife we haven't already driven to extinction.

<b>Carl</b>	<b>Hart</b>	<i>Salem</i>	<i>VA</i>	24153	Please stop this poorly planned project! I have witnessed muddy run off, horrible erosion from my drone videos, pipes left out in the elements and landowners that are heartbroken. If you just use google earth, and follow the route through our mountains, you will see how insane this routing looks. While I was getting gas one morning I asked a person at the Newport Virginia gas station that had Wisconsin plates what brought him to our beautiful area. He said he was a pipeline engineer. I said "how are you going to come down the steep mountain above Rt 42 in Newport, through the wetlands and creek and under the road? After that, you have to continue up the steep mountain and solid rock straight up the other side." He told me, "I told MVP it was a bad idea..." It is a horrible idea!

**Janet Hermann Dougherty** PA 19382 The Forest Service agency is charged with protecting and managing national forests. Your new draft environmental impact statement (EIS) changes your long-standing rules 11 times to allow MVP to tear through the Jefferson National Forest to construct the pipeline. These changes threaten old-growth forests, protected species, and headwater streams for drinking water supplies.

The courts rejected similar permits to cut through the protected Jefferson National Forest two separate times -- in 2018 and in 2022. You cannot continue to try and give passes to this polluting project!

Please, get the priorities of the American People straight. A majority of us do not approve of this. Please don't act as a co-conspirator in the destruction of our planet.

Thank you for your time and consideration.

Sincerely,  
Janet Hermann Dougherty  
Mark Dougherty

<b>Malka</b>	<b>Himelhoch</b>			40502	It is unacceptable to break US Forest Service conservation rules in service of a pipeline. We are in the midst of an environmental crisis and we need to be working towards sustainable energy solutions rather than creating more infrastructure for the fossil fuel industry. These lands are held in the public trust in order to preserve them for the public good, they should NOT be destroyed for private gain.
<b>Erica</b>	<b>Himes</b>	<i>Alexandria</i>	<i>VA</i>	22314	

<b>Judith Tom</b>	<b>Hinch Hinckley</b>	<i>Chesapeake</i>	<i>VA</i>	23323	
			<i>WA</i>	98115	The following quote from the Virginia Mercury nicely captures my feelings about this pipeline. "MVP is a monstrous, 303-mile fracked-gas pipeline planned to run through the Blue Ridge and Appalachian regions of Virginia and West Virginia, all the way to North Carolina. It would boost the bottom line of fossil fuel companies at the expense of regional clean water and endangered species. It would require up to four new compressor stations, facilities that keep the gas pressurized as it travels. The pipeline would also cut through about five miles of the Jefferson National Forest and bisect the iconic Appalachian Trail and Blue Ridge Parkway." My first time driving the Blue Ridge Parkway its entire length was July 1964; the last time was October 2014.

<b>Sam</b>	<b>Inabinet</b>	<i>Virginia Beach</i>	<i>VA</i>	23464	Your actions and inactions regarding this and all related concerns have been, are being and will be remembered by all of us who will live in the world that you are shaping with your decisions right now, in addition to being a matter of public record. We are all on it together. Environmental emergencies are affecting everybody's health and livelihood, and will do so for generations to come. All issues need to be considered as facets of the critical state of the biosphere. Given the consistency with which each current and foreseeable crisis has been weaponized against the vulnerable majority of the population of the United States of America and the world, and the exceptional leniency shown toward — not to mention the overwhelming subsidization of — those industries that create and perpetuate these crises, any failure on your part to directly address and act upon these issues can only be seen as complicity in extinction and a clearly genocidal agenda.

<b>Linden</b>	<b>Jenkins</b>		<i>NH</i>	3832	As a mother, grandmother, retired attorney & pastor I know there is nothing more important than immediately pivoting away from our addiction to fossil fuel consumption. That means No New Fossil Fuel Infrastructure starting immediately. No Exceptions! Follow the science! There is so much evidence that requires that pipeline NOT be built. They ALWAYS leak - even while being built, toxic substances get spilled, aquifers are breached. And after they're built they leak more. Plus the fuel needs to stay in the ground. Period. End of subject. Species are going extinct every minute. Global heating is increasing exponentially. I can't itemize all the developments - but it's your job to know them, be able to recite them & use them to base your decisions NOT to build more fossil fuel infrastructure! We keep saying this. For YOUR children & grandchildren - and mine - get some courage and some integrity and do the right thing! You can do it! I'm praying for you and yours - we are depending on you.

