

RE: Region 5 and Region 6; DEIS Comments; California, Oregon, and Washington; Forest Plan Amendment for Planning and Management of Northwest Forests Within the Range of the Northern Spotted Owl Project 64745, Docket # FS_FRDOC_0001-3908

To Whom It May Concern,

Please find the names of 8,142 people from across the country who signed onto the following comment regarding the Forest Plan Amendment for Planning and Management of Northwest Forests Within the Range of the Northern Spotted Owl Project 64745, and their additional comments:

As you know, the Northwest Forest Plan centered ecosystem health as a primary goal. It remains unique in its vision, and uniquely successful as a model for forest management. In the decades since unchecked logging across national forests in the northwest, the Plan has largely preserved remaining old-growth forests. It thereby has preserved: critical habitat for endangered old-growth dependent species such as the spotted owl and marbled murrelet; cold and clean streams for species including salmon and bull trout, as well as for downstream communities' drinking water supplies; and an irreplaceable store of carbon.

The central pillars of the NW Forest Plan were put in place to ensure this ecosystem can be sustained. Those pillars include land use allocations such as the Late Successional Reserves which have helped ensure distribution and abundance of old-growth forests in perpetuity, and measures like the Aquatic Conservation Strategy to protect river corridors from degradation. Any amendment that undermines the foundation of the NW Forest Plan should not be considered -- full stop.

There are valid reasons to update the Northwest Forest Plan. We must include indigenous communities in the creation and implementation of a plan. We do need to ensure appropriate management in an era of wildfire, and that must be directed by the restoration of ecosystem health, not by timber profits. It is beyond time we recognize the enormous climatic benefits we get from oldest forests. And, we can fix what is broken without undermining what works.

The highest values of our oldest forests can only come from keeping them standing. The NW Forest Plan recognized this in 1994. We cannot go back now.

Please find the signatures and personal comments from 8,142 Sierra Club members and constituents below.

| First Name | Last Name | City | State | Personal Message |
|------------|-----------|--------------|-------|--|
| Brenda | Johnson | Juneau | AK | |
| Maya | Rainey | Fairbanks | AK | |
| Ann | Yates | Anchorage | AK | |
| Mandy | Redder | Soldotna | AK | |
| Kenneth | Hyché | Cullman | AL | |
| Corinne | Ramsey | Helena | AL | |
| Bruce | Fowler | Arab | AL | |
| Linda | Newkirk | Huntsville | AL | Please protect old growth forests for future generations to enjoy. |

|-----------|-----------------|---------------|----|---|
| | | | | Having been a hiker and backpacker for 54 years, forests are incredibly important to me. I do volunteer trail-building and -maintenance work with the Forest Service on my local National Forest. I recently read "Finding the Mother Tree" by Suzanne Simard, so now am even more aware of the huge importance of trees and mycorrhizal fungi that timber companies have traditionally viewed as "trash." We must protect our mature and old-growth forests! |
| Janet | Grossman | Prescott | AZ | |
| Madeleine | Ascott | Carefree | AZ | |
| Christine | Weathersbee | Phoenix | AZ | Planet before profits |
| | | | | You must continue to strengthen protections for mature and old growth forests because the tyrant and chief is determined to turn everything into a commodity. Appeasement of tyrants has never been an effective strategy. Only holding every inch as if it is the last one is an effective strategy; keep the environmental terror to a minimum and pray we get through the 4 years with our forests intact. |

| Rachelle | Cox | Costa Mesa | CA | |
| Millie | Busse | San Diego | CA | |
| Susan | Hollander | Pasadena | CA | |
| Rita | Carlson | Eureka | CA | |
| Ernie | Walters | Union City | CA | |
| Alan | Gonzalez | Long Beach | CA | |
| Linda | Barbosa | Morgan Hill | CA | Previous logging practices were harmful to ecosystems. Forest lands need more protection not more logging |
| Sherrill | Futrell | Davis | CA | WHY DO WE CITIZENS HAVE TO KEEP FIGHTING YOU TO DO THE RIGHT THING? |
| Marianne | Kai | Sherman Oaks | CA | |
| Linda | Schinkel | SANGER | CA | It is my hope that young people and future generations have the chance to enjoy and marvel at old growth forest as my generation has. These true wonders of creation can not be replaced. Please help prevent the loss of old-growth forests. Respectfully, Linda Schinkel Ph.D. |

| | | | | |
|-----------|----------|------------------|----|---|
| | | | | Protecting mature and old-growth forests is important because these forests provide necessary habitat for a suite of unique species, many of which are largely limited to these forests and some that cannot exist in second-growth forests. I work with birds, and therefore know that Spotted Owls and Marbled Murrelets, essentially require mature forests for their survival and will therefore disappear without them. |
| Curtis | Marantz | Riverside | CA | |
| Chris | Loo | Morgan Hill | CA | |
| Greg | Thomson | Sausalito | CA | |
| Laura | Strom | Los Angeles | CA | |
| Scott | Greene | Yorba Linda | CA | |
| Joan | Hebert | Menlo Park | CA | |
| Charlotte | Samuels | Fresno | CA | |
| Kathy | Robinson | Pleasant Hill | CA | Old-growth forests cannot be replaced. They support the well-being of many species. Humans benefit. Please don't ignore the benefits that the forests provide to all of us. |
| Dyan | Osborne | Brentwood | CA | |
| G William | Buchholz | Berkeley | CA | Thank you for the opportunity to provide feedback on the Northwest Forest Plan goal of preserving and protecting ecosystem health of old growth and mature forests. There are numerous benefits provided by these forests that I care deeply about. Old growth and mature forests are not only fast carbon stores, far greater than younger second growth forest, but they also absorb and store more water which adds to trees ability to resist insect infestations and climate stressors. They also provide more clouds through tree evapotranspiration which increases the local albedo reflecting heat back into the atmosphere, and creating rainfall for communities and agricultural lands downwind. These benefits are compromised when trees are cut and forest canopy is disrupted, creating barren soil that may never recover. We need intact old-growth forests for our survival. |

| | | | | Bull feathers Randy Moore!! Don't act like you're suddenly interested in old growth conservation! You're reputed as a logger, Period. USFS is primarily a timber company - written into its charter a century ago. You and other USFS loggers conducted public meetings all last year and got 80% public opposition to USFS's endless large diameter and biomass harvest for timber barons, Drax, timber brokerage commodities & sectors. I've mailed in, phoned in, and emailed in opposition to Fix Our Forests Act to congressionals. They're deaf to anything other than bribery payments from lobbyists. The iron grip that USFS, CalFire, Sierra Pacific Industries, Weyerhaeuser, Potlatch, and international timber aristocracies have on stored carbon for atmospheric preservation is not breakable. And you will always act like it's all a brand new issue, a new problem. biden and newsom acted somewhat pro enviro all term, then did the last-minute turncoat devotion to timber and biomass sales. |

| Sherry | Vater | Los Angeles | CA | Protecting old-growth forests is essential for the future of our planet and as a part of US national heritage. |
| Alessia | Cowee | Chico | CA | |
| Joanna | Tang | Goleta | CA | |
| Michael | Koterba | Redding | CA | Having worked for the USFS as a field technician at the Hubbard Brook Experimental Forest I travelled ~ 40 trail miles/week collecting stream gage and water-quality, precipitation gage and water-quality, and snow-course data from a suite of various aged and managed forests in the White Mountains. Among sites I visited the Snyder Brooks Scenic Area stood out for its mixed hardwood-conifer old-growth forest. Virtually one of the few places left where one could actually see what a mature forest of that type actually looked like. More importantly it was a control area that aided understanding how other forest areas were affected by human activities. Having travelled into this area for data collection it amazed me to be able to actually experience what a truly old growth forest was really like. For scientific and aesthetic reasons it is crucial that these forests be protected and managed to preserve their old growth character. |
| Joy | Zadaca | Long Beach | CA | |
| Ronald & Sandra | Harder | Los Gatos | CA | Remaining forests need our protection before it's to late! |

|------------|------------------|--------------------|----|--|
| | | | | Enacted in 1994, the Plan was the first - and remains the only - plan to guide federal forest land management in a way that was grounded in science, and at the scale of the full forest ecosystem. It has been overwhelmingly effective. And, there are reasons that it should be amended to be made even more effective. Those include incorporating perspectives of Tribes and indigenous communities who were functionally left out of the original planning process; addressing climate change and fully recognizing the carbon storage and sequestration values of old-growth forests; and ensuring land managers follow best available science to appropriately manage forests in an era of wildfire. |

| Tobias | Fritz | Prairie Village | KS | |
| Kurt | Kiebler | Overland Park | KS | |
| Isadora | Avett | Wichita | KS | Show some respect for the gifts the Creator gave to all of us. |

| | | | | |
|----------------|---------------|---------------|----|---|
| Paula | Long | Junction City | KS | |
| Sheryl | Stephens | Derby | KS | |
| Lindsey | Hightower | Wichita | KS | You cannot replace this, please, protect the old growth forest. |
| Rebecca | Bounds | Mission | KS | Natural old growth is the most important forest you can have. It's mature enough to offer the largest ecosystem. Support the largest variety of plant and animal life. I want my great great grandchildren to be able to see healthy natural old- growth forests. |
| Gloria | Raney | Manhattan | KS | Please continue to protect the old-growth forests in the northwestern United States. We need to save old-growth forests so our children will be able to see what happens when forests are allowed to exist and are not logged so a few people can profit. |
| Kent | Taylor | Olathe | KS | |
| Helen | Holifield | Louisville | KY | Old growth forests are a national treasure that should be preserved for future generations. |
| Greg | Zahradnik | Louisville | KY | |
| Thomas | Douglas | Grayson | KY | |
| Susan Noalani | Terry | Edmonton | KY | |
| Greg and Becky | Zahradnik | Louisville | KY | |
| Lisa | Schoenbachler | Louisville | KY | |
| Michael | Budniak | Louisville | KY | As a former volunteer working to designate old growth areas in the Umatilla National Forest, I have seen first-hand how important these magnificent places are and how much they need protection! |
| Tisha | Dehart | Lexington | KY | |
| K | Ca | Pewee Valley | KY | |
| Andy | Klapper | Lexington | KY | |
| Joshua | Seff | Lexington | KY | |
| Margaret G. | Richey | Lexington | KY | An increase in commercial and salvage logging in old-growth forests is incompatible with the NW Forest Plan. Increased logging would be devastating to ecosystem services and exacerbate the negative consequences of extreme weather events. |
| Stephen | Dutschke | Louisville | KY | |
| Sherrill | Wycoff | E Town | KY | |
| Ashley | Grace | Louisville | KY | |

| | | | | |
|-----------|-------------|-----------------|----|---|
| J. | V. | Nazareth | KY | I urge you to protect the Northwest Forest Plan and the ecosystems that surround it. |
| Steve | Groze | Youngsville | LA | |
| Kathryn | Lemoine | West Monroe | LA | |
| Marion | Freistadt | New Orleans | LA | |
| Chad | Leming | New Orleans | LA | |
| James | Bauer | New Orleans | LA | I strongly support protecting the remaining old growth in the northwest. So little of the original forest cover remains as old growth that we really need to protect the small amount that remains. |
| Ryan | Hanson | New Orleans | LA | |
| Ly | Bengston | Belchertown | MA | |
| Chris | Yip | Boston | MA | |
| Margaret | Ferguson | Cambridge | MA | Please protect hiking areas for current and future generations. |

| Kurt | Hirschenhofer | Millis | MA | |
| Wrenn | Reed | Brookline | MA | |
| JM | Shy | Medway | MA | |
| | | | | Clean water, and intact old-growth trees are essential to for the health of all people; they literally save thousands of lives! IT is immoral to not care about the lives of people all around our earth and think we can poison it in some places; we ALL suffer somewhat from climate change effects wherever we live as the air gets more & more unhealthy and flooding or droughts are either one prolonged and worse than before. Then more & more people can't drink the water if we don't leave nature alone to clean up our pollution. Intact old growth forests do an immense good for that!! |
| Carol | Walker | Winthrop | MA | |

| William | Stone | Carrboro | NC | Please save the forests for our children and grandchildren. |
| Olivia | Smith | Durham | NC | |
| John and Cathy | Thomas | Cary | NC | If you really intend to "fix our forests", leave the old growth standing and keep the undergrowth cleared with controlled burns to prevent disastrous wild fires. The oldest trees are our best defense against global warming, not to mention dear to our hearts. Thank you. |
| George | Mackison | Wilmington | NC | |
| Gloria | Shen | Asheville | NC | |
| Joe | Bearden | Raleigh | NC | |
| Adriana | Crisan | Clayton | NC | Save this land! |

| | | | | |
|-----------|-------------|----------------|----|---|
| | | | | People and wildlife depend on intact ecosystems that provide clean water and healthy air. Maintaining intact forests is one way to provide an intact ecosystem. Old growth forests are particularly important due to their large carbon stores. At this particular time our planet is facing an onslaught of perils brought on by climate chaos. Thus, it is extremely important that old growth forests be protected from activities such as logging which would release massive stores of carbon. |
| Deborah | Milkowski | New Bern | NC | |
| Anthony | Bond | New Bern | NC | |
| Stacey | Amodeo | Raleigh | NC | The Earth matters more than profit. We need to do everything we can to protect the world's ecosystems. |
| Keith | Johnson | Siler City | NC | |
| Donald | Harland | Candler | NC | |
| Elizabeth | Cruise | Durham | NC | |
| Edith | Simpson | Asheville | NC | I lived in the Northwest in the 1980s and 90s. I saw the forest devastation happening and celebrated the Northwest Forest Plan. It should be protected and improved. |
| Ron | Bryant | Norwood | NC | we need our old growth forests!!! |
| James | Bengel | Pittsboro | NC | |
| Gerri | Morringello | Leland | NC | |
| David | Nikkel | Fayetteville | NC | |
| Carol | Keeser | Winston Salem | NC | |
| Leonard | Marcus | Southern Pines | NC | |
| Gail | Jennings | Wilmington | NC | Please don't revise this Plan. It will hurt the indigenous people and cut the carbon needed from those trees. Forests are being cut everywhere for development and displacing the wildlife. Please be concerned about our older forests and their impact in our environment. |

| | | | | 30 years after its creation, we can see that the Northwest Forest Plan's vision to protect and restore old-growth forests and imperiled species was ahead of its time. It has been overwhelmingly effective. And, there are reasons that it should be amended to be made even more effective. Those include incorporating perspectives of Tribes and indigenous communities who were functionally left out of the original planning process; addressing climate change and fully recognizing the carbon storage and sequestration values of old-growth forests; and ensuring land managers follow best available science to appropriately manage forests in an era of wildfire. |

| Janet | Einfalt | Hubbard | OH | |
| Aimee | Shinhearl | Mentor | OH | |
| Nancy | Dollard | Uniontown | OH | Protect trees, the environment and wildlife in it. |
| Julie | Pastore | Shaker Hts. | OH | With an unbalanced Northwest ecosystem, we lose critical endemic species which causes cascading and cyclical losses of more critical species. Consider how the loss of various woodpeckers leads to harmful insect overpopulation (like wood-boring beetles) which leads to forest decimation which leads to high forest fire risk and more harm to people and remaining woodpeckers, wildcats, bears, and owls. These natural losses cannot be undone, and much is already gone. Please protect the remaining old growth forest before it?s lost for good. The future of our nation?s wildlife and natural beauty deeply rely on the decisions you make.? |
| Elizabeth | Publicover | Lancaster | OH | |

| Anne | Patterson | Wakefield | RI | Please protect these old growth forests. Once they are gone they are gone forever. |
| Lynn | Grattage- Costa | Warwick | RI | |
| Kenneth | Chay | Providence | RI | |
| Geoff | Kaufman | Westerly | RI | |
| John | Cota | Bristol | RI | |
| Anna | Bernath | Jamestown | RI | It is vitally important to maintain old growth trees. They have been a part of our national heritage for several hundred years and they must remain for future generations. They must not be logged for once cut down they're lost. New growth cannot replace their climate benefits nor habitat for our natural animal world. Please do not backtrack on the valuable progress made in saving these gentel giants for the environment and future generations. Once gone they would be lost for ever and nothing could replace them and their value to us all. |

| | | | | Living close to the Smokies as I have for the last 40 years, I care deeply about trees and have learned a lot about them and am most moved about how they can nurture each other when stressed. Largely taken for granted I believe is how much our entire ecosystem depends critically on the existence of forests, esp. old-growth forests. I've also seen historic photos of our beloved Smokies after they were ravaged by lumbering 1901-1939. I was moved to tears the first time I saw how heavy equipment can take out an old tree ("one of nature's masterpieces") in a matter of just a few minutes. So the issue of lumbering old-growth forests is near and dear to my heart. |

| | | | | |
|-------------|------------|-------------|----|--|
| | | | | My hiking trips within the forests of the Pacific Northwest have convinced me that these areas are essential for old-growth trees and endangered wildlife, as well as low-impact human recreation. There is nothing on earth as quiet, fragrant and spiritual as a redwood forest, especially within the circular rings of clustered trees called fairy rings. Coastal redwoods obtain more than half their water requirements from fog during the summer season. It is a mystical experience to observe how the fern fronds and redwood sorrel extend their leaves in the shadows of the mighty fog-draped redwoods. The air is cool and clean beneath the redwoods' leaves due to their ability to capture and store climate-wrecking greenhouse gases. These forests should remain free of logging activities as well as any mechanized or industrial pursuits. We owe it to future generations to protect the experience of gently treading the paths within the forests of the Pacific Northwest. |
| Debra | Dunson | Spring Hill | TN | |
| Gerald | Mackey | Gainesboro | TN | |
| Martha | Anderson | Chattanooga | TN | My experiences in walking in old growth forests are some of my favorite memories. There is nothing like feeling the relationship between the trees and earth. Please save these forests |

| Nancy | Takacs | Seattle | WA | |
| Janis | Olson | Bellingham | WA | |
| Michael | Gaul | Ravensdale | WA | |
| Michael | Winger | Puyallup | WA | |
| Marilee | Meyer | Port Angeles | WA | Our forests help protect our environment and our opportunities to experience the beauty of nature. They must be protected if we want to ensure a healthy and enjoyable future. |
| Charles | Collier | Redmond | WA | |
| Mark | Leed | Vancouver | WA | I love these forests and I'm passionate about making sure they remain healthy and intact for future generations. |
| Jean | Pauley | Seattle | WA | |
| Tien | Vu | Renton | WA | |
| GLENN | FRANKO | PORT ANGELES | WA | |
| Desiree | MARBLE | Port Angeles | WA | |
| Marie | Bailey | Bellingham | WA | It's our forests that make the Pacific Northwest what it is today. Please protect them! |
| Greg | Goodwin | Seattle | WA | |
| Diane | Lang | Seattle | WA | |
| Martha | Atkinson | Valley | WA | |
| Craig | Swanson | Bellevue | WA | |
| Leon | Robert | Seattle | WA | |
| Kara | Harms | Bothell | WA | |
| Alexandria | Wilson | Snohomish | WA | This is a very important issue to me, I have 3 boys and we go to the forest and learn about the forest together and they are counting on me (and all of us!) to hang onto the forests we have. |
| Tracy | Ouellette | Bow | WA | |
| Daniel | Henling | Seattle | WA | |
| Graham | Golbuff | Seattle | WA | |
| Kristin | Franks | Issaquah | WA | Yep, I am an unabashed tree hugger. |

| | | | | |
|-----------|---------|------------|----|--|
| Angie | Dixon | Clinton | WA | We need our remaining old growth forests to thrive for the health and well being of s all. |
| Cathy | Arnesen | Olympia | WA | |
| Lisa | Cohen | LaConner | WA | |
| Patrick | Pastore | Seattle | WA | With an unbalanced Northwest ecosystem, we lose critical species which causes cascading losses of more critical species. These losses cannot be undone, and much is already gone. Please protect the old growth forest before it?s lost for good. The future of wildlife and our nation?s natural beauty deeply relies on the decisions you make. |
| Amy | Faith | Bellevue | WA | |
| Dennis | Bahr | Snohomish | WA | |
| M. Lou | Orr | Shoreline | WA | We must all work together to protect the beautiful Pacific Northwest! We cannot allow ANYONE to destroy any part of it or any plants, trees or wildlife therein! PROTECT!! |
| Bruno | Grande | Seattle | WA | The Northwest's delicate ecosystem depends on the survival of its native species. When we lose key species like woodpeckers, it triggers a devastating chain reaction. Without woodpeckers to control them, wood-boring beetles multiply unchecked, destroying forests. This forest damage increases fire risk, further threatening the survival of remaining woodpeckers, wildcats, bears, and owls. Once these species and habitats disappear, we can't bring them back ? and we've already lost so much. Old growth forests are irreplaceable sanctuaries for our region's wildlife. Their preservation is vital to protecting America's natural heritage. The choices we make today will determine whether future generations can experience these magnificent ecosystems. |
| thor | t | gig harbor | WA | |
| j | g | tacoma | WA | |
| Yonit | Yogev | Olympia | WA | |
| Lorelette | Knowles | Everett | WA | |
| Skye | Heglin | Camas | WA | Protect natural/old growth forests. Stop seeing forests with dollar signs in your eyes, instead see them with clean air and clean water, and hundreds of native species dependent on them. Plan for a healthy future on earth, not just a quick profit for those who would pillage our natural world. Your job is to serve the best interests of the PEOPLE not the polluting corporations. |
| Lynn | Colson | Bellingham | WA | |
| Lauren | Ranz | Bellingham | WA | Keep up the good work you are doing! |

| | | | | |

| Diane | Mckernon | Carmichael | CA | |
| Daniel | Podell | Santa Rosa | CA | |
| Signe | Wetteland | West Sacramento | CA | |
| Eileen | Mitro | Ukiah | CA | |
| Jan | Randall | Sebastopol | CA | |
| Gary | Stubblefield | Vallejo | CA | <p>The past reveals the horrible consequences of placing profit above stewardship of our precious resources, trees and especially mature stands, which help to make life on earth possible, sustainable, more harmonious, and pleasant.</p> <p>We have gone too far already across the globe with the mismanagement of vital resources and we must all work together to put an end to any policies, priorities, practices, legislation, etc. that further threaten these vital resources, in this case, our precious trees, the lungs of this planet.</p> <p>We all know the right thing to do on a gut level, despite personal greed.</p> <p>Do it!</p> |
| Judy | Dowell | El Macero | CA | Trees are the most important being on this planet. Their functions affect every other living being. They provide oxygen for everyone, they clean and remove pollutants from the air that we breathe, they lower the carbon content of the atmosphere, they provide nutrients to the soil they grow in, they help to prevent landslide by holding the soil with their roots, they provide shade and humidity during the hot and dry season, they provide habit for other species such as nesting, food and shelter and they provide beauty for all to enjoy. |

| Mary | Shannon | Newcastle | CA | |
| Hanne | Jensen | Monte Rio | CA | |
| | | | | I love the Northwest forests, especially the ones with old-growth. These climax communities are important for species diversity, clean water and to sequester carbon. I strongly support the Northwest Forest Plan with its vision to protect what remains of these mature forests after so much logging. Please do not weaken the Plan and support more commercial logging. Follow the science and if you are to amend the Plan do it to make it even more effective in preserving and restoring climax forests of northwestern America. |
| Jan | Randall | Sebastopol | CA | |
| Sue | Barthelow | Auburn | CA | |
| Karen | White | Roseville | CA | Please keep our mature forests intact for future generations! |
| | | | | I lived in a Coast Redwood forest for 40 years and taught hundreds of families the financial and spiritual benefits of protecting large tracts of intact old growth and mature second growth. Many of those benefits are derived from retention of species diversity (slowing species extinctions) and sequestration of atmospheric carbon dioxide. Until we have a consistent federal plan for addressing human-driven climate change, big old trees with massive green canopies are the best remediation we have to slow down global warming. |
| Barry | Grimm | Roseville | CA | |

|----------|----------|---------------|----|--|
| | | | | I am a proud Washingtonian, born in the State in the late '30s, with memories of its beauty and magnificence. I have traveled to a variety of countries and found myself comparing my new experiences to those of my early years. There are few places that measure up to what is found in my native State. Having lived and worked among the Swinomish people and other tribal members, I am aware of how blest these people are with an awareness of the earth, its bounty and limitations. These include rich insights and knowledge for what best serves the land. Please consider native people to help in the continued growth and development of the Northwest Forest Plan. |
| Jeanne | Rollins | Sacramento | CA | |
| Melissa | Brooks | Antelope | CA | |
| Sara | Townsend | Rio Linda | CA | |
| Gary | Pischke | Santa Rosa | CA | |
| Katie | Rodgers | Woodland | CA | Protecting forests not only makes scientific sense, it protects an invaluable tourist attraction. So many people come to the Pacific Northwest for the beautiful green landscape, and miles of forested hills. |
| Kathleen | Jones | Sacramento | CA | |
| Jessica | Schorr | Sonoma | CA | |
| Fran | Saito | Ukiah | CA | By now you must know that trees and forests ground us human beings. In their presence, they make us better people. Many of us seek them out when we're on vacations to balance our urban lives, to absorb the wonder of being in the presence of trees that are centuries old. When I lived in NYC, I was so grateful that forward thinkers created Central Park. How it had saved my life! We must do all we can to preserve our forests and the forest ecosystems. Please be forward thinkers and continue to allow our Northwest forests to be. Do not go backwards. |
| Susan | Rainier | Davis | CA | Trees clean the air. Taking down forest amounts to Ecocide and should hold those who commit Ecocide legally responsible |
| Allison | Doller | Folsom | CA | Please help to protect one of our most valuable resources. Trees give us LIFE! Thank you! |
| Margaret | Schafer | Petaluma | CA | Keep old growth! |
| Alessia | Cowee | Chico | CA | |

| Lisa | Salazar | Shasta Lake | CA | |
| | | | | There is no way to think it is a sane choice to open up old-growth forests, or really any habitat where our fellow creatures live and thrive, to logging. These forests are literally the lungs of this part of our planet. Without them, we are lost. Everyone deserves a chance to stand in an old-growth forest and feel the awe, calm, and aliveness of the earth in this way that is mostly lost. It is by preserving these places that people are able to fall in love with what we need to save. Please protect the Northwest Forest Plan and encourage the amendments needed to incorporate the Indigenous voices--those who know these places best. |
| Rebecca | Broughton | Trinidad | CA | |

| | | | | |
|--------------|------------|-------------|----|---|
| Ann | DiSalvo | Talent | OR | Old growth forests are not a crop to harvest, they are the habitat for so many species we don't even know them all, and we must not assume it's only there for us. We are the stewards, the protectors, not the resource harvesters. If you didn't plant it, don't cut it. |
| Dr. Diana | Cunningham | Ashland | OR | |
| Margaret | King | Redmond | OR | Thank ou for helping make Oregon an environmentally place to live. Forests are home to many species. I love the forest! |
| Janet | Bailey | Beaverton | OR | We ALL need old growth forests for carbon storage & sequestration values, the Tribes & indigenous communities must be included in the process - they have knowledge we've been ignoring. Please do not allow more commercial logging or salvage logging in the National Forests. Protect our future and ensure land managers follow the best available science to appropriately manage forests in this era of wildfires! Thank You, Janet Bailey |
| Ruth | Johns | Corvallis | OR | Protect our forests! This isn?t rocket science. |
| Ellen | Hall-Chave | Banks | OR | |
| Pat | Bowman | Portland | OR | I live adjacent to one of the largest and beautiful urban parks in our whole country. Trees help us by sequestering carbon and by simply being lovely. We must protect our forests! |
| Anna | Cowen | Oregon City | OR | |
| Laura | Hanks | Milwaukie | OR | |
| Lee & Tamara | Hughes | Eugene | OR | |
| Kristina | Kebisek | Portland | OR | |
| Linda | Donnelly | Salem | OR | |
| Alan | Bartl | Coos Bay | OR | |
| Virginia | Tarango | Portland | OR | We have seen salvage logging occur in which tree that are viable are cut, this is an example of the true intention of logging companies, in that making money rises above the health of our waterways, habitats and climate protection. Making is easier for logging interests to do harm needs to be kept in check. Make this landmark plan the strongest and hold true to the protection of ecosystems. |
| Barbara | Ruben | Portland | OR | My academic focus was on forest land managing. Now more than ever, with climate change we can not afford to roll bs k protections. |
| Michelle | Carlson | Ashland | OR | |

| | | | | |
|-----------|-----------|---------------|----|---|
| Matti | Girardi | Portland | OR | I live in the Pacific Northwest and the forest sustainability should not be equated with profit but with people and the earth. |
| Melissa | Martin | Portland | OR | |
| Mitchell | Stargrove | Hillsboro | OR | We are Gaia. Respect this Earth. |
| Sharon | Rivers | Talent | OR | |
| Patricia | Pomeroy | Irrigon | OR | |
| Hannah | Mahler | Albany | OR | I've lived in Oregon my whole life. I come from two generations of loggers and sawmill workers. I myself was a wildland fire fighter for ten years. We are still learning the best forest management practices and we have some much to learn from the ancient peoples of our land. Please do not open the protected lands to commercial logging. Logging is about making money, not about protecting the forests for the next generations. The woods are worth so much more than dollar bills. |
| Laura | Walsh | Portland | OR | Money can't buy Nature.. it Can help sustain and preserve true richness of Life |
| Dena | Turner | Portland | OR | |
| L Ramsay | Weit | Portland | OR | Err on the side of protection |
| Sally | Stevens | Portland | OR | Science is our guide to making the best choices for our forests. Based on carefully gathered and assessed evidence, we can better manage and protect our planet. There is no good reason to make choices on greed and ignorance and indifference- don't know and don't care! |
| Jean | Butcher | Portland | OR | I believe that careful consideration of any changes to this important forest plan is of critical importance and I hope you realize that what we do now will matter for generations to come. Please be thoughtful and use science and indigenous wisdom as your guides. Our children - yours and mine - are counting on you. |
| Margo | Huntsman | Klamath Falls | OR | Please protect these ancient trees our ancestors first saw when they settled this region. Wildlife depends upon their presence. We depend upon their presence for numerous reasons. Conservative and respectful management of our beautiful forests is essential for the future of the northwest. Eliminating old growth trees is not the answer, it would be like wiping out our own elders and history. |
| Rosemarie | Gerstner | Jacksonville | OR | |
| Karol | Dietrich | Corbett | OR | |
| Jay | Somers | Newberg | OR | Please do the right thing. |

| Claudia | Craig | Portland | OR | |
| Juanita | Garnow | Portland | OR | |
| Virginia | Rosenkranz | Portland | OR | |
| Marna | Herrington | Portland | OR | |
| Kelly | Mathers | Creswell | OR | Forests are important for future generations and the environment itself |
| Kevin | Green | Hillsboro | OR | We really have just one chance to preserve our old growth forests. If we don't take that chance now, they will likely never regrow to the same level. |
| Kerry | Canfield | Portland | OR | The Pacific Northwest must stay green and breathable. After all, it is trees that breathe out the oxygen we humans breathe in. |
| Lynne | Taylor | Gaston | OR | Our ancient forests are so important in protecting the environment and wildlife, holding water, holding soil, preventing fires, and most important, reducing climate change. |
| Jacqueline | Jenkins | Keizer | OR | Do not become a part of the annihilation of earth. Do the right thing! |
| Norman | Lewis | Eugene | OR | |
| Don | Kuhns | Corvallis | OR | As a former Forest Service (30 years) employee I understand the political pressure the FS is constantly under. Yo-yo back in forth between conservative and progressive administrations. As such it is more important than ever to stay focused on the reason the FS exists and why it is so important to follow its charter of caring for the land and serving the people. Managing for the greatest good and protecting the immensely valuable resource for future generations. More than ever we know the importance of our forests in providing the many benefits to this great country. Chief among them are providing healthy ecosystems and carbon sequestration to help stem the dangerous path of accelerating species loss and the tipping point of climate change. Now more than ever we need the professional and scientific knowledge of the FS to step up to the challenge. Please keep the critically important parts of the NW Forest Plan intact for protecting our Forests. |
| David | Bone | Medford | OR | you gentlemen are from Oregon, so you know the importance of forests and how they are important to our lives. Vote for that, not for making money and destroying our lives! |
| David | Neumann | Ashland | OR | |
| robert | sears | Mcminnville | OR | |

| | | | | |
|------------|-----------------|-------------|----|---|
| Erika | Bury | Portland | OR | Please protect our forests and especially our old growth! As an avid hiker I love exploring these forests. It's also important to have some old forests for plants and animals which can live nowhere else. These forests keep our air clean, and can stimulate tourism from hikers like myself. There isn't much old growth left and what we still have should be protected. |
| Kim | Beeler | Lake Oswego | OR | |

| Sandra | Farrell | Hillsboro | OR | Permanently protect old growth forests for today and our future |
| Marshall | Hill-Tanquist | Corvallis | OR | |

| | | | | |
|----------|---------------|--------------|----|---|
| Jennifer | Loomis | Portland | OR | |
| Amy | Whitworth | Portland | OR | We need more education from homeowners about fire safety on their own properties. With these wildfires, we can see there were individual homes that remained intact, with leveled homes all around. This is due to the actions taken by these homeowners. Don't blame the forest. Old growth provides irreplaceable habitat for many species facing extinction or dwindling populations due to habitat loss and human encroachment into forested lands. Logging is not the answer, it is part of the problem. |
| Marilyn | O'Malley | Eugene | OR | We need the trees to clean the air and fight pollution. Their roots also help clean water. Trees provide food and shelter many types of animals. To ravage our trees is to take away what little hope we have left to save our planet and all living things. Do you really want your children, grandchildren, great grandchildren to live in a dying world full of toxins? SAVE THE TREES! |
| Kathy | Pavlick | Tigard | OR | |
| Alan | Miller | Grants Pass | OR | |
| Marsha | Allen | Portland | OR | |
| Carla | Wenzlaff | Eugene | OR | |
| Charles | Horton | Independence | OR | |
| Denise | Holley | Redmond | OR | Forests store carbon and breathe out oxygen for humans and animals. We cannot afford to lose trees in our old growth forests to logging. |
| Lynn | Mystic-Healer | North Bend | OR | Look at Europe's long standing multipurpose forest land uses for public services. |
| Denise | Brock | Portland | OR | Protecting forests is important to me because it's what gave me strength and focus in difficult times. I want my grandchildren to have the same options to experience the healing that only unspoiled old growth forests can give. Please save the forests for our next generations. Thank you |
| Amy | Roberts | Albany | OR | |
| Denise | Brock | PORTLAND | OR | |
| diana | boss | Beaverton | OR | We need to preserve what is left of old growth forests. they are crucial in the fight against climate change. |

| Patricia | Freiberg | Vancouver | WA | |
| Jane | Kroger | Bellingham | WA | Please protect mature forests in my home area?once gone, they will take generations to regrow and provide all the environmental functions for humans that they do. |
| Trotter | Laroe | Seattle | WA | Please consider the long-term financial impact of global warming and forest erosion as opposed to prioritizing short-term gains via logging programs. I urge you to continue investing in forest stewardship and ecosystem preservation and protection. |
| Wendy | Krakauer | Seattle | WA | |
| Sheryl | Feldman | Seattle | WA | |
| Julia | Larsen | Seattle | WA | |
| Martha | Atkinson | Valley | WA | |
| Kristin | Fitzpatrick | Seattle | WA | |
| Brandon | Bowersox-Johnson | Seattle | WA | The pillars of the Northwest Forest Plan must be upheld so my son and future generations have healthy forest ecosystems and a livable planet. |
| Alice | Nicholson | Seattle | WA | |
| Don | Williams | Olympia | WA | Mature forests are a resource that should be left intact. |
| Felix | Lee | Seattle | WA | |
| Suzanne | Phillips | Edmonds | WA | Mature old growth can not be replaced for hundreds of years. do not destroy it now. We need it more than ever to clean our air. |
| Mari | Declements | Everett | WA | |
| Larry | Mahlis | Seattle | WA | |

| | | | | |
|----------|------------|---------------|----|--|
| Rose | Nauta | Spokane | WA | Many people enjoy the beauty of these forests. Many businesses that support these guests of the forest would go out of business if the trees were cut down. These losses - for those who come to enjoy the woods as well as these businesses -- are not worth whatever the profit of cutting down the trees. And the loss of habitat for so many species is criminal. |
| Donna | Albert | Montesano | WA | I have grandchildren. I want these forests to be saved for them. We are crossing planetary boundaries by disturbing too much of the earth's surface. LEAVE THESE MATURE FORESTS ALONE! |
| Harry | Romberg | Seattle | WA | |
| Peter | Reagel | Burien | WA | |
| Dayna | Jones | Spokane | WA | |
| Hannah | Glasser | Edmonds | WA | |
| Sharon | Wilson | Seattle | WA | Extinction of species is permanent and climate chaos dooms much of humanity. We NEED our forests as a carbon sink! |
| Jerry | Kessinger | Lynnwood | WA | |
| Cynthia | Bates | Seattle | WA | |
| Nancy | Morris | Shoreline | WA | We must save our old growth forests for future generations, especially now with the gutting of all environmental laws by Trump and his collaborators. |
| Susan | Scott | Vancouver | WA | |
| Roger | Westerdahl | Camano Island | WA | Please protect old growth forests for present and future generations to enjoy and for the diverse species that depend upon them. |
| Jennifer | Macdonald | Bellingham | WA | |
| William | Schaff | Vancouver | WA | |
| Scott | Hastie | Bellevue | WA | |
| Mark | Leed | Vancouver | WA | |
| Mark C | Weller | Port Townsend | WA | My, family and I love walking into the old growth forests. As a matter of fact I live next to Old Fort Townsend State Park. This is a favorite of ours to hike in early morning, afternoon, & after dinner. We enjoy seeing the different varieties of foliage and different signs of animals. Even so the old growth forests are an important habitat for marbled murrelet, birds that need the forest to procreate. One of the most important aspects is carbon storage. |
| Kate | Butt | Redmond | WA | Yes, I'm still a tree hugger at heart. |

