Hi Wendy,

Just got some news about the Newark Project and the impact that it would have on our land, water and tourism. I would like to have the forest service to do an impact study on how we, as a community, would be affected by any type of drilling and the such for minerals. I am passing along my opinion that this would be devastating to Custer City and Custer County. I hope that the powers that be will, at least, do a environmental impact study to see what would happen if this occurs and how it could explode into something bigger. Once they are "given an inch" a mile or more will be taken.

Please pass this on to those who make these decisions.

Thanks,

Susan Estes-Swindal
