2024-09-12 20:36:41 EST	Ashleen	Rakkar	95835	UC Davis	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
2024-09-12 22:24:16 EST	Ben	Kim	90024		<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
2024-09-18 13:55:53 EST	Kelci	Skinner	94608	Berkeley	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
2024-09-18 19:06:34 EST	Zheng	Tao	92092	UC San Diego	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

2024-09-19 18:36:31 EST	Rachael	Lin	92092	UCSD	<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>

We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
2024-09-20 00:05:32 EST	Sriya	Chakravarty	92603		<p>As you consider new policies to protect forests, they must protect our oldest trees from logging.</p> <p>Old-growth trees are the backbone of the ecosystem. They help filter the water in the creeks and streambeds. They absorb pollution from the air. They create shelter for wildlife. And they provide shade and a beautiful sight for us. Logging old-growth trees should be incredibly rare and no old-growth trees should be sent to timber mills.</p> <p>Please enact durable protections for mature trees and forests as well as for old-growth. We have very little old-growth left and the only chance we have to restore what was lost is to protect our mature forests so that they can grow.</p>