| | | | | |

| valarie | matinjussi | Bellingham | WA | |
| | | | | Having lived on a peninsula in SW WA state for the last 38 years. I have my own data to atest to what is here to help nature, indigeneous cultures, economy and the rest of us. Also teaching 4th graders in Pacific county to be good stewards, get outdoors, learn, give back and enjoy the beauty of our area: Lower Columbia River, Pacific Ocean, and Willapa Bay. We must keep these waterways healthy and work on sustainability of resources for our salmon and our jobs; our oysters, our birds, our old growth forests...and on. Together WE can mae this happen. Use the best practices for fire mitigation, work in the communities who need education on how to fish while keeping the fish habitat and fish populations healthy. Let's walk the walk. Yes, all plans need monitoring and adjusting- as a teacher we do that daily! Why is it so difficult for others? I hope your love of the forest will keep you invested in its old growth and management of biodiversity. Ask a 5th grader at Ocean Park Elementary. |
| Martha | Williams | Long Beach | WA | |
| PATRICIA | DORSEY | Oak Harbor | WA | |
| Karla | Taylor | Olympia | WA | |
| Monica | Robbins | Mercer Island | WA | |
| Jewel | Hageman | Shelton | WA | |
| Emily | Vanalyne | West Richland | WA | |
| Bill | Gregory | Sedro Woolley | WA | |
| Amanda Sue | Rudisill | Olympia | WA | When climate change is destroying our planet, forests are the first line of defense against global warming. |
| Mary | Stamp | Spokane | WA | In updating the Northwest Forest Plan, the U.S. Forest service must protect clean rivers, salmon and forests! |
| Leon | Robert | Seattle | WA | These forests are a national treasure and should be protected. |
| Christopher | Olafson | Federal Way | WA | |
| Laura | White | Port Orchard | WA | |
| Charyl | Warner | Pullman | WA | |

| | | | | |
|----------|---------------|-------------|----|--|
| Jim | Corbin | Woodinville | WA | We have very little mature and old-growth forests left. It needs protection to save the entire forest ecosystem -- all of the plants, animals, and people who depend on it. |
| Gary | Wiles | Olympia | WA | |
| Penelope | Symonds | Vashon | WA | |
| Sharon | Dunn | Greenbank | WA | I value our forests for the role they play in protecting our environment as well as the beauty they provide. Save our old growth forests and public woodlands - let the time companies grow a renewable resource. |
| Anne | Van Sweringen | Tenino | WA | |
| Robin | Templeton | Blaine | WA | |
| Robin | Bean | Lynnwood | WA | |
| Marilyn | Scheer | Bellingham | WA | Forests in the Pacific Northwest...and "everywhere!...MUST be protected and maintained, not just for their own sake, but because we NEED them for the fight against climate change!! Not only are they beautiful and occasionally supply lumber when we need it, but they also pump out 'huge' quantities of O2, which, again, are needed in the fight against climate change! So protect, protect, protect those magnificent Northwest forests....and 'all' forests where ever they are!! |
| Beth | Eisenbeis | Kenmore | WA | |
| Jennifer | Horner | Woodinville | WA | Climate change is something I am deeply concerned about and protecting our forests is key to our survival. We need to protect the precious resources we have left. |
| Barbara | Preston | Seattle | WA | |
| Steve | Quai | Spokane | WA | Don't change our forests into toothpicks and TP!! |
| J | J | Orting | WA | |
| Jean | Mendoza | White Swan | WA | |
| Sean | Lynott | Bellingham | WA | |
| Ilaina | Richter | Issaquah | WA | |
| Peggy | Behnken | Renton | WA | I've lived in Washington State for 57 years - my whole life! I've traveled quite a bit & I see how incredibly diverse & beautiful it is here. From Hood Canal, to the Methow Valley, the San Juans, to Mt Rainier not only are they unbelievably beautiful, they are so important in maintaining every living being in Washington's health & quality of living. |

| | | | | |
|-----------|--------------|---------------|----|--|
| | | | | Forests are extremely important to protect, especially with growing wildfire concerns. Logged or thinned areas admit more heat, sunlight, and wind, creating drier conditions. This also allows for invasive species and grasses that are much more flammable to come in. Our older forests hold significantly more moisture and density making them much more resilient to fire. Plus, research is highlighting how trees make rain through evaporation and transpiration, helping to create and balance weather systems. Our current fire issues are in direct correlation with our over logging and development. It is a wise choice to do whatever we can to protect every remaining tree and forest in service to the healthy and robust Ecosystem Services they provide. |
| Nicole | Martel | Yelm | WA | |
| Cornelius | Partsch | Bellingham | WA | PLEASE continue to protection of a key natural and cultural resource |
| Karen | Fisher | Ferndale | WA | |
| K. | Eggers | Addy | WA | THESE FORESTS BELONG TO ALL ON THE PLANET!!!!!! |
| James | M. Tandoo | Edmonds | WA | |
| Nancy | Harter | Olympia | WA | |
| Jeanie | Bein | Bellingham | WA | Please protect our forests. They are not to be exploited by the wealthy! |
| Nancy | Takacs | Seattle | WA | These trees cannot be replaced. |
| Kimberly | Crane | Snohomish | WA | |
| Yesenia | Lee | Rochester | WA | The Northwest Forest plan was enacted the year I was born. It has allowed me to grow up in a beautiful, diverse, landscape where wildlife thrives for the past 30 years. I would never want to call anywhere else home. I want future generations of Washingtonian's to be able to enjoy that same experience. |
| Laura Jo | Severson | Friday Harbor | WA | |
| Kim | Chapman | Port Angeles | WA | |
| Laurel | Boucher | Lynnwood | WA | |
| Diane | Shisk | Shoreline | WA | These forests can't be replaced. Please back this plan. |
| Kim | Howard-Lloyd | Lynnwood | WA | |
| DeAnne | Handron | Ocean Park | WA | I love spending time in nature and feel that it nurtures both my physical and mental/s[piritual] health. I depend on the legislators I voted for to protect our public lands for me and for future generations. |
| Lisa | Crum-Freund | Port Townsend | WA | |

| | | | | |
|---------------|---------------|-------------------|----|--|
| Lin | Meadow | Bainbridge Island | WA | |
| Craig | Swanson | Bellevue | WA | |
| Maureen | Brown | Maple Falls | WA | |
| Larry | Fox | Freeland | WA | |
| Gary E. | Ranz | Bellingham | WA | Our forests protect watersheds that provide clean water for agricultural, industrial and domestic uses. These watersheds are a keystone to fighting climate changes! |
| Gloria | Skouge | Shoreline | WA | |
| Craig | Britton | Port Townsend | WA | |
| Kathie | Mayer | Olympia | WA | |
| Kathleen | Gylland | Seattle | WA | |
| Marianne | Eddington | Battle Ground | WA | |
| Phil and Enid | Crawford | Stevenson | WA | As a professional forester and university professor, I am certain a lot more needs to be done by federal agencies to protect and steward the small amount of old growth forests remaining and to provide more opportunity for the continuing development of new old growth forests. |
| Jo | Harvey | Pacific | WA | |
| Susan | Wollett | Walla Walla | WA | |
| Noel | Allen | Seattle | WA | Please preserve the Northwest Forests as they are. The forests are beautiful, they help preserve clean and air clean water, and are an important part of the ecosystem. People who want to open up the forests to more commercial logging are acting out of personal greed, which is a sin. They are willing to destroy the beauty of nature in order to make a profit for themselves. |
| Andrew | Seaver | Seattle | WA | |
| Wendy | Heiman | Mukilteo | WA | |
| Gretchen Anna | Sand | Kennewick | WA | |
| Michael | Rummerfield | Onalaska | WA | We will most likely be put back hundreds of years by the Trump administration. We MUST protect what we have. |
| Lawrence | Seaberg | Brier | WA | |
| Mary | Shields | Bellingham | WA | |
| Kari | Darvill-Coate | Bothell | WA | |
| Alice | Nicholson | Seattle | WA | |

| | | | | |
|----------|-----------|------------------|----|---|
| Anne | C | Gig Harbor | WA | The beauty and health of the PNW forests is an important part of our history and wellbeing of the people and animals that inhabit the area. Protecting our forests is important to me because it is critical to our communities healthy drinking water, store of carbon and keeping our ecosystem stable. |
| William | Looney | Silverdale | WA | Our forests take care of us. We must take care of our Forests |
| Mari | Maclane | Mercer Island | WA | Please, I urge you protect all old growth forests and stands, restore forests and species and do not increase logging. We must rely on science to guide policy in this time of climate change and increased wildfires. I urge you to keep the Northwest forest plan successful by protecting our precious, beloved, and irreplaceable old growth. |
| Candice | Cassato | Olympia | WA | |
| Andrea | Vos | Everett | WA | |
| Donna | Johnson | Lake Forest Park | WA | |
| Marilyn | Mosley | Vashon | WA | |
| Jennifer | Larsen | Seattle | WA | |
| Krista | Hammer | Blaine | WA | I cannot support anything that undermines the current forest plan here. Our old growth is absolutely critical in so many ways. We may not even fully understand all of them yet. We are learning new things all the time about forests, the animals there and our human health and need for healthy forests, especially old growth. Every member of my family spends much time outdoors hiking. Both my kids hiked the Washington and Oregon PCT. Our trees are like nothing else. If you've been in our forests you can understand how unique and irreplaceable is this resource for our region. No logging old growth!! No changes that will allow more logging. And I say this as the granddaughter of a logger. But we've learned and know so much more than we did then. |
| June | Macarthur | Port Orchard | WA | |
| Meredith | Colquitt | Mukilteo | WA | My family moved to the Pacific Northwest in 2011 to choose a healthier life surrounded by the beauty of the old growth forests here, replete with flourishing wildlife, crystal clear water, and clean air that such landscapes provide. It's important to us, and indeed to us all, to protect these natural resources. |
| Nancy | McMahon | Olympia | WA | |
| Karen | Olsen | Seattle | WA | |

| | | | | |
|-----------|------------|------------|----|--|
| Frank | Marre | Vancouver | WA | There is hardly any old growth forest left. This environment is an essential ecosystem. The logging industry has cleared almost everything. They have had more than their share. Please preserve and enhance what remains for future generations. Thank you. |
| Jean | Pauley | Seattle | WA | |
| Ted | Dennis | Sequim | WA | |
| Barbara | Hay | Seattle | WA | The old growth forests are important. Don't let the trump administration cut them down! |
| Robert | Matinjussi | Bellingham | WA | |
| Adam | Levine | Seattle | WA | |
| Mona | Harris | Suquamish | WA | |
| Frances | Blair | Lakewood | WA | |
| Mona | Harris | Suquamish | WA | |
| Beatrice | Greenwald | Seattle | WA | For the sake of our environment, we need to go forward with the Northwest Forest Plan. |
| Dariusz | Kowalczyk | Seattle | WA | I've lived in the PNW for over 30 years. One of the main things I love about our region is the amazing forests. Please do the right thing! |
| Robin | Jacobson | Bellingham | WA | |
| Thomas | Kallman | Concrete | WA | A healthy forest environment is important to the many people who live in the area, but also to the health of the planet and all who live on it. |
| Dawson | Smith | Spokane | WA | Please keep and strengthen protections for our forests. I dont need to explain the importance of our forests. Protect what few wild places we have left. |
| Alice | Flegel | Rochester | WA | Trees are our climate heroes and are magnificent! They are homes for birds, squirrels, raccoons, and so many other creatures! We must protect our old growth forests to preserve clean air and water! |
| Elizabeth | Patterson | Tacoma | WA | |
| Karen | Byrd | Everett | WA | |
| Cathleen | Dalmeida | Coupeville | WA | Climate emergency is enough reason to protect our old grown forests and put in place strong first management practices to protect our climate and the future of human civilization on this earth. |
| Janice | Kreider | Anacortes | WA | |

| | | | | |
|-----------------|-----------|-------------------|----|---|
| Janice | Kreider | Anacortes | WA | |
| John | Mixon | Seattle | WA | |
| Charlie | Garcia | Vancouver | WA | I recognize that in the current climate this may be extremely difficult to do. Try your best. |
| Nora | Vralsted | Medical Lake | WA | |
| Glen | Phillips | Olympia | WA | we need our wild lands to survive on this planet. That is an obvious fact. |
| Marie | Bailey | Bellingham | WA | |
| Teresa | Abel | Clarkston | WA | |
| Susan | Heywood | Tacoma | WA | |
| Traci | Fairbanks | Port Orchard | WA | |
| Rusty & Candice | West | Shoreline | WA | Trees are Mother Earth's Vital Species. |
| Cole | Grabow | Vashon | WA | |
| Candice | Kalb | Tacoma | WA | |
| Lisa | Ceazan | Olympia | WA | I live in Thurston County, Washington, where a beautiful old-growth forest with an important and sensitive ecosystem is under threat. it helps fulfill the county's Climate Mitigation Plan. It's value to all life cannot be underestimated. Protect old growth forests! |
| Bryan | Evans | Oak Harbor | WA | Save the old growth! |
| Mark | Joy | Arlington | WA | Don't let big business poison everything! |
| Denee | Scribner | Nine Mile Falls | WA | |
| Linda | Knudson | Bainbridge Island | WA | |
| Rebecca | Heisman | Walla Walla | WA | |
| Lindsey | Zuercher | Seattle | WA | |
| Renee | Stern | Kirkland | WA | As a resident of Washington state, I benefit from the plan every day. We have to make it more inclusive and comprehensive. |
| J | Lopez | Kent | WA | |
| Lucy | Johnson | Seattle | WA | |
| Amy | Faith | Bellevue | WA | We need to protect our old forests. |
| Larry | Mahlis | Seattle | WA | |
| Amy | Heyneman | Seattle | WA | |

| | | | | |
|----------|-------------|----------------|----|--|
| Sylvia | Williamson | Sammamish | WA | In a few hours our modern technology can destroy what nature has taken centuries to patiently create. I am awed by these majestic giants, that give homes to a myriad of creatures, shade us and sequester tons of carbon. Once these mature trees are gone, they will be gone for the rest of my lifetime, as well as my children's and grandchildren's lifetimes. Let's preserve the tiny number that remain before it's too late. |
| Kathleen | Mcevoy | Bellingham | WA | |
| Teresa | Sollitto | Maple Valley | WA | Please protect these fragile ecosystems for our wildlife, human health, and our planet. |
| Valerie | Carlton | Spokane Valley | WA | We have to think like our indigenous brothers and sisters and consider the lives of the next seven generations! |
| Dani | Rowland | Bellevue | WA | |
| Michael | Hemker | Carnation | WA | |
| Carol | Kautzmann | Olympia | WA | My grandfather, Leigh J. Young, was one of the first professors of Forestry at the University of Michigan and strove to protect old growth forests there 80 years ago. I stand for his memory in preserving protection for our forests and not allowing their destruction to fill the pockets of a few!! I would expect you to do the same Right thing! Carol Young Kautzmann |
| Dorothy | Geraghty | Sammamish | WA | |
| Lawrence | Magliola | Sequim | WA | |
| Deanna | Mintz | Stanwood | WA | Our forests are iconic, bringing tourism, reduced stress related illness, cooling that is so needed during this climate crisis, and a habitat unparalleled providing homes for thousands of vital species. We need to keep our forests old and intact, doing whatever is needed to keep them healthy. |
| Samantha | Schnittger | Yelm | WA | |
| Yonit | Yogev | Olympia | WA | |
| Ruth | Herman-Dunn | Seattle | WA | |

| | | | | |
|-----------|----------------|-----------------|----|--|
| | | | | I am a hiker and backpacker, and take great solace in being able to hike through Washington state's national forest. The forests are not only important for recreational opportunities, but for maintaining a healthy, vibrant and diverse ecosystem critical for wildlife habitat and climate change resiliency. Older forests, in particular, help maintain forest and ecosystem health. I want the forests, and in particular older forests, to thrive for future generations. That is why it is imperative that the tenants of the Northwest Forest Plan, and the policies that guide our management of our national forests, be grounded in science, consider the full forest ecosystem, and protect our old growth and legacy forests. |
| Cindy | Brown | Seattle | WA | |
| Alannah | Hudis | Vashon | WA | |
| Eileen | Owen-Williams | Freeland | WA | |
| | | | | If you have ever experienced the beauty of the Pacific Northwest it would stay with you for a long time. In addition, few natural sites available to us compare to the old growth redwood forests hugging coastal California and Oregon. And the wild and untrammled locations are not difficult to access. Please support ongoing conservation of these natural places for everyone today and for future generations. |
| Tom | Norton | Santa Rosa | CA | |
| Tami | Dorraugh | Volcano | CA | Protect our Forests! |
| Elena | Knox | Volcano | CA | |
| Katherine | McIntosh-Smith | Davis | CA | Forests are living systems and cannot be replaced. When they are gone they are gone --making all of us poorer. |
| Dena | Stevenson | Sebastopol | CA | |
| Christina | Bowers | El Dorado Hills | CA | |
| Keith | Filipello | Sonoma | CA | |
| Annette | Raible | Petaluma | CA | |
| | | | | Old growth mother trees are an essential component of a healthy natural forest. Thanksgiving you for prioritizing preserving the little old growth that remains. |
| Tisha | Douthwaite | Ukiah | CA | |
| Donald | Frank | Occidental | CA | |
| Eileen | Mitro | Ukiah | CA | |

| Lisa | Mirhej | Eugene | OR | |
| Alan | Winter | Portland | OR | having spent my youth in the forests of Southern Oregon and elder years hiking around Mt. Hood and the Gorge as well as Central Oregon and a bit of time in the deserts of Eastern Oregon, I know how valuable this resource is. Please protect it from the devastation that comes from logging and road building. |
| Patricia | Spicer | Eugene | OR | There is no way to exaggerate the importance of trees, not only old growth, but those in particular at this point in time. |
| Allen | Crutcher | Ashland | OR | please widely and strictly limit logging, road building, etc. in old growth forests. |
| David | Dickinson | Portland | OR | I spend a lot of time in the forests of NW Oregon--and have witnessed firsthand how much clear cutting already exists and the damage it does. Please leave some trees for those of us who like to forage and walk among them. |
| Mary | Buckley | Portland | OR | |
| Lynn | Delatorre | Portland | OR | Please consider sustainable forest management practices |
| Kai | McMurtry | Portland | OR | The forests around my home are the most productive carbon sequestration on earth! We must protect them to protect the planet. |
| Steve | Bilow | Lake Oswego | OR | |
| Joanna | Roberts | Portland | OR | |
| Andrea | Pellicani | Coos Bay | OR | |
| Brian | Hranka | Portland | OR | Log the tree farms. Spare the old growth. |
| Sandra | Elliott | Portland | OR | |
| Randy | Davis | Portland | OR | |
| Linda | Kolstad | Bend | OR | Focus on sustainable forestry?leave old growth alone. It's the legacy of our magnificent state. |
| Adama | Hamilton | Ashland | OR | |
| Linda & John | Mackown | Newport | OR | |
| Ann | deSilva | Bend | OR | |
| Christie | Zerfing | Carlton | OR | |

| | | | | |
|--------------|-----------|-------------|----|--|
| Craig | Emerick | Corvallis | OR | |
| Eileen | Ordway | Springfield | OR | Hands off our Old Growth forests! Future generations need them more than the capitalist polluters and ecosystem destroyers! No more destruction of our Old Growth forests! |
| Diane Newell | Meyer | Ashland | OR | |
| Jack | Wells | Portland | OR | These trees did not live 150 years --to be thoughtlessly destroyed today |
| Kay | Hagen | Ashland | OR | |
| Vince | Lang | Azalea | OR | Please don't let greed destroy more of our forests. We know private timber lands cannot be controlled, but our older forests need to be enjoyed by our families and future generations. |
| Carol | Van Strum | Tidewater | OR | Trees are out life, old-growth trees ensure long life to all. |
| Annie | Bedrosian | Portland | OR | |
| Sandra | Pocholec | Veneta | OR | |

| joe | frascone | Dallas | OR | |
| Michael | Robertson | Portland | OR | |
| Brian | Voeller | Medford | OR | We must continue the successful longterm perspective, include indigenous wisdom and knowledge in any changes, prioritize healthy ecosystem, and preserve the tremendous capacity of carbon sequestration. |
| Kristin | Smith | Portland | OR | |
| Harry | Freiberg | Brookings | OR | To borrow from Mark Twain: Guard & Protect our National and State Parks/Forests, shore lines, rivers, lakes, and wild lands. They are not being made anymore. |
| Wendy | Hunter | Portland | OR | |
| Hope | Stanton | Nehalem | OR | Forests and old growth forests are incredibly important in these days of climate change and environmental degradation. They resist forest fires, hold and capture carbon, provide habitat, and are the last remnants of habitats that are mostly gone. The income they generate is tiny and quickly gone. THE YOUNG FORESTS THAT REPLACE THEM are more fireproof. They protect watershed, increas water capacities of soils and prevent erosion Don't cut them! |

| | | | | |

| Andee | Barnhart | Bend | OR | The forest is my soul! Please protect our forest environment! |
| Jamie | Fillmore | Rainier | OR | |
| Carolyn | Eckel | Portland | OR | I am a long time hiker in the Oregon forests. So, I want to see that the old forest trees are protected so that I will still have a good experience hiking. Resist attempts to water down protection for the old growth trees in the forests. |
| Heather | Walker-Dale | Wilsonville | OR | |
| Tammy | Bittler | Newport | OR | Protecting old-growth forests is important to me because they are unique habitats to so many cherished species while at the same time playing such an important part in helping sequester carbon in the cycle of climate change. Win/Win. |

| | | | | |
|-----------------|----------------------|---------------|----|--|
| | | | | Having had the privilege our entire life to enjoy experiencing and treasuring the beautiful NW forests, the NW Forest plan of 1994 had the vision to preserve this special place. Over time, the conditions for which the plan was developed have changed. It is time to now update the plan and we are in support of the recommendations proposed by the Sierra Club. |

| | | | | |
|------------------|-----------|-------------|----|--|
| | | | | Two trillion dollars and increased energy production have to come from somewhere. The low hanging fruit is always the first to be gobbled up. Unfortunately, the A-76 process will not protect you. The Sierra Club backed the wrong horse in our most recent Presidential election. I think it is cute they remain so naive to think their efforts will do anything other than waste more paper, electricity, etc, trying to stave off the inevitable. Perhaps one day after the forests, the animals, the fish, etc. are all gone, you can sit around the holiday table with your family and reminisce about all that was lost and why you did nothing to preserve anything for future generations. Happy Holidays |
| Randy | Deyton | Brownsville | OR | |
| Iorraine | foster | Portland | OR | |
| Joan | Oconnor | Portland | OR | |
| Kenneth | Kebisek | Portland | OR | |
| Debbie | Fields | Bend | OR | With less than 10% of the original old growth from colonization times remaining we need to preserve 100% of it. |
| Jennifer | Will | Bend | OR | |
| David and Ingrid | Cook | Joseph | OR | I live at the base of the Wallowa Mountains in northeast Oregon. I am thankful that our forests are being thinned to lesson the threat of fire. These are the small trees. Please protect the old growth trees. They store the most carbon as we face the threat of climate change and carbon in the atmosphere. |
| Frank | Perruccio | Colton | OR | |
| Veena | Singwi | Eugene | OR | |
| Charles | Scudder | Portland | OR | Having removed the vast majority of old growth trees from Northwest forests, logging interests now want to clear out all the remainder. That would be a tragedy from many perspectives, not the least of which is their unique capacity to take CO2 out of the air. |
| Catherine | Sicilian | Portland | OR | Please save the forests for our children and grandchildren. |
| Debbie | Smith | Milwaukie | OR | |
| Ann | Nowicki` | Eugene | OR | |
| Alisha | Davis | Eugene | OR | |

|--------------|-------------|--------------|----|--|
| Teresa | Schader | Bend | OR | Proper management and conservation of our forests is what's needed now. |
| Jack | Duggan | Jacksonville | OR | We can no longer dip into the principal of our forest resources. We must return to a stable, sustainable management that provides the dividends we must live with to restore the resource. |
| Judy | Steinberger | Portland | OR | |
| Charlie | Graham | Hillsboro | OR | |
| Ron | Shaffer | Orland | OR | Save a tree, save the world! |
| Patricia | Pomeroy | Irrigon | OR | |
| jukka | naukkarinen | Deadwood | OR | Trees provide the oxygen we breath. Planting trees does not replace old growth forest...thank you |
| Mark & Susan | Rochester | Sutherlin | OR | |
| Starlene | Everson | Astoria | OR | |
| Chuck | Hottle | McMinnville | OR | |
| Susanna | Askins | Bandon | OR | |
| Dana | McBrien | Salem | OR | Oregon is blessed with amazing forests and natural beauty. Please protect the forests and it's inhabitants for our health and the health and delight of our grandchildren |
| Marty | Brockway | Portland | OR | |
| Tom | Beatty | Coburg | OR | |
| Barbara | Bowers | Portland | OR | As a single mother raising 3 children I depended on hiking to maintain a healthy mindset. The forests were the tranquilizers that calmed my struggles/worries of raising children. Please use best, scientific practices in managing these resources in the years to come. |
| Lisa | Baxter | Aloha | OR | |
| Jefferey | Perla | Sisters | OR | Leave it alone protect our wildlife and oxygen and trees we already lost enough |
| Sarah | Medley | Portland | OR | |
| John | Spahr | Florence | OR | I live and work in Oregon and I feel that we must allow for old growth and mature forests to be left intact and do not allow logging in this areas in the northwest forest plan. |
| Terry | Barber | Springfield | OR | Old forests must be protected. Trees are more than those who deliver oxygen. They are sentient beings as recent research shows. They hel remove negativity from our auras when we walk among them. I suspect they are our natural home. |

| | | | | |
|-----------|----------|-------------|----|---|
| Martin | Frazier | Portland | OR | WE STILL NEED TO LEARN HOW THE FOREST WORKS.WE CAN NOT AFFORD TO LOSE THE ECO SYSTEM BEFORE UNDERSTANDING IT. |
| Ella | Kothari | Eugene | OR | Please amend and strengthen the Northwest Forest plan and not dismantle it.Forests especially the mature and old growth trees are the lungs of our beloved planet? It is vital to preserve what we have at this juncture on earth. The plan is science based, and all paths point to preserving and maintaining these amazing ecosystems to preserve and maintain a place that we call home for all creatures. We strongly urge you decision makers to do the right thing for all of us, thank you . |
| Karen | Ashikeh | Beaverton | OR | The NW Forest Plan should be based on science, not the needs of Corporations and at this time, global climate changes mandates the need for as many trees as possible, uncut and in forests. This protects air, water supplies and climate = needed more than money, profits or jobs. Asistance to fireharden homes in forested areas is the best way to sues human workers and assure safe communities NOT cutting trees. Let people work at that, There is much to do for public and private buildings and to save essential infrastructure and community buildings. Tree cutting has no role to play in these efforts/ |
| Allison | Everitt | Salem | OR | |
| Rebecca | Clark | Portland | OR | |
| Heidi | Gerson | Springfield | OR | Please don't let loggers take apart the NW forest plan. We need to protect all of our remaining forests for people and wildlife. |
| Julaine | Morley | Yachats | OR | |
| Rhett | Lawrence | Portland | OR | |
| Catherine | Leach | Springfield | OR | |
| Anthony | Albert | Corvallis | OR | |

| | | | | |
|-----------------|---------------|--------------|----|--|
| | | | | <p>I am an Oregonian and forest owner.</p> <p>I'm not against forests for profit in general, it is an important part of our economy. However, I am opposed to any logging of old growth or virgin timber. It is short sighted to do so. Everyday we learn something new about nature. Old growth forests are an important part of fighting climate change. Cutting old growth forests releases many times the carbon back into the atmosphere than can be absorbed by a young forest. What we are learning about old growth forests is transforming the way we live. There is much to learn from the remaining old growth forests. If the old forests are gone we lose that forever. There is not much left and it must be protected, not cut down. The plants and animals that only live in old growth forests do not have a choice where they live, we do have a choice.</p> <p>Anything we can do to limit green house gases is critical to the future.</p> |
| Andreas | Moran | Tigard | OR | |
| Sierra | Farris | Ashland | OR | |
| Lauren | Redfield | beaverton | OR | <p>Hello, on behalf of our older aging adults, the young generation growing up, and the future generations to come, I urge you to protect our national forests.</p> |
| susie | kim | Hillsboro | OR | <p>We have young children who need to explore our beautiful outdoors. We understand this is not possible without the guide and help of the Forest Staff.</p> |
| Erik | Shaw | Redmond | WA | |
| Silvia | De Los Santos | Sequim | WA | |
| Gretchen | Sand | Kennewick | WA | |
| David & Barbara | Wallesz | Bellingham | WA | |
| Janet | Riordan | Seattle | WA | |
| Catherine | Madole | Walla Walla | WA | |
| Gloria | McClintock | Mount Vernon | WA | <p>My deceased husband worked for the Forest Service and protected old growth trees. We must continue his efforts.</p> |
| Wally | Bubelis | Seattle | WA | |
| Paul | Roberts | Seattle | WA | |
| Lisa | Day-Seymer | Burien | WA | <p>It's hard for me to think that we still have to put up a fight to protect our forest! All the knowledge that we have now should prove that it is imperative that we keep the trees and old growth forest for everyone now and in our future. Please take care of the forest we have now and put protections in place that they can never be touched.</p> |

| | | | | |
|----------|----------------|---------------|----|---|
| Curt | Given | Everett | WA | |
| | | | | Healthy, diverse and mature and old growth forests are critical for fighting both the climate and biodiversity crises. We must protect them if we want to maintain a habitable biosphere. We must stop logging MOG forests and protect them for future generations! |
| Scott | Mcgee | Port Angeles | WA | My wife and I moved to a more rural area from Southern California in order to be in and near forests. We love and cherish these natural wonders! |
| Craig | Britton | Port Townsend | WA | |
| peter | RING-REVOTSKIE | Port Townsend | WA | Protect our Sacred Forests! The Forests are the Breath of life for Mother Gaia! |
| James | Mulcare | Clarkston | WA | |
| Dan | Schneider | Seattle | WA | |
| Namaste | Robbins | Kent | WA | Solve this climate issues |
| Fran | Post | Port Townsend | WA | In these days of climate change we need to protect our old-growth forests as you well know they absorb much more carbon than young trees. This is so important! |
| Edward | Lisowski | Yakima | WA | |
| Mary | Emmons | Leavenworth | WA | |
| Terrance | Ryan | Quilcene | WA | |
| Pamela | Wohlman | Tacoma | WA | Please protect our Forests! Dont allow those with monetary ideas come and wipe out our precious forests and ecosystem of the NW. |
| Vickie | Hanson | Spokane | WA | |
| Sandy | Grace | Bellevue | WA | |
| Erin | Neubauer | Clyde Hill | WA | |
| Klaudia | Englund | Anacortes | WA | |
| Dale | Greer | Seattle | WA | |
| Norman | Mundhenk | Poulsbo | WA | |
| Barbara | Gross | Seattle | WA | PNW forests are the envy of the world. To thrive, they need protect and wise management, not mishandling by monied interests. |
| Jonathan | Cardona | Seattle | WA | |
| Jennifer | Nelson | Seattle | WA | |
| Derek | Kunimoto | Seattle | WA | |

| | | | | |
|-----------|-------------|--------------|----|--|
| Steve | Quai | Spokane | WA | Don?t cut down these trees to make toilet paper, wood chips and floors |

| Catherine | Clissold | Port Orchard | WA | |
| Robert | Ulrich | Issaquah | WA | |
| Don | Thomsen | Spokane | WA | |
| Michael | Stilwell | Greenbank | WA | |
| Brett | Baunton | Bellingham | WA | The forests of the Pacific Northwest are critical for salmon streams and rivers as well as for the humans that live here. I am a lifelong resident and advocate for our old growth and other unique forests.Please protect as much of our quality forests as possible. If there are revisions to the Forest plan please consider strengthening protections of these magnificent trees. |
| Gary | Albright | Snohomish | WA | Please do all you can to save our forests. |
| Susan | Williams | Covington | WA | |
| Chuck | Foulke | Ridgefield | WA | |
| Andrea | Chin | Redmond | WA | |
| Georgina | Armstrong | Edmonds | WA | I support the ecosystem health that had been the primary goal of the Northwest Forest Plan. Our wildlife are struggling to survive due to our changing climate that is being caused by GHG emissions driven by fossil fuels. We need old growth trees for all the benefits they provide, not the least of which is carbon sequestration and wildlife protection, including species that our state is actively attempting to bring back like the salmon. Knowing that Indigenous tribes did not contribute to the amendment to the NW Forest Plan you are contemplating. These tribes should always have a seat at the table where land use is concerned, and must be respected by the US Forest Service. The amendment you propose will undermine the Plan's guiding vision, and will promote commercial logging and salvage logging in our National Forests, and this is unacceptable. Please either retain the existing Northwest Forest Plan, or include the Indigenous tribes in developing a more acceptable amendment. |
| Cathy | Arnesen | Olympia | WA | |
| Margie | Van Cleve | Selah | WA | |
| Linda | Montesi | Shelton | WA | |

| | | | | |
|----------------|--------------|-------------------|----|--|
| Vicki | Boeckman | Seattle | WA | Please do all you can to change the effects of climate change that are imminent as well as embracing and respecting the knowledge of indigenous people. The Pacific Northwest is unique to our country and to the planet. It simply must be protected. There are ways. Please. |
| Alice | Nicholson | Seattle | WA | |
| Molly | Cox | Bothell | WA | Our country is at a crossroads. It is critical every citizen stand up and protect our environment. Please, at this crucial time in our history, protect the Northwest Forest Plan. |
| Gregory | Espe | Seattle | WA | |
| Randy | Guthrie | Snohomish | WA | |
| Bruce | Gundersen | Poulsbo | WA | |
| JD | Carter | Brier | WA | We chose you to preserve and protect our forests. Please do so! |
| Larry | Franks | Issaquah | WA | I am a long time salmon advocate. Salmon have co-evolved with old growth forests, and will be irreparably damaged if the forests are lost. |

| | | | | |
|----------|------------|--------------|----|---|
| Jeanie | Bein | Bellingham | WA | |
| | | | | Our forests across the nation have largely disappeared replced with cities, towns, farmlands and ranches. It is time now to think about what needs to be preserved and that is our oldest standing forests. To me forests mean fresh clean air, clean water, habitat for wildlife, cooler and moister environment and a place of peace and solitude. I am blessed to live aside a forest and have some very close by in the North Cascades. I believe everyone should have the opportunity to spend time in forests. They can heal the soul. Please preserve what is left of our old growth and Legacy forests. We cannot afford to loose them. Our future generations, my grandchildren and their's depend on them . |
| Judith | Akins | Bellingham | WA | |
| Joseph | Piecuch | Suquamish | WA | |
| J | Conley | Seattle | WA | Walking or hiking in a beautiful forest is one of the pleasures of life. Please don?t let it become a rarity by not strengthening the Forest Plan sufficiently. |
| Dennis | Ledden | Sequim | WA | |
| Tracy | Ouellette | Bow | WA | |
| Mary | Olheiser | Burien | WA | |
| Jill | LaRue | Cashmere | WA | I visit the forest many times each month for my own health and well being . Let?s protect it! |
| Karen | Stevenson | Port Orchard | WA | |
| Diane | Marks | Port Angeles | WA | |
| Lin | Nacht | Seattle | WA | I remember when forests were clear cur across Snoqualmie Pass. We can?t go back. My family hikes and enjoys the forests of our region, and we take seriously our duty to care for the forests so that our grandchildren can experience the forests that we have protected. |
| Steve | Harrington | Lilliwaup | WA | |
| Alice | Pfister | Renton | WA | |
| Molly | Sutor | Spokane | WA | |
| Noah | Ehler | Carnation | WA | |
| Richard | Schoonover | Lakewood | WA | Please leave Our Old Growth Forests Wild |
| DESIREE | MARBLE | Port Angeles | WA | |
| GLENN | FRANKO | PORT ANGELES | WA | |
| Carolita | McGee | Port Angeles | WA | |
| Michael | Siptroth | Belfair | WA | |

| | | | | |
|---------|-------------|----------------|----|---|
| Lynn | Colson | Bellingham | WA | |
| Carrie | Pilger | Bellingham | WA | |
| A | G | Spokane Valley | WA | |
| Blanche | Tiernan | Everett | WA | |
| Joanna | Buehler | Issaquah | WA | More than enough of our natural world has already been trashed or sold off, please stop this destruction now. The NW Forest Plan was a compromise, but apparently the pigs have returned to the trough for more profit. These lands belong to all citizens and are an essential defense against climate change. |
| Rebecca | Lee | Anacortes | WA | |
| Dorene | Kelly | Bremerton | WA | |
| Nancy | Strand | Marblemount | WA | Protect our old growth and the wildlife that depend on them as well as slow climate change. |
| Denise | Stotsenbeeg | Coupeville | WA | WE need to PROTECT and PRESERVE what little remains. |
| Jini | Fisher | Issaquah | WA | |
| J | R | Orting | WA | |
| Nikki | Nafziger | Seattle | WA | |
| Melissa | Eriksen | Seattle | WA | As a residents of the Pacific Northwest, I hope that you will protect these important forests. They are critical to the health of our planet and the American people. |
| Sharon | Fetter | Puyallup | WA | |
| John | Dunn | Vashon | WA | |
| Linda | Ellsworth | Eastsound | WA | |
| M Lou | Orr | Shoreline | WA | Don't reinvent the wheel!!! Work with the plan and make it better but DO NOT dismiss it!! |
| Philip | Chanen | Seattle | WA | |
| Jean | Kroll | Bellingham | WA | The Forest Service should focus on the areas that need to be fixed, and build on the strong foundation of the original plan - not attempting to fix what's not broken. Our water, wildlife, and communities depend on it. Now is the time to speak up for our cherished older forests across the region. |
| Ellen | Madsen | Olympia | WA | These trees are vital to our fight against climate change & to sustain important & endangered wildlife. |
| Angela | Ginorio | Seattle | WA | A 100 year old tree will continue increasing its storage of carbon for generations beyond my time - or yours! PLS don't weaken its protections. |

| | | | | |
|----------|------------------|-------------|----|---|
| | | | | We need to be better stewards of this world for all life current and future. We are degrading the earth at a terrifying rate - faster than it can replenish itself. We should be taking every opportunity to slow and reverse this. This is one such opportunity. There are many forest ecosystems that we have already turned into wastelands with "trash" pines. I have hiked many of these. It is in those that we should develop plans for both restoration and renewable use. Let us not take apart the healthy forests we have here. We have pillaged mother earth and when trying to be responsible with extraction, we have made grave mistakes. Let us learn how to truly extract in a healthy, renewable way on the places already in ruins before we consider trying on healthy ecosystems. There is too much to lose, and time is running out. Peace, William Terry |
| William | Terry | Brinnon | WA | |
| Lore | Wintergreen | Vashon | WA | |
| Dennis | Bahr | Snohomish | WA | |
| Judith | Von Kleinsmid | Seattle | WA | |
| Kara | Harms | Bothell | WA | |
| Laurie M | Gogic | Kirkland | WA | Protecting forests is important to me because old growth trees absorb pollution in the air, provide homes and habitat for wildlife and are irreplaceable! Logging these ancient forests would be an injustice and a huge loss to the environment in our beautiful pacific northwest! Please protect these wondrous old trees from the chopping block! |
| Brandon | Bowersox-Johnson | Seattle | WA | I want the Northwest Forest Plan to continue protecting the world my son and future generations will inherit! Ecosystem diversity and ancient forests are precious and irreplaceable. I do not support any amendments that undermine the foundational pillars of the plan (as further explained). Please protect our forests and our future! |
| Tien | Vu | Renton | WA | |
| Eric | Breidenbach | Issaquah | WA | These forests are critical for carbon storage and biodiversity! |
| Katriba | Syetson | Woodinville | WA | |
| Freya | Fisher | Vancouver | WA | |
| Tim | Gould | Seattle | WA | Keep the NW forests' unique habitats in quality condition by not clear cutting old growth on National Forest lands. Our watersheds and wildlife depend on healthy forests, so the forest management should protect these treasured habitats. |
| Eric | Buhle | Seattle | WA | |