**Reverend Natl Jimenez National Portland**

OR 97214 There is no reason why we should even be using petrol or fossil fuel products we can run cars, trucks, on solid hydrogen as demonstrated by Stan Ovshinsky. We can run trains and fly planes on biodiesel, we can even make plastic-like products from biomass cellulose products so there is no reason why we should be using petrol products at all. By not using biofuels you are hurting American Farmers. So please stop allowing drilling for oil, fracking for gas, which pollutes the atmosphere and destabilizes the earth's crust by drilling and fracking. We need to move toward a sustainable and renewable future. In addition, there are biofuels which would help American Farmers make money that are also available to be used for fuel so there is no reason for us to be using petrol at all. Fundamentally the use of petrol is old world moronic thinking. Are you a wise person or a moron, be a wise person and oppose such horrible environmental damage. We all live on this planet and we only have one planet we have to be as the bible says good stewards of the earth. Do not give into greed or for the lust of power, greed and the lust for power leads to perdition. If we do not invest in a green infrastructure then the United States of America will fall behind in these technologies. All new cars should be biodiesel hybrids this would go far to eliminate pollution. Countries like China will gain market share in these areas of business. If we have sustainable green energy we will always eternally have sustainable green energy. This is a wise decision to switch to clean energy so we will always have energy. With the recent computer hack on the Colonial Company pipeline I think that need for biofuels are even more prevalent please support such legislation and business practices.

<b>Isaiah</b>	<b>Karas</b>		<i>TX</i>	78619	While I am not a resident in a location where this would directly affect my well-being, I carry similar concerns to those who live in the state of Virginia, where it has become quite the issue. My overall trouble is not that things that could cause severe environmental damage but that the upper management for this project hadn't done all the research required to realize they were making mistakes leading towards this potential. Allowing the Mountain Valley Pipeline (MVP) to break 11 of the amendments put in place to protect the Jefferson Fo on account of convenience seems to be the wrong move. I strongly urge the U.S. Forest Service to stand firm and hold to the value of their amendments. It may not be the course of action, but taking the time to review scientific pros and cons with experts in the field of geology and topography could help avoid hazardous situations. Like many others, I am against the continuation of the MVP until there is a way to uphold the standards.

<b>Rachel</b>	<b>Keen</b>	<i>Charlottesville</i>	<i>VA</i>	22901-2200	Dear Dr. Homer Wilkes, Many people have the impression that National Forests are protected from corporate greed. This has proven to be wrong over and over again. I am thinking of the destruction of old growth forests in Oregon and Washington. Now a battle is being fought over the Mountain Valley Pipeline in my state of Virginia. It threatens the Jefferson National Forest. The U.S. Forest Service is giving in to corporate greed to grant permission for this pipeline. They are changing the rules for private corporate profit. This is not acceptable. Please do all you can to stop this damage to our forests.

<b>Bonnie</b>	<b>Kissling</b>		<i>CO</i>	80219	America needs to move away from tearing up our lands with pipelines that have proven to be destructive and harmful to the environment. The building of these lines destroys the lands surrounding them due to the equipment brought in to place them and to keep them running. And the leakage and spills from pipes can cause irreversible damage to the land and waters. I for one do not want to go to a National Forest and see pipelines sprawling across the once pristine forests and wildlands. I visit our forest and parks to get away from the sight of manmade intrusions and devises. Please, reject these proposed amendments and keep our forests national and safe.
<b>Ann</b>	<b>Kistler</b>		<i>NY</i>	12054	We must protect the earth from the corporations that are drilling for, selling, and transporting fossil fuels. Do you have children and/or grandchildren? Do you want them to have a secure future? We are in the middle of the sixth great extinction folks, please WAKE UP and stop this pipeline. You are scaring a lot of people because if you do not, your actions will help Global Warming continue, to the great detriment of the human race.

