Linda Jackson, Payette Forest Supervisor

USFS, Payette National Forest

500 North Mission Street

McCall, Idaho 83638

Dear Mrs. Jackson

I currently live in Nevada now but I was a resident of Idaho for 34 years and have been recently been made aware of the Stibnite Gold proposed project that would commit Perpetua to reprocess legacy tailings that are currently contaminating Meadow creek with mercury, arsenic and antimony. My husband and I hope to move back to that area of Idaho soon, therefore, I wholly support the project that will result in an healthier environment for beautiful Idaho.

Sincerely,

A handwritten signature in cursive script that reads "Sandy Trainer".

Sandy Trainer