| | | | | |
|------------|-----------|------------|----|---|
| Derek | Benedict | Lynnwood | WA | |
| Janis | Olson | Bellingham | WA | |
| Betsy | Gross | Bellingham | WA | I strongly urge you to take all necessary steps to protect and restore all old-growth forests and imperiled species, and to incorporate Indigenous perspectives and stewardship |
| Patricia | Pedigo | Anacortes | WA | |
| David | Scheer | Bellingham | WA | We "must" continue to support the Northwest Forest Plan---since we 'need' as many trees here in the Northwest as possible! We need them not only because they are beautiful and nice-looking, but also to fight the climate change crisis we are facing---ie., they 'capture' the Co2 we're constantly producing with out vehicles.... and then they emit the wonderful oxygen that we and all 'life' needs to have(!). So huge forests are a 'must-have' that we must encourage to grow and PROTECT(!!). |
| Pam Turner | Turner | BELLINGHAM | WA | |
| Tracy | Ouellette | Bow | WA | |
| Linda | Ellsworth | Eastsound | WA | |
| Lori | Erbs | Acme | WA | Protect and restore all old-growth forests and imperiled species. Incorporate Indigenous perspectives and stewardship. Address climate change by recognizing the carbon value of our forests. Rely on best-available science for forest management in an era of wildfire. Recognize that protections for old forests, rivers, and species are what has made the NW Forest Plan successful. Do not rollback these key provisions! |
| Tracy | Wang | Seattle | WA | |
| Giles | Sydnor | Seattle | WA | |
| Michael | Sennett | Bellingham | WA | The percentage of old growth forest in the Pacific NW is in single digits, like the redwoods and sequoias of California. These facts prove the tremendous extent of the criminal plundering of the nation's forests for private profit.and yet this immense looting is not enough to satisfy the rapacious lust of th logging industry for harvesting every last old growth tree that has escaped its maniacal appetite for timber- much of which is exported as raw logs instead of providing work for sawmills. |
| Nathan | Williams | Olympia | WA | |
| Alison | Gilmore | Spokane | WA | Please safeguard old-growth forests by maintaining and improving the protections in the NW Forest Plan. |

| | | | | |

| Anna | Riggs | Portland | OR | |
| Carol | Milliman | Eugene | OR | It is so important to preserve our mature intact forests to help us mitigate the effects of climate change and keep our water safe and pure for all species |
| Laney | Kibel | Portland | OR | As fires destroy more habits it is imperative that we save and maintain existing forest and water sources. |
| Lee | Campbell | Mosier | OR | |
| Susan | Hawkins | Salem | OR | The forest service should be protecting our natural resources not selling them! We must safeguard our forests, wildlife and water for our children & grandchildren. We count on you not to sell out to corporations! |
| Lee | Hughes | Eugene | OR | |
| Russell | Eng | Portland | OR | Protecting forests is important to me because I care about these forests being preserved for my five grandchildren, with current ages from 1 (on January 14, 2025) to 14 years. |

| | | | | |
|-----------|----------|-------------------|----|---|
| Jack | Mattison | Eugene | OR | In my much younger days, I was a hiker and backpacker. On one hike that I recall vividly, I started in a second growth forest and progressed into an old growth forest. The difference was startling and these old forests need protection. Once they are gone, there's is no going back, so please continue their protection. Thank you. |
| Stephanie | Stephan | Beaverton | OR | |
| Domyo | Burk | Beaverton | OR | Please think of future generations. |
| Chris | Cairns | Salem | OR | |
| Cristina | White | Corvallis | OR | We need our old growth forests. Please protect them! |
| Ruth | Schmidt | Eugene | OR | Please protect these ecosystems!!! |
| Sarah | Stewart | Gresham | OR | |
| Sharron | Noone | Portland | OR | Oregon is special. Let's keep it that way!!! |
| Stephanie | Farrell | Seattle | WA | |
| Maxwell | Hanson | Seattle | WA | How many more mistakes do we need to make before we get the picture? |
| Skeeter | Ezell | Port Townsend | WA | |
| Casey | Forsyth | Olympia | WA | Please protect out trees and forests in WA state |
| Rachelle | Miller | Deer Park | WA | |
| Cynthia | Hardi | Port Orchard | WA | |
| Alana | Hartman | Bainbridge island | WA | |
| David | Albano | Seattle | WA | Please protect old growth forests for their ecological value, the wonder of them for people, and preserving our climate through sequestration. |
| Julie | Stohler | Bellevue | WA | We just visited the coast redwoods in Stout Grove. They are unbelievably impressive and sequester a huge amount of CO2. We need our foresta to be thick. My family makes frequent visits to NW forests and we love them. They are not a "crop" anymore and the Plan just needs amendment to include the contributions of the native tribes. Please don't allow more "harvesting" or it will rob the future of this public treasure plus climate help. Sincerely, our current & future family. |
| Angelina | Lacheur | Newport | WA | Depleting the forests is depleting the wildlife and the biodiversity which will harm all our lives not only worsening the climate but killing off animal and wildlife will kill off human life The percentage of forests and wildlife destroyed is already disastrous and causing animal extinction and climate change |

| | | | | |
|-----------|------------|------------|----|--|
| Lisa | Barton | Edmonds | WA | It is just the right thing to do! |
| Donna | Hutchinson | Seattle | WA | |
| Pat | Morrison | Freeland | WA | one of the most valuable assets in the word.... |
| Darlene | Hovatter | Puyallup | WA | |
| Erin | Grise | Seattle | WA | |
| Alice | Nicholson | Seattle | WA | |
| Liz | Wallace | North Bend | WA | No commercial logging! We need these trees and healthy forests, especially now with rising temperatures. Native forests can withstand fires. Damaging these forests through logging would put everything at risk. |
| Jacquelin | Perry | Vashon | WA | It is critical that we maintain the aspects of the NW Forest Plan that support conservation while also manage for fire, etc. As opposed to opening up to more commercial cutting without restrictions please employ practices that recognize the important role our forests play in the health of our planet. Supporting community forest programs such as the Mt Adam's Forest Stewards is an effective method of managing the woods for the benefit of the communities in which they exist. Incorporating indigenous practices would improve the plan. Please take this task seriously as the future of your grandchildren depends on it. Thank you, Jacquie Perry |
| Rebecca | Evans | Seattle | WA | |
| Bob | Kandiko | Bellingham | WA | |
| Debbie | Ramos | Renton | WA | |
| Nanci | Haddigan | Ruston | WA | There is nothing more beautiful on Earth than our magnificent trees and forest animals and birds. Saving them should be TOP priority. Thank you, Nanci Haddigan |
| Daniel | Cawlfild | Monroe | WA | Protecting forests is important to me because my health and mental health depend on proximity to forests, and spending time hiking in old growth and mature forests. I understand forests west of the pacific crest can survive without prescribed burns and logging. Dry climate forests need more management to ensure they don't create too much dry fuel mass. Please recognizing the carbon storage and sequestration values of old-growth forests. Please ensure land managers follow best available science to appropriately manage forests in an era of wildfire. Clear-cuts don't stop wild fires, Clear-cuts don't stop soil erosion. Re-planting clear cuts with single species saplings will lead to more uncontrollable fires and soil erosion. |

| | | | | |
|----------|-----------|-------------|----|---|
| Dan | Locke | Olympia | WA | Keep the mature and old growth forests uncut! |
| Mary | Fields | Seattle | WA | It's heartbreaking to see clearcuts. Please protect our beautiful forests which still remain. Our ecosystem cannot survive without them. |
| Megan | Machiniak | Bellingham | WA | The future generations depend on the decisions we are making now. It is our duty to ensure that we are responsible with our resources and decisions. Please think of your family and what kind of world you want to leave for them. |
| Chris | Southwick | Shoreline | WA | Mature and old-growth forests keep our air cleaner, reduce temperatures and make me happier when I walk amongst their large trunks and their thick duff. In addition to protecting the environment these forests improve my mental outlook. |
| Patrick | O'Keefe | Vancouver | WA | |
| Nelius | Njenga | Edmonds | WA | Please save the trees, for cleaner air and the coming generations. |
| Aliana | Ustanik | Seattle | WA | We need the lungs of the earth! |
| Jennifer | Durrie | Seattle | WA | Please keep the momentum for this important work. |
| Kay | Bland | Issaquah | WA | I want my grandchildren to experience hiking and natural beauty. |
| Lois | McIntosh | Vancouver | WA | Old growth trees need to be protected. They are centuries old and can not be replaced. |
| Cheri | Kerr | Woodland | CA | Please protect our forests for our children and grandchildren to enjoy and for all the animals that depend on it to live! |
| Beatrice | Bernhart | Belmont | CA | Forests have served us for millennia. They have given us fresh oxygen to breathe. We should be increasing them, not decreasing them. Given all the pollution we have now we need to cherish our forests and be grateful for all they give us. |
| Nancy | Bidgood | Vernonia | OR | I grew up next to an old growth forest, played under it with my friends, was soothed at night by its whispering waves?and I will not ever wish for it to succumb to commercial destruction!! I will fight for its legacy!!! So back off. |
| Linda | Abbey | Portland | OR | |
| Brad | Hagen | Ashland | OR | |
| Gayla | Leopard | Springfield | OR | |
| Sunny | Tabino | Summerville | OR | |
| Melissa | Sherwood | Roseburg | OR | Oregon broke a somber record in 2024 - most acres burned. We need our forests to protect against increasing carbon emissions. |
| C | R | Portland | OR | Keep our forests alive and healthy. Too many are already burning. |

| | | | | |
|----------|------------|---------------|----|---|
| Melissa | Cyders | Edmonds | WA | |
| Carolyn | Salmon | Port Townsend | WA | |
| Julie | Schliebner | Mount Vernon | WA | Let's not log ourselves out of very ecosystem we need to survive. Put living beings before corporations. |
| David | Chaney | Olympia | WA | |
| shelly | blazich | Poulsbo | WA | STOP DESTROYING OUR FEW REMAINING ECOSYSTEMS NOW |
| Barbara | Mckee | Vancouver | WA | |
| Brianne | Foster | Montgomery | AL | Late stage and old growth forests are an increasingly rare resource that deserve protection. Their biodiversity cannot be replaced and are incredibly important for local and native communities, scientific and medical research, and the health of our planet. Please do not abandon the Northwest Forest Plan and save these unique forests for future generations. |
| Scott | Goetz | Flagstaff | AZ | Forests are critical for habitat and climate change mitigation. |
| Martin | Robbins | Los Osos | CA | |
| Teri | Shore | Sonoma | CA | Adventuring in these public lands is essential to our personal health and conserving the forests, mountains and rivers as wild and free is critical for our climate health and future generations. |
| Marcin | Whitman | Cotati | CA | These lands should be manage to reestablish large late serial forests not for increasing the short-term logging cut |
| Jennifer | Bauer | San Luis Obis | CA | |
| Vicky | Hoover | Ss Francisco | CA | We NEED all the big old trees we can save to sequester carbon to mitigate effects of climate disruptions |
| mairs | ryan | la mesa | CA | Seattle is beautiful and clean because of the efforts to prevent over-logging. Its ordinance protecting trees provide a lush and green complement to the thriving city. People from all over the world visit the NW BECAUSE OF THE TREES. It is reckless and short-sighted to start slashing and cutting and then filling in the blanks with more housing. Look at what Los Angeles has done. Over cut, Over built and Over burnt itself down. We should not go back now. |

| | | | | |
|---------|---------|-------------|----|---|
| Theresa | Ryan | Healdsburg | CA | I have had two wildfires near my home that required evacuation. The fires in LA have been terrifying. Science tells us that old growth forests contribute to mitigating climate change, which was a component in those fires, due to their carbon sequestration benefits. This plan allows logging of old growth that I am completely opposed to for this reason among others. Science tells us that logging forests does not prevent forest fires but in fact makes fires worse. The forest service needs to hear that their actions will damage my safety regarding wild fires and that it also endangers all life including humans due to increasing climate change that the forests help mitigate. These are our lands. Please do not give in to greed of oligarchs to log and make money on forests that will never be replaced in our life time or the next generation. |
| Elayna | Trucker | NAPA | CA | |
| Tim | Tonsing | Felton | CA | The Northwest Forest Plan has been a huge success! 1 it ensures clean water for wildlife and humans. 2 it sequesters carbon. 3 it helps mitigate our insatiable thirst for fossil fuels. 4 it protects ecosystems for wildlife. 5 it provides recreation opportunities. 6 provides economic opportunities for rural communities (tourism), clearcuts don't. It is time the U.S. forest Service changes it's priorities and put the public, ecosystem preservation, and wildlife above being a logging business. It is high time that the U.S.F.S. be transferred to the department of the Interior. Tree's should not be thought of as corn (agriculture). |
| Lauren | Bowles | Los Angeles | CA | |
| Sam | Butler | Los Angeles | CA | I am greatly concerned that our old growth forests are being put in danger with the Forest Service's proposed amendment that would open the door to increased logging. The Forest Service must prioritize old growth forest integrity and health, not for profit extraction. We need these forests intact as a buffer against climate change and for eco-system health. The Forest Service must build on the strong foundation of the original plan, and not compromise the protections the current plans provides. |

| | | | | |
|---------|-------------|------------|----|---|
| Marla | Charbonneau | Cotati, Ca | CA | I am very concerned about possible amendments to the NW Forest plan. Having spent a lot of time over the years hiking in forests throughout the NW, I have great appreciation for our old growth forests in particular. I am particularly concerned about decisions fueled by potential timber profit versus more crucial long-term decisions that support climate stability. Whereas some forest management is necessary, more logging is not the best response to our current climate emergency. Thank you for reading my comments. |
| Sandra | Eppolito | Eureka | CA | I have traveled and seen first hand the scars that loggers leave behind. Please, for the sake of mankind protect the old growth. |
| Karen | Jacques | Sacramento | CA | I love the natural world, spend my vacations in forests and volunteer with the Sierra Club, 350 Sacramento, Defenders of Wildlife and the Endangered Species Coalition. I have loved forests all my life and, in my younger years, had the pleasure of taking inner city kids to visit them. I am alarmed and saddened by the relentless logging of old growth forests and the loss of biodiversity. I've done a lot of lobbying to protect wolves and other endangered species and was relieved when my state, California, gave wolves endangered species status. I want a forest plan that protects all remaining old growth forests. They are among the most beautiful places on earth and we have already lost too many of them. They are key to sequestering carbon and protecting air quality, water quality and biodiversity. I believe indigenous tribes, with their deep ecological knowledge, must be actively involved in protecting them, including overseeing controlled burns. Forests need their wisdom. |
| Nora | Privitera | Oakland | CA | Do not approve any plan that permits logging in old growth forests. |
| Sharon | Stock | Monte Rio | CA | It is urgent we protect our Old Growth forests |
| Querido | Galdo | Oakland | CA | |

| | | | | |
|----------|----------------|--------------|----|---|
| | | | | By loosening protections for rare, threatened, and endangered species, USFS is proposing to increase logging across the board and defy the intent of the NWFP. There should be more rigorous and transparent GHG accounting of thinning for fire reduction and getting out the cut. Thinning increases GHG emissions more than the fires that they are purported to diminish. After fires, the vast majority of carbon is still left in the forest. There should not be any assumption of complete incineration. downed, standing , and snagged burnt trees all have significant ecological function for wildlife, water cycles, soils, regeneration, and carbon sequestration. Logging and road building release carbon directly into the atmosphere, prevent additional sequestration, and cause climate stress. Only 20% of a harvested log makes it into a wood product. Logging residue, mill residue, and transportation GHG emissions are more immediately released to the atmosphere. Logging is not climate neutral! |
| Scott | Hatfield | Boulder | CO | |
| ellen | brennan-pierce | fort collins | CO | |
| Linda | Hutchins | Naples | FL | |
| Jenifer | Johnson | Marietta | GA | I am also horrified that Trump just opened up our federal forests to logging under the guise of a "timber emergency" or some such nonsense. The forests that are remaining must be left standing, in order to help fight climate change and provide a haven for precious wildlife! |
| Connie | Njust | Springfield | MO | |
| Jonathan | Howard | UNION CITY | NJ | |
| Carol | Valentine | Selma | OR | Vegetation treatments must be prioritized to protect communities by working from the home outward, not working at the landscape level in the backcountry where they can actually create windier conditions and invite invasive species as well as damaging soils and releasing carbon. The NWFP should retain the 80 year upper limit on harvesting, and continue to protect old growth at the stand level rather than individual trees in LSRs in dry forests. In mixed conifer SW Oregon forests, maintaining more closed canopy conditions will help maintain soil moisture and cooler conditions as climate change impacts hydrology and microclimates. |
| Robert | Harsell | Portland | OR | |
| Rose | Schneier | Portland | OR | I am a pediatrician and mother. We need to preserve old growth forests for future generations! |
| Kay | Hagen | Ashland | OR | |
| Edwin W | Moore IV | Springfield | OR | |

| | | | | |
|-----------|----------------|--------------|----|---|
| Mary Jo | Eyler | Salem | OR | Save the forest for future generations. I love Oregon because of the wild beauty just minutes from my home. Please don't destroy that which is beautiful and sacred. Think of your children and their children, do you want them to have these wild spaces to enjoy or do you want barren, dead lands. The choice is yours. But think about how future generations will remember you. |
| Vince | Lang | Azalea | OR | |
| Heather | Seal | Bend | OR | We need old growth forests now more than ever. If we cut them down they will never come back. Please protect them. Climate change is already destroying many. We can't afford to keep losing our precious trees. |
| Diane E | George | Hillsboro | OR | |
| Madeline | Kemp | Beaverton | OR | |
| Robin | Esterkin | Portland | OR | |
| bruce | fish | Bend | OR | |
| Jennifer | McDaid | Lostine | OR | |
| Randy | Jensen | Corvallis | OR | |
| Beth | Levin | Portland | OR | |
| Steve | Griffiths | Lincoln City | OR | None of the alternatives are satisfactory. They all weaken existing protections. |
| Ellen | Pfander | Creswell | OR | |
| Stephen A | Johnson | Portland | OR | Old growth forests are a natural resource not fodder for the lumber industry. |
| Ciji | Shelton-Flores | Portland | OR | We need the forests as much as generations to come. Think of tomorrow not just today. |
| Ron | Stout | Portland | OR | We need our forests more than ever now that global warming is in full swing . Forests protect our water and air . |
| Sandra | Elliott | Portland | OR | |
| Doris | Queener | Astoria | OR | |
| Pamela | Bolton | Forest Grove | OR | |
| Peter | Miller | Portland | OR | |
| Sandra | Joos | Portland | OR | |
| DORIS | TONSETH | Prineville | OR | Please do not do any more damage to our beautiful forests here in Oregon. |
| Donetta | Hornsby | Gresham | OR | I moved to Oregon from Utah to be among these precious trees. PLEASE save them. |

| | | | | |
|----------|--------------|------------|----|--|
| Caroline | Cunningham | Ashland | OR | |
| Harry | Freiberg | Brookings | OR | To borrow from Mark Twain: Guard & Protect our National and State Parks/Forests, shore lines, rivers, lakes, and wild lands. They are not being made anymore. |
| Arthur | Gardener | Eugene | OR | |
| Allen | Hancock | Eugene | OR | Thousands of acres of industrial forest land near me has burnt in wildfires. Logging will only make the weather hotter and drier leading to more fires. We need to protect the forests we have. |
| Dan | Baker | Portland | OR | Improve and rewild, don't dismantle . |
| Marilyn | Costamagna | Marilyn | OR | The forests' longevity prove that survival is in its interconnectedness..... the forest and all forest components, plant, animal, mineral, work together to give mankind what it needs to survive.... why does mankind keep trying to destroy what had sustained it since forever? |
| Charlie | Graham | Hillsboro | OR | |
| Anita | Leipper | Eugene | OR | Preserve ecosystems and habitat. Manage forests by regular controlled burns. |
| Denise | Wurtz | Portland | OR | Clear streams are important to the Salmon whose numbers are dwindling because of silt in the streams from erosion after cutting trees |
| Kristin | Smith | Portland | OR | |
| mike | glass | corvallis | OR | |
| Diane | Meisenhelter | Portland | OR | The actions being taken right now under the guise of Fire management are actually allowing logging in disguise and making forests drier and more vulnerable to future fire intensity. We need to save mature and old growth trees and protect them as global scientists have signified a need for at least 30% sequestration zones as a minimum as we go into these challenging years of climate chaos. The plan will allow logging in moist Late Successional Reserves as old as 120 years which is 40 years higher than current standards. An additional loophole would allow logging in stands originating as far back as 1825 if there were a ? compelling ecological rationale? proposed by the Forest Service. Existing old forests would never age into protection but remain on the chopping block. In addition, recommendations were for accelerated logging across 1/3 of all dry area stands regardless of land use allocations with protections only for trees over 150 years old. This is totally unacceptable. |
| Susan | Hartford | Hood River | OR | |

| | | | | |
|-----------|-----------------|------------|----|---|
| test | Gotfrid | Ashland | OR | I live in and drive through Oregon and am always shocked and dismayed when I see huge swaths of clearcutting. There simply must be a better way in this day and age to achieve more sustainable source materials. |
| Hope | Stanton | Nehalem | OR | Old growth is an irreplaceable resource. It is more fire resistant than young trees and shrub that inevitably replace it when it is logged. Trees sequester carbon dioxide and produce oxygen. They prevent erosion, provide habitat for hundreds of species and are an integral part of the PNW ecosystem which has been mostly wiped out. There is no reason to cut what is remaining for short term goals.. It does NOT increase fire danger |
| Alan | Colley | Portland | OR | I own land in Southern Oregon, consider myself a steward of it. I know first hand of the value of old growth trees around us. They are resilient in fire, they feed and produce strong offspring. Plantations of monoculture trees (mostly Doug fir) are sterile and extremely vulnerable to fires, like the Devil's Knob Fire which destroyed our property on September 5 last year - 2024. |
| Nancy | Haas | Bend | OR | |
| Elishka | Pierce | Bend | OR | Protecting old-growth forests and forest ecosystems is incredibly important to me because they provide critical habitat for hundreds of species, sequester carbon, clean our air, and make our home inspiring and beautiful. They deserve our protection and respect, please. |
| Michael | Hoover | Beaverton | OR | |
| Leslie | Payne | Lebanon | OR | Please do the 'right thing' and protect our forestry. |
| Philip | Randall | Bend | OR | |
| Sean | Brady | Portland | OR | |
| priscilla | Murray | Scappoose | OR | Now more than ever we need to protect our forests in the Pacific Northwest. They give us the air we breathe. |
| Mary | Schmitt-Capwell | Sweet Home | OR | Protect old growth, period! |
| Susan | Weatherby | Madras | OR | With all the present and looming chaos, our forests are an escape to sanity and reality. Don't destroy them! |

| Rick | McMonagle | Portland | OR | |
| Rich | Yeager | Portland | OR | Please continue to preserve the forest we have left to save. Say no to commercial logging. Maintain the Northwest Forest Plan. |
| Pam | Tinker | Eugene | OR | |
| John and Polly | Wood | Hood River | OR | Forests make more money when they are left standing. |
| Thomas | Keys | Gresham | OR | |
| Ann | Laffin | Hillsboro | OR | |
| Sean | Leslie | Bend | OR | |
| Rita | McKissick | Albany | OR | |
| Daniel | Miller | Estacada | OR | |
| Marie | Suhre | Bend | OR | Protecting our old growth forests is vital to protect our watersheds, flora and fauna diversity, climate change resilience. Please ensure that your planning includes many indigenous voices. Thank you for saving our forests for future generations. |
| Jacalyn | A Callies | Canby | OR | The trees in our beautiful state are what makes Oregon so special. Please protect them from over logging. |
| Stephen | Bachhuber | Portland | OR | |
| Tom | Beatty | Coburg | OR | |
| Kaye | McDonald | Portland | OR | For the sake of the world, its creatures, and our grandchildren. |
| Gene | Gossett | Portland | OR | |

| | | | | |
|-----------|-------------------|---------------|----|---|
| Jane | Bartosz | Salem | OR | It's important to keep clean water and air, which our forests and natural areas provide, safe now and for our future health. |
| Charles | Fillipucci-Arnett | Hillsboro | OR | Leave Oregon's forests alone! Greed is destroying our planet! |
| Arun | Toke | Eugene | OR | We need to preserve and protect our ancient forests for future generations and for biodiversity. Please strengthen the NW Forests plan. |
| STEPHANIE | PFLASTER | PLEASANT HILL | OR | |
| SARAH | GRIMM | Eugene | OR | Keeping the last of our planet's old growth ecosystems intact is priority 1! --so necessary, as is reforestation!! Don't you care about the lives of your children and grandchildren, and theirs? If the Forest Service does not take every action possible that lessens global warming NOW, today, some could call it a dereliction of duty! |
| Cheryl | Walsh | Eugene | OR | Although changes should be made to the NW Forest Plan to make it more effective in terms of climate change and potential wildfire management, its basic tenets should be upheld and strengthened. |
| Elizabeth | Menetrey | Astoria | OR | |
| Patrick | Roberts | Redmond | OR | |
| Laurie | Holser | Portland | OR | |
| Amy | Ayrsman | Eugene | OR | Save our old growth forests |
| Ronald | Varekamp | Portland | OR | |
| Stephen | Cutler | Yachats | OR | |
| Allen | Crutcher | Ashland | OR | |
| Megan | Dussault | Keizer | OR | Oregon's ancient old growth forests are a priceless, non-renewable resource. Once they are cut down, they are GONE and take THOUSANDS of years to recover (if they ever do), far longer than any human lifespan. Protect these forests, for all of us and the wildlife that depends on intact old growth forests! |
| Helen | Dixon | Portland | OR | |
| Amanda | Powell | Eugene | OR | As new leadership comes to the Oregon forestry service, please stand strong with our deeply valued co-inhabitants?the oldest trees. |
| Jynx | Houston | Portland | OR | LEAVE IRREPLACEABLE OLD-GROWTH TREES ALONE. |
| Janice | VrMeer | Ashland | OR | We need to be protecting more of our old growth forests not cutting them down! With all we know today, how could we even consider such a reckless shortsighted plan? |

| | | | | |
|------------|------------|-------------|----|---|
| Alan | Kirk | Corvallis | OR | I care about this issue for the sake of future generations, who will bear the impacts of climate change even more than we have. Your role is to weigh the cost of any proposed changes to public health and well being against any private interests. |
| Joel | Kay | Milwaukie | OR | |
| Nan | Artman | Portland | OR | Thank you. |
| Lynn | Delatorre | Portland | OR | The old growth forests can't simply be replanted. Please preserve this important ecosystem. |
| Michael | Janes | Eugene | OR | |
| Carol | Lee | Lake Oswego | OR | |
| Judy | Loney | Portland | OR | |
| Christine | Whaley | BLUE RIVER | OR | For future generations. |
| Drew | Fletcher | Portland | OR | |
| Linda | Medeiros | Medford | OR | In this age of global warming we need trees to sequester carbon and keep the planet cool. We also need them to prevent mudslides, soil degradation and give us wilderness to explore. |
| Kacie | Christie | Tualatin | OR | We need to protect our forests now more than ever. With global warming and increased natural disasters, we have to tend to our natural resources to assist in the challenge of climate change. |
| Roxanne | Pryhorocki | Salem | OR | Old Growth trees filter the air, protect the trees around them and weather storms and fires better than smaller trees. They're irreplaceable. Clear cutting is ugly and allows erosion, mud slides, etc. Incorporate Indigenous perspectives and stewardship. Protect the life in the forest, both plant, animal and fish with clear clean streams and rivers |
| Marguerite | Eliasson | South Beach | OR | |
| Joan | Gross | Corvallis | OR | |
| Veena | Singwi | Eugene | OR | |
| Tyler | Nishitani | PORTLAND | OR | As a lifelong Oregon resident and architect designing mass-timber wood structures, it's incredibly valuable to preserve ancient forests so that we can learn from natural ecosystems to better inform sustainable forest management, ensuring long term climate and wild fire resilience and forest product availability. |
| Jamie | Shields | Rainier | OR | |
| Robert | Phelps | West Linn | OR | I want my grandchildren to be able to see such forests |

| | | | | |
|----------|-------------|-------------|----|---|
| Kathleen | Pavlick | Tigard | OR | Please take my concerns seriously. I am always so upset by the lack of respect & honor for all the beauty of nature- trees, plants & the whole eco system. |
| Karen | Hooper | Portland | OR | |
| Mary | Buckley | Portland | OR | |
| ANGELINA | VASILE | Portland | OR | Please do the right thing. |
| robert | hiatt | Oregon City | OR | I have spent my lifetime rejoicing in the Northwest Forest's habitats including its Old Growth Forests and Iconic Mountain Peaks. It is the 1994 forest plan that protected this environment for all the inhabitants of the NW to use so lets not change the goals of that plan that have protected this environment for all these years and in fact lets make it more inclusive and protect those species and plants that are now endangered by climate change so future generations can enjoy their many natural beauties and environments. We can do this if we all work together! |
| Susan | Langston | Portland | OR | |
| Katie | Haldeman | Bend | OR | |
| Kathy | Stasny | Ashland | OR | Please protect our old growth forests while encouraging thinning of the forest to make it healthier! |
| Margaret | Quentin | Portland | OR | Protecting the forest is so important, for all of us and wildlife. Once it's gone, it's gone forever. |
| Carey | Wickham | Portland | OR | |
| Margaret | Prag | Williams | OR | |
| Dawn | Griffin | Pottland | OR | |

| Linda | Skonberg | Sutherlin | OR | |
| Sandra | Holmes | Portland | OR | |
| | | | | <p>I retired 7 years ago as a family physician providing primary care in the medically underserved community of The Dalles, OR, in the Columbia River Gorge. I now am an OSU-certified Oregon Naturalist and Land Steward. I do volunteer work on the Columbia Gorge preserves of the Friends of the Columbia Gorge and The Nature Conservancy.</p> <p>My wife and I own 10 acres of mixed oak and conifer forest in a high-risk wildfire area. We are diligent about managing our land and forest to have a strong defensible space for our two houses.</p> <p>The critical role of old growth forests in a healthy and resilient environment is even more important now with climate change and extinction pressures on many species. Research has discovered the deep connections and interdependence of old growth forests that are disrupted and destroyed by logging. We need to protect and preserve old growth forests for the benefit of ourselves and future generations. Once they are gone, it is impossible to bring them back.</p> |
| John | Rogers | Mosier | OR | |
| | | | | <p>We NEED our MOTHER TREES! They are the ones, who give a home to wildlife, produce tree seeds for future tree generations, and give instructions about life and how to survive to their tree offspring; AND, old growth forests create WATER for people to drink. We are all ready in a drought! Why do you forest people want to create MORE DROUGHT, by cutting down our old growth forests!</p> <p>We need our old grow forests preserved from logging. It is time to stop the destruction of our forests, through logging!</p> <p>We need our old growth forests, so we can have water to drink, water to bath with, water to wash our dishes, water for our lawns, and to be able to wash our clothes with when needed.</p> |
| Anne | Marsh | Springfield | OR | |
| Rick | Ray | Troutdale | OR | |
| Nic | Petersen | Portland | OR | |
| Eileen | Ordway | Springfield | OR | We need to protect old-growth forests and their ecosystems from human harm and greed! |

| Susanna | Askins | Bandon | OR | Coos County is clear cutting forests left and right! |
| Greg A | Steinke | Depoe Bay | OR | |

| | | | | |
|--------------|-------------|-------------------|----|--|
| Ann | deSilva | Bend | OR | |
| JO | HOENNINGER | Portland | OR | These old growth forests serve a vital function in slowing down climate change and providing critical habitat for wildlife. Please embrace science-based methods of fire prevention and preserve our old growth forests! |
| Kathy Oriana | Kahn Hurwit | Eugene | OR | Don't imperil a 30 year GOOD plan. |
| Gayla | Leopard | - Springfield- OR | OR | |
| Marg | Bartosek | Corvallis | OR | We are so blessed with our beautiful natural environment in OR! Let's keep it that way. Our oldest forests are essential to protect. They are irreplaceable! Please act quickly! |
| Rolf | Friis | Happy Valley | OR | |
| Lisa | Read | Happy Valley | OR | |
| Chip | Hall | Manzanita | OR | We can't afford to go back. |
| Cerissa | McFarlane | Portland | OR | |
| HEATHER | DALE | Wilsonville | OR | |
| Tiffany | Wyatt | Medford | OR | Please protect our old growth forests. They are so important to our health and future in their current capacity, not as disposable lumber. The ecosystem is irreplaceable. Please protect it! |
| Pat | Bowman | Portland | OR | I have lived in the NW almost all my life and actually our house is near one of the largest urban parks in the United States. The NW Forest Plan was ahead of its time and ABSOLUTELY NEEDS TO BE PROTECTED!!! |
| Setsuko | Maruki-Fox | Grants Pass | OR | |
| Veroune | Chittim | Selma | OR | Oregon is looking more like advertisement for becoming the next brush field where once beautiful healthy trees grew. |
| Susan | Crabtree | Portland | OR | Protecting our environment is key to our future. Please protect our mature and old growth for us for generations to come! |
| Sandra | Van Calcar | Tualatin | OR | I see no reason to "delist" old growth forests in the Pacific Northwest - some things do not need to changing..... |
| Alan | Lawrence | Portland | OR | |
| Barbara | McSpadden | Cave Junction | OR | Protect old growth forest by encouraging sustainable hemp industry for all of our paper, building, agricultural and industrial needs. |

| | | | | |
|---------|----------------|-----------|----|---|
| | | | | I am writing to you today to urge the US Forest Service to preserve the Northwest Forest Plan as they address the National Forests in the Pacific Northwest. For the past 30 years, the Northwest Forest Plan has protected mature and ancient forest ecosystems and the animal species that live within them. Sadly the Plan faces an uncertain future. Please reject provisions in the proposed amendment to the NW Forest Plan that would undermine the guiding vision and would allow and promote commercial logging and salvage logging in our National Forests. Rather than depart from the original Plan that has protected these key ecosystems, please focus changes on areas that need to be fixed, and build on the strong foundation of the original plan. This is important to me and many others who live here in the Pacific Northwest because of the immense values that these healthy forests add to climate protection, the survival (and hopeful vitality) of endangered species that depend on these forests. |
| Michael | Heumann | Portland | OR | |
| Ann | Nowicki | Eugene | OR | |
| Kendra | Tester | Tillamook | OR | Many of these trees have been growing longer than we have been on the earth. Please try to save them for us and our children. |
| Dru | Peterson | Astoria | OR | |
| Gail | Mahan | ASTORIA | OR | |
| | | | | The Northwest Forestry Plan is VITAL to keeping ecosystems intact. It has been proven that we need to save ecosystems- not just species. Each piece of the puzzle is vital. Let's learn from our previous mistakes and keep a plan that: Protected irreplaceable old-growth forests Preserved critical habitat for imperiled species Set a precedent for forest management that prioritized intact forests -- not timber harvest Now more than ever we need to use our new knowledge to step forward for future generations. Let's show the young people of today that we can make informed decisions that have the correct and logical outcomes in mind- rather than political and/or brief financial gain. What will be your legacy? How do you want your actions to be remembered? Focus on the long or short term? A focus on an ecosystem or a political system/corporate agency currently in ?power? with self centered focus that will NOT stand the test of time? |
| Brenda | Holmes Stanciu | Warrenton | OR | |
| Ian | Williams | Siletz | OR | |

| | | | | |
|----------|-----------|-------------|----|--|
| Garet | Voit | Portland | OR | The Oregon wilderness is a key part of my physical and mental health. Hiking, fresh air, and a sense of wonder are just a few of the things I regularly appreciate about our forests. I also know what a critical role these forests play in keeping our environment stable for humans and animals. We cannot continue to cut what cannot be replaced in our lifespans. |
| Marissa | Wolfheart | Portland | OR | |
| Cristina | White | Corvallis | OR | Please protect our mature and old-growth forests here in the Northwest. They help keep our earth, air, waters healthy, and provide food and shelter for countless diverse species. These forests are vitally important to our well-being as well as the health and well-being of countless animals, birds, fish, fowl and insects. |
| Alisha | Davis | Eugene | OR | |
| Hella | Nordberg | Salem | OR | |
| Michael | Foster | Springfield | OR | |
| Dana | Weintraub | Beaverton | OR | |
| Caroline | Duley | Portland | OR | |
| mary | troutr | Portland | OR | PLEASE CONTINUE TO PROTECT THESE MAJESTIC AND AMAZING OLD GROWTH FORESTS THAT ARE HOME TO BIRDS, LAND ANIMALS, INSECTS, AND NETWORKS TO OTHER TREES AND PLANTS. THEIR LIVES ARE CRUCIAL AND IMPORTANT ON THIS EARTH THAT IS IN DIRE DANGER. THEY DESERVE TO LIVE AS WELL AS ALL THE SPECIES THAT CALL IT HOME. STOP BEING GREEDY. THEY ARE LOVELY AND CLEAN OUR AIR AMONG SO MANY OTHER THINGS. THIS IS THE ONLY EARTH WE HAVE! STOP CUTTING DOWN THESE TREES LIKE THEY MEAN NOTHING. THEY ARE EXTREMELY IMPORTANT IN OUR ECOSYSTEM AND NEED TO REMAIN ! |
| Charlene | Larison | Springfield | OR | Older forests have a multitude of values to organisms, including humans, that live on our planet. One characteristic particularly important in our current time is that they are wonderful carbon sinks. |
| terri | stewart | ashland | OR | Stop the destruction. Save our Forests. Save our Wildlife. Restore our Planet. Preserve our Forests. Protect our Future. Protect the natural environment. |
| Emma | Wear | Portlnad | OR | I value the preservation of our remaining old growth forests - visiting these ancient ecosystems is awe-inspiring. If lost, they could not be replaced in several human lifespans. |
| John | McSwigan | Hillsboro | OR | |