**Julia Kolb** *FL* 34472 Please do not destroy our wonderful natural features with that awful looking pipeline. It is ugly, can spill (the older it gets the greater the likelihood of disasters). Not to mention the effect on wildlife. Why can we not encourage research to rid ourselves of the need for oil and plastics that are causing so much damage?

**Joseph Kollar** *NY* 10541

**Janet Kolodner** *MA* 2446 The Mountain Valley Pipeline (MVP) has already destroyed woodlands, seized private property, and violated commonsense water protections over 300 times in West Virginia and Virginia. Despite this horrible track record, they are still trying to move forward.

Time after time, pollution and mudslides have run off MVP's worksites and into streams, wetlands, and even homes of people living nearby. MVP has had so many problems with this project over the last 8 years of trying to build it, that FERC should say NO to their plans to finish this boondoggle of a project.

In January of 2022, Mountain Valley Pipeline lost multiple permits from a federal appeals court, putting the whole project in jeopardy.

Federal regulators shouldn't give MVP any new permits until these important issues have been addressed.

<b>Jane</b>	<b>Kwiatkowski</b>		<i>OR</i>	97405	The U.S. Forest Service should be protecting the interests of irreplaceable forests, not easing the way for extractive industries that are trying to pillage them. The forests contribute to climate mitigation, while protecting rare wildlife & native plants, and providing beauty, recreation, & mental refreshment to the people who visit them.
					The forests take hundreds of years to recover fully from damage inflicted by the exploitive efforts of extractive industries. The U.S. Forest Service is uniquely central to the protection of these irreplaceable natural assets.

<b>Patricia</b>	<b>Lamonica</b>		<i>AR</i>	72712	

<b>Laurie</b>	<b>Lamoreaux</b>	<i>Chapel Hill</i>	<i>NC</i>	27516	<p>Mountain Valley Pipeline's owners and supporters continue to push the same old misguided justifications (falsehoods) to push this project forward. But repeating these excuses doesn't change the fact that MVP is over-budget, past deadline, dismissive of frontline communities, and extremely dangerous to our environment.</p> <p>During the Trump administration, the U.S. Forest Service took permitting action to clear the way for the Mountain Valley Pipeline to be built through the Jefferson National Forest. But the U.S. Court of Appeals rejected those approvals in 2022 due to the agency's faulty review of the pipeline's impacts on the surrounding environment and local communities.</p> <p>Why does the Forest Service continue to push for MVP's permit? To me, it seems antithetical to their charge of protecting and managing national forests. North Carolinans do NOT want this unnecessary gas pipeline to be built through one of our public national forests, risking not only the beauty and integrity of the land but also the many ways they support our communities, wildlife, and planet. And it would expose local communities to environmental dangers to their water, air, and soil.</p> <p>This construction within a national forest will set a dangerous precedent for other pipeline projects, and would have a domino effect in making it easier for the rest of MVP's construction to be completed or extended in all three states.</p> <p>I ask the Forest Service to protect the national forest as charged and reject any attempt to construct Mountain Valley Pipeline on public lands.</p>

<b>Sylvia</b>	<b>Lotspeich Greene</b>	<i>Concord</i>	<i>MA</i>	1742	I am strongly urging you to join the movement to fight climate change and protect our beautiful planet and all the creatures on it by refusing to accommodate the Mountain Valley Pipeline by changing permitting regulations. Allowing any further fossil fuel projects, especially in a beautiful place like the Jefferson National Forest, is a step towards climate catastrophe. We must transition as quickly as possible to renewable energy and the good green jobs that will generate. Changing the rules for corporate profit is going in exactly the wrong direction.
					Thank you for your consideration.
<b>Jude</b>	<b>Lotz</b>	<i>Burbank</i>	<i>CA</i>	91505	
<b>Maggie</b>	<b>Louden</b>	<i>Hedgesville</i>	<i>WV</i>	25427-17C	The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.
					I maintain that the proposed changes to standards for soil health, old-growth forest, forest edge, species competition and scenic viewshed standards would bring significant harmful impacts to the Jefferson National Forest. The proposed changes serve as conveniences for the developer of one fossil fuel project, to the detriment of lands held in the public trust.

