Stibnite Gold Project

Dear Linda,

I support Perpetua Resources to mine in the Stibnite Area for various minerals, including gold, and Antimony. The USA needs these minerals to maintain self sufficiency from other countries. Perpetua Resources has set aside million of dollars for improvements after excavations.

We have been to Stibnite on tours the last 3 years and feel they are working hard to take care of the land.

My father delivered equipment and materials into Stibnite from Cascade, friends I know were born there.

It is time to permit the Stibnite Gold Project .

Sincerely,
Phyllis Bulgin