| | | | | |
|----------------|-------------|--------------|----|--|
| Marie | Jackson | Eugene | OR | Protecting forests matters now more than ever. |
| Helen | Jones | Ashland | OR | |
| Susan | Heath | Albany | OR | |
| Barb | Tiede | Beaverton | OR | |
| Jukka | Naukkarinen | Deaadwood | OR | Other species on this planet has a right to exist too. Please protect the forest and its habitats. Planting trees takes too long, 15-20 yrs before they start capturing carbon, hence preserve the existing old growth. Thanks ! |
| Luke | Pederson | Beaverton | OR | Honor the northwest Forest plan. Do not alter it. Save the irreplaceable Old growth forests. All of them. Thank you. |
| Elaine | Henderson | Portland | OR | |
| Barbara | Troxel | Gresham | OR | |
| Scotty | Johnson | Portland | OR | |

| Jaime | Ramirez | Corvallis | OR | |
| Craig | Mackie | Camp Sherman | OR | |
| Victoria ('V') | Eells | Gold Beach | OR | |
| Victoria ('V') | Eells | Gold Beach | OR | |
| Nancy | Phillipa | Philomath | OR | Protect and restore all old-growth forests and imperiled species Incorporate Indigenous perspectives and stewardship Address climate change by recognizing the carbon value of our forests Rely on best-available science for forest management in an era of wildfire Recognize that protections for old forests, rivers, and species are what has made the NW Forest Plan successful. Do not roll back key these provisions |
| Heather | John | Portland | OR | Our forests are vital for mitigating climate change and providing habitat. They are diverse ecosystems that need to be honored, preserved and thoughtfully stewarded. |
| Valerie | White | Bend | OR | Update the plan to go with the climate changes occurring worldwide, everything is linked on earth. |
| Scott | Kennedy | Keizer | OR | |

| | | | | |
|-----------|-----------------|-------------|----|---|
| inga | fisher williams | portland | OR | I care about strengthening protection of intact woodlands and old growth forests as important for climate resiliency, wild life and offset to increasing urbanization. Mature forests have been shrinking as practices for timber have adopted 35 year rotations on replanted trees - as absurd a practice as can be based on best available science for managing forests. |
| Christine | Reed | Beaverton | OR | |
| Catherine | Leach | Springfield | OR | |
| Denise | Mitchell | Gearhart | OR | |
| Rebecca | Hollenbeck | Sherwood | OR | |
| Sarah | Medley | Portland | OR | |
| Cheryl | Miller | Portland | OR | Protect our beautiful state. |
| Morton | Smith | ASHLAND | OR | |
| Sue | Muth | Beaverton | OR | |
| Sarah | Chaney | CORVALLIS | OR | Protecting the forests has been shown recently to be even more important for wildlife in streams and rivers than when the NW Forest Plan was enacted. In addition, we need to conserve as much forest as possible for our own health and the health of the planet. Please do not go backward, but continue to go forward with the NW Forest Plan. |
| Timothy | Leavey | Bend | OR | I urge you to uphold and strengthen the Northwest Forest Plan, which has successfully protected the Pacific Northwest's forests, rivers, and wildlife for 30 years. This science-based plan has preserved vital ecosystems, maintained water quality, and supported sustainable fish and wildlife populations. As amendments are considered, it is crucial to focus on necessary updates such as improving wildfire management using the best available science while maintaining the plan's proven protections. Increased commercial and salvage logging could disrupt fragile ecosystems, degrade watersheds, and harm fisheries that are economically and ecologically significant. The Northwest Forest Plan is working. Let's improve what is necessary without undoing decades of progress. |
| Mary | Dietrich | Lake Oswego | OR | Old-growth forests are treasures to our State and Country. They need to be preserved, not chopped down to build a house, etc. They harbor many species of birds, animals, fish in the streams running through them, etc. PLEASE leave them alone!!!!!!!!!!!!!! |

| | | | | |
|----------|---------------|-----------------|----|--|
| Betty | Massoni | Corvallis | OR | |
| Allison | Everitt | Salem | OR | |
| Pamela | Dillehay | Eugene | OR | Please protect our remaining irreplaceable mature and old-growth trees in the Northwest. |
| Cliff | Feldman | Corvallis | OR | I live on the edge of pristine forests in Oregon and spend a lot of time hiking through them. Let future generations have the same privileges I have - maintain the forests for the future. They are not just ours, but everyone's. Let our children and grandchildren experience them the way we have. |
| Debra | Smith | Milwaukie | OR | |
| Robert | Smith | claackamas | OR | We NEED a healthy planet!!!!...PLZ/THX |
| Phyllis | Grove | Bend | OR | |
| Benjamin | Hauck | Florence | OR | As an outdoor loving Oregonian, I spend countless hours in the trees, hiking trail running, foraging for mushrooms or berries, or just enjoying their calm natural beauty. The forests are absolutely critical to our state and to the world, and deserve our protections. |
| Gina | Bramucci | Portland | OR | |
| Pat | Knight | Salem | OR | The quality of life in the Pacific NW depends on healthy forest systems. |
| Terry L | Barber | Springfield, OR | OR | |
| Jean | Baecher Brown | Portland | OR | Everything about the NW Forest Plan has been a plus for all of nature, including the plants and animals and habit that helps to slow the seriousness of our warming planet. |
| Cleo | Reilly | Portland | OR | |
| leann | magee | Portland | OR | Just as people grow and change, so do our institutions and culture. Oregon has always had a strong timber economy, and indeed, this sustained my family for 3 generations. What we need now is strong protections for anything which sustains our natural environment. We have built our infrastructure and continue to improve resources to build without virgin wood products. More important than ever is clean air and carbon loads. As a native Oregonian, I've seen the drastic loss of these basic necessities to life. At the rate we are going, our precious forests will be gone, and our economic stability along with it, leaving nothing for my grandchildren. The time has come to put every ounce of energy into keeping what is left of our forests, protected for future generations. |

| | | | | |
|----------|---------------|---------------|----|--|
| Jenny | Bedell-Stiles | Portland | OR | Our forests are critical as a place to escape the busy world we humans have created, and find peace with the world of wild things. Oregon's forests are where I track the presence of wildlife, camp/backpack, and find myself again. We should be focused on saving our treasured and ecologically-rich forests for ourselves and future generations. |
| Doranne | Long | Grants Pass | OR | Please preserve our natural lands, water, and air, for all of the creatures, including us humans! |
| Ed | Kushner | Portland | OR | I am 82 and enjoyed hiking and backpacking well into my 70's. It is extremely important that my grandchildren have the opportunity for these activities when they become young adults. |
| Pam | Gormley | Beaverton | OR | |
| T | Cartwright | Klamath Falls | OR | Preserve & Expand critical habit & sensibly manage Oregon Ecosystems, Habitats & Forests for the longevity of conservation for the future & future generations. Stop using our Forests, wildcards, grasslands, waterway & their precious remaining resources as give aways to corporations who extract without cleaning up after themselves nor replant & repair their impact on our Waterways Forests * & Native grasslands. Strengthen & Expand the NW Forest Plan. Thank you. |
| Janice | Moore | Eugene | OR | We need to preserve our old growrh! |
| Leah | Yamaguchi | Fairview | OR | |
| Jeffrey | Koutroulis | Corvallis | OR | Please |
| Peggy | Loveless | Hillsboro | OR | |
| Linda | Burgel | Bend | OR | Our old growth forests not only provide homes for threatened and endangered species but also store the most carbon. We must preserve them for ourselves and our future generations. |
| karen | horton | Independence | OR | |
| H.M. | Sustaita | Eugene | OR | Now is the time to save all of our green spaces for the future. |
| Gerald | Lofquist | Portland | OR | Save our planet...Save the trees ! |

| Patty | Pomeroy | Irrigon | OR | |
| Patty | Pomeroy | Irrigon | OR | |

| | | | | |
|---------|---------------|----------------|----|---|
| Ila | Fetterly | Rainier | OR | Here in Western Oregon, we are a part of the "Emerald Edge" a temperate rain forest extending from Alaska to the Oregon-California border. It may be the largest remaining temperate rain forest in the world, and we need to preserve it for future generations and for the planet. These trees sequester literally tons of carbon, helping protect all of us from climate change and global warming |
| Carmel | Valencia | North Bend | OR | We are only the caretakers of this land - we have a moral duty to consider the next 7 generations. |
| Gary | Millhollen | Eugene | OR | |
| Nancy | Fleming | Lake Oswego | OR | |
| Andreas | Moran | Tigard | OR | |
| David | Klingensmith | eugene, oregon | OR | |
| Angela | Wanak | Salem | OR | Please protect the old growth forests and the creatures that inhabit them. The health of their lives are important to me. |
| Corinne | Sherton | Salem | OR | |
| Mary | McDermott | Portland | OR | Save the old-growth for future generations! |
| Alicia | Liang | Portland | OR | |
| Dresden | Skees-Gregory | Hillsboro | OR | With so many wildfires destroying so many forests, this can't wait. |
| Kate | J Miller | Lake Oswego | OR | PNW forests are integral to the salmon population , we cannot violate the climate impacts to rising temperatures in streams without habitat conservation. This is a huge industry that employs many more people with fishing and sports fishing, as well as native treaty rights. Act to maintain natural forests and not create more tree farms. I have worked as a firefighter and see that we need more serious attention to habitat |
| Debbie | Fields | Bend | OR | |
| Lena | Randall | Corvallis | OR | For various reasons we need whatever remaining forests we have left to stay. Everyone, including logging companies, will face detrimental impacts from the loss of our forests. Health impacts, lack of oxygen, lack of greenhouse gas offset from the trees, and loss of other species we rely on that rely on the forests. the fact of the matter is that we are cutting too many trees and the forests don't grow fast. We need to consider less development, utilizing abandoned buildings that are already built, and subsidizing logging employees to ensure they have the funds necessary to keep them alive while we reduce logging as a whole. |
| Ruth | Schellbach | Salem | OR | |

| | | | | |
|----------|------------|-------------|----|--|
| Thomas | Keys | Gresham | OR | |
| Geoffrey | LaRoche | Beaverton | OR | Don't gut the forest protection plan. Preserve old growth forests but also thin and manage our forests. |
| Diane | George | Hillsboro | OR | |
| Marilyn | Costamagna | Marilyn | OR | |
| Mary | Harwood | Newberg | OR | My family loves calling Oregon home, as did my mother, grandparents, and great-grandparents before me. Protecting the beautiful forests and green-spaces is important for keeping areas that are pristine as habitat, outdoor recreation sanctuary, and filtration for our air and water that we all depend on. I want to leave Oregon a better place for my children and all those blessed to call it home. Please protect the mature and old growth forests. They cannot be replaced. |
| Terry | Donahe | Lake Oswego | OR | Let's save our forests! |
| Patricia | Gifford | Portland | OR | Big trees and big healthy forests protect our future and make us healthier. So good for all of us and the planet. Please save them. |
| Doris | Tonseth | Prineville | OR | Don't let this administration scare you into doing something you will regret. They too shall pass. |
| Diane | Meyer | ASHLAND | OR | |
| Natalie | Schoeppler | Bend | OR | Please protect old growth forests, we have enough pine and fir plantations for lumber. |
| Susan | Hartford | Hood River | OR | |
| Chris | Henderson | Philomath | OR | |
| Tom | Beatty | Coburg | OR | |
| Greg | Jacob | Hillsboro | OR | In 1994 the NWFP was adopted to stop logging practices that decimated old-growth forests and destroyed critical habitats for endangered species. Now proposed changes to the Plan reveal increased logging on federal lands across the Pacific Northwest in the name of fighting fires. That is baloney. This amendment should not go forward because it does not keep current protections, it does not include genuine tribal involvement, and it does not protect climate-buffering forests. |
| louis | roth | Terrebonne | OR | Stop killing old growth forests. Corporate profits don't mean anything. |
| KRIS | YORK | Talent | OR | As a native Oregonian, former wildlife habitat worker and current graduate student in sustainability, I urge you to continue to protect our forests. |

| | | | | |
|-----------|-----------|-------------|----|---|
| Stephanie | Toohey | Corvallis | OR | Continue to protect old-growth forests across the Northwest! |
| Donna | Mulvey | Grants Pass | OR | Leave the trees. |
| Dave | King | Portland | OR | Old growth holds more carbon than anywhere else. Please save it and add to it. |
| Robyn | Hauck | Corvallis | OR | Our old growth forests are irreplaceable treasures. Protect them! |
| | | | | If you use it, it is used up. Gone. Yes, it grows back, but OLD-Grow is OLD. Your great Grandkids won't have it... unless you preserve it. Please; as an American Citizen and your Constituent, I am both requesting... and REQUIERING you to oppose any-and-all efforts by politicians for the next 4 years to log/clear-cut/harvest/re-categorize or otherwise tamper with this Legacy of ours. It is a !!Treasure!! It will NOT be if you don't defend it. Sincerely yours, Sean Hammond (Teacher/Landlord/American-Patriot) |
| Sean | Hammond | Eugene | OR | |
| Kristin | Van Donge | Redmond | OR | |
| Donna | Mulvey | Grants Pass | OR | I want mature trees, forests, and the ecosystems they support to thrive. Forest defense is climate defense. |
| Linea | Fuller | Sisters | OR | |
| Leslie | Payne | Lebanon | OR | |
| Leslie | Payne | Lebanon | OR | It is imperative that we continue to protect what we have. As well as look to the future, planning ahead to maximize our own ecosystem. |
| Elena | Beitzel | Bend | OR | |
| Beth | Jacobi | Bend | OR | I live in Bend, Oregon. |
| Kathleen | Roche | Bend | OR | Mature and old-growth forests are unique and important wildlife habitat. This is important and urgent the new northwest forest plan is anticipated to make decisions about the future of these forests and the wildlife and fish dependent upon them. |
| Cynthia | Chrystal | Bend | OR | |
| Andrew | Simrin | Eugene | OR | We need to do more to protect, preserve, and enhance our old growth and mature forests. |
| Phil | Goldsmith | Portland | OR | |

| | | | | |
|---------|----------|----------------|----|--|
| Delaney | Reed | Oregon | OR | Hello, I'm Delaney and I'm a teacher and I want you to know how much the trees and our earth's roots mean so much to our next generation. Ancient trees impact so many things and I plead that you create laws to protect them. Our next generation needs the trees and we need them to keep in touch with our roots. |
| Oliver | Martin | portland | OR | |
| Deborah | DeChaine | Portland | OR | In addition to being beautiful and excellent at sequestering carbon dioxide to reduce weather destabilization, mature trees' connections with all the trees around them protects the whole forest. They use soil fungus networks to pass resources like sugars and nutrients to younger trees and release signaling molecules to warn of drought and insect attacks, so neighboring trees can prepare. This 4-minute TED-Ed video "The secret language of trees" is a great illustration of how intimate relationships are. The interconnectedness is really amazing! Removing old-growth and mature trees shuts down this communication and negatively impacts the health of the entire forest. https://www.youtube.com/watch?v=V4m9SefyRjg . |
| Emily | Davidson | Virginia Beach | VA | The ongoing protection and preservation of our environment should not be a political and/or economic issue. Cutting down old-growth and mature forests today will only serve to hasten the impacts of climate change, impacting all future generations. By choosing to protect our environment today, you are choosing to be a positive source for future change. Thank you. |
| Pam | Tinker | Alexandria | VA | I moved to Oregon thinking that it was forested, but was so saddened to see that most of it is in the form of plantation trees. It would be immoral and a travesty to cut the remaining old growth forests. As a Cherokee Citizen living in the territory of other Indigenous Tribes, it is very important to me to respect and protect what is left of unspoiled lands for cultural/spiritual purposes of the original inhabitants. |
| Steve | Williams | Tacoma | WA | |
| Emily | Austin | West Richland | WA | |
| Polly | Freeman | Seattle | WA | As a lifelong outdoors person and a mom who understands how healthy forests help preserve our environment for the future, I'm asking you to please protect our forests! |
| Andrea | Chin | Redmond | WA | |

| | | | | |
|---------|----------------|---------------|----|---|
| David | Scheer | Bellingham | WA | You MUST "protect" our mature and old-growth forests here in Wash- ington State! They pump out a tremendous amount of O2 in the fight against the climate change CRISIS...which is presently the very worst Planet Earth threat---because if we don't conquer 'that', continued life here is doomed!! So PROTECT every tree and forest we've got!! |
| Nancy | Shimeall | La Conner | WA | I am a forest owner because I grew up in the NW and love our trees. Please act to protect what we love! |
| Jeffry | Steele | Eastsound | WA | You serve those who elected you, not the corporations! |
| James | Mulcare | Clarkston | WA | |
| Robert | Vanderkamp | Battle Ground | WA | |
| Tracy | Ouellette | Bow | WA | |
| Rebecca | Evans | Seattle | WA | Our forests are helpful against climate change & are beautiful. We need them! |
| Belinda | Hovde-Klingman | SEATTLE | WA | I was a former water quality inspector for forest proposed logging parcels through WA State Dept of Ecology. I worked closely with DNR. We must do all we can to protect the old growth forests for future generations for many reasons, not just for clean water as I was involved in to assist humans, fish and farmers. But also for the mental health issues that humans get from being in a fully developed old growth forest, and also the clean air, carbon capture, wildlife of all types, and diversity of species, and possible new pharmaceutical uses that we don't even know about yet. There are many more benefits but these are just a few to think about. Thank you for consideration of my comments. |
| Michael | Betz | Bellingham | WA | |
| Noreen | Parks | Port Townsend | WA | |
| Chris | Marks | Bellevue | WA | The old growth forests are even more valuable than they were in 1991, now that we understand the damage of greenhouse gas emissions and the value of carbon sequestration in the old growth trees!! |
| Thom | Peters | Snohomish | WA | |
| kevin | orme | seattle | WA | Protect our PNW Forests, protect old growth, BAN clearcuts and greedy logging! |
| Derek | Benedict | Lynnwood | WA | Where healthy forests survive, life thrives! |
| Jill | LaRue | Cashmere | WA | We need old-growth forests for out health and the health of the planet. |

| | | | | |
|---------|----------|---------|----|--|
| Vanessa | LaValle | Olympia | WA | <p>Where I live in the Pacific Northwest we have already lost the marbled murrelet populations we hoped to protect. Currently we are losing the salmon populations. We need the forests to have clean water, health air and stable climates. I have been advocating for halting the cut of "Legacy Forests" in Washington and DNR is not listening eventhough we need them to hit our old growth targets, climate goals and for clean air, water and communities.</p> |
| Lauren | Redfield | Seattle | WA | <p>the Pacific Northwest and spends much of my time hiking, foraging, and exploring these forests, I am deeply concerned that the proposed amendmets weaken protections for mature and old-growth trees while expanding commercial logging. These forests are essential for biodiversity, climate resilience, and carbon storage, and we must strengthen protections, not roll them back.</p> <p>Shifting from stand age-based protections to stand establishment dates will prevent younger forests from aging into old growth. Logging forests over 80 years old releases carbon, degrades habitat, and weakens resilience. The Forest Service should retain these protections, except where controlled burns support wildfire prevention or Indigenous stewardship.</p> <p>I support expanded Indigenous co-stewardship but urge you to separate it from increased logging. We need a plan that prioritizes long-term forest health over short-term industry gains, ensuring these landscapes remain intact for future generations.</p> |
| Clara | Hsu | Edmonds | WA | <p>I was born and raised in Washington state and return to raise my children here. I have backpacked around Mt. Rainier the entire 93 miles Wonderland trail, I have summited Mt. St. Helens - a couple years ago, backpacked in the Olympics, Goat Rocks, North Cascades, and numerous trails and forests surrounding all of these - cross country skiing as well - these are National treasures - treat them as such. July 2022, our state courts recognized that our old-growth forests have myriad of benefits besides money, that should be considered. Don't let money be your false guide. Put in proper, current science-based protections for our treasures. Take care of the earth.</p> |

| | | | | |
|--------------|---------------|-------------|----|---|
| | | | | I worked for over 20 years on environmental compliance and corporate sustainability for a paper company. My former company sold or closed its pulp mills to purchase FSC-certified pulp and to shift its paper recipes to include recycled fiber. This move was motivated by consumer pressure to protect irreplaceable old-growth and legacy forests. Now that I am retired, I feel more strongly than ever that forest lands need to be protected to maximize the ecosystem services, which in this period of climate disruption, become increasingly valuable. Please make sure that the Northwest Forest plan protects the commonwealth we share in our mature and ancient forests. |
| Howard | Sharfstein | Bellingham | WA | |
| William | Mueller | Milwaukee | WI | Please protect old-growth forest |
| Theresa | Bassett-Dolan | Anchorage | AK | |
| | | | | Have we not destroyed enough of the lands we live on? What of the animals that inhabit these ecosystems, the cubs and fawn, the familial units, the sick, and the malnourished? As we continue to deplete the planet's oxygen reserves, the incremental effects may seem negligible today, but the long-term consequences are far from certain. |
| | | | | Forests are not merely utilities for human exploitation; they constitute an integral component of the delicate balance that sustains life on Earth. We are not the epicenter of existence, the trees, berries, and roots are just as important as us. The symbiotic relationship between humanity and the natural world is one of interdependence, not domination. |
| | | | | Love is not merely an emotion, but an act of consideration ? a recognition of the intricate web of life that binds us to the land, to the creatures that inhabit it, and to the very essence of existence itself. Let us spread love, not destruction; empathy, not exploitation. |

| Dean | Passarella | Los Angeles | CA | |
| Ronald | Roth | Chico | CA | |
| Bob | Schildgen | Annapolis | CA | |
| Alisha | Rhodes | Santa Maria | CA | |
| Sandra | Gamble | Ridgecrest | CA | |
| Lori | Lorenzo | Sacramento | CA | Our old growth forests are increasingly rare and need to be preserved as the valuable ecosystems they are. I want my grandchildren to be able to walk through their quiet shadowy expanses just as I have done. The Northwest Forest Plan has been effective at doing this must continue as a guide to forest management. |
| Stephen | Fitch | Thousand Oaks | CA | |
| Leslie | Smith | Oakland | CA | |
| Richard | Gallo | Santa Cruz | CA | |
| Jamie | Rivera | Riverside | CA | Please Protect the Northwest Forest we need to save Mother Nature we need to protect our ecosystem, in the future if children don't to grow up learning about nature and appreciating it they will not understand it and if they don't understand it they won't protect it and if they don't protect it who will? |
| Cynthia | Tuell | Upland | CA | |
| TIMOTHY | SHEEHAN | San Rafael | CA | |
| Rebecca | Broughton | Trinidad | CA | Preserving what is still providing balance for our quickly failing ecosystems is essential to all creatures on this earth including humans. We must move forward with protecting our oldest forests for all they are and all they do. The forests protect us. They protect the water, air, and balance. Let us have common sense to preserve what protects us. |
| Carol | Shapiro | Auburn | CA | |
| Angela | Alam | Fontana | CA | I love trees more than most things on this planet. Baby trees are great, but they haven't had the opportunity to develop and cause as much of an impact as old growth trees. They are so very important for ecosystem maintenance and a multitude of things, as I'm sure you've been made aware of. On top of all the benefits they give to nature simply by existing, I desperately wish to go see the old growth forests during the course of the rest of my life. I find them so enchanting and rejuvenating and the idea that I one day won't be able to experience their vast presence is gut-wrenching to me. |

| | | | | |
|-----------|----------|------------------|----|--|
| Tom | Kunhardt | Oakland | CA | The Pacific Northwest is famous for clean flowing rivers, native salmon runs, and ancient old-growth forests. All of these values are most prevalent in our National Forests -- and we have the Northwest Forest Plan to thank for that. |
| David | Peterson | San Jose | CA | |
| Margo | Reeg | Whittier | CA | Protecting our old growth forests is important because these trees sequester carbon and generate oxygen, supply protected homes for a variety of species, prevent erosion and landslides , and provide beautiful serene places to escape from cities and enjoy forest solitude. |
| Renaldo | Gonzalez | Yucca Valley | CA | |
| Lauren | Smedley | Menlo Park | CA | I am currently a high school senior who spends a lot of free time in the redwood forests of California. I have grown up around the trees and know firsthand how important old-growth trees are to biodiversity and local ecosystems. Acting as carbon sinks to draw carbon out of the air, cutting down these trees would hinder our progress towards reducing our carbon footprint at a time when our window to act on climate change is rapidly closing. With more than 70% of our biodiversity projected to disappear in the near future it is imperative that we take every step we can to preserve what little we have left. we need to focus our efforts on moving forward, not trying to stop people from pushing us further back. I already know that the world i grow old in will look vastly different from the one I grew up in. It is too late to stop all of the effects of climate change, but we can focus on protecting what we have left. |

| | | | | As humans, we are animals, and therefore apart of nature. Any actions against conservation are a direct threat, not only to numerous plants, animals, and ecosystems, but to humanity as a whole. The current proposed revisions of the Northwest Forest Plan go directly against what the Forest Service stands for, and would only exemplify a government that does not govern its people, but endanger them. These amendments are not only a bad idea for the environment, it's downright bad PR, and you should know better than to mess with nature. I guarantee you more people stand in unity with nature, than with the current government, and these amendments would only exemplify that. |

| | | | | |
|------------|-------------|--------------|----|---|
| Katherine | Plosky | Winchester | MA | The Northwest Forest Plan is designed to protect wildlife and biodiversity. By keeping the forest healthy, it provides a much needed habitat for countless species that could go extinct if these protections were taken away. Additionally, the land under the Northwest Forest Plan is important to Indigenous tribes in that area, another reason that it needs protection. Unfortunately, loggers want to use this land to make money and ignore the importance of a protected forest. Trees also help to fight global warming because they take in carbon dioxide and produce oxygen. They trap this carbon dioxide and prevent it from contributing to climate change. This means that old trees have more carbon dioxide inside them than younger ones, making old growth forests especially valuable. In the state that our environment is in, we cannot afford to cut down more trees, destroying habitats and releasing CO2. Please continue to protect this region and say no to cutting down our much needed trees. |
| Mark | Guerriero | Provincetown | MA | Thank you Joe for all your efforts in the last four years of your presidency. Hopefully the next president doesn't try and reverse everything you have accomplished. I guess no one can change the Antiquities Act that I know of. Take care good luck in your future retirement |

| Linda | Heath | Senecaville | OH | |
| Isabella | Paspalovski | Hudson | OH | As someone who's partner works as a WildLand FireFighter I always Admired the drive to help not only the people but the forest and It's inhabitants . It's disappointing to say the least that the Forest Service a service created to PROTECT the forest is doing the opposite. People look to you to protect what's sacred not destroy. Don't make your agency or working for your agency an embarrassment more than it might soon be. Working with and using science to protect the forests and work on prevention for fires and conservation while standing firm on harmful logging policies or harmful environmental policies in general is what you need to continue to do |

| Christine & Doug | Sinclair | Ashland | OR | |
| Megan | Roller | Salem | OR | I was in SAR in PNW and I still love hiking in our forests. Don't take away something that is unique to our state and cherished and beloved. |
| Michelle | Steele | Terrebonne | OR | I have lived in the PNW all my life. As a child, my parents couldn't afford to take us on expensive summer vacations so our trips consisted of backpacking into the many alpine lakes in our area. I have fond memories of these trips and developed a deep appreciation for our beautiful forests. These forests must be preserved so our children and grandchildren can also enjoy them, not to mention preserve the habitat for the many species who call the forests home. |
| Marney | Reed | Florence | OR | |
| anne | ackley | salem | OR | |
| Holly | Brandwen | Waldport | OR | |
| Brandi | Martinez | Madras | OR | Protecting forests of the NW is one of the most important and easy things to do in mitigating some of the effects of climate change. Keep the carbon sequestering power of those great old trees intact. Old grown forests need to be protected to the fullest extent possible for the sake of the all living creatures and habitability on this most auspicious plant. |

| Evelyn | Adams | McKinney | TX | |
| MADRIENNE | PETITJEAN | Richmond | TX | These are some of the most beautiful and diverse public wilderness areas in the Continental US. Keep it safe! |
| | | | | It is crucially important to protect as much of the old growth forests in Oregon, Washington and Northern California as possible. I have spent many hour walking in the various redwood forests in Northern California especially the Jedidiah Smith Redwoods State Park which contains my favorite Redwoods trail, the Boy Scout Tree Trail. I have visited Olympic National Park, and spent many hours kayaking the rivers in this area, including the Deschutes, the Metolius, and my favorite river, the McKenzie. I know there is progress in returning salmon to their original habitats through dam removal and that process should continue in full measure. |
| Justin | Askins | blackburg | VA | |

| | | | | |
|----------|-----------|----------------|----|--|
| Charles | Tillotson | Mc Lean | VA | Forest Management is not a one day job. My Grandfather was a timber man who managed large sections of original forest with an eye to the futures and it paid off over time because he made plans for the future |
| A | J | Roanoke | VA | |
| Tiffany | McIntyre | Vancouver | WA | |
| Lori | Ruhl | Sedro Woolley | WA | Save our trees on the great Pacific Northwest |
| caroline | driscoll | Bellingham | WA | |
| A | G | Spokane Valley | WA | |
| Sheryl | Sparling | Lynden | WA | |
| Steve | Rothboeck | Oak Harbor | WA | Please improve but do not weaken the NW Forest Plan. Please preserve all old-growth forests. |
| Deonet | Wolfe | Camano Island | WA | These lands are ours and our legacy to our children with the forests intact and providing good salmon spawning grounds, recreation, tourism, and habitat for all the iconic species of the PNW. Please save our forests and protect the small amount of old growth we have left. Old growth isn't a renewable resource. Those that would pillage the land are not willing to leave the areas they damage alone for another 1000 years so it can renew. There is an area on the peninsula that was "replanted" in the 1920s and all the monoculture trees there are sick and spindly due to the logging and replanting practices. Our soil is thin and cannot regrow a full healthy forest after everything is cut and erosion takes a lot of the soil. |
| Suzanne | O'Keefe | Vancouver | WA | |
| David | Scheer | Bellingham | WA | PLEASE protect the mature and old-growth forests across the Pacific Northwest---and 'everywhere' for that matter!! Among other things, they emit HUGE quantities of O2, which is what we really "need" in the fight against climate change!! So guard and protect them...O.K.?!? |
| Patricia | Pedigo | Anacortes | WA | The Pacific NW is under threat from climate change and poorly planned growth. We need to protect the critical forests, especially old growth and provide safe environments for the birds and animals who depend on it for their survival. |
| Art | Petersen | Anacortes | WA | Protect our old growth forests ! |
| Peggy | Olsen | olympia | WA | We gave so little left. Save old-growth forests now! |
| Tim | Kerfoot | Yelm | WA | |
| Pat | Storms | Vancouver | WA | |

| | | | | |
|-----------|-------------|------------|----|---|
| susan | pitiger | Vashon | WA | |
| Diane | Christensen | Lynnwood | WA | Forests protect us all. |
| Janet | Swihart | Long Beach | WA | |
| Joanne | Hamilton | Allyn | WA | Protecting forests is important to me because we need them to protect salmon, filter water, prevent runoff, shade and cool tree roots and the ground. I love the natural beauty of the ancient trees. They will never be replaced in my lifetime. You can not save a forest by cutting it down. Each tree supports so much more life than it's own. Please protect these forests. They are so much more than board feet. |
| Robert | Sager | Gig Harbor | WA | Protect our NW forests from fire, clear-cuts, and loss of biotic diversity. |
| Glen | Gersmehl | Shoreline | WA | The next generation will benefit as well as ours. Let?s do the best we can with this! |
| Tim | Kerfoot | Yelm | WA | |
| Annamarie | Janisse | Sammamish | WA | The natural world around us in the PNW is what makes this part of the world so magical to live in. I'm watching my daughter grow up in this magical place, enjoying the clean air, clear water, learning about the salmon lifecycle, and respecting the long life of our ancient trees. Please find another way to fix issues and challenge the corporations, and people who are already rich, who want more and more profits, to look elsewhere. |
| Angie | Dixon | Clinton | WA | |
| Colleen | Kim | Bellevue | WA | |
| Jake | Stewart | Spokane | WA | |
| Ken | Zontek | Yakima | WA | |
| Andrea | Hildebrandt | Seattle | WA | This is sacred land and water as is the whole of Mother Earth. Let?s stick to the science. If we continue to cut down trees and clear land we will kill all life on the planet. Period! Please use your science and fight for life, a healthy future, our futures. We know far left is hard to fight but you are strong and we are strong with morals and truth. Stay focused and don?t give up on our planet and its people and all life. Please fight for our PNW forests to stay living, breathing and rooted! Thank your for your service! We are with you! |

| Sheri | Fatout | San Francisco | CA | |
| Jarod | Banks | Van Nuys | CA | Protecting forests is important for many reasons. First, they are beautiful and majestic and remind us of the grandeur of nature. Second, they provide shade and comfort to animals and people. And lastly and most importantly, forests are like the earth's lungs, and people need them to breathe. Don't sell out our planet's future so some corporate loggers and make a few more bucks and we are ravaged by climate change. |
| Donald | Wiltshire | Willow Creek | CA | I live in the Six Rivers National Forest. Our community is extremely vulnerable to wildfires. Please continue to use the current plan, in place now for 30 years, to help protect our community. It's bad enough that the fire resilience funds have been frozen and pre fire season mitigation programs have been halted. Please don't exacerbate our risk further by changing the current plan for best practice forest management! Thank you for your time in consideration! |
| Dale | Haas | San Diego | CA | |
| Martha | Siegel | Santa Barbara | CA | |
| Carol | Lorenzo | Winters | CA | |
| Hank | Schlinger | Glendale | CA | |
| Diana | Light | Laguna Woods | CA | Hello, I am not a scientist, simply an American citizen. Lacking expertise, I nevertheless can see that all that sustains the living world is imperiled when we allow the expediency of the pursuit of profit to compromise, and ultimately, parcel by parcel, to destroy the ability of our natural world to regenerate and keep all that lives in balance. Please, consider that the Earth necessarily depends for its survival on the determination of those who are able to advocate and act decisively in favor of our natural resources. Know that we are with you in the face of the juggernaut barreling its way across the landscape. |

| John | Haynes | Pacifica | CA | |
| Inge | Wagner | Los Angeles | CA | |

| | | | | |
|-----------|-----------|---------------|----|--|
| | | | | As a PhD botanist and practicing ecologist I ask you to recognize and protect nature and old growth forest ecosystems. In many cases logging makes us more susceptible to fires. We are only beginning to understand the disruptions to native ecosystems including mosses, liverworts, fungi, and soil health caused by logging and other commercial activity. The USFS needs to understand these impacts and logging needs to be guided by scientific understanding to a much greater degree. Please know that as citizens we value intact healthy ecosystems and call on you to restore this balance. |
| Susan | Fawcett | Berkeley | CA | |
| Frederick | Cliver | Long Beach | CA | We must protect nature before more damage is done. |
| Mary | Rojeski | Santa Monica | CA | Do you want to see our Forests cut down??? What we need is to Protect them!! Especially Now, while the orange thing is in office!! |
| Don | Lee | Encinitas | CA | |
| Nancy | Davenport | Menlo Park | CA | Without trees, this earth is going to die. |
| Ralph | Smith | Los Angeles | CA | |
| Nona | Weiner | San Jose | CA | |
| David | Grant | San Francisco | CA | |
| | | | | Please consider the following: To respect tribal sovereignty and incorporate indigenous knowledge and perspectives that were left out of the original plan To look at the value of these forests when they are still standing for carbon sequestration in a time of climate change To ensure that forests are managed based on the best available science so that they can be healthy and wildfire resilient |
| Bob | Crocco | Santa Barbara | CA | |
| Susan | Allen | Livermore | CA | Our forests are vital to protect our climate, & a beautiful legacy for future generations. |

| | | | | |
|-----------|-----------|-----------------|----|---|
| | | | | <p>Please protect and do not cut old growth forests. I have been hiking, camping, and enjoying our National forests since my parents started taking me there as a baby. My parents met in the Sequoia Giant Forest, and they chose to raise their family near the forests, and in particular the Pacific Coast Sequoia and Old growth forests. I continued that tradition with my children. At 89 years of age we still take my mom camping in these forests along with her grandchildren and great grandchildren. Please honor and include tribal nations in any decisions that are made. We need the biodiversity of the forests for carbon capture. Clear cut logging is detrimental to the environment and encourages forest fires. Replanting a monoculture of trees further harms the environment and degrades the health of the forest and the plants and animals who live there. We need the forests with old growth trees intact to protect our air and provide clean water supplies. Please do not destroy our cultural heritage.</p> |
| Nancy | Golz | Merced | CA | |
| Tiffany | Birch | Los Gatos | CA | |
| Beverly | Carman | Los Angeles | CA | |
| Christine | Oda | San Francisco | CA | |
| Erika | Helene | Richmond | CA | Protecting endangered species was a core tenant of the original plan, but the proposed amendment has lost this focus |
| Cynthia | Gerard | Glendale | CA | Protect the Northwest Forest ecosystem. The earth needs old growth forests to maintain a healthy global climate. Protect the Northwest Forest from the Lumber industry for future generations to enjoy and realize the earth's history . |

| Christine | Rangel | Playa Vista | CA | |
| Tom and Sharon | Merchant | Granite Bay | CA | To whom it may concern. Please do everything you can to respect the irreplaceable value of our forests, particularly 'old growth' as an ecosystem which may never fully recover fully from logging. The ecosystem function includes, reservoir of endangered species, highly active climate change mitigation and important recreational opportunities. Even burned forests will suffer from soil compaction and spcies depletion and other long term damage limiting proper recovery if 'salvage logging' is not done with care and in a limited fashion. Thank you for considering my thoughts. Tom Merchant |
| Bill | Devincenzi | San Jose | CA | |
| Sharon | Hefke | San Francisco | CA | We must save creations precious timeless gifts to us, the trees, their ecosystems and species we may not have yet discovered, and their countless benefits to our species. |