<b>Jamie</b>	<b>Lurtz</b>	<i>Paradise</i>	<i>NV</i>	89121	
<b>Anne</b>	<b>Lusby-Denham</b>	<i>Roanoke</i>	<i>VA</i>	24015	In addition to all of the above reasons the U. S. Forest Service must not amend its National Forest Plan to allow the Mountain Valley Pipeline to cross the Jefferson National Forest is climate change. Estimates by climate scientists indicate that the MVP if completed would contribute 1% of the U.S's greenhouse gases, approximately 89 million metric tons annually. This in itself is a good reason for MVP to not be allowed to cross the Jefferson National Forests. Climate impacts are not included in assessments but this is an extremely important shortcoming because we are warned time and time again by both the U.N. and climate scientists that we are running short on time and must put an end to fossil fuel use now. The public good, and what is right environmentally for the Jefferson National Forest must be put ahead of corporate interests.

<b>Elizabeth</b>	<b>Mahood</b>		<i>MO</i>	63109	Old growth forests, along with many other biomes (praries notably) are becoming increasingly rare in the US. This makes it really important to protect what little of the natural ecosystems remain. Removing 11 clauses that safeguard ecosystems for the benefit of one pipeline makes little sense to me (not to mention the damage that constructing and maintaining this pipeline would do to the existing forest). How quickly will other ecosystems be damaged? It is well known that we are in the sixth mass extinction, and humans are causing it. We urgently need to do more to safeguard refuges where original ecosystems remain, yet these 11 proposed changes would do the opposite. I don't know about you, but I don't think living on a planet populated only by humans, their pets, and corn would be so great.

<b>Ken</b>	<b>Martin</b>			6470	
<b>Laura</b>	<b>Martin</b>	<i>Seattle</i>	<i>WA</i>	98125	Please don't ruin our national forests. They are already abused enough as it is.
<b>Margaret</b>	<b>Martin</b>		<i>TN</i>	37322	

<b>Marie</b>	<b>Martin</b>		<i>CA</i>	93030	Our national forests and parks are almost all that remains of our natural resources. The ecological biodiversity of these places is vital to the health of our country and planet. Clean air and water, wildlife, and other natural resources must be left to thrive in these places before it's too late and we have none left. The survival of our planet depends on it.
<b>Mary</b>	<b>Martin</b>	<i>Eagan</i>	<i>MN</i>	55123	Preserve the beauty of our National forests!
<b>Melodie</b>	<b>Martin</b>		<i>WA</i>	98102	
<b>Michael</b>	<b>Martin</b>	<i>Dallas</i>	<i>TX</i>	75214	We must prioritize preservation and stop destruction. Proven clean energy solutions make this possible and that is where we can direct our resources.
<b>Monte</b>	<b>Martin</b>	<i>Sumner</i>	<i>WA</i>	98390	Thank you!
<b>Nancy</b>	<b>Martin</b>	<i>Santa Barbara</i>	<i>CA</i>	93105	Please do not allow Mountain Valley Pipeline in the forest. It could destroy the clean, running water in the rivers, the soil and trees that live in them, and the lives of the wild birds and animals that live there. It is not safe! And there is no way to repair the damage once it has occurred.
<b>Roger</b>	<b>Martin</b>	<i>University Place</i>	<i>WA</i>	98466	Right here, along the Puget Sound, we have seen an original and two Supplemental Environmental Impact Statements written primarily by Puget Sound Energy (PSE), and then rubberstamped by Puget Sound Clean Air Agency (PSCAA) the agency that was supposed to be managing PSE for the project for an LNG facility built on top of the Tacoma Tideflats. PSE and PSCAA were informed and provided documentation showing that 1) the shoreline landfill on which the LNG facility sits is prone to collapse over time, just as it was in the Loma Prieta Earthquake in San Francisco's Marina District; 2) the landfill sits directly on top of 1500-2000 feet of alluvial silt rated as Puget Sound's most likely to liquefy in an earthquake; and the Tacoma Tideflats where all this is sits on top of the Tacoma Earthquake Fault--and NONE of this was mentioned in any of the three EIS' submitted to the Trump EPA. This sort of looking the other way has to stop! Laws, such as the Environmental Protection Act, need to be enforced. Stop the almost-automatic granting of waivers.

