

Bridger-Teton N.F.

Comments - E-Bikes.

Don't build any new trails for "E-Bikes"
trying to keep up with technology -
can't be done - what ever decision are
made now - will be far outdated by
the advancement of technology.

Any new trails not only for E-Bikes
will only affect wildlife - which is slowly
being pushed into a corner - not only in BTNE
but everywhere else.

BECAUSE an area has BEEN logged and
on burn - DOES NOT make it a good place for
any new trails. In only a few short years
all types of wildlife will be using these
food rich locations.

Class One - two - three - etc what's the
difference - They are motor driven bikes.
Where is the funding going to come from to
enforce any new trails or regulations?

For the most part, I find not the aging
public using E-Bikes - but riders going from
point A to B as fast as possible - along

with many "Outlaw trails" showing up.

No NEW trails or Regulations - LET the
crybaby public deal with it.
