

I received a voicemail from Norma Morrison on 2/15/23 at approx.. 0930 hrs. Her voicemail was leaving a public comment in regard to the Pond Mountain Project. I have her voicemail saved on my office phone. Her voicemail states:

“Hello Chad this is Norma Morrison thank you for being persistent I’ve been really busy since I left a message with you. I’ve lived in Carter County for almost 50 years and we are almost surrounded completely by the Cherokee National Forest. We live on Ripshin Mountain halfway up. I do not think we should have any commercial logging along the lower Rough Ridge, and as Unit 4 should be excluded from commercial logging and I do not think we should have any herbicides at all in the woods and the forest. I have started a Creation Care Committee at our church in Elizabethton and these things are very important to me so thank you for hearing my voice. Take care my number is Area Code [REDACTED] Again Norma Morrison. Thank you. Good bye and have a great day.”