| | | | | Our old growth forests and those ecosystems create a refuge for our children, grandchildren, and beyond. While those ecosystem benefits are well known, as climate changes become more apparent, the carbon sequestration in our old growth (mature not ancient) significantly decreases carbon dioxide in the atmosphere, more so than younger trees. Removing these assests should be avoided. Additionally, thinning forests of these mature trees greatly increases the wildfire hazard due to changes in microclimates created by these trees. Drying the soil though loss of shade also has significant impacts that are often not considered. Older forests are valuable and worthy of protection using science and indigenous practices. |
| Mary | Elizabeth | Stockton | CA | |
| David | Marancik | San Jose | CA | |
| | | | | Our National forests are a legacy we leave our children. These wild places help our environment , promote nature's healing properties for our minds and bodies. Walking in a forest calms you as you breathe in the oxygen they give off as they absorb the carbon we emit . The amazing spaces of natural wonder attack all Americans for rest , hiking, fishing and relaxation. Foreigners that do not have the forests and Sierra mountains because they populated these places and cut their trees come to experience our National Parks. These are National treasures that need protecting and nurturing . We come from nature and must protect its special places for generations to come. Thank you for reading my comment. Vesna |
| Vesna | Breznikar | Healdsburg | CA | |
| E Muriel | Gravina | Palo Alto | CA | Indigenous communities were here before we were. They have a right to live here in peace and safety. We must protect the forests to safe guard our air. |

| Kelly | O'Donnell | Los Angeles | CA | |
| | | | | The Northwest Forest Plan's vision to protect and restore old-growth forests and imperiled species has been overwhelmingly effective. And, there are reasons that it should be amended to be made even more effective. Those include incorporating perspectives of Tribes and indigenous communities who were functionally left out of the original planning process; addressing climate change and fully recognizing the carbon storage and sequestration values of old-growth forests; and ensuring land managers follow best available science to appropriately manage forests in an era of wildfire. Our oldest forests are more important than ever. Please do the right thing and provide them with full and complete protection from logging and other destructive human activities now and forevermore. |

|----------|-------------|----------------|----|--|
| | | | | The Forest Service is beholdng to private interests for profits that the public never see's. They give away the Water and receive no profit from the taking. One example is the San Bernardino Forest. So tied up with private interests they done answer phone calls or emails and when comments are made you never hear outcomes. I say that the Forest Service is not doing a proper job managing our Forest's. Have you noticed how many laws and rules one needs to jump through just to make a comment be registered? Government agencies must do a better job saving our Forest, put more people working in the forest instead of behind desk's in offices far from seeing the real problems. |
| Richard | Luczynski | Pasadena | CA | |
| Aaron | Kenna | La Mesa | CA | Please save our old growth forests. |
| James | Stamos | Encinitas | CA | |
| Karen | Lee | Glendale | CA | |
| | | | | |
| Jason | Price | Santa Clarita | CA | My family and I live on the front lines of wildfires in Southern California. In January, we received an evacuation warning but not an order - the second warning in three months. The most important thing about the old growth forests of the Pacific Northwest are their ability to capture and manage carbon dioxide, and this plan represents an opportunity to maintain that carbon in the stewardship of tribal sovereignty. My family and countless other Americans need this plan and others like it to reverse the cycle of carbon emissions that fuel fire disasters. |
| Corwin | Zechar | BERKELEY | CA | |
| Kristina | Fukuda | Los Angeles | CA | |
| | | | | |
| Samantha | Johnson | Escondido | CA | I want to see our natural spaces remain intact. Please honor the decision and continue the work to protect the old-growth forests across the western parts of Washington State, Oregon, and northern California into perpetuity. |

| Melissa | Nelson | Pacifica | CA | |
| | | | | There is nothing more breathtaking than to walk through mature and old-growth forests that have stood the test of time for previous, current and future generations. To upset this healthy ecosystem with the unnecessary cutting of these trees is unfathomable and would be a huge detriment to the lives of cherished wildlife that abounds in the areas targeted for logging, and a phenomenal disrespect for the Tribes and indigenous communities who should've had their perspectives included in the planning process. As an environmentalist, a photographer and tourist, I ask that these beautiful forests be spared from any misguided plans the U.S. Forest Service has to pillage these forests of their biodiversity, clean drinking water, flood and erosion protections, and fire resistance capabilities. The cultural impact of such disdain for local communities' needs is appalling and must be amended to protect them all before any thought of logging in these precious forests is further considered. |
| Deborah | Gostin | San Diego | CA | |
| Tracy | Morris | San Rafael | CA | |
| Lord | Brent | Panorama City | CA | Save All Trees! ??? |
| Vicki And Rod | Kastlie | San Diego | CA | |

| Mike | Pasner | Penn Valley | CA | |
| Margaret | Koster | Ventura | CA | |
| Karen | Roberts | Redwood City | CA | |
| Terry | Jacobs | Redwood City | CA | |
| | | | | You always want us to be so nice, kind and say "Please". Our consequences are so dire, I find this an insult to our intelligence and our wisdom to see through the con that is being done. Our oldest forests exemplify the wealth of Nature that has been gained and must now be protected once again. Those include incorporating perspectives of Tribes and indigenous communities who were functionally left out of the original planning process; addressing climate change and fully recognizing the carbon storage and sequestration values of old-growth forests; and ensuring land managers follow best available science to appropriately manage forests in an era of wildfire. We have "wildfires" that are intentionally set so commercial logging company's can "gain access". The forests are decimated, our wildlife is destroyed and we are left with wasteland. No Commercial Logging In Our Forests: PERIOD ! |
| Charlene | Kerchevall | Oceanside | CA | |
| Marisa | Nelson | Woodside | CA | |
| Melinda | Grant | Cupertino | CA | Please do the right thing and save our precious old-growth forests! They are irreplaceable. Thank you! |

| Alex | Vollmer | San Rafael | CA | |
| Shelley | Friedman | San Francisco | CA | |
| Helen | Manning-Brown | Atascadero | CA | |
| Pamela | Sandberg | Fort Bragg | CA | Please protect the forests across the Northwest by sticking to the Northwest Forest Plan as it is now. Our water, wildlife, and the very air we breathe depend on it. |
| Parker | Elaine | Berkeley | CA | |
| E | Sanfilippo | Huntington Beach | CA | |
| Robert | Reed | Laguna Beach | CA | |
| Mark | Jenne | Cardiff By The Sea | CA | I can't believe people are still talking about cutting the last few of our old-growth forests! |
| Paula | Katz | San Francisco | CA | I love forests. They are so beautiful and so important to us. Walking in a forest brings us peace and calm. |
| Bruce | Von Alten | Yreka | CA | |
| Caryl | Schwartz | Rancho Palos Verdes | CA | We need protect these forests' role in storing carbon, which is critical in the fight against climate change. We need to ensure science-based management, making our forests healthier and more wildfire-resilient. The proposed changes could open more old, mature trees to logging -- trees that were previously protected. They also increase harmful post-fire salvage logging, which can devastate ecosystems. The plan claims to enhance community stability but would produce only minor effects across the large socioeconomic region. The plan disregards the value of forests for habitat, climate stability and carbon sequestration, recreation, and clean air and water that communities actually rely on. |
| Donna | Woodhams | Rialto | CA | |
| Helen | Hays | Walnut Creek | CA | |
| Gary | Goetz | Pacific Grove | CA | |
| Volker | Eckl | San Francisco | CA | In a resource scarce environment like on our planet we have to be deeply cautious of approaching every resource out there and instead find other ways to tackle our needs. Otherwise we will be depleted of all our needed resources in the foreseeable future. |
| Benjamin | Keller | Oakland | CA | Preserving old-growth forests in the Pacific Northwest is critical for climate change mitigation, an issue that impacts every American. |

| | | | | |

| Jerry | Persky | Santa Monica | CA | |
| Ruth | Nash | Larkspur | CA | Please respect the knowledge and success of indigenous people of the Northwest. They have proved over the centuries how to be successful stewards of our Northwest forests. Incorporate their words and values into the Northwest Plan as it is updated so that the Plan reflects these values. |
| Rokhsan | Taherpour | Tarzana | CA | |

| | | | | |
|-----------|-----------|---------------|----|--|
| Patricia | Zeider | Pasadena | CA | |
| Sharron | Helmholz | Palo Alto | CA | Trees grow very slowly and they can't protect themselves. The desire to destroy our environment to make the wealthy even richer is growing quickly. Sanity and resolve is needed very badly. |
| Charlene | Sodergren | Tehachapi | CA | |
| Siddharth | Jain | San Jose | CA | |
| Patricia | Essick | Ojai | CA | OLD GROWTH FORESTS ARE IMPORTANT TO ME BECAUSE THEY ARE IMPORTANT CARBON SINKS AND BECAUSE THEY PROVIDE VALUABLE HABITAT FOR MANY SPECIES THAT WON'T BE ABLE TO SURVIVE IF THEY ARE REMOVED. PLEASE PROTECT THEM! |
| Nam Kaur | Khalsa | Santa Barbara | CA | Our forests are the property of US citizens; government should be their stewards. Do not even consider cutting our forests for profit or selling our national parks and forestland. |
| Amy | kim | Newhall | CA | |
| Kevin | Kim | La Crescenta | CA | |
| Lauri | Grasse | Sonora | CA | |
| Harry | Garrison | Berkeley | CA | |
| Heidi | Dietz | Alameda | CA | |
| Gregory | Mull | Oak View | CA | |
| Debra | Sally | Clearlake | CA | Dear decision maker, The current NWFP is superior to the proposed alternatives. Please keep the protections for Old Growth Forests and add wording to provide for meaningful input from the indigenous communities and science based techniques for fire resiliency that protect ecosystems. By doing these things you will be encouraging biodiversity, decreasing flood and erosion risk, and providing for outdoor recreation that improves the mental health of all who live in or visit the forests. I agree with the message sent by the Sierra Club. Please protect our forests and our future. Thank you. |
| Audrey | Doocy | San Jose | CA | It's vital to protect our old growth forests for the health of all the inhabitants, clean air and water. |
| Charles | Neal | Alameda | CA | |

| | | | | |
|-----------|-----------|----------------|----|---|
| Rod | Kirk | San Jose | CA | Forward ho! Get on board to protect our natural forest resources. Please put all you have into fighting the Republican corruption that wants to ill use our national forests. Once they are gone... they are gone. Help protect them. Do what is right! |
| Maria | Ballardo | Los Angeles | CA | Let these lands thrive for our health and well being. |
| Erica | Varela | Hollister | CA | |
| Leslie | Winston | Alhambra | CA | |
| Miranda | Edison | Elk | CA | |
| Stephanie | Larro | Woodland Hills | CA | |
| Nico | Martinez | San Diego | CA | |
| Kristin | Morgan | Belmont | CA | Forests are, actually, NOT as "renewable" as we might think ...devastating these environments is stupid short term gain for long term harm. Don't do it!! |
| Monica | Romero | Pacific Grove | CA | |
| Matt | Williams | Oakland | CA | |
| Lyndell | Pritchett | Three Rivers | CA | PROTECT OUR, THE USA RESIDENTS, MATURE OLD GROWTH FORESTS...I LIVE NEXT TO SEQUOIA NATIONAL PARK, IN WHICH THERE IS A FRACTION OF OLD GROWTH... THESE ARE IMPORTANT TO FROM LOGGING, OIL, GAS, MINING OPERATIONS..THANK YOU |
| Bridgett | Heinly | San Diego | CA | |
| Paulette | Langguth | Oakland | CA | |
| Tammy | Bullock | Ramona | CA | |
| Bill | Leikam | Mountain View | CA | |
| Liz | Varnhagen | Berkeley | CA | This nation's natural resources are dwindling. Our northwestern forests are precious and functional for so many things beyond but including our human environment. Please base all decisions on the use of this resource on long term, comprehensive planning for a sustainable future. |

| | | | | |
|---------|-----------|-----------|----|--|
| | | | | <p>Hello,</p> <p>I have been going to going to national forests for backpacking, camping and hiking fo most of my life. I have made a point to raise my children with respect for the natural beauty of forest service land in the pacific northwest, even while living in The central cosat of california and montana. Now i am blessed to be able to share this experiance with my grandchildren. PLEASE preserve the Forest, especially the old growth forest so that future generatoins can stand at the base of a 2000 yr old tree in awe of its majesty. Saving what is left of old growth forests is one of the best things we can do for furure generations. These areas are truely priceless.</p> <p>Thank you</p> |
| Bill | Olsen | Alamo | CA | Bill Olsen |
| Gerald | Mantonya | Sylmar | CA | |
| Sydney | Furman | San Ramon | CA | |
| Daniel | McKeighen | Rocklin | CA | |
| Heather | Hunter | Cool | CA | |
| Jillian | Saxty | Alameda | CA | <p>If you'd like to cut down trees, please take the burnt ones from the many wildfires we've suffered in California, and leave us the old groves and the beautiful living trees. More than ever, we need to protect forests for the air we breath, the carbon they sequester, their beauty and their role in creating an ecosystem for all wildlife. Please let indigenous communities take the lead in saving our old-growth forests!</p> |
| Indee | Brooke | Sunland | CA | <p>It is beyond foolish to decimate our old growth forests, to sacrifice them to short term corporate profits. These type of forests are essential to maintaining the health, resilience, and sustainability of our environment - in which we live and move and breathe. Human beings require breathable air and potable water to survive. Get real. Protect the essentials we all require to live and to hand our children and their children a world in which they can not only live but flourish. We must protect the natural resources vital to our global well-being. There are no national borders in nature. The world ecosystems flow into one another, the waters, fresh and salt impact the land and vice versa. These are immutable facts. Please get real. There must be balance and intelligent use and non-use of our natural resources based upon science and proven stewardship of natural systems. Protect our lives.</p> |

| | | | | |
|------------------|-------------|-----------------|----|---|
| Lisa | Lundquist | Tustin | CA | In saving the forests we are saving ourselves. The time to abuse nature is long past, now or never. We owe it to future generations to not trade in tomorrow for today. |
| Marta Kati | Plonski | Anaheim | CA | |
| Nicole | Mixdorf | Woodland Hills | CA | Our forests are our national treasure. Visiting these beautiful natural places has been an honor for me and my family. We must honor and save these important habitats for critically endangered wildlife. These forests are our legacy. Do the right thing! We are counting on you to save these national treasures for generations to come! |
| Jan | Sownie | Bellflower | CA | The Sierra Club has circulated these words. I stand adamantly and urgently behind every one of them. |
| Elaina | Caner | Costa Mesa | CA | |
| Susanne | Blake | Mill Valley | CA | |
| Joe | Hiney | San Rafael | CA | climate change is killing people. we need the balance that has been lost, just look at the polar vortex that is colapsing. |
| Dawn | Navis | Carlsbad | CA | |
| Michael | Bordenave | Fresno | CA | |
| Enoe | Corado | San Francisco | CA | |
| Jay | Muir | Foster City | CA | |
| Lorenzo | Bavoso | Oakland | CA | Please support this far reaching plan! |
| Gail | Farina | Los Angeles | CA | |
| Diane | Matthews | Carson | CA | |
| Geralyn | Gulseth | Alameda | CA | |
| Jacqueline | Mcvicar | San Diego | CA | |
| Lauren | O'Keefe | West Sacramento | CA | |
| Madeleine | Adams | Fallbrook | CA | We need the Northwest forest, and all the other forests still preserved, to ensure our environment can recuperate from all the damage we have inflicted upon it. I need this, for my future, and so does the rest of the world's youth. Please protect these forests, don't let us down. |
| Ronald | Schoenewolf | Clovis | CA | Please protect our old forests. There is no thrill like walking or hiking through a beautiful forest. |
| Steve & Isabelle | Robey | Berkeley | CA | |
| Keith | Christy | Jurupa Valley | CA | |
| Ryan | Dempsey | Concord | CA | |

| | | | | |
|--------------------|------------|---------------|----|--|
| Randy and Michelle | Davis | Vacaville | CA | |
| Leah | Halper | Santa Rosa | CA | Forests sustain us. It is your job to protect them. Please, do that job. |
| Kent | Miller | Sacramento | CA | As a longtime Northwesterner, I love our forests there. They are an invaluable natural and aesthetic resource for this and future generations. |
| Summer | Light | Elfin Forest | CA | Please continue to protect our mature and old-growth forests, it is the right thing to do. Let's not destroy our beautiful forest for future generations. Our decisions today will surely impact them. |
| Pauline | Faye | San Clemente | CA | |
| Gerold | Wharton | Oceanside | CA | |
| Querido | Galdo | Oakland | CA | |
| NORA | DI BENE | PLEASANTON | CA | |
| Tasha | Bigelow | Roseville | CA | Please don't give up on our beautiful and majestic swaths of nature. They need us to protect them and preserve them for the future. |
| Carolyn | De Mirjian | Valley Glen | CA | |
| Richard | Bradus | San Francisco | CA | I am old enough to remember the protests and turmoil surrounding the Clinton-era forestry restrictions. Despite the protests from loggers (sponsored by the large forestry companies), most of those jobs are gone anyway, as the only motive for those companies was profit. More logging is not sustainable! Now, the way to increase economic security for those rural communities is to continue to protect the forests and foster recreational opportunities. If the NWFP is to be revised, it must incorporate the values and vision of the native peoples who have lived in these areas (along with their historical knowledge) and recognize the enormous benefits of old growth for combating climate change through carbon sequestration. Please take into account the needs of the indigenous and local communities and incorporate the best science to enhance forest health and protect the old-growth forest and the species that depend upon these forests. |
| Ronald | Mohler | Long Beach | CA | |

| | | | | |
|---------|---------------|-----------------|----|---|
| Isis | Howard | Santa Rosa | CA | <p>Hi there, I'm a 27 year old Conservation Biologist living in CA, though I've lived and recreated in several Northwest states over the years. In my few decades of life, I've already witnessed the serious ecological effects of unchecked or minimally controlled resource extraction, habitat degradation and climate change. I am terrified of what will happen if this amendment moves forward. I spend my workdays advocating for monarch and invertebrates. Monarchs, like many other wildlife, rely on very specific forested areas to survive. In fact, monarchs have returned to the same tree groves year after year for decades, despite being generations removed from their ancestors who last inhabited these overwintering sites. It's phenomenal to witness. Unfortunately, monarchs are in significant decline; over 95% in the West. Though monarchs mostly cluster in CA and MX, other species (including us) uniquely depend on the forests threatened by this amendment. A similar fate awaits if this amdt passes</p> |
| Kari | Hernandez | North Hollywood | CA | Protect biodiversity, clean air and the mature old growth forests for future generations! |
| Linda | Reilly | Cypress | CA | |
| Kristen | Lee | Los Altos Hills | CA | <p>A bunch of us visited Gifford Pinchot National Forest in Washington State on July 10. We were invited by the US Forest Service on a field trip, to participate in Q&A about the proposed old growth amendment. We had a surprise gift: Jerry Franklin, one of the authors of the Northwest Forest Plan of the 1990s, was sitting on a log in an old growth section of the forest.</p> <p>Jerry offered words of advice to the USFS and all of us, specifically starting with the old growth stand we were in: "This forest is fine on its own. Many old growth forests don't need intervention. Many foresters would think this stand is decadent? but it has so much potential for more carbon?Stands like this tend to unravel when people start messing with them. They don't take to treatment well."</p> <p>Bottom line, Jerry advised leaving many old growth forests alone, to grow, instead of DOING things to them (logging/burning them). This applies to temperate forests in the Pacific Northwest west of the Cascades.</p> |

| Jerry | Pinsker | Boulder | CO | |
| Evelyn | Hutt | Denver | CO | |
| Amy | McKeon | Aurora | CO | |
| | | | | I can still remember the first time that I stood in an old-growth forest. There is something spiritual about the experience. And that was before I understood more about what these forests provide. Cutting old-growth forests is a short-sighted activity. It takes decades to get a forest to the point that it can serve as a highly-needed carbon storage. The biodiversity that is lost by logging undoubtedly will result in other losses beyond our current understanding. And, let's be honest, the American people NEVER get a fraction of the worth of the forests from those companies allowed to log on OUR land. Yes, it is NOT your land. It is OUR land. Don't sell our future off for political gain or the benefit of a small number of individuals. |
| Mary | Kerttula | Fort Collins | CO | |
| Nancy | Harrison | Colorado Springs | CO | |
| Earl | Poteet | Pueblo West | CO | |
| Sue | Hendricks | Denver | CO | Our forests are a critical part of our environment. We have a responsibility to preserve them for future generations! |

| | | | | |
|--------------|------------|------------------|----|---|
| Jacqueline | Eliopoulos | Boulder | CO | All that we can protect we must protect. Our nation is struggling to maintain its resources against powerful odds. Our planet is overpopulated and sustainability is threatened on every level. We must protect and preserve all that we can now more than ever. |
| Annette | Barnett | Englewood | CO | |
| Julia | Gillett | Durango | CO | |
| Cathryne | Kimura | Aurora | CO | |
| Maya | Kurtz | Glenwood Springs | CO | Please act now to protect our precious old growth forests. These forests are irreplaceable and should not be sold off for private profit. |
| Tobias | Bank | Louisville | CO | |
| Lee | Stark | Aurora | CO | |
| Craig | Benkman | Timnath | CO | |
| Kathy | Faklis | Florissant | CO | Please help to protect the critical ecosystems and old-growth forests by opposing amendments that would allow increased logging in our National Forests. These forests are important for so much more than the commercial value of the wood in the trees! Our family and friends recreate in the forests, both local and across the country, on a regular basis, and they are vital to the environment. |

| | | | | |
|-----------|-------------|------------------|----|---|
| | | | | <p>Greetings. My name is Mary Grayson and I live in SW Colorado. I have traveled in the Northwest and fell in love with the majestic old growth forests there. I was also sorely dismayed to see how most of the forests had been decimated by clearcutting.</p> <p>Here in Colorado there is also not much old growth left but I cherish the old growth stands and mature forests, which support so much more life than the other forested areas that were logged. Old and mature forests support so much more life. They protect and filter clean water. They are the places we want to spend time hiking and camping in.</p> <p>I am totally opposed to any amendments to the NW Forest Plan that would allow any kind of logging in old growth and mature stands of forest. Instead, these precious remnants of a rich and healthy ecosystem should be protected fully.</p> <p>I do support adding an amendment to give Indigenous people inclusion in the planning and care for these forests. This is very important.</p> <p>Thank you.</p> |
| Mary Kate | Grayson | Ignacio | CO | |
| John | Langevin | Colorado Springs | CO | |
| William | Embrey | Bellvue | CO | |
| Leslie | Lomas | Boulder | CO | |
| Suzanne | Carter | Loveland | CO | |
| Gretchen | Bennett | Littleton | CO | <p>Why should private companies be allowed to profit from destroying something that not only belongs to us all, but which is irreplaceable and is vital to helping with carbon capture? It's just so exhausting - how can today's leaders be so short-sighted? It's truly incredible. Save and expand the Northwest Forest Plan.</p> |

| Deborah | Aguilar-Hewitt | Aurora | CO | |
| | | | | Our earth is a space ship! Our forests are the key life support systems! Old forests are miracles at recycling and restoring life. Without massive old growth forests we are doomed! |
| Kenneth | Ramsey | Parker | CO | |
| Deb | Nicklaus | Denver | CO | |
| Nicole | Taylor | Colorado Springs | CO | |
| Kent | Borges | Colorado Springs | CO | |
| | | | | I have spent much time in the forests of the Pacific Northwest. It has a unique beauty that anyone who has spent time there can appreciate. Please keep the Northwest Forest Plan intact, & ensure that the forests there are protected for future generations. |
| Dirk | Summers | Parker | CO | |
| Claire | McLean | Louisville | CO | |
| | | | | The proposed changes could open more old, mature trees to logging -- trees that were previously protected. They also increase harmful post-fire salvage logging, which can devastate ecosystems. The plan claims to enhance community stability but would produce only minor effects across the large socioeconomic region. The plan disregards the value of forests for habitat, climate stability and carbon sequestration, recreation, and clean air and water that communities actually rely on. These forests provide clean air, water, and habitat for countless species. If we don't act now, we risk losing protections that have safeguarded them for decades. |
| Ashley | Bremer | Golden | CO | |
| Robin | Whatley | Denver | CO | |
| | | | | The pacific northwest forests are some of the most stunning I have ever seen. Leave them as wild as possible. |

| Gabrielle | Bolton | Greenwich | CT | |
| Patricia | Syvertsen | New Haven | CT | |
| Luella | Landis | Cromwell | CT | |
| Catherine | Turgeon | East Hartford | CT | Our forests are vital to the country. |
| | | | | Mature and old-growth forests are not just groups of old trees. They are complete ecosystems, including water, plants, soil, animals, birds, and people. All of these live together, sustaining each other and helping each other to be healthy, resistant, and cohesive. Cutting them down just because they are there and old is foolish in the extreme. Those who respect forests now that they are an interconnected living community, and removing one part will inevitably ruin the whole system. Do not do that. |
| Deborah | Crosset | Granby | CT | |
| Carol | Brooks | Windsor Locks | CT | |
| David | Drinnan | Middlebury | CT | |
| | | | | The importance of old growth forests to the natural environment cannot be measured in board feet. It provides clean air, clean water, and natural habitat for a variety of wildlife. The quality of human life depends on old growth forests! |
| Joe | Janiga | East Haven | CT | |

| Michael | Holland | Ocoee | FL | |
| Rita | Garvey | Clearwater | FL | |
| Alison | Ronzon | Neptune Beach | FL | We need to put the health and welfare of our planet ahead of greed. The old growth forests which once covered the United States have been decimated due to lack of concern and protection for what they provide-reducing erosion and flooding, animal habitats, and keeping the Earth's climate in check. A lesser discussed fact is that forests keep us mentally healthy, something we are in dire need of nowadays. Please protect our old growth forests. Once they are gone, we will not see them again in our lifetime or in the lifetime of generations of our descendants. We need to get our priorities straight. Health and happiness is not brought about by money. If you haven't already, visit an old growth forest and you'll feel true happiness. |

| Barbara | Steinberg | Kihei | HI | |
| Ginny | Swift | Urbandale | IA | |
| Nicholas | Chill | Decorah | IA | The value of our old growth forests cannot be overstated! Please help protect the future of these incredibly important natural resources. |

| | | | | |
|--------|--------------|-------------|----|--|
| Lisa | Ross Thedens | Walker | IA | Keep the Northwest Forest Plan. Include Indigenous peoples in creation and implementation of any update. Old growth forest is irreplaceable and we need it now more than ever for carbon sequestration. Do not sell the irreplaceable. do not sell out your planet, please! |
| Tamara | Holmes | Coon Rapids | IA | |
| | | | | Our old-growth forests deserve and need protection because they provide the highest level of services to the environment and to our citizens. The services include providing good air quality, prevention of soil erosion, sustaining wildlife, providing recreation and carbon sequestration. |
| Margo | Vanderhill | Alton | IA | Do not destroy this stable system and instead adhere to its provisions and enhance them by using indigenous knowledge to improve forest management. |
| Jody | Gibson | Des Moines | IA | |
| Karen | Beine | Floyd | IA | |

| | | | | |
|--------|----------------|-----------------|----|--|
| | | | | <p>Our forests are invaluable, providing clean air, water, and critical habitats, as well as playing a vital role in carbon sequestration amidst the growing threats of climate change. It is essential that we manage these lands based on the best available science and with a deep respect for tribal sovereignty and Indigenous knowledge.</p> <p>I am particularly concerned about provisions in the proposed amendment that would open up older, mature trees to new logging and significantly increase post-fire salvage operations. These actions threaten the health and resilience of our forests and overlook their irreplaceable value for climate stability, recreation, and local communities. Instead, the focus should be on preserving these ecosystems to ensure they remain a lasting legacy for future generations.</p> <p>Please prioritize strong protections for our public lands and reinforce the original intent of the NWFP. Our forests are not just resources?they are lifelines for our communities and our planet.</p> |
| Maria | Taylor | Davenport | IA | |
| J | Cypis | otho | IA | |
| Bill | Adams | Spillville | IA | Protect ALL our forests. Recycle lumber instead of demolishing and sending it to landfills. Trees take too long to grow. They are true national treasures. |
| Erin | Howell-Gritsch | Williamsburg | IA | |
| Mary | Allen | Carter Lake | IA | |
| Karen | Johnson | Harpers Ferry | IA | Once a forest is logged, it can never be the same. |

| | | | | |
|---------|------------------|---------------|----|---|
| Laurel | Klosterboer | Mc Gregor | IA | Old-growth forests and forested federal lands serve a vital air-renewing, flood-preventing, sustainable life for the entire earth. Plan to preserve the Northwest Forest Plan, and other protected U.S. forests. |
| Jody | Gibson | Des Moines | IA | |
| Delora | Jespersen Hade | Ames | IA | |
| Margot | Tollefson/Conarf | Stratford | IA | I lived in western Oregon for seven years from the late sixties to the mid seventies, both in urban and rural areas. The forests of Oregon are national treasures, where I am writing as a person pwho liked to hike. At the time, it seemed to me that the forests were being harvested sustainably. Please make rules that continue the sustainability. |
| Bruce | Kreuger | Des Moines | IA | |
| Carol | Turner | Cedar Rapids | IA | |
| J. | Cypis | Otho | IA | |
| Carla | Wilson | Mitchellville | IA | |
| Stacy | Boston | Cedar Rapids | IA | |
| Robin | Lorentzen | Caldwell | ID | please protect mature and old growth forests in the Northwest |
| Laura | Rushing-Raynes | Boise | ID | Old growth forests will be increasingly important for carbon storage, clean water and the preservation of habitats - as well as beautiful places to find the solace and joy in nature that we all know are essential for human flourishing in harmony with our beloved planet. I want our children and grandchildren and their descendants to be able to turn to the forests - especially ancient ones. These ancient forests teach us what it means to endure through adversity and build more beauty in spite of adversity. I think we all can acknowledge that we want our descendants to have access to that. For us, in the here and now, we need to fully support forest ecosystems so that they can fully function to support our clean water and air. And our need for beautiful, unspoiled places. Please, DON'T MESS WITH THE NORTHWEST FOREST PLAN. It has already preserved and protected old-growth forests very much to OUR mutual benefit. Their beauty and their functionality needs to be treasured. |
| Cydney | Conger | Ketchum | ID | THIS IS IMPORTANT! |
| Hilaire | Henderson | Boise | ID | As a PNW native, I beg you to protect our greatest treasure - the natural wonders of our home! |
| Robert | Vestal | Boise | ID | My family and I treasure our forests. Please support the Northwest Forest Plan. |

| | | | | |
|---------|-----------|---------------|----|---|
| Lon | Stewart | Eagle | ID | To stand in a grove of Old Growth forests is truly amazing, peaceful, and visually exciting. Far from the junkyard looking affect of a logged forest. Once an old growth forest is removed, several generations of humans will pass before such an ecosystem will re-establish itself, if ever. Do not cut down the remaining old growth forests! |
| Roy | Bossert | Salmon | ID | |
| Robbie | Leatham | Boise | ID | |
| Charlie | Otto | Victor | ID | Please keep our old growth forests! This issue is so important to me. |
| Sam | Eurich | Sun Valley | ID | |
| Barbara | Aronowitz | Victor | ID | |
| Mitch | Long | Ketchum | ID | My wife and I live in an area surrounded by national forests, and we live here because of its natural beauty. We spend a lot of time in those forests, hiking, biking, and skiing. It is important to keep our forests healthy and protected, for it natural beauty, the clean water it helps provide, for its habitat for diverse species, and for its ability to help provide flood control. Please make our forest plans strong and protected. |
| Ann | Rathfon | Boise | ID | The impact of losing our old-growth forests would be devastating to the planet. Please continue to protect! |
| Emily | Krosnicki | Coeur D Alene | ID | |
| Greg | Sletten | Coeur D Alene | ID | Idaho forests need to be protected for public use, not sold off for corporate profits. |
| Dameon | Hansen | Idaho Falls | ID | |

| | | | | |
|----------|-------------|-------------|----|--|
| Eric | Watkins | Cocolalla | ID | <p>Our ecosystem is like wheels in a clock. Each working to assure the others are inline. If one falters the whole system is stopped. We are only here for a small speck of time. But; our actions, when doing the wrong to our system, will impact our and your children for generations to come. Greed today will have a large impact tomorrow. Let the experts, the scientist decide what is best to preserve and maintain our forest. Government only needs to understand the impact if this "wheel" is damaged. Government only needs to supply the money that the expects need to keep the "wheel" greased and moving. So all can experience what nature offers. Create more programs to show inner cities the beauty of the forest. That the wheels of nature must not be disturbed. The Indigenous people have known for centuries that balance must be attained in order for life on earth to continue as intended by God. To understand more of what can happen, look at the Amazon. Once it is gone, it won't return.</p> |
| Jerry | Manning | Boise | ID | <p>When I was in the military in Germany in the 60s , the nation had a program to protect forests and ground water from our polluting with our tanks and indiscriminate oil servicing . In the 60s! And we should do less?</p> <p>The current regulation, as written, protects indigenous people who have been the protectors of Nature in the Northwest for centuries and gave me and my family of 4 many opportunities to visit the grand old majestic trees and woodlands</p> <p>Do not let anyone destroy the legacy that has been preserved by so many who preceded us so we can continue that spiritual gift to the generations to come?please.</p> <p>We do NOT need those trees to feed our current economy that is evanescent. But the trees, once gone are gone forever!</p> |
| Crystal | Rain | Garden City | ID | <p>Please do not increase logging in the NW! Our forests, the services they provide (clean water and air) and the species they support are invaluable. They are our heritage and once they are gone, there is no getting them back. Please, let our intact lands be our legacy to future generations.</p> |
| Lindsay | Battershell | Boise | ID | |
| Robert | Dana | Boise | ID | |
| Edward L | Cisek | Nampa | ID | <p>We need the clean air and quality of life proved by old growth forests.</p> |

| | | | | |
|--------------------|------------|--------------|----|---|
| | | | | As a taxpayer and user of Public Lands, I ask that our Federal Government and US Forest Service work for long term protection of old growth forests. Management of these forests does not include logging, but thoughtful planning and implantation of prescribed burning and maintaining the ecosystems of these forests. |
| Lucile | Scopinich | Boise | ID | Short term profit is not the solution. |
| Susan | Chaloupka | Boise | ID | |
| Scott and Cathleen | Weston | Post Falls | ID | These cannot be replaced. Let's keep them around for the grandchildren |
| R | Rannow PhD | Boise | ID | Old-growth forest act as a firewall for wildfires, so maintaining old-growth forest is critically important. |
| Ellen | Glaccum | Stanley | ID | |
| James | Van Dinter | Boise | ID | |
| Ann | Larson | Victor | ID | |
| Robin | Piane | Meridian | ID | We need to do everything we can to protect and expand our forests for clean air, clean water and saving all life. Do NOT destroy us---this affects ALL life on Earth. |
| Alida | Bockino | Moscow | ID | |
| Jane | Fritz | Sandpoint | ID | Old growth is essential to sequester carbon. Climate Change is real, and these old, big trees are vital to reining in global warming. It is time to protect old growth! |
| Dameon | Hansen | Idaho Falls | ID | |
| Pamela | Weil | Priest River | ID | |
| John | Lis | Boise | ID | The forests of the Pacific Northwest, and the whole country for that matter, have been a huge part of my life. I have worked in them, lived in them, played in them, and found myself in them. They saved me from suicide. We have developed and destroyed the majprity of our cpuntry for profits. When is enough enough? We don't need more timber production in the face of declining wildlife populations, increasing suicide rates, and the largest disconnect from the planet we were born on in human history. Please protect these pristine wildernesses. Please, ask your God, the Creator of all of this, what would He (or She) want you to do. Don't tarnish this wonderful gift. Remember, I am a voting citizen. Thank you for hearing my plea. |

| | | | | |
|----------|------------|-------------------|----|---|
| Larry | Lightner | Idaho Falls | ID | I live in Idaho but have traveled, fished and camped in the Pacific Northwest from northern Alaska to Southern California. These areas are not only beautiful but vital to the entire area and its inhabitants and the environment. They must be protected to the maximum degree possible. |
| Nadamayi | Shanti | Boise | ID | "Old growth forests will be increasingly important for carbon storage, clean water and the preservation of habitats - and beautiful places to find the solace and joy in nature that we all know are essential for human flourishing in harmony with our beloved planet. I want our children and grandchildren and their descendants to be able to turn to the forests - especially ancient ones. These ancient forests teach us what it means to endure through adversity and build beauty in the midst of adversity. I think we all can acknowledge that we want our descendants to have access to that. For us, here and now, we need to fully support forest ecosystems so that they can fully function to support our clean water and air. Please, CONTINUE WITH THE NORTHWEST FOREST PLAN. | | | | | |
|---------|-------------|---------------|----|---|
| Mark | Lundholm | Palatine | IL | In my early twenties (1969 summer) I had the opportunity to work for a sustainable logging operation in the PNW. This was a system using a Wyssen(?) skyline cable to selectively log mature and diseased timber from steep mountain sides and avoiding clear cut and damaging the forest floor. Fifty years later there is little evidence that we were ever there as new growth is well established. I believe such logging is advisable as well as controlled burns, pine bark beetle eradication efforts. This area was extremely remote, in the Railroad Creek watershed above Lake Chelan and may be a non-standard example of forest management. |
| Marilyn | Domke | Evanston | IL | I need the strength,sense of awe, and peace that the forests give me. ?The firmament showeth His handiwork ? |

| Donly | Chorn | Lake Villa | IL | Forests are a value we can't afford to waste...please protect! |
| Zachary | Limon | Tinley Park | IL | I have been a nature lover since I was a young child, primarily because of the mystical feeling of stepping into a forest. It is imperative we preserve this fweling of wonder for future generations. My future wife and I plan on living near a forest and a body of water. We cannot lose our roots as humans for the better of future generations as well as current ecosystems. |
| Mary | Barker | Rantoul | IL | |

| | | | | |
|----------|----------|----------------|----|--|
| | | | | <p>The Northwest Forest Plan has been a model of success, protecting old-growth forests while ensuring ecosystem health. However, proposals to increase logging threaten the very foundation of this plan. We cannot prioritize timber profits over biodiversity, wildfire resilience, and clean water.</p> <p>I have family members who were impacted by wildfires, and I understand the importance of responsible forest management. Logging does not stop wildfires?healthy, intact forests do. Any amendments to the NW Forest Plan must follow best-available science to manage fire risk without undermining old-growth protections.</p> <p>I urge you to reject any provisions that weaken protections for mature and old-growth forests and instead focus on strengthening tribal inclusion, ecosystem restoration, and climate resilience. The NW Forest Plan works?let?s fix what?s broken without destroying what makes it effective.</p> |
| Kate | Lieber | Chicago | IL | |
| Paul | Baits | Rockford | IL | |
| Marcia | Heitz | Cuba | IL | These old growth growth forests generate a lot of tourist income to the area! |
| Gwen | Piekarz | La Grange Park | IL | |
| Thomas | Boling | Libertyville | IL | With the risk of destructive wildfires steadily increasing, it?s more important than ever to protect our old growth forests; for habitat, for heritage and recreation and for the economic health of the communities that rely on them to attract visitors and provide employment. Once gone, these forests will take many, many generations to regenerate, if ever. |
| Stanford | Daniels | Chicago | IL | |
| Barry | Hendrix | Belvidere | IL | We need to protect old growth forest for the future of our planet. |
| Nora | Stanczak | Lansing | IL | <p>The forest help us to have clean air and water. They are not an easily renewable resource. Yes, you can plant more, but if you have destroyed the land while trying to extract ?resources?, the newly planted tress will probably not grow. This will leave our planet in a failing condition. The tress will be gone, the animals who inhabited the area will be gone, the land will be destroyed, and people may not survive.</p> <p>The bottom line for the ?billionaires and their companies is not what you were elected to represent and protect. Get strong and go against Trump and his destruction of America. stand tall, stand smart, stand strong.</p> |

