

# save idaho salmon!

Dear Linda Jackson and Payette NF,  
I would like to voice my concerns about the negative environmental impacts of the proposed Subnive Mine.

The proposed project would expand the already damaged area by 1,000 additional acres and pollute the watershed with heavy metals, acidic compounds, and sediments. All of which would harm

ESA listed species of chinook salmon, steelhead, and bull trout. The mine does not need to be expanded, it needs to be restored. The people that use and recreate in these areas would be negatively impacted and no longer have access to the 14,221 acre project site. This does not coincide with the FS value of
