

Public Comment: Save Oregon's Oldest Forests!

Re: Land Management Plan Direction for Old-Growth Forest Conditions Across the National Forest System (65356)

Thank you for accepting public comments about old-growth in national forests. The Willamette and Umpqua National Forest is part of what makes Oregon a great place to live and visit. As you develop your final policies:

- Please end logging and commercial exchange of old-growth trees. No old growth trees should be sent to timber mills.
- So that our children can have old-growth forests, please enact durable protections for mature trees and forests.