| | | | | |
|----------|------------|-------------------|----|--|
| Richard | Stuckey | Chicago | IL | Our oldest forests are more important than ever. Please protect them from the ravages of the timber industry, which only cares about short-term profits. These forests protect the environment. |
| Janice | Frankel | Chicago | IL | I support the Northwest Forest Plan's vision to protect and restore old-growth forests and imperiled species. |
| Theresa | Nix | O Fallon | IL | |
| Terri | Barnard | Arlington Heights | IL | Do NOT allow Elon Musk/Donald Trump and administration to cut down old growth trees & forests!!! |
| Oris | Washington | Chicago | IL | |
| Jeremy | Basso | Chicago | IL | |
| Joan | Adams | Belleville | IL | we only have one earth |
| Patricia | Davis | Mishawaka | IN | Our environment is in an EMERGENCY crisis, being damaged on all fronts by human beings who do NOT understand what greed is doing to the safety of the environment that supports our very lives. For so many reasons, our forests must be protected. Please, do your job with integrity and honesty!! |

| Ruth | Kauffmann | Goshen | IN | |
| Diane | Winkler | Jasper | IN | |
| Emily | Bayer | Fort Wayne | IN | |
| Ingrid | Wiebke | Bloomington | IN | We need the trees for biodiversity and for sequestering CO2?s. High quality forest are very important and also providing clean, cold drinking water Fire resilience Cultural values Outdoor recreation and Mental and spiritual well-being. Protect the forest!!!!!!? |

| | | | | |
|-----------|---------------|----------------|----|---|
| | | | | I've been staring at my screen trying to decide where to begin. What to say to help you understand. I'm genuinely surprised that so many old growth forests are in danger. Even if a person doesn't love trees and wildlife, those trees are NEEDED by us. More than most people realize. We can't keep destroying forests and think it doesn't matter. Trees take decades and decades to mature. They help clean our air, cool our planet and influence weather. That's not why I personally care, but sadly it's the only argument I think will help. I wish everyone could feel the love and unique connection to 'life' that I feel and so many others feel when we are in the forest. I wish everyone cared about all the wildlife and plant life that live there. But those arguments seem not to matter. I can only hope that money won't once again buy out something so valuable in so many ways that has zero way to speak for itself unless the people making decisions are willing to listen. |
| Krissa | Schandelmaier | Anderson | IN | |
| Chris | Cissell | Westfield | IN | |
| | | | | Please protect the important ecosystems that are our forests from reckless and short-sighted plans for monetary profit. |
| Hannah | Granger | Marion | IN | From another concerned nature-lover, Thank you for your time. |

| Gianluca | Guaitoli | Covington | KY | |
| Donald | Seeger | Louisville | KY | |
| Antoinette | Daniels | Fort Thomas | KY | Protect Nature for the good of the entire planet. Why do we not consider our every action in light of the good of the Earth? |
| Kate | Groemling | Louisville | KY | Please protect our lands from pollution and destruction |
| Gail | Henley | New Castle | KY | I'm 86 years old and one of my goals is to visit one of our National forests in the Pacific NW . I have read about their beauty but want to see firsthand. These forests are necessary to restore our souls as well as providing habitat for many, many of God's creatures. Please leave them alone. |
| Barbara | Kelly | Prospect | KY | |
| Noelle | Keller | Elizabethtown | KY | |

| | | | | |
|----------|-----------|--------------|----|--|
| Ray | Barry | Lexington | KY | We have lost so much old growth forest, too much. We must not lose any more and begin the process of creating more. This is so important in an era of mass extinction. We are at a critical turning point. |
| Thomas W | Fleitz | Taylorsville | KY | |
| Sharon | Casanova | Louisville | KY | |
| DIANA | JOHNSON | Lexington | KY | This is a no brainer! |
| Eva | Davis | Corbin | KY | The trees breathe along with us. We exhale, they inhale. They exhale, we inhale. We need the trees to help keep natural balance on this planet. I understand, as a species we are growing and need more natural resources but please, be the steward you signed up to be and do not allow this administration to put money above nature. Short term gain is a long term loss in this situation. What do we lose if we lose the trees? Once the web has a hole that big, it will not be repaired and will continue to disintegrate. Thank You for your consideration of my feelings to this matter. |
| Michelle | Smith | Louisville | KY | |
| Tim | Hacker | Fulton | KY | |
| Emily | O'Connell | Louisville | KY | The few remaining forests of our nation should be respected and left intact for the sake of our future generations and the health of ecosystems and precious animal and insect life that once destroyed wont have a chance. Destroying forests for the sake of current profit is short sighted and overlooks the impact of such action on the future. Current monetary gain is NOT worth more than the habitat and oxygen that these forests provide. The health of humanity relies on the health of the planet and destroying the planet will never bring prosperity for human life. Furthermore it should be illegal for past environmental actions taken to preserve these areas to be so easily overturned. We need to stand up for the future of our planet and future generations of humans and animals that deserve to have untouched areas of forests just as we have been able to enjoy in the past. Please consider the huge impact of forest destruction that has been scientifically proven. |
| Donald | Walker | Anchorage | KY | |
| Shannon | Crowe | Crestwood | KY | |
| Melissa | Rowe | Waynesburg | KY | |
| R | Foreman | Metairie | LA | |
| Patrick | Judge | New Orleans | LA | |

| | | | | |
|-----------|-----------|-------------------|----|--|
| Lynn | Peters | Slidell | LA | Please save our wild places. Forests are so important for the health of the planet. Protect them!! |
| Ivy | Mathieu | La Place | LA | For all the reason noted in this appeal, we need elected officials with vision, intention, and most importantly, courage to act on the behalf of the masses and the protection of nature that gives humans a healthy and diverse existence. Despite the current cruel, ill-informed, and lawless Executive and Supreme Court, Congress must do everything to protect our forest which will help the planet and the quality of human existence. Ivy |
| Connie | David | Baton Rouge | LA | Forests are important to all of us. They help offset the deleterious effects of our man made pollution. This is the absolute least solution we should absolutely be taking. We could do more. |
| David | Gurney | Hammond | LA | |
| Alan | Hart | Metairie | LA | |
| James | Bradley | Prairieville | LA | |
| Scott | Jennings | New Orleans | LA | |
| Mark | Kuss | Metairie | LA | |
| Alison | Armstrong | New Orleans | LA | The forest is important to me because of its vital role in combatting climate change, its habitat for numerous species, as well as its sacred beauty. |
| Franoise | La Monica | Newton | MA | Present moment political climate should not interfere with the long view of the common good. Let save our children inheritance--they deserve a good world. |
| elisa | salmon | Amesbury | MA | The Pacific northwest is on my list of places to visit. I want to be in awe of the glorious green forests and giant redwoods/sequoias. These mature forests must be protected at all costs. We only have one planet, lets be more respectful of nature |
| Barbara | Abraham | Leominster | MA | |
| Ann | Walsh | Dorchester Center | MA | National Forests are the lungs of our nation and planet - please protect and manage them responsibly for future generations! |
| Charlotte | Cutter | Newton | MA | |
| Alan | Gordon | Newton | MA | |
| Kelsey | Q | Norwood | MA | |
| Cynthia | Pulito | Great Barrington | MA | Old-growth forests are more important than ever today, during this time of climate change. |
| Sherry | Weiland | Hudson | MA | |
| John | Hess | Roslindale | MA | |

| | | | | |
|---------------|-------------------|----------------|----|--|
| Sofia | Montemayor-Thomas | Acton | MA | |
| Philip Swing | Robertson Jr | Falmouth | MA | I strongly oppose the Trump Administration plan to start massive logging in protected areas, and that includes in the Northwest Forests. The Forest Service is supposed to protect forests for future generations, not promote efforts to wipe out forests! |
| Beverly | Flaxington | Walpole | MA | Once the mature trees are gone, they are gone. It is heartbreaking. |
| June | Davenport | Princeton | MA | |
| Conrad | Willeman | Newburyport | MA | |
| Johanna | Haagens | Marlborough | MA | |
| Chris | Wheeler | Marstons Mills | MA | |
| Stacy | Diamond | Waltham | MA | Please increase efforts to protect old-growth forests and their habitats. It is unacceptable that anyone would consider opening these lands to logging. Please don't sell out our protected reserved spaces to corporate interests. Forests, climate wildlife are all linked and their survival depends on these unbroken woodlands. There are pollinator species going extinct there are birds, insects, amphibians, reptiles dying from pollution and human encroachment. I urge you to take every possible action to save and preserve and add to these lands against the forces that have taken power aligning with corporations for personal profit |
| Judith | Embry | Florida | MA | |
| David & Susan | Clark | Concord | MA | Greed is destructive. Our Northwest Forests are national treasures and should be permanently protected, not harvested for short term profit. |
| Inge | Knudson | Concord | MA | I first visited the forests of the Olympic Peninsula in 1980 and was bowled over by the lush growth and huge trees. When I next returned to the same forest about 10 years later, I was aghast to see a clear-cut plain where these majestic trees had stood. Stop the madness. |
| Jane | Kuby | Boston | MA | |
| David | Harris | Auburndale | MA | |
| Michelle | Kokoszka | Upton | MA | Please, protect these old forests and the wildlife that live there, for our children, grandchildren, and our planet. |
| Brian | Leacu | Waltham | MA | |
| J. Paul | Minkin | Concord | MA | |
| Christine | Leeman | Fairhaven | MA | |

| | | | | |
|-----------|----------|------------------|----|---|
| Simca | Horwitz | Roslindale | MA | |
| Bruce | Olson | Milford | MA | |
| Lynne | Man | Lunenburg | MA | |
| Terry | King | Lincoln | MA | once gone, that's it |
| Lindsay | Keith | West Bridgewater | MA | |
| Elizabeth | Gorman | Winchester | MA | This issue matters to me because wild forests are essential resources for absorbing atmospheric carbon and slowing climate change. In addition, they restore and elevate our souls as evidence of the beauty of God's creation. |
| Tracy | Revett | Somerville | MA | |
| Jussi | Gamache | Somerville | MA | |
| Virginia | Jastromb | Northampton | MA | |
| Bruce | Tillery | Upton | MA | |
| Carol | Goslant | Cambridge | MA | |
| Marlene | Schwarz | Auburndale | MA | |
| Maureen | Sundberg | Andover | MA | Protecting forests is important to me because old-growth forests are irreproducible. Once they are lost, we will never have these amazing resources and the ecosystems they encompass available again. We must not allow protections to be chipped away. |
| Stacy | Diamond | Boston | MA | Please protect all government lands from corporate exploitation-logging doesn't belong on a protected land, a fact which should be obvious to everyone but apparently has been overlooked when in the hands of those wishing to bow to commercial interests for personal gain. I wish to urge you as strongly as possible to make every effort to safeguard the Northwest Plan and all government-held lands. These forests are already in danger from fire, climate change, pollution and human encroachment so please preserve these precious remaining forests |
| Beth | Garcia | Groton | MA | Now is the time to protect our forests. With Trump proposing to clear cut National Parks, the environmental repercussions are enormous, for trees, the land, the animals, the humans, etc. It's a lot easier to destroy something than to grow it back! Please protect the forest |
| Walter | Gotham | Haverhill | MA | |

| | | | | |
|-----------|-------------------|--------------|----|---|
| | | | | We all need old growth forests for clean air, their majesty just to look at, for all the animals and birds that nest there. Climate change is wrecking our air, and making the planet much hotter, and the USA as well. Tribal lands respect the old growth forests for way more than most Americans do. Preserve wildlife, Old growth trees, keep our food and water cleaner, and particularly the air we breathe which gives of life. Don?t let Trump have his way to get rid of all the environmental rules that keep us alive and future generations as well! |

| Leslie | Pope | Gloucester | MA | |

| | | | | |
|-----------|-------------|---------------|----|---|
| Elaine | Dionne | Hopedale | MA | Please! Let's not be the greedy people we have been in the past and think of more than making money. We need to be Greedy and save our trees & land for future generations & the wildlife that depends on our forests as well. We can't go backwards!! |
| Deborah | Coviello | Clinton | MA | |
| Sarah | Wolff | Medford | MA | |
| Lisa | Contarino | Cambridge | MA | |
| Deb | Stringham | Sharon | MA | These forests are extremely important to mitigating climate change |
| Donna | Adams | Newton | MA | Our old growth forests are important! |
| Janet | Mihalyfi | Charlestown | MA | |
| Gabi | Loeffler | Westborough | MA | A better future starts with protecting nature. |
| Eileen | Kelley | Amherst | MA | |
| Judy | Walker | North Andover | MA | |
| Nicolle | Becker | Waltham | MA | Please protect what's left of our forests. They are the backbone of our ecosystems and are irreplaceable. |
| Christine | Goulet | Ayer | MA | Please protect forests!! There is no need to cut them down! |
| Stacy | Diamond | Boston | MA | Please protect all woodlands and forests that come under government purview- the Northwest forest Plan is crucial for maintaining at least this relatively small area of natural land having to keep at bay logging and other corporations that wish to exploit our natural lands for profit. Please do everything possible to keep these natural habitats safe from all sorts of corporate interests. Too many of these woodlands have been opened up to logging, thereby destroying the ecosystem for pollinators, birds plants and endangered species. |
| Paul | Brewer | Boston | MA | |
| Lucie | Burke | Marblehead | MA | |
| Donna | Schubert | Bourne | MA | |
| Pamela | Maxfield | Danvers | MA | Once these graceful old trees are destroyed, it takes countless years for them to recover, if ever. Let's reconsider cutting down old-growth trees. |
| Wendy | Hollis | Agawam | MA | |
| Mary | Blazejewski | Greenfield | MA | |
| Jeremy | Lane | Sterling | MA | |

| | | | | |
|-----------|----------------|-----------------|----|---|
| Laurie | Lane | Sterling | MA | Protect our old growth forest. It's essential for clean water and protecting species and fish that are dependent on it. Mess with the ecosystem and it will collapse. Continue the NWF Forest Plan that has been a success in maintaining a vibrant healthy habitat that benefits us all |
| Vanessa | Kirchner-Leida | Bedford | MA | |
| Tom | Dignes | East Falmouth | MA | |
| nicole | terrien | Arlington | MA | Forests are beautiful places, full of birds, mammals, insects, plants, and fungi, all together the way they have done for millions of years. Being in a forest connects you to that time, to things that are bigger than your self, and reminds us that though we are small, we can and do have an impact. Why be cruel when you could be kind? Why be careless when you could be careful? Why be ruthless when you could be generous? God says to love your neighbor as yourself - these forests, animals, plants, etc are our neighbors. Let's be good to them. |
| Edwina | Frei | Mashpee | MA | |
| Judith | Barr | Wellesley Hills | MA | The nation needs old growth forests to encourage biodiversity and sustainability of the forest. Old growth trees are "Mother Tree" with underground links to surrounding younger trees. |
| Marydana | Gershanoff | Lincoln | MA | |
| Catherine | Wakely | Framingham | MA | |
| Katherine | Levin | Scituate | MA | |
| Elena | Tillman | South Hadley | MA | |
| Pong | Louie | Brighton | MA | |
| Sondra | Shepardson | Attleboro | MA | |
| Christine | Hoguet | Malden | MA | |
| Sandra | Fosgate | Plymouth | MA | Only a tiny fraction of old-growth forests are left, and they're priceless - they may contain the next cure for a major disease. |
| Jesse | Iskra | Oak Bluffs | MA | I had hoped Dr Seuss - The Lorax really said all we needed to know about what our forests are good for. Not profit, not material. We need them to live and Trump and his cronies do not care about Humanity- just wealth, their own. |
| Claire | Goode | Bourne | MA | Make the right choice. I'm sure our children will be better off for it. |
| Alex | Gorokhov | Adamstown | MD | Protect the old growth forests, please. |

| | | | | |
|---------------|-------------|---------------|----|---|
| James | Kline | Silver Spring | MD | Please protect our forests! |
| Dianne | Van Sciver | Baltimore | MD | |
| Alicia | Czechowski | Baltimore MD | MD | Stop killing my planet! |
| Robbie | White | Silver Spring | MD | |
| Scott | Hutter | Columbia | MD | |
| Andrew | Deranger | Cockeysville | MD | |
| William | Yates | Lothian | MD | |
| Anthony | Erdman | Baltimore | MD | |
| Christopher | Ecker | Rockville | MD | |
| Gale | Quist | Chestertown | MD | I have hiked through the ancient forests of the NW, in awe of the spectacular old trees and surrounding ecosystems of mosses, ferns, and so much more. If we lose these resources, they will be gone for many lifetimes. We must preserve what remains, and manage them responsibly. |
| Patricia | Burton | Gaithersburg | MD | |
| Elizabeth Ann | Hull | Baltimore | MD | We need to protect our Forrests for the future of our planet and future generations. |
| Doug | Kelley | Silver Spring | MD | |
| Kit | Mason | Silver Spring | MD | Keep on protecting the small amount of old-growth forest remaining in this country. It is a resource that cannot be replaced, it is part of an incredible ecosphere that must continue. |
| Robert | Lumsden | Annapolis | MD | |
| Ida | Mae | Baltimore | MD | |
| Joy | Mayfield | Chestertown | MD | |
| Julia | Clark | Bel Air | MD | A few years ago we visited the Olympic National Park and were totally blown away by that amazing place because of its beauty, biodiversity, and healing power of old growth forest. Preserving such areas is vital to the health of the nation and they must be protected and increased at all costs. |
| Patricia | Glander | Silver Spring | MD | Please help |
| Trisha | Thomas | Annapolis | MD | |
| John & Julie | Fitzpatrick | Catonsville | MD | Please study the science on this; old growth forests are necessary for the preservation of this planet and the survival of endangered animal and plant species. Our economy can find cleaner, greener solutions and still be sustainable and keep the planet healthy. |
| Leland | Cheskis | Silver Spring | MD | We don't have many old-growth forests. Let's take care of them! |

| | | | | |
|------------|------------|----------------------|----|--|
| Betty | Krier | Takoma Park | MD | Old growth forests take generations to replace. Meanwhile, important habitat and carbon sinks are lost. Do not adopt this shortsighted plan. |
| Katy | Orme | Cabin John | MD | |
| Anju | S. | Silver Spring | MD | |
| Michael | Langton | Newburg | MD | If Trump has his way, he will dismantle all environmental regulations. Please help stop this horrific administration from destroying the environment. Thank you. |
| Barbara | Winner | Arnold | MD | Trees help to reduce air, water, and soil pollution. We must preserve trees and forests for the health of our planet. Now more than ever before the positive environmental actions we take can make our world a safe and healthy place for all future generations. |
| Thomas | Williams | Rockville | MD | Protect these old growth forests. They cannot be replaced, and are our legacy to future generations. |
| Ali | Cuza | Elkton | MD | |
| Matthew | Bayne | Lutherville Timonium | MD | |
| Ernestel?e | Kilbourne | Beltsville | MD | |
| Scott | Draper | Crownsville | MD | Please protect our forests that where we fish hike and relax |
| Alicia | Czechowski | Baltimore | MD | Stop trashing nature! |
| Laura | Bonkosky | Greenbelt | MD | We need this old growth forest and all the protection the majestic trees give to our land and water far more than additional sources for lumber |
| Rakhee | Goyal | Olney | MD | |
| Donald | Cowan | Silver Spring | MD | |
| Edward | Bielaus | Rockville | MD | |
| David | Burnick | Silver Spring | MD | |
| M | Sampery | Halethorpe | MD | Dear Mr. President, please protect our forest, the old growth and all its inhabitants. This forest, trees and land and wildlife are the most precious things we have on this earth |
| Ted | Weber | Annapolis | MD | |
| Debbie | Farlow | Bishopville | MD | |
| Alex | Gorokhov | Frederick | MD | |
| Kelly | Allison | Berlin | MD | There is no reason to destroy the last pure thing in this nation. Hands off our national forests. Keep our forestry experts employed. |
| CHERYL | FAHLMAN | Gaithersburg | MD | |

| | | | | |
|----------|------------|----------------------|----|--|
| Therese | Dougherty | Towson | MD | |
| Pat | Burton | Gaithersburg | MD | |
| Liz | McDowell | Grantsville | MD | If America is truly great, then we can protect these forest for present a future generations. |
| Scott | Hutter | Glen Burnie | MD | |
| Megan | Lankenau | Silver Spring | MD | |
| Patricia | Burton | Gaithersburg | MD | |
| Alvernon | Brown jr | Hyattsville | MD | |
| Lillian | Luksenburg | Silver Spring | MD | Once these trees are gone, they're not coming back! History will judge you on the actions you take today. |
| Alan | Wojtalik | Baltimore | MD | |
| Hayden | Reiter | Ellicott City | MD | |
| Marsha | Ansel | Hampstead | MD | |
| Kenneth | Cohen | Laurel | MD | These forests provide habitat for numerous birds and animals. The forests also provide an inspiring environment for people to appreciate the natural world. |
| Elaine | Nahai | Woodbine | MD | Forests are valuable habitats. They sequester carbon which helps with climate change. Please help safeguard them for our future. I love to go hiking in forests. Mature forests should not be logged, leave them alone! Our forests need to be protected now for future generations. |
| M | Langelan | Chevy Chase | MD | |
| Marc | Imlay | Bryans Road | MD | |
| James | Togashi | Silver Spring | MD | |
| Joy | Mayfield | Chestertown | MD | |
| Patricia | Kirk | Lutherville Timonium | MD | |
| Nikki | Wojtalik | Parkville | MD | |
| John | Haresch | Boyds | MD | |
| Lynne | Hottell | Bethesda | MD | |
| Donald | Schwartz | Baltimore | MD | |

| Brittany | Comer | Cumberland | MD | |
| Steven | Kline | Middle River | MD | |

| | | | | |
|-----------|-----------|------------------|----|---|
| Carol | Appleby | Towson | MD | I may live in the east but hope to visit these irreplaceable forests someday! |
| David | Band | Takoma Park | MD | |
| Cheryl | Palmer | Thurmont | MD | |
| Janis | Oppelt | Crownsville | MD | |
| Michael | Kurman | Owings Mills | MD | |
| Steven | Lipson | Silver Spring | MD | |
| Anju | S. | Silver Spring | MD | |
| Jennifer | Rossmere | Rockville | MD | Please continue to use your power to protect old growth forests. These forests are some of the oldest and most important ecosystems we have. Once they are gone, they can never be replaced. These forests provide clean air, water, and habitat for countless species. We, as humans, have a responsibility to protect our earth and all its diversity for future generations. Keeping old growth forests is part of that. |
| Daniel | Vice | Bethesda | MD | Please do not increase logging of our forests. |
| Maureen | Schriber | Prince Frederick | MD | |
| Lisa | Krausz | Clarksville | MD | |
| Elizabeth | Moore | Gaithersburg | MD | |
| Jane | Woltereck | Phoenix | MD | |
| Julia | Redifer | Taneytown | MD | |
| Karen | Whitehair | Middletown | MD | Anyone who has walked through a forest knows how time stands still. Your heart fills with peace. The world becomes right again. We humans need forests, not only for the economic benefits but also for our mental health, and our very well-being. Forests also provide us with oxygen and without it, we will no longer be able to live. Everything we see around us- the trees, birds, sky, fungi, insects, animals, and humans- is part of a continual cycle. We need each other. Wonton cutting will only come back to haunt us in the end. We must be forward-looking rather than greedy filling an immediate perceived need. Please keep our natural forests intact and cut only from forests established for sustainable forestry. Do not allow Trump and his cronies to grab natural resources to line their selfish, already bulging pockets. End the pillage of our natural lands. Stop Trump!!! |
| Keith | Brennan | Manchester | MD | |
| Melanie | Brennan | Manchester | MD | |

| | | | | |

| Michele | Bouchard | Waterville | ME | |

| | | | | |
|----------------|-----------|---------------------|----|--|
| Nicholas | Pelletier | Bernard | ME | Please protect our remaining old growth forests, they are critical to the environment of which we all are apart and belong to. There are so few remaining we can not afford to jeopardize more. Please help protect them for future generations. Don't allow the greed of a few ruin our world . |
| Kathie | Brown | Lincolnville Center | ME | Old growth forests are the breath that sustains the health of our planet, please protect them. |
| Pam | Krupinsky | Hallowell | ME | |
| Barbara | Wood | Wells | ME | |
| Karl | Clarke | Georgetown | ME | |
| Ruth | Mccord | Oxford | MI | |
| Andrew | Kasha | Ypsilanti | MI | My home state of Michigan has only a few stands of old growth trees remaining in the lower peninsula. Good fortune and good foresight saved these trees so that generations later we can still enjoy them. Please do not let intact old growth forest in the Pacific Northwest come under the axe; while these trees may seem to be "renewable" resources, the vibrant ecosystems they support above and below ground are not. |
| Helen | Huff | Tecumseh | MI | Don't throw away our future for some small short term financial gain. |
| Susan | Wheadon | Cedar | MI | |
| Jody | Richmond | Chelsea | MI | |
| Geri And Larry | Biggs | Dearborn | MI | |
| Serge | Schillio | Stevensville | MI | We need protection and responsible management of these forests?.not deforesration and exploitation |
| Paul | Iddings | Petoskey | MI | |
| Autumn | Bell | Kalamazoo | MI | |
| Michael | Horner | Southfield | MI | |
| Russ | Bellinger | Plymouth | MI | Please do everything you can to stop the devastation and abuse of our forests and fight climate change. I do not agree at all with the current administration's policies. We only have this one last chance to try and protect the beauty of this planet. Thank you. |
| Annie | McCombs | Kalamazoo | MI | Public lands and forests belong to the People, not extraction corporations. Stop it. |
| Sue | Parsell | Ann Arbor | MI | |
| Dr. Susan | Huber | Royal Oak | MI | |

| | | | | |
|---------------------|-----------|-----------------|----|--|
| Georgia | Griffin | Chesterfield | MI | We need to preserve ancient old-growth forests now more than ever! |
| Tom | Scheller | Hillsdale | MI | |
| Carol | Gagliardi | Ann Arbor | MI | |
| Michael | Wolf | Alto | MI | My husband and I are avid hikers and have visited many national forests. We enjoy the solitude and beauty and seeing wildlife in their natural habitat. Please particularly protect old growth forests, using indigenous knowledge and the best of science as guides, especially when it comes to protection from wildfires. |
| Hillary | Shemes | Ithaca | MI | |
| Mary | Loos | Grand Rapids | MI | |
| Elizabeth | Snyder | Birmingham | MI | I am 82 years old. The health of our forests matters to me because I want them to be there for the health, safety, and beauty of generations following me. |
| Mike and Susan Gail | Raymond | Shelby Township | MI | |
| Pauline | Feltner | Detroit | MI | Forests are essential to our life. We need them for life, beauty, relaxation. Please, please let us continue to protect our precious forests. |
| Renee | Crutcher | Davisburg | MI | |
| Ann | Rogers | Traverse City | MI | |
| JoEllen | Rudolph | Petoskey | MI | Our precious NW Forests MUST be saved. NO OLD GROWTH should be cut. They are critical for the survival of many species and a huge factor in combatting climate change by absorbing carbon in the atmosphere. |
| Dash | Riprock | Saginaw | MI | |
| Deborah | Burcar | Grand Rapids | MI | I have had the honor of visiting many of a National Parks and Forrest in our great country. ?America the Beautiful?it is called.. Redwoods, Sequoias, Bristol Cone, other old growth Forrest?s. We must defend and protect their existence! Not sell it off and destroy for profit for some. WE MUST FIGHT FOR NATURE! |
| Daniel | Solano | Detroit | MI | |
| Melvin | Vance | Shelby Township | MI | |
| Michael | Webster | Grandville | MI | |
| Michael | Foley | TRAVERSE CITY | MI | Please do not destroy our few remaining old-growth forests for short term gains! |

| Kimberly | Lapere | Belleville | MI | |
| Cirrae | Habermehl | Waterford | MI | |
| Jeff | Sparling | Warren | MI | Our forests are a gauge of wealth of the community. Without them, we die-and so do you! |
| Rock | Dash | Saginaw | MI | |
| Daniel | Solano | Detroit | MI | |
| Apryl | Scheffler-Martin | Portage | MI | |
| Benjamin | Williams | Richland | MI | |
| Carian | White | Livonia | MI | |
| Jennifer | Rier | PINCKNEY | MI | |
| Richard | Taylor | Temperance | MI | Indigenous community members should have a most important voice in all proposed amendments to the plan. |

| | | | | |
|------------|------------------|---------------------|----|---|
| | | | | Hi! I used to live in the PNW and miss its beauty! It's not just a pleasure to look at. Going through forests, national parks, and protected lands provides mental and physical health for humans while contributing to the biodiversity and climate of our Earth. Please do what you can to protect our nation's precious resources! |
| Brandy | Boak | Lansing | MI | |
| Christyann | Smith | Detroit | MI | |
| Chari | Jean | Kentwood | MI | |
| robert | Aguirre | Linden | MI | |
| Trinity | Moles | Swartz Creek | MI | |
| Rob | Jenkin | Walled Lake | MI | |
| Barbara | Wilcox | Swartz Creek | MI | |
| Doug | Cornell | Howell | MI | Please don't destroy our irreplaceable old growth forests. Their beauty is awe-inspiring and they fix carbon dioxide to help control the green house gas effect. |
| David | McGraw-Schuchman | Minneapolis | MN | |
| Doug | Jost | Cologne | MN | |
| Mary Lou | Hoff | Minnetonka | MN | |
| Lisa | Pollei | Oronoco | MN | I appreciate your time and attention. |
| Tegwin | Moye | Inver Grove Heights | MN | |
| Kay | Slarna | Spicer | MN | |
| David | Keller | Knife River | MN | Please consider long-term consequences of deforestation-- concerns like carbon sequestration that trump and his minions probably don't understand and don't care to learn. |
| Elaine | Mayer | Plymouth | MN | Maintaining our old-growth forests will make it easier to conserve them. |
| Perry | Grueber | Minneapolis | MN | After more than a hundred years of sustainable forest management practices, how can this even be considered. |
| lisa | bergerud | Minneapolis | MN | |
| Sue | O'Donnell | Annandale | MN | Please protect all the forests on our planet. They provide beauty and help to keep the air cleaner. They provide homes to many species of birds and animals. I love the beauty of the Northwest and I love hiking through the forest. Please protect them before it's too late! Thank you. Sincerely, Susan O'Donnell in Whitefish MT and Annandale Mn. |
| Robert | Logelin | Savage | MN | |

| | | | | |
|-----------|-----------|-------------|----|--|
| Lori | Ells | Wyoming | MN | |
| Mary | Jenson | Roseville | MN | |
| Cynthia | Brockway | Saint Paul | MN | |
| Lisa | Clark | Plymouth | MN | It's hard to go back once we have taken something. Our wild world brings so much joy to people, value in ecotourism and provides homes for so many plant and animal species. I want my children to be able to enjoy a world filled with lush trees and green environments so they, too, can enjoy the fascinations of nature. |
| Cathie | Duncan | Saint Paul | MN | |
| Erik | Voldal | Rochester | MN | Our family has greatly enjoyed hiking in the magnificent forests of the Cascades. Please focus on preserving them, and not on logging. |
| Lynn | Lang | Saint Cloud | MN | |
| Julee | Mead | Rochester | MN | |
| Curtis | Coffer | Saint Paul | MN | |
| Brenda | Kemmerick | Minneapolis | MN | |
| Jeffrey | Koon | Saint Paul | MN | My daughter lives in Oregon & I used to live in CA. I've seen clearcuts in Oregon in times past, and they are gourd-awful vistas, like hillsides with nothing but stumps. I dreaded at the time to even think about the long-term effects from such landscapes... especially near salmon environments. And now, with global warming confirmed many times over, we need to keep the old growth and carefully removed only what modern science identifies as especially dangerous in terms of fire. You should also consult with the organization, Forest Service Employees for Environmental Ethics. And permanently terminate all Forest Service actions & proposals that twist their mandate (and our needs) trying to weasel ways to cut old growth trees (hint: they add a little revenue to their budget and every other value suffers). |
| Susan | Imker | Isanti | MN | |
| Christina | Fanciullo | Minneapolis | MN | We need a future worth living for. Please protect the trees. |
| Margaret | Keating | Minneapolis | MN | We need our trees and forests. They add beauty and health for all. I have been able to go to many forests and I would like to see more. Please save our forests for the future. |
| Bruce | Goff | Eagan | MN | |
| Thomas | Griffin | Minneapolis | MN | |
| Nancy | Gardner | Minneapolis | MN | Please stop the madness of the trump Administration. |

| | | | | |
|----------|--------------|-------------|----|---|
| Michele | Vaillancourt | Saint Paul | MN | |
| Peggy | Bach | Andover | MN | Please keep the forests and nature ecosystems healthy and around for many generations. |
| Andy | Pearson | Minneapolis | MN | |
| | | | | As a child of military parents, I grew up exploring the whole world. In my opinion, no country on Earth matches the US in terms of stunning natural beauty. Our parks and protected lands are universally beloved and universally popular. Logging in our forests must be done sustainably and responsibly, for the continued well-being of both the forest and the local logging industries. I urge you to consult with experts on this ecosystem and come up with a plan that is sustainable for industry, recreation, and habitat. Logging forests irresponsibly spells the doom of the American logging industry. |
| Tenley | Feinberg | Minneapolis | MN | |
| Karen | Raum | Minneapolis | MN | Our trees, forests, are more important than we realize, our climate is dependant on them, wildlife can't survive without them and many more reasons to take care of them. |
| G | Hagen | Rochester | MN | |
| Kris | Acuna | Rochester | MN | |
| Lauren | Roquet | Mahtomedi | MN | |
| Kristine | Runyon | Bloomington | MN | |
| Rick | Rayburn | Finlayson | MN | |
| Jody | Goldstein | Rochester | MN | |
| Kate | Wolford | Minneapolis | MN | |
| Annette | Digre | Saint Paul | MN | |
| Lori | Ekholm | Richfield | MN | |
| Mary | Ludwigson | La Crescent | MN | |
| Doug | Jost | Cologne | MN | |
| Patti | Roepke | Aitkin | MN | Forests remove carbon dioxide and clean our air. We need to leave large forests like the Tongass to combat climate change. |
| H | Ande | Igh | MN | |
| Marck | Oconnell | Minneapolis | MN | |
| Randy | Wenthold | Menahga | MN | I have forest property in MN that I manage so understand the value of these. |
| Kari | Miller | Minneapolis | MN | |

| | | | | |
|----------|-------------|------------------|----|---|
| | | | | I have watched the logging industry abuse their access and decimate both the Northern Highland - American Legion State Forest and the Chequamegon-Nicolet National Forest in northern Wisconsin. It is heartbreaking to drive through areas once filled with beautiful mature forests, only to find a clear-cut landscape full of stumps and debris that provides perfect tinder for wildfires. The logging companies are not careful in their operations and leave a wasteful, dangerous, hideous mess in their wake. They have also destroyed old growth areas of the Chequamegon-Nicolet using the "ask for forgiveness instead of permission" philosophy all in the name of profit. Please don't let this happen to the Northwestern Forests! |

| Audrey | Kramer | Chanhassen | MN | Forest Service: To protect our population from climate disastrous floods, water contamination, explosive forest fires, melting glaciers, wildlife extinction, please protect our forests in all states. Forests care and serve us; we must protect and let them grow in return as it means our own safety as well as their ability to thrive and nurture us. Audrey in Minnesota Thank you! |
| Connie | Grundhofer | Lino Lakes | MN | Thank you for the opportunity to express the importance of The Pacific Northwest. This ecosystem like all others need to be protected and able to be all that it can be. Habitat loss is a large part of loss of birds and insects. Estimated 45% - 50% reduction of insects in the USA since 1970. About 3 billion birds in North America lost since 1970. Habitat, ecosystems erased or changed has effected our world, their world. We the people are at risk by interfering with our ecosystems in a negative way. Listen to what Doug Tallamy is asking for us to do. We are needing to repair our ecosystems now. We are running out of time. Think of the future of your children, grandchildren, all children of the future. Will you be proud to say that I helped our planet? Helped to keep it thriving? Clean water, food, a beautiful place to reduce stress and anxiety. A healthy place to live. Please protect our forests. |

| James | Camp | Lake Saint Louis | MO | |

| | | | | |
|----------|-------------|--------------|----|---|
| Gala | Perry | Kansas City | MO | I have always valued the Pacific Northwest for its incredible forests, clean rivers, and diverse wildlife. These lands are irreplaceable, not just for their beauty, but for their role in storing carbon, providing habitat for endangered species, and supporting communities. The Northwest Forest Plan has been essential in protecting what remains of these ecosystems, and while updates should incorporate Tribal perspectives and climate science, they should not be used as an excuse to increase logging. Logging mature and old-growth forests will only weaken the very protections that have made this plan so successful. I urge the Forest Service to strengthen?not undermine?this critical plan by ensuring full protections for old and mature forests, prioritizing ecosystem health, and maintaining a science-based approach. Our forests are worth more standing than cut. Please keep them protected for future generations. |
| Steven | Ross | Nixa | MO | I have marveled at the beauty of old growth forests and look forward to sharing them with my grandchildren. Please work to protect them for future generations to enjoy. |
| Bob | Bolland | Saint Louis | MO | |
| Victor | Poland | Parkville | MO | Thanks for Your Time to Listen to Me |
| Pam | Rethy | Saint Louis | MO | Please continue to protect our mature & old growth forests for the wildlife and our children and grandchildren to come. This is critical habitat and should be cherished. Please do not ruin it. |
| Jonathan | Kiesling | Saint Louis | MO | |
| Brian | Coates | Columbia | MO | We must continue to protect old growth forests! |
| DAVID | WILEN | Saint Louis | MO | |
| Cynthia | Hobart | Rolla | MO | |
| Y | Rocco | Chesterfield | MO | Original forest, mature forests, are the best for carbon sequestration, and for those living near them. Create a good forest plan. |
| Karen | Schmidt | Theodosia | MO | |
| Janice | Starke | Sullivan | MO | |
| Louise | Wienckowski | Springfield | MO | Please update your plan to maintain old growth forest protection, consideration for indigenous tribes perspective, the carbon sequestration of these forests and incorporating best scientific practices in management policies. |
| Rebecca | Rook | Saint Louis | MO | |
| Dennis | Honkomp | New London | MO | I have experienced the majesty of old growth forests in the Pacific Northwest and this plan must be saved! |