NY 10901-426

I am writing as a physician and public health/environmental protection advocate who strongly supports full protection for Wilderness Areas throughout our country. At this time, I completely urge the US Forest Service to please not start construction on the Mountain Valley Pipeline, which will cut through the state of Virginia's National Park, without completion of an environmental impact statement.

I urge this action because the completed 303-mile Mountain Valley Pipeline would pollute waterways and communities across Appalachia while transporting gas with the combined climate impact of 19 million passenger vehicles annually. It is very important to understand that the construction of this pipeline has already led to hundreds of water-quality violations and a federal court of appeals has already twice found that the agencies in charge of the process failed to give enough consideration to the environmental damage the pipeline would cause.

The pipeline would cut across key habitat in Jefferson National Forest, including areas adjacent to two designated wilderness areas, through an inventoried roadless area and through habitat for threatened and endangered species.

It is vital for the Forest Service to understand that continued development of the Mountain Valley Pipeline would damage lands and waters in the Jefferson National Forest, causing harmful impacts for communities across Appalachia and wildlife alike. The endangered wildlife found in the Jefferson National Forest includes black bear, raccoon, coyote, skunk, opossum, beaver, two species of squirrel, bobcat, chipmunk, river otter, two species of fox, woodchuck, and white-tailed deer.

At this time, I thank you for your consideration of my letter and my request. To ensure full protection for the local communities and the endangered wildlife that will all experience habitat loss and loss to all family households that are located around or in the Jefferson National Forest, I strongly urge the U.S. Forest Service to please not amend the Jefferson National Forest Land and Resource Management Plan, because this plan would prohibit a pipeline as currently written. Please realize that any amending to the forest plan would conflict with the USFS 2012 Forest Planning Rule. It is crucial that the Bureau of Land Management should deny the right-of-way and temporary use permits that would allow

<b>Kerry</b>	<b>O'Connor</b>	<i>Austin</i>	<i>TX</i>	78701	I grew up in this area. As I travel the country, and learn more about water scarcity that will impact the West, it seems insane to me that someone sees it in the national interest to take an area of water richness and risk it with this pipeline. It's not a matter of "if" pipelines leak, it's "when." Further, we have learned the importance of old growth trees on carbon sequestration and forest health. We have a very very limited window to impact climate change. This pipeline will do its part to accelerate it. We don't need it. Stop this madness. Protect our natural resources NOW.

<b>Nora</b>	<b>Privitera</b>	<i>Oakland</i>	<i>CA</i>	94602	The damage that would be done to the Jefferson National Forest if these rules are bypassed would be permanent, especially the destruction of old growth trees that are rare and precious.
					The Mountain Valley Pipeline is a controversial project that has failed to garner permits for very good reasons. It is an ill-conceived project that is environmentally destructive and subject to leakage.
					There is simply no justification for bypassing important environmental rules to facilitate this project.
					The rules are there for a reason. Bypassing them to enable the Mountain Valley Pipeline is unconscionable.

<b>Theresa</b>	<b>Rollins Flanagan</b>	<i>Corpus Christi</i>	<i>TX</i>	78414	Looks like MVP is hoping for “the third time is the charm” option. Please don’t let this happen.

Make the MVP go around the forest.

We need forests, they r important for every living thing on this planet

We don’t need another pipeline that will rust out with in 50 years or so & pollute & poison the planet or cause explosions !

Think about the consequences of ur actions & ALL the effects of man made pipeline will do to the land & forest in 50 years from now. U might not be here but the planet should be & most damage can not be repaired or reversed.

<b>Thomas</b>	<b>Rowan</b>		<i>NY</i>	10462	I find it hard to believe that a plan to run an above ground pipeline over mountains and through valleys is even being considered by sane individuals. The Jefferson National Forest is a piece of land part of America's heritage. It is well known how dangerous above ground pipelines are wherever they are. They suffer ruptures out in the forest and discharge oil onto the floor of the forest, into valleys and water ways destroying all in its path. I trust the U. S. Forest Service will do the right thing for the forest.
<b>Adeline</b>	<b>Rowe</b>		-	50111	This issue matters to me because I want to live in a world that has tons of fresh air and plants.

