

public comment on federal register

i definitely am opposed to the forest service/blm coming in and massacreing this land. leave it alone. leave it to nature. it does not have to be mauled and manhandled. the rain is coming all over this contry at the present time. drought is gone. this massacre by federal govt destroys our nature. you must leave this land alone. your maassacre of this forest is malevolent. i want to be kept advised of this project all fher time. and make sure you listen to all the people, not just the ones who agree with you as you alwkays do. jean publiee [REDACTED]
