Juneau, AK 99801

Re: Mendenhall Glacier Visitor Facility Improvements Project

Norwegian Cruise Line Holdings Ltd. (NCLH) would like to thank the U.S. Forest Service for the opportunity to comment on the Supplemental Draft Environmental Impact Statement (SDEIS) for the proposed Mendenhall Glacier Visitor Facility Improvements Project.

Guests of NCLH have enjoyed visiting Mendenhall Glacier for many years, and it remains one of the most sought-after experiences for passengers while calling in Juneau. To this extent NCLH supports the alternatives proposed for modifications to the visitor facilities that are outlined in the SDEIS. The alternatives for improvements will enhance the experience for visitors while carefully considering the surrounding area to ensure it accommodates continued recreational opportunities for both residents and tourists.

NCLH looks forward to working with the U.S. Forest Service in providing commentary as the project advances.

Sincerely,

Daniel Farkas  
EVP & General Counsel  
Norwegian Cruise Line Holdings Ltd.