<b>Habib</b>	<b>Shubber</b>		<i>OR</i>	10000	The U.S. Forest Service should reject the Mountain Valley Pipeline (MVP) due to its potential risks to the environment and communities along its route [1]. The pipeline would traverse many fragile ecosystems and could have devastating impacts on the forests, streams, and other natural resources it crosses. Furthermore, the pipeline would increase air and noise pollution in nearby communities, as well as increase the risk of water contamination and property damage due to potential pipeline leaks and explosions. For these reasons, the U.S. Forest Service should reject any permits that would allow the Mountain Valley Pipeline to be built.

<b>Katherine</b>	<b>Stabb</b>		<i>IL</i>	60304	As a young person, I am very concerned about the state of the environment and the climate. I am especially worried that the long, damaging, construction process of the Mountain Valley Pipeline could potentially be allowed to continue. The 2022 IPCC report has shown that use of fossil fuels needs to decrease quickly in order to stay below even 2 degrees Celsius of warming, and we need to act on this information. The Mountain Valley Pipeline does not fit with the rapid transition to renewable energy that our planet and future generations desperately need. The fossil fuels that this pipeline would transport would only worsen the climate crisis that my and future generations will bear the weight of. I urge you to reject the amendments and stop the Mountain Valley Pipeline.

<b>Smith</b>	<b>Stacey</b>	<i>Henderson</i>	<i>KY</i>	42420	Please STOP appeasing the Greedy and Wealthy Capitalists. Please STOP allowing our Lands and our Wildlife be destroyed for the Few.
<b>Delores</b>	<b>Stachura</b>	<i>Herrin</i>	<i>IL</i>	62948	
<b>Ken</b>	<b>Stack</b>	<i>Los Angeles</i>	<i>CA</i>	90026-221	Destroying a US Forest to enable a corporation to maximize their profits is NOT a part of your job description. Do your duty sir !
<b>V</b>	<b>Stack</b>	<i>salinas</i>	<i>CA</i>	93906-8378	
<b>Madeline</b>	<b>Stacy</b>	<i>Oakland</i>	<i>CA</i>	94612	America's national forests are held in the public trust as special lands — they harbor headwaters for drinking water supplies, habitat for rare animals and plants, scenic beauty and recreational spots where we rejuvenate our spirits. They should not be destroyed by the fossil fuel industry for private gain.

Changing the rules for private corporate profit is not acceptable!

Do NOT rewrite the permit!

37738 I implore you to redeem the moral record of the Forest Service toward our Appalachian Mountains and our climate by rejecting the request to amend the forest plans of the George Washington and Jefferson National Forests to accommodate the ‘Mountain Valley Pipeline,’ a project that patently and brazenly contradicts the purpose of the National Forests, and the objectives of the existing GW&J Forest Plans in particular. The MVP has already inflicted atrocious damage across a wide swatch of forests, streams, and farmland. If construction is completed, MVP will help to lock America into a generation of methane consumption, and raw methane leaks into our atmosphere, that our rapidly deteriorating climate cannot survive.

Fragile and irreplaceable ecosystems, including some of the finest remaining forests in America, lie squarely in the crosshairs of the pipeline. It defies belief that the staff of either MVP or the Forest Service has become so numbed to this cosmic expression of life and beauty, that they would condone its destruction for a giant metal conduit. This pipeline, is allowed to continue construction, will be remembered with hatred and contempt by our children, as will the FERC staff who permitted such a heinously immoral arson of Earth's biological gems.

The pipeline will stand as tangible testament to the modern repetition of our sad errors of exploitation, to the historical lessons that the Forest Service has failed to learn, and to this administration’s fanatical obsession with pipelines which respects nothing else as valuable or sacred.

The pipeline’s breach of the George Washington and Jefferson National Forests is an egregious violation of the public trust placed in our government to protect and steward a national treasure , acquired at great effort and expense by a prior generation. The visionaries who assembled and consecrated the GW&J National Forests for future generations did so with the insight that a future cohort of industrialists might covet the land for a myopic project like a pipeline, and hoped that the National Forest status might preclude exactly such a project as this. The project applicant has not shown that the use of National Forest lands is an absolute necessity for the pipeline to exist, rather than a cost-saving convenience. The Forest