| | | | | |
|------------|------------------|---------------|----|---|
| Ryan | Philyaw | Lees Summit | MO | Old growth forests provide an unparalleled place to hike and are important in preserving the biodiversity of the region. |
| Daniel | Conford | Saint Louis | MO | The remaining old growth are islands supporting species and recovery. I remember the effects of wholesale logging. Today we have better methods and can produce lumber on already dedicated and previously denuded lands. Protect old growth and permit current mature forests to grow and thrive so that in several generations they will effectively be old growth as well. |

| | | | | I have a BS in Forestry and Soils from the University of Montana and over 40 years experience . It is essential that we protect old-growth forests and the species they support. Recent efforts to "improve forests" by thinning more often harm the resource and promote global warming by removing or burning organic materials and opening up the ground to increased light and temps. Burning contributes to greenhouse gasses. |

|-----------|--------------|-------------|----|--|
| Lois | Howlett | Chapel Hill | NC | <p>Please protect forests, especially old growth forests. They are key to our human survival on Earth. As Henry David Thoreau wrote, "In wildness is the preservation of the world". If lumber is needed, please use agricultural forest land. These trees also sequester carbon, provide oxygen, clean the air and water.</p> <p>What we do to our environment we do to ourselves!</p> <p>Thank you,</p> <p>Lois and Al Howlett</p> |
| Kathy | Lamb | Raleigh | NC | <p>We need to look at the value of these forests when they are still standing for carbon sequestration in a time of severe signs of climate change.</p> <p>We also need to ensure forests are managed based on the best available science so that they can be healthy and wildfire resilient in these times of increasing prevalence of wildfires.</p> <p>Provisions in the proposed amendment would open up older, mature trees, which the original plan protected, to new logging. These provisions also significantly increase the amount of post fire salvage taking place - which can really harm the ecosystem.</p> <p>The plan claims to enhance community stability but would produce only minor effects across the large socioeconomic region. The plan disregards the value of forests for habitat, climate stability and carbon sequestration, recreation, and clean air and water that communities actually rely on.</p> <p>We can never replace our oldest forests.</p> |
| Katherine | Rogers | oriental | NC | |
| Dorian | Dagati | Chapel Hill | NC | |
| Gina | Debreto | Weaverville | NC | <p>Once they are gone, these forest, these trees, the unique habitats they form, these national treasures and priceless resources, they? re gone. We only get one chance to do this right.</p> |
| Rita | Burns-wooten | Conover | NC | <p>I URGE you to work to PROTECT the old growth forests!!! Once they are gone, they can not be replaced!!!! I am an RN and know that the health of the Earth is intertwined with the health of all people!</p> |
| L | Franklin | Waynesville | NC | |

| | | | | |
|--------------|--------------|--------------------|----|--|
| Beatriz | Lothrop | Weaverville | NC | Hello 13 years ago I moved to the Blue Ridge Mountains of Western North Carolina because of our protected old growth forests which I get to hike and enjoy their beauty and habitat for amazing forests and wildlife. Please continue to protect with the best scientific practices our forests and mountain communities for the future generations of our families. If we don't care to protect our inheritance from Nature, all of our offspring will be denied the awe I receive every time I visit and hike our wondrous. Thank you for listening. |
| Elizabeth | Chappell | Julian | NC | The survival of life our planet is essential in part to our trees globally! |

| | | | | |
|-----------|-----------|----------------|----|---|
| Marsha | Stopa | Brevard | NC | Protecting our forests -- especially the few remaining old-growth forests -- is important because they anchor us in where we came from and what it means to be human on a diverse planet. Once gone, these forests are never coming back. That's unacceptable. |
| Richard | Vultaggio | Valdese | NC | |
| Marla | West | Asheville | NC | |
| James | DeGrave | Arden | NC | |
| Pamela | Rose | Newton | NC | Our forest are essential to our physical and mental wellbeing. I walk almost everyday in woodlands and find an inner peace. Please consider the long term effects of attacking these beautiful forests. |
| Elaine | Lite | Asheville | NC | We cannot lose our precious forests! Protect then NOW! |
| Gretchen | Wolf | Hillsborough | NC | |
| Katherine | Rogers | Oriental | NC | |
| Laura | Hill | Winston Salem | NC | Listen to the conservation scientists...not to an administration that is putting corporate profits over the health and safety of generations of people, plants, trees, and animals. |
| Don | Bergey | Winston Salem | NC | |
| Julie | Frey | Belmont | NC | Wilderness ecosystems must be protected as habitat for life in these systems and as a deterrent to climate change. |
| Robert | Zinn | Hendersonville | NC | |
| Stephanie | Rogers | Hillsborough | NC | I have fought to protect old growth forests since 1973. In that time our knowledge, through scientific research, has enabled us to advance our conservation efforts. It is unacceptable to abandon decades of serious effort. |
| David | Goist | Asheville | NC | |
| Martha | Johnson | Black Mountain | NC | I grew up in a large camp where my father was camp director and president of the American Camping Association at various times. A respect for our environment was deeply instilled in me, especially for our forests. I have returned to my birthstate and live near old growth forests. Few of these remain on our entire planet. We must protect them for that reason and because they give back far more than they take. |
| Kendra | Sykes | Tobaccoville | NC | Forests are important for clean air and for people to get out into nature! Please continue to protect Maruti Forests in the NW US. |
| SUSAN | GALANTE | Fuquay Varina | NC | |

| | | | | |
|-------------|------------|---------------|----|---|
| Robin | Smithwick | Newport | NC | please leave the forests alone we need the trees for oxygen and plus the trees look pretty. |
| Jennifer | Angyal | Gibsonville | NC | |
| Laura | Heise | Pittsboro | NC | Our nation's forests play a vital role in our national ecosystem. Excessive cutting for short term economic gain is an environmental disaster in the making. |
| Irene | Radke | Mooreville | NC | |
| Margaret | Silvers | Carrboro | NC | |
| S | B | Burnsville | NC | |
| Elizabeth | Caudill | Winston Salem | NC | Humans' relationship with trees is as old as our species. They are rooted deeply in our souls and call out a yearning within us to be with them. We must protect our large forests, especially the remaining old-growth forests; our very lives surely depend on it. |
| Deborah | Swanson | Fairview | NC | |
| William | Dawson | Raleigh | NC | Timber harvesting as it currently functions is not sustainable, in any sense of the word. We need to look into other methods to produce building and paper products that do not destroy what may be one of our most valuable resources. We've seen the results of deforestation in the devastating effects on local populations through ecological disasters as well as the loss of tourism money and the damage to wildlife. |
| Ruth | Van Sickle | Marshall | NC | |
| Sandra | Bromble | Weaverville | NC | Why is there now a "need" to log the old forests that have been protected by the NW Forest Plan? Our changing climate needs these old growth trees. The ecology of the Pacific NW (think fisheries) is best maintained by leaving this thriving ecosystem alone. Please think beyond the pockets of a few lumber companies. |
| Carl | Sigel | Raleigh | NC | |
| Sue | Perry | Asheville | NC | |
| Stuart | Matthews | Angier | NC | Our old growth forests and peat bogs are nature's natural carbon sinks. They are our most cost efficient ways to remove CO2 from the atmosphere all we have to do is LEAVE THEM ALONE!!! |

| Carmen | Plummer | Midland | NC | |
| Matt | Yetter | Asheville | NC | We need to preserve our forests. |
| Robert | Eidus | Marshall | NC | |
| | | | | This is a time to save as many old growth forests as possible, as they are key to the future of this planet, our kids and grandkids. Thoreau said "In wildness is the preservation of the world" and he his right. Thank you for swift action on this. |
| Lois | Howlett | Chapel Hill | NC | Sincerely Lois and Al Howlett |
| Suzanne | Dickson | Sneads Ferry | NC | |
| Carole | Newsome | Emerald Isle | NC | |
| | | | | Old growth forests are vitally important for preserving the micro and macro genetic sources necessary to bring our denuded lands back to productive forests. They are a major key in reducing carbon and working to reduce global warming. The indigenous people of this land were working to protect these forests long before Europeans arrived on the scene. Their long history makes them better equipped to steer the process. Europeans had already worked to destroy their forests when they arrived; their descendants should not be placed entirely in charge of the forests of this continent with their past history. |
| Alison | Pockat | Cary | NC | |
| Sharon | Godfrey | Asheville | NC | PLEASE?we need all the PROTECTIONS possible for our forests and wildlands?.PLEASE!!!! |
| Davey Anne | Mcevers | Hickory | NC | Please save our trees, we need them more than ever!! |

| Kate | McQueen | Hillsborough, NC | NC | |
| Ingrid | Kalfaian | Gastonia | NC | Old growth forests are crucial to the health of the Earth! |
| Jim | Atkins | Winston Salem | NC | Old growth forests provide a respite from our crazy world. They are better medicine than any drug or prescription medicine. Plus they provide a more cost effective solution to the ills of this world. It's a no-brainer. We need to keep them forever. |
| Tom | Clarke | Greensboro | NC | |
| Will | Mckinley | Hillsborough | NC | |
| Gwendolyn | Pate | Greensboro | NC | |
| SUZANNE | DRAKE | Carolina Beach | NC | |
| Nancy | Tew | Sanford | NC | |
| Ester | Cova | Swansboro | NC | |
| Davenne | Essif | Chapel Hill | NC | I am struggling to come up with a personal message regarding this topic because I think the Sierra Club says it well and I agree with their messaging! Please continue to protect the old growth forest and consider other ways of controlling forest fires besides the logging of old growth trees (beaver estuaries, for example!). Please understand that I am in line with the Sierra Club's position on this. I hope you will consider taking this position as well! |
| Marcia | Lindler | Wilmington | NC | |

| | | | | |
|----------|-------------|---------------|----|--|
| | | | | As I child I was extremely lucky to visit many of the old growth mature forests around the country. I was awed by the majestic wisdom and beauty held within the trees, forests and ecosystems. I was also fortunate and shocked to visit Native peoples living in impoverished reservations after having been collectively robbed of everything. In a time when we are losing biodiversity, woodlands, and wildlife habitats it is even more important to protect old growth forest across the Northwest. Including and implementing tribal protections must be a priority. We need to learn to protect and caretake the earth and stop putting profits of a few above the good of the whole. Old growth mature forests have a lot to teach us. There?s a reason they still stand. They cannot be replaced. To this day, the healing power and wisdom of nature strengthens my being and my determination to give voice to the importance of protecting our mature old growth ecosystems. |

| Eric | Speed | Strafford | NH | Save our forests! |
| Katharine | Riley | Orange | NH | |

| | | | | |
|-----------|---------------|--------------|----|--|
| | | | | Forests are extremely important to me. They offer respite from daily stressors. And the diversity of life that relies on them is immeasurable. The carbon they capture for free is far more valuable than the lumber they could provide. If we cut old growth forests, there is no replacing them, except with many hundreds of years. Time that we do not have in the fight against climate change and in the race to protect endangered species. Please continue to protect these places. Without them, we will surely see a decline in diversity and balance. |

| Mara | Sabinson | Cornish | NH | |
| Elaina | Valzania | Greenland | NH | |
| | | | | No decisions about forests should be made without input from and respect for the native peoples who were the forests? original caretakers. Recent forest fires have shown how indigenous fire management was superior to our modern approaches. Similarly, the preservation of old growth forests will be more effective with native wisdom respected. |

| | | | | These forests need humans for the first time in history. The delicate balance is a great risk and damage is well underway. Please do what is possible to preserve the glory of this beloved part of our legacy. |
| Marcia | Brier | Hillsborough | NH | |
| Dan | LaCrosse | Manchester | NH | |

| | | | | |
|-------------------|---------------|----------------|----|---|
| | | | | I well remember the destruction of old growth forests plan over 30 years ago. This approach to old growth forests was a long, sad learning lesson in forestry. The spotted owl debate forced science to the forefront in discovering an ecosystem at the very top and bottom of old growth trees. Amending the forest plans, along with climate change, tribal input is essential for future maintenance. Our old growth forests are more important than ever due to climate change. May I remind those who want to fell these beauties that when they are gone, they are gone forever. |

|------------|-----------|--------------|----|---|
| | | | | I am an American who cares greatly about wildlife and environmental protections, and the profound importance of biodiversity to our nation and the world. America's old growth forests, especially those in the Pacific Northwest, which are included in the Northwest Forest Plan, are vital to the overall environmental health of our country, the continent, and our shared planet. Not only are the forests of the Pacific Northwest the habitat for countless plant and animal species, of which many are threatened and endangered, but they are also the lungs of our country's full ecosystem. The oldest forests are the most important forests to maintain our irreplaceable environment and help it continue to thrive. Therefore, I implore you please to make the right moral decision to protect these old growth trees by keeping the Northwest Forest Plan fully intact and not allowing any additional, destructive commercial and salvage logging in our treasured national forests. |
| Holly | McDonald | Robbinsville | NJ | |
| Chris | Noyes | Hillsdale | NJ | Natural Resources and Nature |
| | | | | I am reaching out to you today to ask you to protect the Northwest Forest Plan. It is essential that this protection be strengthened. The actions taken must be based on science, forward looking, and developed in cooperation with indigenous groups and tribes. In this time of climate change we need the carbon storage and sequestration the old-growth forests provide, and we need a thriving habitat for the animals that make our eco-system work. If we do this now, we will enrich our own lives and leave a valuable legacy for future generations. Please do the right thing. Please stand tall and protect the Northwest Forest Plan. Thank you for your time and attention to this issue. |
| Patricia | Lockwood | Montclair | NJ | |
| Jacqueline | Murtha | Hackettstown | NJ | |
| Laura | Kavanagh | Colts Neck | NJ | |
| | | | | The Forests are slowly being destroyed by fire, human encroachment, and mud slides. Now is the time to act for a future filled with forests filled with wildlife. |

| Joye | Crowe-logan | Bound Brook | NJ | |
| Paul | Rinear | Aberdeen | NJ | This is so important! |
| Christine | Coari | Toms River | NJ | Without the Northwest Forest Plan, the entire Pacific Northwest would have been logged because of greed. We must fight the greed and corruption that will occur over the next 4 years. The Northwest Forest Plan needs to be strengthened by including indigenous communities, preventing more logging and using science to manage forests. |
| Susan | Gates | Newfield | NJ | |
| Daniel | Wall | New Egypt | NJ | |
| Paula | Romanski | FLORHAM PARK | NJ | |
| Joan | Youell | South Orange | NJ | |
| Mihaela | Dinu | Freehold | NJ | As a resident of New Jersey, I am extremely concerned about the impact of climate change on the state's residents as well as on the population of the US and of the globe. The least expensive climate mitigation strategy is increasing the coverage of the Earth's forests, an approach known as afforestation. Old growth forests, of which not many remain on the globe, should not be touched but expanded. Any economic benefit that could be extracted from the exploitation of old growth forests will be repaid, multiplied by factors of ten to hundreds, by future generations who will suffer the consequences of present short sightedness, greed, and hubris. |

| Billy | Valencia | Las Vegas | NV | My name is Sylvia. Our forests are a place of beauty and wonder. Please save our forests for our children and grandchildren. |
| Sheila | Bell | Sparks | NV | Our forests contribute so much. Along with the greenest areas of the Amazon, these are the "lungs of the planet", and we cannot afford to be so destructive! Now is the time to create constructive plans to create more opportunities for reforestation, not deforestation! |
| Ken | Gibb | Zephyr Cove | NV | |
| Scott | Pratt | Las Vegas | NV | As a native of Vancouver, WA/Portland, OR (1961-2002). Destroying the forest for the past 300 years. ENOUGH!!! Trees don't have a voice. Majority of the lumber companies want to pillage for profit. And the young talk about global warming, (the best CO2 to O2 TREES!!!) ENOUGH!!! |

| | | | | |
|-----------|------------|-----------------|----|---|
| | | | | Environmental hazards continue to be a problem in this day and age. Many industries are indiscriminately logging and are attempting to log forests that are ecological diverse and vulnerable, especially old-growth forests. We've seen what happened during colonial times where trees were getting chopped down left and right, with no sure plan of replenishing the forests where they were taken from. These forests are homes to many species and provide resources to those who live on the land. To take the away will be detrimental everything in those areas. Clean air, habitats, food resources, etc. Forests in general need to be treated with integrity and respect. Old-growth forests especially require that. |

| | | | | |
|-----------|-----------|-------------------|----|--|
| Raphael | Kosek | Hopewell Junction | NY | Protecting our forests is so important to me because we are land and how we treat it. People and land are not two separate entities. |
| Nadine | Koza | New York | NY | |
| Barbara | Vitale | Long Beach | NY | |
| Kristin | Acocella | Mount Kisco | NY | |
| Scott | Forster | Buffalo | NY | Please save the northwest forest from being pillaged of its beautiful trees. We need these more than ever! Thankyou |
| Mark | Hochman | Ossining | NY | |
| Fran | Grady | Johnstown | NY | |
| Teresa | Beutel | Teresa | NY | |
| Alec | Thorp | Yorktown Heights | NY | |
| Elizabeth | Ashby | New York | NY | |
| Pamela | Miller | Brooklyn | NY | Ever since reading Richard Powers "Overstory" I don't just care about our forests, I'm in awe of them! |
| Sue | Maxam | Putnam Valley | NY | |
| C | Ezra | Croton on Hudson | NY | |
| Rosemarie | Pace | Middle Village | NY | |
| Tom | Olszewski | Katonah | NY | |
| Jeannette | Lovetri | New York | NY | Old Growth Forests Are Priceless. It is imperative that you save all old growth forests for future generations. They are not "just" trees, they are a vital part of the rich and diverse ecosystem that is crucial for the many species who live in these forests, beyond the trees themselves. The decision to cut these forests is selfish, foolhardy, disrespectful and frightening. The US Forst Service has an obligation to the people of this country, not just to corporations who would use the wood to make a profit for themselves. I urge you as strongly as possible to preserve the Northwest Forest Plan of 1994 and to do all you can to strengthen protections for all forests in the USA. Thank you. |
| Thomas | Landers | Oceanside | NY | Please do all you can to protect our environment. Stop the shortsighted, greedy grab to ruin our forests. |
| Shawn | Finlinson | Brooklyn | NY | I became a Citizen Pruner in my local community because I know how important they are--they are the lungs of our country and are one of the last remaining wonders. They must be protected and have a plan in place to maintain them. |
| Betsy | Kennedy | Mattituck | NY | |
| Kara | Huberman | Brooklyn | NY | |

| | | | | |
|-----------|------------|-------------------|----|--|
| Ross | Marshall | Lyons | NY | We need a strong NWFP to preserve our clean water and clean air, maintain the habitat, and stabilize climate and sequester carbon. And this will best be accomplished with the native peoples input. |
| Patricia | Espinosa | Richmond Hill | NY | |
| James | Jones | Bayville | NY | |
| Derrick | Tingley | Minoa | NY | |
| Pamela | Tishman | New York | NY | |
| R | Rivera | New Hyde Park | NY | Protect nature! |
| Marilyn | Baldo | Wallkill | NY | |
| Paula | Bacorn | Nichols | NY | Trees provide habitat for birds and wildlife, help to mitigate climate change, and are the lungs of the planet. |

| Deborah | Hoffmann | Buffalo | NY | |
| Losa | Rosado | Brooklyn | NY | |
| Jen | Horowitz | Scarsdale | NY | |
| Nancy | Prowell | Honeoye | NY | Generations of my family have working in Oregon forestry and logging. We need the old trees to sustain the forests, forest ecology, and the people of Oregon. |

| | | | | |
|----------|----------|---------------|----|--|
| Evan | Lawrence | Cambridge | NY | I had the good fortune to spend two summers in the Pacific Northwest, one of them in and near Olympic National Park, and fell in love with its forests. The value of these magnificent forests extends far beyond Salmon Nation to the essential role they play in sequestering carbon and regulating climate worldwide. Please do not undercut the existing plan! Change only what needs to be improved. |
| Mark | Nunez | Ballston Lake | NY | The Pacific Northwest Forest Plan is precisely what is needed to protect these western old growth forests for future generations. Lets remember what is really great about America is what was here originally and how vulnerable it all is to greedy short-sighted interests. |
| Daniel | Tainow | New York | NY | |
| Rob | Hamilton | New York | NY | |
| Karen E. | Lund | Staten Island | NY | |
| Narina | Schulz | Canandaigua | NY | <p>We need mature forests and old-growth! They are important for:</p> <ul style="list-style-type: none"> Safeguarding biodiversity and Reducing flood and erosion risk Providing clean, cold drinking water Fire resilience Outdoor recreation and Mental and spiritual well-being <p>You know, the Northwest Forest Plan has always had ecosystem health at its core. It's been a game-changer in forest management, and honestly, it remains a unique and successful model. If we look back at the decades before the Plan, unchecked logging across the northwest's national forests was really taking its toll. The Plan, though, has helped preserve what's left of our old-growth forests.</p> <p>That means we've been able to protect critical habitats for endangered species like the spotted owl and marbled murrelet, ensure clean and cold streams for salmon, bull trout, and even drinking water for communities downstream, and keep a vital carbon store intact. The Plan's key strategies were set up to make sure this e</p> |
| Tom | Clavin | Whitestone | NY | we need old growth forests!! |
| Brendan | Rooney | Brooklyn | NY | |

| | | | | |
|-------------|-------------------|----------------|----|--|
| Carol | Hansen | Watervliet | NY | Why would you destroy the old growth forests by unchecked logging? We must protect these forests for future generations of humankind and forest creatures. These forests play a tremendous part in maintaining progress in the handling of carbon as climate change control is a must. |
| Patricia | Yehl | Olean | NY | Old growth forests are essential for the future! |
| Steve & Lin | Schnepf@gmail.com | Macedon | NY | |

| Joanna | Taylor | Jackson Heights | NY | |
| Harold | Jacobowitz | New York | NY | |
| Brett | Baginski | Elma | NY | |
| Louise | Pillai | Copake | NY | There's so much we don't yet know about the balance of ecosystems and of nature. Because trees don't move and don't look like us, we treat them as lifeless, but they are in fact very much alive and active. Trees do so much good and are foundational to life and to myriad species' survival. They clean the air, bring rain, capture carbon dioxide, give us oxygen, provide shade and beauty and mental peace. Old growth forests are especially valuable and foundational, and at this time we need them more than ever. Old growth trees literally communicate with their daughter trees via root systems. They are irreplaceable within the ecosystem in so many ways. It is the height of tragic stupidity to rush in and cut these trees, ostensibly to reduce wildfires, but really, to boost the short-term profits of the lumber industry at the expense of everyone else. We are not the only species on this earth, and probably not the most important. Please do the right thing and protect these forests! |
| Thyais | Brown-Newball | Brooklyn | NY | |

| | | | | |
|-----------|----------------|-------------------|----|---|
| | | | | Protecting the old growth and mature forests of the Pacific Northwest is important to me because I believe maintaining the ecosystems there benefits all of us, even those who don't live there. Forests make our air healthier, allow diverse animal and plant life to flourish, allow people like me to be out in nature, help with our carbon balance, and allow native people to retain some traditional places and practices. There is no necessity to log in these forests. I think it is important to maintain some places that are stable environments for plants and animals without human capitalization on those spaces. |
| Martha | Lain | Westtown | NY | |
| Elizabeth | Woodard | Webster | NY | |
| Alix | Keast | New York | NY | Please support our forests. They are crucial to our climate protection. |
| Cathy | Marczyk | Highland Mills | NY | |
| Noelene | Hutchinson | Poughquag | NY | |
| Donald | Lathrop | Canaan | NY | We have 90 acres of mostly forest land and support such efforts. |
| David | Muir | Marcellus | NY | Reading any of the recent literature regarding the significance of old growth forests tells you why we must not destroy any of those which still stand. My wife and I have been hiking our nation's forests for many years. While their ecological importance cannot be overstated, we must also recognize that they feed the soul. |

| | | | | The health of this nations forests is a sign of the health of the nation overall. We must not compromise that. As an amateur mycologist and president of a mycological society I am deeply concerned about the future of old growth forests in the US, not just for the trees, but for the sake of all of the organisms that inhabit them?including the mushrooms. Mushrooms can be mycorrhizal, sharing mineral nutrients and sugars with the old growth trees, and as such are a crucial part of forest health. Old growth forests must be protected. Any amendment to the Northwest Forest Plan plan that includes commercial logging and/or salvage logging should be rejected. Please act in the interest of the people who enjoy these forests, the creatures that inhabit them and the forests themselves, not the commercial interests of big business. |
| Ethan | Crenson | Brooklyn | NY | |
| Helena | Tapper | New York | NY | |
| Andrea | Taylor | New York | NY | |
| William | Stout | Massena | NY | Protect old growth forests. |
| Duncan | Brown | Walworth | NY | |
| Vera | DePalma | Brooklyn | NY | |
| Brian | Roberti | Fresh Meadows | NY | I urge you to continue protecting this extraordinary natural resource, for the benefit of all. |
| Alex | Kowtun | Hornell | NY | |
| Mike | Farber | New York | NY | |
| Alex | Hurlburt | Astoria | NY | Protecting forests is important to me as an avid hiker. I couldn?t imagine a world where I don't have access to the natural beauty forests provide let alone the clean air and natural refuge they provide for people escaping the city and for all the animals that call the forests home. It is critical we work to protect these forests so the next generations can continue to enjoy the life giving experience of these natural wonders. |

| | | | | |
|-----------|------------|--------------------|----|--|
| | | | | Forests are one of the most vital ecosystems for helping us have clean air and water. Leave them alone! The last thing this country needs is more raping of our lands and it resources. Gas and oil and mineral extraction only profit the rich and greedy corporations, not the common citizen. Trump and his minions care nothing about this country only their pocketbooks. STOP THE PILLAGE AND EXPLOITATION OF OUR RESOURCES NOW!!!!!!!!!!!!!! |
| Bob | Wolf | Holland | NY | |
| Aubrae | Lamparella | Farmington | NY | |
| Cynde | McCloskey | Buffalo | NY | |
| Brynn | Taylor | Fayetteville | NY | The climate benefits and support to different species that these forests provide is unimaginable. These beautiful places must be protected. |
| Rebecca | Stringer | Columbus | OH | Please, do your job. |
| Elizabeth | McGinnis | Columbus | OH | Having spent time in old growth forests, I understand how special and irreplaceable they are. They are a place for peace and rejuvenation as well as a haven for many different animal and plant species. We have logged so many across the years- please do what you can now to save what's left. |
| Jean | Jackson | Chippewa Lake | OH | When you protect nature you protect us. |
| Suzanne | Schenkel | Willoughby | OH | |
| Julia | Radwany | Akron | OH | |
| Ginnell | Schiller | Cincinnati | OH | |
| John | Kreft | Moreland Hills | OH | |
| Laura | Colston | Terrace Park | OH | |
| Renate | Pealer | Fairfield Township | OH | The Forest Service should focus on the areas that need to be fixed, and build on the strong foundation of the original plan -- not attempting to fix what's not broken. Our water, wildlife, and communities depend on it. Now is the time to speak up for our cherished older forests across the region. |
| Margaret | Maxwell | Loveland | OH | Attacking our national forests and parks is unconscionable. These icons of our country are so important to the well being of the climate. Aside from that they are vital to our history and provide joy to people all around the world. These old growth forests sustain the new growth and the ecosystem. Going back to old practices is not the answer and is only to satisfy the need for greed. Mining, drilling, fracking---destruction. Please keep these places as sacred spaces. |
| Matt | Colahan | Grove City | OH | |

| | | | | |
|-----------------|---------------|--------------------|----|--|

| | | | | |
|-----------|------------|----------------|----|--|
| Judith | Appleton | Oberlin | OH | <p>The trees of the forest are surely the heroes of our planet. they moderate our climate, clean pollutants from the air and water we use, they provide homes for every kind of animal--birds, mammals, invertebrates, insects, plants. And they enrich our soils with thousands of miles of interconnecting, cross communicating roots and fungal mycelia providing food and messaging throughout the forest. This system developed over eons and cannot be recreated once a tree, ESPECIALLY A MATURE TREE, is cut down. Replanting doesn't do it. The soil and ALL it supports above it is forever diminished. And we are diminished and robbed of all the benefits of that former healthy ancient forest. There is little that surrounding communities will gain from this destruction and so very much to lose. Mainly, all this goes just to line some one's pocket.</p> <p>I love trees in all their glory and productiveness. I've hiked in those of the PNW. They are a great health benefit!</p> <p>DO NOT LOG THEM. PROTECT THEM!</p> |
| Christian | Smith | Columbus | OH | Protecting old growth forests is important to me because i love big towering trees. They are beautiful and should be protected as much as possible. i love hiking in forests with my dog Betty. |

| Margaret | Mueller | Cincinnati | OH | |
| Stacey | Yanetta | North Ridgeville | OH | |
| Lisa | Long | Uhrichsville | OH | Old growth forests are essential for clean air. Cutting more forests will literally destroy us. No cutting forests! |

| | | | | |
|-----------|--------------------|----------------|----|---|
| Michael | Skinner | Cincinnati | OH | |
| Susan | Eck | Cincinnati | OH | Old-growth forests are important to me because I am able to feel fully alive when I walk amongst the mature trees. They provide oxygen for us to breathe and remove carbon dioxide. They provide habitat for so many species of plants and animals. We need old-growth forests for humankind to survive. |
| Jordan | Schuman | Toledo | OH | As a lifelong outdoorsman, protecting our forests is a deeply personal and vital issue for me. Not only are forests important resources for our ecosystems and climate?they are also where I've made some of my fondest memories. Ever since I was young, my parents pushed me into the outdoors, and I often found myself in the woods. It pains me to hear that our forests may be at risk, and I urge you to keep my experience?and those of many others? in mind and protect our old growth forests from logging and other detrimental practices. |
| Russell | Doyle | Cincinnati | OH | With the rainforest turn this one around. |

| Chantal | Young | Rootstown | OH | Please help the forests and the animals that depend on the forest for survival! |
| Karen | Durbin | Cuyahoga Falls | OH | |
| Cynthia | Kukla | Cincinnati | OH | Our public lands belong fully to the public. Two Republican presidents, Grant and Roosevelt and a Democratic president Wilson all helped create our National Parks. No logging, no timber selling to companies on OUR PUBLIC LAND. |
| ELIZABETH | DAVIS | Kettering | OH | |
| Leslie | Evelo | Cincinnati | OH | |
| Pat | Heffron-Cartwright | Dayton | OH | We need our parks to balance our ecosystems and to feed our souls with their beauty. |

| | | | | |
|---------|------------|---------------|----|--|
| Carol | Unverferth | Dublin | OH | |
| Sue | Brungs | Cincinnati | OH | Please save our forests. They are the lungs of the planet. We cannot survive without them. We have a responsibility to future generations to care for this beautiful planet. If we care for the trees they will care for us. A win win plan. |
| Matt | Zolnay | Cleveland | OH | |
| Nikki | Harris | Skiaook | OK | |
| David | Wolek | Edmond | OK | Money is never the best reason to destroy something that can take a lifetime to regrow. Stop messing with the climate. Save the planet. |
| Paul | Moore | Tulsa | OK | No backsliding on a done deal |
| Justin | Currie | Hulbert | OK | |
| Makenna | Hartman | Oklahoma City | OK | |
| Neil | Fisher | Sand Springs | OK | These forests provide clean air, water, and habitat for countless species. The Forest Service is considering changes to the Northwest Forest Plan (NWFP), and this is our chance to ensure these lands are protected for generations to come. Keep these pristine forests unchanged and unmolested by short sighted greed. |
| Robert | Fiegel | Edmond | OK | |
| Matthew | Ashe | Choctaw | OK | |
| Deborah | Wolek | Edmond | OK | The gain far outweighs what will be lost if we cut down old growth forests. Save our childrens future clean air. |
| Marilyn | Copenhaver | Edmond | OK | I am 83 yrs old. What my Grandchildren have inherited in the beautiful natural environment of our country, must be protected for their children & into the future. With careful planning & protection, the forests of our Country will endure thru the ages. |
| Maurice | Hawthorne | Wilburton | OK | |
| William | Merry | Oklahoma City | OK | Keep old growth! Please help protect all our forests so our grandkids can enjoy them years from now. |
| Jo | Thomason | Pryor | OK | Old-growth forests cannot be replaced before many generations pass. These venerable forests must be preserved. |
| Meghan | Dooney | Portland | OR | |
| Amy | Hunter | Portland | OR | Do not sell out our forests and our environment! |

| | | | | |
|-----------|-----------|-------------|----|---|
| Kristi | Evans | Portland | OR | There is SO MUCH research out there that supports the NEED on this planet for trees, and old growth in particular, as it takes generations to replenish, and in the meantime, the ecosystem around them dies and creates more severe climate change. If you can't see that we depend on the health of our planet to live, you are shortsighted and making your own life harder. Unless you like disastrous flooding and dirty/no drinking water for the rest of your life. PLEASE help. The trees are actually saving us. |
| Vicki | Pedone | Salem | OR | Now more than ever, we need to stand up for resources that spiritual and environmental benefits to all people instead of being used to make a quick buck for the wealthy. Once destroyed, they cannot be restored. |
| Mary Anne | Morrison | Eugene | OR | |
| Lisa | Manning | Portland | OR | Healthy forests keep our water and air clean! Our quality of life is dependent on healthy forest ecosystems! Beautiful forest wilderness has huge economic value for the Ecotourism Industry besides providing a home habitat for thousands of wild creatures! |
| A Michael | Dianich | Corbett | OR | |
| Cathryn | Davenport | Newberg | OR | I have love forested lands all my 73 years. I took my children camping to instill the love of forested lands in them too, including how old grow can generally withstand fire, how the ecosystems or interconnected and the importance of protecting our waterways for ongoing clean water. My children have taken their kids camping as well. An intact and healthy forest environment gives to much to our communities and future generations. |
| Theron | Wells | Portland | OR | Old growth forests are the best carbon sequesters we have! Do not compromise them for the sake of our very own survival. Long term rewards over short term profits. |
| Stephen | Still | Eugene | OR | |
| Bruce | Tinker | Eugene | OR | Amendments to the NWFP need to preserve mature and old growth forests, not increase their logging. They are the best carbon storage equipment the earth has. |
| Leda | Hermecz | Springfield | OR | Our old growth forests have been reduced to a small percent of what once stood here. To think that we, as a nation, would ever want to do anything to reduce them even more is inconscionable. Can we please just think about what these forests do for our entire eco-system? |
| Irene | Bachhuber | Portland | OR | |
| James | Eckman | Springfield | OR | These forests are vital to Springfield?s water supply and air quality. |

| | | | | |
|----------|-----------|---------------|----|--|
| Betty | Shelley | Corvallis | OR | Our trees are vitally important to a healthy ecosystem. No more logging. |
| Beth | Melville | Portland | OR | We need to fight climate change and Trump. |
| Leslie | Hunter | Eugene | OR | So much old growth has already been destroyed. Can't we keep just a little in case our grandchildren survive? |
| Robert | Albee | Grants Pass | OR | |
| Judith | Williams | Portland | OR | Please go take a hike and immerse yourself in trees. I promise that you'll immediately sense that their value goes far beyond money. |
| Maurice | Golden | Silverton | OR | Forest of the life blood of Oregon and we need to protect them for future generations. Well, I support good forest management. I believe protected spaces are essential to the balance of the ecosystem. Old growth is essential. |
| Kurt | Geist | Portland | OR | |
| David | Jaffe | Portland | OR | This is *fundamentally* important to me! |
| Philip | Mullins | Silverton | OR | I want my grandchildren to experience the benefits and beauty of our forests. Please safeguard them for our future! |
| Kat | Selah | Portland | OR | My children were born in Oregon, and their love for nature and trees is a great reason that we have stayed here. Please help us maintain all that is so wonderful about Oregon - most of all, including our gorgeous forests! |
| Jon | Martz | Damascus | OR | Please expand protections for this valuable resource. It is not just about profit, it is about climate, fish and wildlife and providing for future generations. Learn from indigenous ways that have kept forests healthy for centuries. Best practices reduce wildfire risk |
| Patricia | Dunham | Salem | OR | 1. Bark beetles caused dead trees causing forest fires to flare. 2. Climate warming causes more lightning storms, more fires. Clean water & fish protections are important. |
| Alexa | Divett | Portland | OR | Hello, my name is Alexa and I am a hiker, a hunter, a fly fisherwoman and a passionate user of our forests, public lands and wild places. I am asking you to please protect these sacred spaces for my generation and those that follow. |
| Jennifer | Bushard | Cave Junction | OR | |
| Susan | Garelik | Portland | OR | The science doesn't change with administrations Please adhere to your mission of protecting our mature and old growth forests! |
| Martha | Lussenhop | Sisters | OR | |

| | | | | |
|------------|----------|-------------|----|---|
| Karl | Keener | Portland | OR | We cannot allow our great forests to fall victim forever to this lunatic |
| Rich | Faith | West Linn | OR | As a avid hiker throughout the national forests of the Northwest, I see the benefits of our old growth forests. They are the foundation for wildlife habitat, carbon sequestering and recreational splendor. I strongly support a Northwest Forest Plan that recognizes the benefits of our old growth forests and lays out policies and guidelines for their long term protection. |
| Laura | Johnson | Portland | OR | I am personally terrified about the way this administration is dealing with climate change, by denying it exists. Indiscriminately cutting down our national forests and possibly wanting to sell mining rights in our national parks is disgusting on so many levels. We can't undo that kind of damage. Please do whatever you can to stop this administration from decimating our natural lands and even worse making it harder to fight climate change. |
| Kenneth | West | Aloha | OR | |
| Sheila | Dooley | Mosier | OR | Please protect our forests for us and future generations. |
| Kathryn | Torvik | Eugene | OR | I'm horrified by Trumps EO opening up our forests for massive logging! We need to protect our forests and do sustainable logging that doesn't jeopardize our old growth forests, water and environment. We literally need our forests to absorb carbon dioxide and release oxygen so we can breathe. Healthy forests are soooo important to our wellbeing--on every level: physical, emotional, health, mental and spiritual wellbeing. Save our forests! |
| Elaine Ann | Daly | Portland | OR | |
| Jill | James | Portland | OR | Stick to the plan! It's working!! |
| J | Myers | Newberg | OR | We need to keep our forests. They are our life line. The Northwest Forest Plan has been an effective plan for all. |
| Julianna | Nader | Sherwood | OR | Please protect our forests!!! |
| Steven | Harford | Eugene | OR | |
| Margaret | Blauvelt | Oregon City | OR | Old growth endures fires and helps keep our air clean - keep them old trees! |
| David | Ibbotson | Hillsboro | OR | |
| Patricia | Knight | Salem | OR | Old growth forests are irreplaceable. We must protect these forest preserves. |

