2024-01-31 19:02:43 EST	Abby	Smith	33710-7843	Eckerd College	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. No old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

2024-01-31 20:28:43 EST	Amina	Masum	7306	Rutgers Newark	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. No old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

2024-01-31 23:20:42 EST	Sofia	Perez	92591	University of California Santa Barbara	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. No old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

2024-09-11 19:43:22 EST	Ava	Vasicek	62918-1056	Mizzou	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. No old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

2024-09-18 09:48:09 EST	Greta	Muellner	1003	University of Massachusetts Amherst	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. No old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
2024-09-19 11:04:32 EST	Carmen V	Oldale Lara	97205	Crow	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. No old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
