Hello,

I am writing to express my concerns over the proposed Newark Project. I am not gifted with words, but please, please do some serious research on this proposal. The first item that concerns me is the projected astronomical use of water PER DAY, ALL DAY for 5 YEARS!! 5 YEARS! My husband and I will be moving out to that area to our retirement home in the next few months. Is this what we bargained for in our plans? NO ! What is going to happen to our aquafir?? Talk about a horrendous waste of a major important resource! I hope and pray that the Forest Service does their job and remembers why they are in existence. To protect our beautiful natural resources. They will be cutting down trees, building a road and building at least 39 drill pads! NO! And you know that this will just be the start of it. Once they get their foot in the door, the drilling and exploration could just explode. This is NOT what I want around my retirement home. Not to mention how it will affect French Creek and all of the wildlife that live around us.

Please, please remember the beauty and peacefulness of this area and the need to protect our water supply from non-sensical waste.

I appreciate your attention in this area and ask for your research and consideration.

I am looking forward to retiring out in that area and hope and pray that this proposal does not go through. Thank you!

Respectfully,
Annette Peterson
