As a member of the Ruffed Grouse & American Woodcock Society, and I avid visitor of the cherokee national forest I'm advocating for the increase to the maximum 8% early successional habitat the forest plan calls for. Without extensive and imminent action these native birds are going to be on the brink of disappearing from this landscape due to lack of habitat. Don't Rob the National forest of much needed habitat, and most importantly don't rob the wildlife that needs it.