<b>James and Ter Walker</b>	<i>Lindsay</i>	<i>WV</i>	24952	Dear Dr. Wiles, regarding MVP and their ongoing quest to ruin West Virginia for an unnecessary pipeline I submit the following: Is nothing sacred anymore? How many rules, and regulations must be ignored, changed, or twisted before enough is enough? MVP has ruined 100 year old timberland. Defiled pristine waterways REPEATEDLY, been fined millions and still wants to plow ahead with an unnecessary pipeline which will NOT benefit WV. Most if not all the gas will be sold to China. Climate change, going green, electric cars, eliminating fossil fuels is the way ahead for America, NOT AN UNNECESSARY PIPE LINE WHICH WILL DESTROY AND/OR CHANGE A NATIONAL FOREST FOREVER JUST FOR CORPORATE GREED. This pipeline will destroy MUCH for the benefit of some stockholders who I am sure have never set foot in a national forest. Please DENY any new permits. Respectfully submitted, James Walker Proud West Virginian

<b>Sandra Walker</b>		<i>VA</i>	24153	Once the damage has been done it cannot be fixed. We watched a tree in front of a neighbor's house die because of a leak in a gas line on the street, and this was in a city. Imagine what a simple leak can do to a forest. The Fossil Fuel companies have a record to agreeing to safety measures then ignoring them and responding with "Sue me" or "Fine me" when the problems develop. They can afford lawsuits and fines because their profits are so high. We cannot let this happen any longer.
<b>Sandra Walker</b>	<i>Capon Springs</i>	<i>WV</i>	26851	

<b>Stuart</b>	<b>Walker</b>	<i>Pageland</i>	<i>SC</i>	29728	Since fossil fuels are poisonous to all life we need to shut that mistake down asap, nothing more needs to be discussed. Please help us fix this humongous mistake.

<b>Diane</b>	<b>Wallace</b>	<i>Kernersville</i>	<i>NC</i>	27284	FROM DIANE WALLACE, FORSYTH County, North Carolina Resident- Let's protect all species, public lands and retain habitat for trees, plants and animals. It will eventually be too hot to sweat. And once the permafrost thaws past a certain point then the temperature of the Ocean will rise such that the methane hydrate frozen at the bottom of the continental shelves and Ocean will be released then there will be an oxygen poor atmosphere starting above sea level.

<b>Barbara</b>	<b>Wilcox</b>	<i>Berkeley Heights</i>	<i>NJ</i>	7922	Please don't let the Mountain Valley Pipeline go through the Jefferson National Forest in Appalachia. Digging to lay the pipeline will disturb and disrupt the life in the forest -- trees, bushes, birds and all the other wildlife there. And once it's laid, there is always the risk of it breaking and/or leaking. They always say that's not going to happen, but it does happen -- much too often! Leave the forest alone like it should be left. Humans have already taken over too much land. We should let the few untouched places stay that way!

<b>Alice</b>	<b>Williams</b>		SC	29440-6077	
<b>Amelia</b>	<b>Williams</b>	<i>Afton</i>	VA	22920	I live just 2 counties over from the proposed MVP path and have hiked and camped in areas along the proposed MVP route. I know first hand how the forest health would be damaged by the build, and have seen first-hand the devastation of the already-built sections. The Forest Service should not change its protective rules to accommodate a company that is one of the most egregious violators of environmental regulations. There's no public benefit to the MVP, neither in Virginia nor in other states, and environmental rules should not be changed to favor private gain. The George Washington and Jefferson National Forests are where my family goes for recreation, rejuvenation and environmental learning. I'm a medical writer by day but my avocations are writing poetry and making eco-art installations and I draw inspiration for my writing and art from the nearby forests where I camp and hike. I urge you to continue to protect these forests from the devastation of the MVP.
<b>Annski E</b>	<b>Williams</b>	<i>Eugene</i>	OR	97405	As someone whose father was born, grew up, retired and died in West Virginia, and spent many months there over the years, I deeply understand the importance of protecting the water quality and forest environments of Appalachia. I urge you to protect public land for future generations.

CA

91362 Old-growth and mature trees form the backbone of their ecosystems, absorbing carbon dioxide, maintaining genetic diversity, and providing habitat for a diverse array of life.

