Hello,

My name is Bob Henman, I reside at [REDACTED].

My wife and I are concerned that the proposed exploratory drilling project along Wabash Springs Road could adversely affect our water well. We have a 360 ft deep well with great tasting water. We would hate to see our aquifer contaminated or possibly drained by these test wells.

I believe that some kind of an environmental study be done to determine how the project will affect the aquifer our well is in.

Unfortunately we cannot attend the meeting this Thursday due to a prior commitment for our granddaughter.

Thank you,

Bob and Karen Henman
