Alice	Adams	MA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Bumgarner	AZ	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Ricketts	KY	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	stanton	NY	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Louchard	CA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Bourlotos	NJ	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
Elaine	Tucker	ME	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Lebednik	MA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>I implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, I again ask that the U.S. Forest Service select Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Stoll	NY	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Gilcrist	NC	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, as are all of us, and the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity. Our own well being as Americans is connected to the health of our environment.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Hoffman	PA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Becker	VA	<p>comment: Dear Dr. Wilkes:</p> <p>The rules and regulations for managing Jefferson National Forest were put in place years ago, based on the best available information and judgment available at the time.</p> <p>The economic development interests of private investors have not changed ANY of the information and judgment that were used to put those rules and regulations in place.</p> <p>There is no compelling NEED for the natural gas this pipeline would deliver, and allowing this pipeline to be built would result in an additional 20-30-40 or maybe MORE years of burning a fossil fuel. Ironically, the best science currently available is telling us that, if we want to survive as a species ♦♦♦ if we want our children and grandchildren to have a life sustaining environment , we must be moving AWAY from fossil fuels as quickly as possible.</p> <p>Changing the rules to accommodate the selfish financial ambitions of a small number of powerful individuals would be nothing less than a gross sell-out of the public interests.</p> <p>Do the right thing: DENY MVP♦♦♦s request for rule amendments!</p> <p>Thank you for being brave enough to stand up for the forests, and for the future of our planet!</p> <p>Mark G Becker 143 Caldwell Lane Newport, VA 24128</p>

Lange	PA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. I say: "How dare they!!" This is clearly greed above all else. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest. These natural areas are fundamental to the health of ecosystems and groundwater which are essential but vulnerable. Negative environmental impacts from projects such as this cannot continue to be diminished! Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>I implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Wix	FL	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Entered as a Forms Plus 2/17/2023, Broughman, VA	VA	<p>comment: Dear Dr. Wilkes:</p> <p>Please, please, do not let that pipeline be finished! My homeplace of Bent Mountain, Virginia has already been scarred & habitat for many animals has already been taken. I have friends who were forced to sell their land to accommodate this horrible project, by Eminent Domaine, which was quasi legal as none of that community will benefit from that construction-a conduit for gas obtained by fracking-so, yet another brutally invasive process inflicted upon another ecosystem. Everything about this MVP deal stinks; it's a corrupt, rotten deal shoved down our throats by greedy executives & politicians. All of whom, I'm sure, would never agree to let it be built in their backyard. I'm sorry for the angry tone, but you see I AM angry, this whole thing truly makes me sick; when I really think about it, it makes me weep with grief. So I cannot be as articulate & knowledgeable as the letter which follows, written by a scientist, I'm sure. I agree with it totally, but wanted to be sure to include my own thoughts since this isn't a project far away, off in the woods somewhere to me- it's an abomination happening all over the home I loved as a youngster & still love, where many friends & a few family members still live. Please know, none of us in that community want that cursed project to continue. Please, listen to us & stop it! It's already scarred Bent Mountain, but you can make sure it goes no further & doesn't scar Jefferson National Forest as well. Please, I beg you to listen! ?</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Reese	NC	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Koch	OR	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Grisham	IL	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Ashley	OH	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
Treasor	NJ	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Dolan	<p>FL</p> <p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Stambaugh	CO	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives. Thanks</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Hansen	WV	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. 	Palmer	WA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Thomson	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Hamilton	IN	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	LaRose	IA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
May	CA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Hawley	CA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Walden	NJ	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

	Robeson	WA	<p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>

Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven. There are existing supply alternatives and market shifts towards non-fossil fuel alternatives.</p> <p>For the reasons stated above, we again ask that the U.S. Forest Service selected Alternative (1) No for "No Action," and reject the 11 proposed amendments to prevent unnecessary damage to Jefferson National Forest.</p> <p>Thank you.</p>
	Green	<p>IL</p> <p>comment: Dear Dr. Wilkes:</p> <p>The Mountain Valley Pipeline and Equitrans Expansion Project Draft Supplemental Environmental Impact Statement #50036 proposes amendments to 11 crucial standards that are essential for protecting the Jefferson National Forest. The company's newly submitted documents do not provide sufficient assessment, monitoring, modeling, nor real-world analyses to support changes to the Forest Plan.</p> <p>The Forest Service cannot be permitted to break 11 of its own rules as a convenience to the Mountain Valley Pipeline, LLC, of which has been unable to meet basic minimum criteria to continue their project due to the environmental risks associated. These 11 proposed changes would be detrimental to the soil health, old-growth forest, species and preservation of the Jefferson National Forest.</p> <p>Forest ecosystems are vulnerable, the negative environmental impacts cannot continue to be diminished. Old-growth forests play an imperative role in creating topsoil, and its loss alone cannot be mitigated and would impair biodiversity.</p> <p>We implore the U.S. Forest Service to select Alternative (1) "No Action" and reject the proposed 11 changes.</p> <p>Rewriting the rules for one fossil fuel project will set a disturbing precedent for what will be tolerated on national forests across the country. Since the production of this pipeline began, the applicant has demonstrated their inability to maintain proper and adequate environmental practices during construction. As a result, significant delays have arisen due to multiple federal authorizations vacated and the accrual of over 500 violations of permit conditions and environmental standards in Virginia and West Virginia.</p> <p>Furthermore, the applicant has alleged the desire and need for the Mountain Valley Pipeline, of which is speculative and unproven.