The Climate Crisis is at heart a Biodiversity Crisis, caused by our disregard for and destruction of Nature, which has also precipitated a Health Crisis (in the form of a global pandemic) which is sure to metastasize if leadership doesn't quickly change course.

Providing lasting protections for mature and old-growth forests and natural ecosystems is absolutely essential to our nation's strategy to avert catastrophic Climate Breakdown and precipitous biodiversity loss.

As a deeply concerned biologist, avid outdoorsperson, and parent of two young adults - one of whom struggles to breathe due to petroleum-pollution-triggered asthma, I urge you to take immediate action to protect older forests and old-growth trees in the United States -- specifically in the Jefferson National Forests -- and to ensure federal agencies work to recover these carbon-rich landscapes for their climate, biodiversity, watershed, recreational/mental health, and economic benefits to our nation's people.

Like 295,000 residents of Ventura County, I am a Woolsey Wildfire evacuee, because the average temperature has already increased 2.6 degrees Celsius (4.7 degrees Fahrenheit) where I live, making mine the FASTEST HEATING COUNTY IN THE CONTINENTAL UNITED STATES. The hotter it gets, the drier it gets; the drier it gets, the more flammable it gets ... as we are witnessing literally worldwide. A comprehensive May 2020 report authored by the International Energy Agency, a traditionally conservative, fossil fuel-focused, global energy policy body, warned that the world MUST STOP new fossil fuel investment LAST YEAR to limit global temperature rise to the critical, not-to-be-exceeded 1.5C limit. IEA further explained that doing so would result in tremendous benefits by creating 30 million new jobs, preventing 2.5 million deaths every year,

<b>Alaima</b>	<b>Wood</b>	<i>Johnson City</i>	<i>TN</i>	37604	As an Appalachian who has conducted NEPA environmental reviews for years, I am vehemently against the Mountain Valley Pipeline. This pipeline has both environmental and climate concerns that can't be ignored. We should be transitioning to renewable energy and not putting our public lands at risk of spill or landslide. Please select select Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.
<b>Catherine</b>	<b>Wood</b>	<i>Richmond</i>	<i>VA</i>	23230	

<b>Debbi</b>	<b>Wood</b>	<i>Port Hueneme</i>	<i>CA</i>	93041	
<b>Dennis</b>	<b>Wood</b>	<i>Port Townsend</i>	<i>WA</i>	98368	The Jefferson National Forest doesn't need 11 amendments to protect that forest. What the forest needs is less commercial interference relating to monetary interest and corporate profit rip offs. I live in Washington State and before that I lived in Oregon State and before that I was born in California and lived there for 26 years before my migration north. The creeks, streams and rivers have been fouled to the point that fish populations are not surviving. The climate has been altered to the point that fires now run rampant and reduce the landscape to a moon scape. When is Forest Management going to serve the environment and stop destroying the entire west coast eco system.

<b>Marjorie</b>	<b>Woodruff</b>	<i>Chicago</i>	<i>IL</i>	60622	Dear Dr. Wilkes:

I agree with the petition. "No Action" and reject the proposed 11 changes.

I say, NO, to lessening and changing the rules to allow for expansion. this will only bring harm. This has already been voted down twice -- changing the rules to allow this to pass is shameful and harmful. Rule changes are for the interest of some financial gain rather than for what the people in community want and have fought for.

Sincerely,  
Marjorie Woodruff

<b>Naomi</b>	<b>Zurcher</b>			11201	The MVP - source of environmental damage and destruction - must not be allowed access to our National Forests or any public lands.

As a forestry professional, I fully understand the impacts and demand that the USDA FS get out of the pocket of the MVP and be accountable to its larger responsibility - protection and preservation of our Public Lands.

NO MORE PERMITS FOR THE MVP

<b>Jody</b>	<b>Zwick</b>	<i>Pomeroy</i>	<i>PA</i>	19367	Why another pipeline. Pipelines are known for leaking hazardous material. We need to eliminate anything that is fossil fuel based, and go for all natural sources.
-------------	--------------	----------------	-----------	-------	--

<b>Marie Louise Zwicker</b>	<i>Sullivan</i>	<i>ME</i>	04664-023	the rules to protect the national forests must be kept and not broken for special interests like the Mountain Valley Pipeline. changing the rules to enable more corporate profit is not and never should be acceptable.