| | | | | |
|----------------|----------|----------|----|---|
| | | | | <p>There has NEVER been a more important time to protect Old Growth and Mature Forests in northern California, Oregon and Washington. The risk of fire each year is more obvious, more perilous and as was the case in Oregon, more acreage burned in 2024 than any previous year due to devastating fires. Northern California also had a high number of fires as did most of the western U.S. Old Growth and Mature Forests not only provide protection from major fires but they are also an ecosystem that is important for a diversity of birds, mammals, plants, amphibians, etc and help protect streams and rivers when these types of forests stay intact.</p> <p>America cannot afford to lose these remaining forests. They're an educational tool for all ages and provide a sense of solitude and grandeur. Once they have been fragmented and destroyed they cannot be replaced in short order...we're talking MANY years. Our country and planet can't wait that long.</p> |
| Vince | Zauskey | Ashland | OR | |
| Tyler | Kreipke | Portland | OR | We need to work to ensure the continued protection of our forest ecosystems. |
| Tyler | Kreipke | Portland | OR | We need to work to ensure the continued protection and flourishing of our forest ecosystems. |
| | | | | <p>I am a homeowner living in the northwest today. I have moved steadily north from So. California and So. Oregon as mega wildfires became part of the norm due to climate change. Bark beetles now infect many trees as drought conditions prevail. The removal of old growth and clear cutting is not anywhere close to best practices and will only add to the problem. Thinning and prescribed burns create a healthy forest.</p> <p>Retired now, I enjoy hiking with my dogs in nearby forests. Please insure that the Northwest Forest Plan remains so that all may continue to enjoy these vital forest lands.</p> |
| Marcella | Laudani | Bay City | OR | |
| Erin | Marcotte | Tigard | OR | |
| Louise & Jerry | Pascoe | Bend | OR | |
| Christopher | Gore | Portland | OR | |

| | | | | |
|---------|----------|-----------|----|---|
| | | | | This issue is profound to me as I fully understand the meaning of Seventh Generation. When making decisions, keep future generations in mind. My father grew up in a logging camp near Spirit Lake on Mt. Saint Helens from about 1927-1938. His father was a welder working on the machinery in the camp. I've grown up hiking and camping in the mountains and forests. But my enjoyment of the forest is not the issue. The issue is the long life of complex ecosystems that create and sustain the possibility of life. Without these thriving ecosystems, all we have is meaningless. I'm also a carpenter and I know that smaller trees are harder to work with. Old growth makes for better 2x4s. But mowing down forests has a short end game. We need to focus on engineering materials for good building while preserving wild complex ecosystems. Without them, everything will fall apart. |
| Jeffrey | Gunn | Portland | OR | |
| Richard | Katz | Portland | OR | |
| Charles | McGinnis | Portland | OR | Many Oregon communities get their drinking water from streams originating in National Forests. The purest water comes from undisturbed forests. The late successional forests as we as existing old growth forests must remain intact to protect our drinking water. |
| Kay | Novak | Milwaukie | OR | Trees are a basic part of the ecosystem that sustains all life on Earth. |
| Betty | Shelley | Corvallis | OR | |
| Helen | Krier | Salem | OR | |
| Ernest | Johnston | Milwaukie | OR | I was born and raised in Oregon, with the rain water and smell of pine in my blood and bones. This is an essential part of our great state and our place on this planet. Please protect Mother Earth, we have already done so much harm. |
| Marti | Cheek | Jefferson | OR | Once our old growth is gone, there will be a great loss. The forests provide ground filtration for clean water, clean air by removing carbon dioxide and the air in the forest is the cleanest you will ever experience. |
| Michele | Budd | Portland | OR | Please protect our all of our forests, especially our old growth forests. It's essential for the short term and long term health of our country, world and planet. The impact of removing these trees impacts economies of communities close to them, and causes unrecoverable impacts to our communities, nation and world. |
| Gillian | Hunt | Portland | OR | Speak for the trees! Watch the Lorax! |
| Kirsten | Locke | Buxton | OR | |

| | | | | |
|-------------|-----------|-----------|----|---|
| Dennis | Detrick | Bend | OR | Please consider how important these forests will be to future generations...not just what short term gain they contain. |
| | | | | I support the testimony of the Sierra Club and the Coast Range Association (CRA) on the proposed NW Forest Plan (NWFP) amendment. If a Do Nothing option keeps the NWFP in place, then I strongly agree ? do it. I agree with this CRA testimony: ? The final record of decision should end the cutting of old-growth trees in all national forests and end the cutting of mature and old growth trees in high carbon sequestering moist forest types.? These latter forest types sequester more carbon than any other forests in the world. Our forests need stewardship, not clear cutting. |
| Marilyn | Koenitzer | Bend | OR | From 1980 - 2000, our business, Forest Data Incorporated, mapped 15 million acres of NW forests. We need to save old growth, cut little and let the forests grow to save our climate. We need Tribes in forestry decision making to keep forests sustainable. |
| | | | | Protecting old growth and mature stands in forests is extremely important for watershed protection, animal and plant habitat protection and forest wildfire survival. There is plenty of timber which can be harvested outside of these areas. |
| Rebecca | Olson | Portland | OR | |
| Elaine | Henderson | Portland | OR | |
| Gordon | Lent | Oakridge | OR | |
| | | | | I want the forests to be here for all our future generations! The beauty is so important to appreciate nature and to provide a home for many creatures that depend on the forests for their survival! Please protect our forests!! |
| Jocelyn | Henry | Redmond | OR | |
| Thomas | Keys | Gresham | OR | |
| walter | graf | bend | OR | please don?t savage our most important protection against climate warming . please strengthen the nw forest plan to protect our nw wildlife, ecosystem and our climate. |
| | | | | Thank you for the work you do in protecting and maintaining our federal forest. Old growth trees sequester more carbon than younger trees and provide a habitat for certain animals. As you draft the management plan, please preserve the old grow trees. |
| Ingrid Cook | Cook | Joseph | OR | |
| Sue | Muth | Beaverton | OR | |
| | | | | Please protect our forests! I am an Oregon native and absolutely love our forests and nature here in our state. Please protect our wildlife and eco systems. Thank you |
| Angie | Thompson | Portland | OR | |

| | | | | |
|--------------|-----------|-------------|----|--|
| Virginia | Tarango | Portland | OR | I love living in Oregon and am grateful to everyone who worked to reach the original Pacific Northwest Forest Plan. While it was good we know more today and we face different challenges. Redefining old growth trees as proposed in this plan ensures we will lose the small amount of old growth trees that remain. Along with that habitat. Tribal members need to have a clear and equitable role in determining how to make this plan stronger. The PNW brings to mind images of growth forests and healthy Salmon runs. This plan needs to ensure our iconic and tourism drawing jewels aren't thrown away for resource extraction purposes. Please strengthen the plan and don't sell out vital habitat and our carbon sink. |
| Amy | Whitworth | Portland | OR | the groundbreaking NW Forest Plan has been working and needs to be extended without changes. Healthy forests are more important than ever in a time of climate change. More logging is not the answer |
| Heidi | Gerson | Springfield | OR | Please keep the Northwest Forest Plan as is to protect our remaining old forests. If we keep it going the people will have more recreational opportunities, cleaner air and water. I want to be in wild places and see native plants and animals. Let them survive! |
| diane newell | Meyer | ASHLAND | OR | |
| Sarah | Chaney | CORVALLIS | OR | The Northwest Forest Plan is a science-based guide to federal forest land management. We now have a national treasure in the old-growth forests and we need to preserve these forests from logging and salvage logging. Protecting these old-growth forests is important to me because I love going into the forests, I enjoy clear rivers and streams that don't have run-off from logging practices, and I know the forests are keeping carbon out of the atmosphere. I would like my family and grandchildren to be able to live in a world with as little climate change as possible. Thank you. |

| | | | | |
|---------|----------|-----------|----|--|
| | | | | <p>Hello,</p> <p>I am writing to urge the strengthening of the Northwest Forest Plan rather than weakening it with the proposed amendment. For 30+ plus years the current plan has benefited humans, numerous species and water sheds. I am an avid hiker, backpacker and mountain climber. For me it is about recreation, beauty, rejuvenating, re-energizing and community. This is a critical time to safeguard future generation?s ability to enjoy the forests and to recognize that the health of these forests impact all of our lives! Large areas of Old-growth and Mature Forests within the plan area must be protected for multiple reasons:</p> <ul style="list-style-type: none"> ?Safeguarding biodiversity ?Establishing climate refugia ?Reducing flood and erosion risk ?Providing clean, cold drinking water ?Fire resilience ?Cultural values ?Outdoor recreation and Mental and spiritual well-being |
| Verna | Burden | Portland | OR | <p>The proposed increase in logging fails to take into account the impact of those changes. This is a time to be forward thinking!</p> |
| diana | boss | beaverton | OR | <p>the NW forest plan must protect old growth forests that are vital to efforts at sequestering carbon and slowing climate change. the plan must include tribal perspectives.</p> |
| Cynthia | Chrystal | Bend | OR | |
| Elishka | Pierce | Bend | OR | <p>I love forests more than anything in the world, and I urge you to please fight for their right to survive and thrive. We need old-growth forests and vulnerable ecosystems to be protected, not endangered further. We need you to stand with the trees! Please and thank you.</p> |
| Sandi | Goldie | Ashland | OR | <p>Protecting our forests is essential to protecting the future for us, our kids and grandkids in this time when climate change is threatening everyone's future. Please do the right thing to help us preserve our forests!</p> |
| Katie | Harvey | BEND | OR | <p>Please protect our old growth forests. They are critical carbon sinks, fire breaks, and ecosystem anchors. They are worth FAR more alive and growing than as logs. The decision to sacrifice the old growth forests would be unbelievably short sighted.</p> |
| Chandra | Paetsch | Eugene | OR | |
| Carol | Bunge | Bend | OR | |

| | | | | |

| Mike | McCampbell | Pittsburgh | PA | |
| Holly | Smallwood | Aliquippa | PA | |
| Marya | Bradley | Rose Valley | PA | I am appalled that in this moment when we most need to protect our forests this proposed amendment threatens to welcome in their destruction in order to allow commercial logging to profit off ruin. We cannot afford this kind of myopic vision; we need the forests that remain to remain intact and unfragmented in order to preserve us from an utter collapse of biodiversity and extinction of species and from the acceleration of the manifold crises of global warming and climate change. There can be no valid justification for sacrificing our forests for short-term profiteering; it took millennia for these forests to grow into the web of life they support and sustain, we are incapable of repairing what we now recklessly would ruin. Do not allow the logging of our oldest forests. |

| Joseph | Farley | Riverside | RI | |
| Liz | Robberson | Portsmouth | RI | |
| Candy | Stark | Providence | RI | |
| Mary | Brewster | Warwick | RI | I visit the Northwest yearly specifically to stay and recreate in these areas. Only the old growth areas retain the ecological character of the original forest. Once cut, these areas become choked with undergrowth and prone to fire. So much has already been lost. Please preserve the last remnants of this valuable wilderness for my children in the future. |
| Mim | Shelden | Inman | SC | |
| Mike | Sterling | Irmo | SC | Trees filter our air, provide for wildlife and make life both livable and enjoyable for humans. Please use actual science in developing plans for our forests. These forests belong to the American people not to developers and private enterprise. |
| Barb | Bittenbinder | Central | SC | To respect tribal sovereignty and incorporate indigenous knowledge and perspectives that were left out of the original plan. To look at the value of these forests when they are still standing for carbon sequestration in a time of climate change. To ensure that forests are managed based on the best available science so that they can be healthy and wildfire resilient. |
| Lorraine | Wilson | Hilton Head Island | SC | |
| Janis | Gadow | Fort Mill | SC | |
| Jennifer | Dublino | Simpsonville | SC | Destroying old growth forests is not something to do lightly (or at all). They have taken thousands of years to get where they are and provide numerous benefits to people, including cleaning the air we breathe, providing breathtaking beauty for us to contemplate our place in creation and serving as a home to hundreds of plants and animals. |
| Mary | D'Errico | Murrells Inlet | SC | |
| Pamela | Haas | Okatie | SC | Save our forests don't destroy them please please please |
| John | Schenck | Spartanburg | SC | |

| | | | | |
|----------|----------------|--------------------|----|--|
| Kathleen | King | Mount Pleasant | SC | |
| Kathy | Kowalchick | Charleston | SC | |
| Paula | Mitchell | Rock Hill | SC | Our old growth forests are not intended for profits to logging companies. They should be preserved and properly managed as essential ecosystems, for Americans like myself to appreciate the beauty of nature, and to contribute to carbon sequestration. I am opposed to the proposed amendment. |
| Luke | Lumpkin | Columbia | SC | It is tempting to believe that rising profits and increased job production is always a good thing, but it is more important to acknowledge that no money can be made from an ecosystem if that ecosystem collapses under the strain of mankind's disturbances. Look further down the road and recognize that we cannot eat money; profits at the expense of sustainability provide no sustenance. |
| Alan | Citron | Bluffton | SC | |
| Miriam | Shelden | Inman | SC | |
| Cindy | Page | Simpsonville | SC | |
| Diane | Tollick | Greenville | SC | |
| Lisa | Scharin | Fountain Inn | SC | I listened to trump speak about not needing trees from Canada- since We have SOO many-which I believe NEED to be PROTECTED-Under Biden-I supported His 30 x 30 policy to include Our Lands along with oceans-I OPPOSE logging in Old growth forests and opening up almost 300 Million acres! This will cause serious consequences that trump continues to be oblivious too-We WILL have MORE ecosystem collapse, MORE wild fires- NOT less-There will be MORE erosion, MORE droughts, and MORE flooding risks-along with serious habitat loss for Wildlife that is already struggling due to man's destructive actions-We should be recycling MORE paper materials and ALL materials instead of dumping them into landfills-We should also be reusing plastics, other materials to make materials with-plastics are a better option from MANY construction materials-siding, roofing, and furniture, etc-We NEED to PRESERVE., CONSERVE and PROTECT what We have left-it is also a threat for more diseases to spread- |

| | | | | |
|---------|-------------|------------------|----|---|
| | | | | <p>Multiple Use is an objective for National Forests. Timber, Watersheds, Wildlife, Recreation, and Preservation all of these need to be managed. Opening up our forests to a single objective of timber production only benefits the timber industry. Where parts of our forests the best use is timber production go for it. Other areas need other management objectives. Please preserve some old growth, protect wildlife, protect Watersheds, and think about recreation. Managing for all uses is your objective, NOT timber production regardless of the cost. Poor management can damage the land for generations.</p> <p>Logging in not the cure all for our National Forests. Logging just to maximize timber for the timber industry only benefits the timber industry.</p> <p>Thank You for listening.</p> |

| Gina | Turner | Memphis | TN | |
| Alice | Tym | Mc Donald | TN | |
| Sandi | Vanacore | Monterey | TN | <p>I love hiking and walking in a forest where you see God?s beautiful creations like animals, birds, plants and wildflowers. The peace and tranquility make you happy s as nd stress is lowered for better health.</p> <p>We need to protect these national and natural treasures for all life forms and future generations. No clear cut or cutting old growth forests and forests.</p> |
| Keri | Withington | Oak Ridge | TN | <p>I have been bringing my children to national lands since they were babies. I hope that, someday, they can bring their kids to the forests, too.</p> |
| Ruth | Jackson | Knoxville | TN | |
| Carolyn | Fellhoelter | Knoxville | TN | <p>The land that we live on is one of the most valuable assets we have as Americans. Prioritizing the management and protection of our forests is so important and makes a lasting contribution for generations! Damaging our forests hurts us all.</p> |
| David | Strong | Halls | TN | |

| | | | | |
|-------------|------------|----------------|----|---|
| | | | | I urge you to protect and strengthen the Northwest Forest Plan. My wife and I have family who live in the area. When we visit them, we always take time to get out into nature to hike and camp. The thought of destroying this special place is inconceivable to us. The revised plan should respect tribal sovereignty and incorporate indigenous knowledge and perspectives that were left out of the original plan. The forests are important for carbon sequestration in a time of climate change, and they should be managed based on the best available science so that they can remain vibrant and wildfire resilient. They should not be given over to corporate interest at a cut rate simply for immediate profit. |
| Stephen | Idem | Monterey | TN | |
| Jesse | Gore | Nashville | TN | |
| | | | | We often camp and hike in the national forests. We've hiked in the UK in England and Scotland and seen the damage of excessive foresting over hundreds of years. We need to protect the US resources. We've seen the effects of private lumbering and the lack of diversity that results and the straight rows of trees that become unnatural. Please protect our forests and national lands! |

| | | | | I am anxious to hear that the US Forest Service will continue to use the intelligence within the 1994 Northwest Forest Plan. Old growth and mature trees within this forest area still need to be protected . I am particularly concerned about the great ecological and climate balancing effects these forests provide to our survival , and the survival of countless species. They are part of the perfectly balanced system of Life, which provides clean air, clean water, pure soil for new life, and resistance to wildfires. My family finds that a slow walk in an old growth forest is renewing, and even a Spiritual experience. Please safeguard these priceless places for families of all cultures to enjoy and be renewed. |

| James | Neely | Austin | TX | Our forests support life on our planet - protect them at all costs!!!~ |
| | | | | Growing up in northern Pennsylvania with acres of woods to enjoy just out my backdoor, I have always loved and appreciated time spent under the canopy of the trees, climbing in their sturdy branches, observing diverse wildlife, and collecting the bounty provided by these grand neighbors. The hills also bore witness to the destruction of deforestation. Having read extensively about the wonders of the life cycle of trees, I wish we were as effective in our communication with one another as they are within their ecosystem. Willful ignorance of our reliance on these majestic specimens for our existence and health is not an excuse for evil decisions. We must protect, humbly manage, and honor these invaluable treasures. The arrogance of those acting purely in the interest of short-term profits has no place in this sphere. Ample research is available and should be continued, valued, and utilized in all decision making. Save and manage. Protect and prosper. Care and enjoy. |
| Vicki | Gorman | Houston | TX | |
| | | | | I have worked for the forest service and know first hand how important these places are for the general public for camping, hiking, birding, fishing and just plain getting away from stress for a short time. Protect and maintain this precious resource for both us and future generations. |

| Keith | Daniels | Houston | TX | Stop Screwing over the American Environment |
| Erin | Eitel | Uhland | TX | Protect the forest & wildlife's home! |
| Sara | Laffin | Irving | TX | |
| Triana | Mary | San Antonio | TX | We must protect our forests |
| | | | | <p>National Forests are a joy and a haven. A day hike in a forest breathes kindness into my heart.</p> <p>Do not allow harvesting of old-growth trees. The old trees are critical to the biodiversity and health of the forest. They are also beautiful living sculptures that took a century or more to grow. They have centuries of life left in them to thrive. I want them to remain for my enjoyment and the thousands of other hikers who visit the forests every year.</p> <p>Give managing roles to local indigenous communities. Their knowledge and their dedication to care for the land are invaluable resources. We also have a moral duty to protect and respect their cultural heritage embedded in these forests.</p> <p>Wildfire management should be based on science and protection of water quality. Fire risk management must not be influenced by profit.</p> <p>Decisions for forest management should be based on the life of the FOREST, not some logging company's profit.</p> |
| Carol | Hawk | Brownsville | TX | |
| Chris | Nicolosi | Houston | TX | I strongly agree with this message. Old growth forest must not be cut!!!!!! |

| Nyla | Lenart | Allen | TX | We need old growth forest to protect our clean air, water and wild life species. The greed of corporations is killing the planet. |
| Lisa | Schick | Fort Worth | TX | |
| Gordon | Klein | Dickinson | TX | |
| Lisa | Brenskelle | Houston | TX | As an avid outdoorswoman, I support preservation of forest and other natural areas. The benefits to Americans to these natural spaces are incalculable. |
| Andrew | Lyall | Corpus Christi | TX | |
| Cindy | Morrison | Corpus Christi | TX | |
| James | Klein | Corpus Christi | TX | |
| Marion | Fetters | Arlington | TX | Forests are the lungs and water filters of this nation providing oxygen and a habitat for diverse wildlife. They also offer peace and tranquility to tourists and hikers. |

| | | | | |
|-----------|--------------|-----------------|----|---|
| Paul | Hottensen Jr | Katy | TX | Please think about how important forests are to all of us. I enjoy hiking and being out side and so do many other people not to mention the animals that live there. Just like the wild fires took peoples places to live away so does logging do the same to the wildlife that lives there, don't be a wildfire to these animals. Thanks |
| Angela | Wilkinson | Universl City | TX | |
| Colin | Cox | Dallas | TX | |
| Lauren | Haby | Austin | TX | These forests will outlive all of us if we let them. Our time is temporary compared to theirs. Just stop thinking about the money and the businesses and whatever else for a few seconds and imagine what it would be like if we simply did the right thing. |
| Angela | Wilkinson | Universal City | TX | |
| Angela | Wilkinson | Universl City | TX | |
| Reynolds | Cox | Magnolia | TX | Science has shown that forest lands are essential to the health and stability of our world. Furthermore, indigenous communities, recreation seekers, and regular people all benefit from the existence of protected forest land. For these reasons, make sure that the Northwest Forest Plan puts the environment and real people before business and economic growth. We want forests not greed! |
| Roy | Morey | Fort Davis | TX | |
| Kris | Marohn | Dallas | TX | |
| Charles | Hobbs | Dallas | TX | |
| Laura | Carbonneau | Austin | TX | We need our forests to remain intact, to ensure we survive. Biodiversity is more important than short-term profit. |
| Christy | A Morris | Lufkin | TX | |
| Sue | Wolfe | Fair Oaks Ranch | TX | Please consider the effect on planet Earth if you make changes to the Northwest Forest Plan. Our world is drastically changing and we need to center on an ecosystems |
| Catherine | Faver | Katy | TX | |
| Jon | Rives | Kaufman | TX | |
| Carl | Niemeyer | Austin | TX | Destroying national old growth forests for profit will permanently take away one of the best things about America for short term profit for billionaires who already have enough money. |
| Matthew | Taylor | Grapevine | TX | |
| Lorien | Kuster | Salt Lake City | UT | |

| | | | | |
|-------------|-------------|--------------------|----|--|
| Curtis | Graf | Park City | UT | I have children, don't you? We need to preserve this earth for the future. |
| Karen | Collett | Bountiful | UT | |
| Theresa | Forrester | SMITHFIELD | UT | with climate change well managed forest are essential to our survival.. |
| Ken | Smith | Logan | UT | The forests in the NW are a special place to me and my family. Although my wife and I live in Utah, our son and his family reside in south western Washington, and we visit often. Whenever we visit we make it a point to enjoy the woods, and absolutely love the forests in the NW. |

| Kathryn | McGauran | Cedar City | UT | |
| | | | | I am a mother who is an nature enthusiast. My love of nature started with Sequoia Redwood Forests in Northern California where I grew up. To my among there presences is like being with wise elders. These old growth forests offer solutions to our current issues facing humanity. They are a part of the ecosystem we inhabit and without them we add to our problems two fold. Humans need open nature spaces to reground with ourselves and recharge. There are a long list of long-term benefits in keeping these forests as they are. In contrast, we would only gain short-term benefits changing this policy. I urge you to reconsider how these proposed changes would impact humanity long-term fir generations to come. |
| Christina | Dilauro | Salt Lake City | UT | Sincerely, Christina DiLauro |
| Joyce | Green | Murray | UT | When old-growth forests are gone, they're gone forever. |
| | | | | I have been volunteering as a Tree Steward for nearly 20 years and believe trees are one of the best bulwarks against climate change. Preservation of existing trees and planting young trees are both imperative to help save our planet from the growing risks of climate change. |
| Eleanor | Quigley | Alexandria | VA | |

|-----------|-----------|--------------|----|--|
| | | | | At 64, I have been a life-long nature and wildlife advocate. It hit me, as a young teenager, that recognizing the value in protecting our natural resources could only benefit our own subsistence, and it was obvious to me that if we protect nature, it protects us. Anybody with a connection to and an awareness of the land and animals that form all the ecosystems that help humans own habitats, knows that roles of these ecosystems store carbon, release oxygen, providing clean air, naturally filtering and sustaining waterways that provide habitats for fish and community water supplies, and the list goes on. We've already seen first hand the damage done when humans neglect and destroy forests, habitats, and the climate, and it is from this proof that we need to act differently to save this planet. |
| Donelle | Sawyer | Vienna | VA | |

| John | Hiser | Charlotte | VT | |
| Allison | MacCormick | Norwich | VT | It would be so short-sighted to remove this ecosystem! Please consider more than money to make this decision. Having healthy forest is so important for my health (mental and physical) and for all humans' health. Please do not destroy it! |
| Marktest | Boslertest | Coupeville | WA | |
| John | Thompson | Tulalip | WA | It is more critical than ever that our old forests and all that they provide be protected. There is about to be a major assault on our national forest lands by an administration dominated by gross ignorance, corruption and greed. We must stand for the respect of our remaining forests, and especially we must allow Native Americans to have a major role in the preservation of these lands and resources, all of which are sacred. We must NOT cave to the lust and greed of corporations that only see our sacred resources as dollar signs. Do not allow any of our state and national forests to be pillaged for momentary economic gain. |
| Mary Kay | Voytilla | Seattle | WA | |
| Paul | Sampson | Seattle | WA | I have lived in Seattle since 1981 when I joined the faculty at the U.W. Now, more than ever, I am fully committed to the importance of the NW Forest Plan. |
| Bonnie | Shimizu | Bellingham | WA | If we don't protect old growth forests, we add another reason why the planet is in continuing danger from the climate crisis. |
| Cheryl | Gray | Federal Way | WA | Trees and especially forests provide ecosystems for entire species! |
| Niousha | Mashayekh | Seattle | WA | |
| Rowena | Watson | Concrete | WA | I am especially concerned about any logging in old growth forest ecosystems. We need all mature forests preserved! |
| Holli | Smith | Snohomish | WA | |

| | | | | |
|-----------|-----------|---------------|----|--|
| | | | | <p>I am Karen Weis. My family has lived on the west coast for 6 generations, and counting. I have photographs of family members hiking and camping under giant, old growth trees in their Model T. Hiking through these forests have kept me healthy and grounded through many a turbulent time. It is my fondest hope to bring my grandchildren to the old growth forests of the west coast for life enriching experiences that are incalculably valuable. I have mourned over stands that were logged to make profit for a few people that already possess all the wealth they could ever need. One thing is clear: they have never paid for the true worth of their raw materials. So, logging is an exploitive endeavour for all the rest of the beneficiaries of the forests in their natural state. Furthermore, the wreckage that is left has created vulnerability to fire. I beg you to protect what is left of our forests especially in this economic time that will create more pressure to further exploit our true treasure.</p> |
| Karen | Weis | Bellingham | WA | |
| Elizabeth | Beuthel | Mercer Island | WA | |
| Joan | Poor | Edmonds | WA | Protecting mature forests are important for clean water, biodiversity of wildlife, and numerous outdoor recreational interests. |
| Christine | Eaton | Bremerton | WA | |
| Barbara | Wilson | Port Angeles | WA | Once they are gone, they are gone forever. It makes no sense whatsoever to cut them down. Please protect these forests for generations to come. |
| | | | | <p>Old growth forests are few and far between. They are rare and should NEVER be cut down. We cannot create these places with their complex and natural relationships. We have learned much and continue to learn from these places. One can feel the uniqueness and sacredness of these awesome constructs of God for lack of a better word. Our mature forests are also extremely important for many of the same reasons. Logging of these should be very carefully done selectively as they are critical for maintaining many balance with the climate and area balances including recreation.</p> <p>As a retired WA state park ranger I have a lifetime of experience with forest management and the balance of people with nature. Please don't let financial matters ruin any more of our forests than is already done. Lumber and use is obviously important for our society. We need a careful balanced approach to care of our forests.</p> |
| Stephen | Middleton | Shelton | WA | |
| Karen | Jones | Seattle | WA | |

| | | | | |
|-----------|---------------|--------------|----|---|
| Caitlin | Leeger Langan | Poulsbo | WA | |
| Janis | Radtke | Lynnwood | WA | Please stop commercial logging in our NW forests! |
| Ronelle | Heyes RN | Vancouver | WA | |
| Joseph | Bamberger | Camas | WA | |
| Ruth | Maule | North Bend | WA | |
| Laura | Patterson | Olympia | WA | Please save the old growth. It is our children's children who will need these beautiful giants. And the whole world will need them. They produce oxygen and a sense of connection. |
| Catherine | Caron | Spokane | WA | My father was the head ranger for the Okanogan National Forest and I grew up in those forests, and still hike and camp in those forests, loving them like a sister. Yes, management to clear forest floors of underbrush, which is what fuels fires is necessary, but cutting down the lungs of our planet, and threatening the lives of the creatures that balance the fragile climate and health of the land is a dangerous idea, one that I oppose. |
| Maia Wolf | Ostrom | Poulsbo | WA | Water is life. |
| Rand | Guthrie | Snohomish | WA | |
| Cindy | Tufford | Lacey | WA | |
| Ola | Edwards | Seattle | WA | this Sierra Club message says it all. We must |
| Sean | Edmison | Redmond | WA | |
| Laurie | Gogic | Kirkland | WA | |
| Doug | Wittren | White Salmon | WA | I fully support protecting the health and diversity of old growth forests and the many environmental benefits they provide. Do not weaken the NW Forest Plan. |
| Carol | Charles | Seattle | WA | I volunteer for Grow It Forward, & am currently tending to 100 Douglas Fir seedlings that will be transplanted in a deforested area of the North Cascades. We must protect our mature forests. They provide climate mitigation & critical habitat. Mature forests take decades to replace. Any bill or amendment that undermines the foundation of the NW Forest Plan MUST be stopped. Thank you for your commitment to protect our environment, our beautiful forests, & our future. |
| Evan | Wiederspan | Seattle | WA | |

| | | | | |
|----------|--------------|-------------------|----|--|
| Sheila | Maseda-Gille | Duvall | WA | I moved to Washington in 1997 in part because I love the trees and plants, clean air, water and wildlife. It is crucial that we protect our trees and keep a tight rein on logging. I love our beautiful state and don't wish to see it become a desolate wasteland. The nature in our state including our beautiful trees give our citizens recreational opportunities and provide a home for our animals. Please do everything possible to protect our environment as is. It gives us a great quality of life, |
| Nicolas | Duckstein | Seattle | WA | Having the forests on our cruise to Alaska was amazing. See the clear cuts was devastating in the Tsonfas. Please preserve them. |
| Rick | Rosenberry | Seattle | WA | |
| Ruth | Allen | Mountlake Terrace | WA | We live on beautiful land and we must protect it! Please help keep our forests safe. |
| Karen | Pickering | Vancouver | WA | |
| Gnanulan | Canagaratna | Everett | WA | |
| August | Dailer | Stanwood | WA | |
| Nancy | Neyenhouse | Lacey | WA | This issue is so incredibly important. I hike throughout the Pacific Northwest and understand the importance of forest ecology and what it means for biodiversity. |
| Mimi I | Perrin | Seattle | WA | |
| Chelsea | Braun | Bellingham | WA | |
| Ruth | Fruland | Seattle | WA | I want to amplify that an amendment is needed that improves NWFP: To respect tribal sovereignty and indigenous knowledge and perspectives; To value forests for the FREE services they perform for clean air, water quality, biodiversity, in the face of climate change; To ensure they are scientifically managed based to be healthy and wildfire resilient; and removing provisions that: Open up mature trees to new logging; Increase the amount of post fire salvage, reducing natural, FREE resilience; Pretend minor economic gains are worth the free ecological services losses; Disregards the value of forests for habitat, climate stability and carbon sequestration, as well as recreation, that communities actually rely on. |
| Angeline | Zalben | Tacoma | WA | |

| | | | | |
|------------|-----------|---------------|----|--|
| Abby | Sas | Spokane | WA | I care about our state's forests and the diversity of organisms they are home to. We are nothing without healthy forests. They bring in recreators to rural parts of the state, they ensure our air and water are clean, and they store carbon dioxide. |
| Krista | Melby | Spanaway | WA | Save our forests for the health of future generations ! |
| Dhiraj | Bhatt | Sammamish | WA | |
| Jenny | Welker | Sequim | WA | SAVE OUR NATIVE LANDS AND FORESTS!!! |
| Kristin | Michael | Seattle | WA | |
| Susan | Towle | Seattle | WA | Living in both CA and now the Pacific NorthWest, I have hiked and camped in our forests including old growth forests. I have educated my children on the importance of our forests especially old growth forests. We cannot afford to cut any old growth trees!! These living giants provide so many soul saving experiences which all humans need to find balance and spiritual succor. The NW Forest Plan has been successful! Do not change what is not broken! |
| Judith | D'Amore | Port Townsend | WA | |
| Harvey | Brown | Greenacres | WA | |
| Marie | Bailey | Bellingham | WA | It seems the earth is on the brink of dying. Trees are essential to keep it alive. Please protect the forests. No amount of corporate greed is worth this. |
| Marianna | Haniger | Lopez Island | WA | |
| Amanda Sue | Rudisill | Olympia | WA | |
| Aileen | Jeffries | Winthrop | WA | |
| Caeli | Lynch | Camano Island | WA | Our survival on this planet depends on respecting nature. Not everyone wants to go to MARS! We have an implicit duty as human beings on this planet to respect and care for this planet. |
| Melanie | Sharbono | Seattle | WA | What would Washington be without our old growth forests? They are the soul of our state. They must be preserved and maintained. |
| Peg | Reynolds | Ferndale | WA | |
| Mike | Stapleton | Olympia | WA | |
| Marjorie | Fields | Edmonds | WA | |
| Carol | Force | North Bend | WA | |
| Ronald | Snell | Kirkland | WA | |
| Januce | Kreider | Anacortes | WA | |

| | | | | |
|-----------|---------------------|---------------|----|---|
| Clara | H | Edmonds | WA | Our oldest forests needs to stay standing. Don?t proceed with a flawed ?update? on the Forest plan! Acknowledge the science and the truth of the critical need for these old trees and the numerous benefits from them to us - don?t create more problems, more vulnerability to wildfires, increased temperatures, dirtier watershed and less water, lost wildlife and endangered species. |
| Violet | Van Diest | Bellingham | WA | Please consider this very carefully! Thank you! |
| Janette | Hammond | Port Ludlow | WA | Please help protect our earth!!! We are the only ones who are standing up to ask for this vital protection! |
| Richard | Donnelly | Bellingham | WA | Save our old growth!! |
| Liz | Scranton | Lopez Island | WA | We need to prioritize ecosystem health so we can leave a legacy for our children! |
| Sandy | Serrett | Shelton | WA | There is so much more to our forests than just the trees. The forests hold hundreds of varieties of other living things. Many are becoming rare. The forests are the remaining places to experience nature. To see how it is all interconnected and can thrive if we let it. The forests provide us with clean air and protect our ground waters. Forests are becoming rare and they are so precious. |
| Nathan | Trimble | Port Townsend | WA | |
| Morgaine | Hager | Seattle | WA | It is unbelievable that anyone could even consider removing our forests. Say goodbye to all living things on the planet if this goes forward. |
| James | Keeley | Vancouver | WA | |
| Elizabeth | Bray | Bellevue | WA | I have been honored to utilize so many forests throughout Washington- don?t let us lose them! |
| Cyndi | Cross | Port Angeles | WA | Once you tear down this amazing old growth, mycology and ecosystem of s true natural occurring forest, you cannot get it back. We need to study these areas more and leave them in a natural state! |
| Dean | Carr | Port Townsend | WA | Once the unwarranted logging is done, the damage is long term. The time to prevent this is now. |
| Leann | Schaetzel-Hawthorne | Olympia | WA | Save our legacy and old growth forest; our climate pleads for their preservation! |
| Niousha | mashayekh | Seattle | WA | |

| | | | | |
|---------------|--------------|---------------|----|---|
| | | | | Please prioritize protecting one of the things that makes America so great - our bountiful nature reserves, state, and national forests & parks. As a scientist and someone who enjoys outdoor recreational activities, please work to protect the old growth forests across the northwest! It's important to me that Americans can continue to enjoy their beauty through recreation, scientists can continue to study the ecosystems that live there, and the environment continues to benefit from the oxygen release and carbon capture that these forests provide. |
| Emily | Cliff | Seattle | WA | |
| Mark | Lucianna | Camano Island | WA | |
| | | | | In 1993, I was in Portland for the summit that created the NW Forest Plan. I have spent a lifetime hiking and backpacking in the forests of the Northwest and I have introduced my growing children to these amazing ecosystems that tie our society to something older, bigger, and more sustaining than our fast changing built environment. Please do not risk turning backwards the monumental efforts we have put into keeping these places alive and thriving. Continue to protect our ancient forests! |
| Michael | Jones | Edmonds | WA | |
| | | | | We must respect tribal sovereignty and integrate Indigenous knowledge. We must protect these forests' role in storing carbon, which is critical in the fight against climate change. We must use science-based management, making our forests healthier and more wildfire-resilient. |
| Carole | Geddes-Engel | Seattle | WA | |
| Linda | Chu | Seattle | WA | |
| James | Santoro | Vancouver | WA | |
| Alice | Nicholson | Seattle | WA | |
| Rosemary | Sikes | Port Townsend | WA | |
| June & Ronald | MacArthur | Port Orchard | WA | |
| | | | | Old growth forests cannot be replaced! They take centuries to grow and are essential in healthy ecosystems for habitat, water retention, erosion prevention, as carbon sinks, and the beauty and respite they offer in an increasingly fragmented exhausted world. We depend on you to keep these forests intact and not to cave to special interests focused on profit. Thank you for your strong defense! |
| Marcia | Rutan | Seattle | WA | |
| Michael | Gan | Kennewick | WA | |

| | | | | |
|-------------|---------------|-------------|----|---|
| Denis | Martynowych | Seattle | WA | Protecting forests is important to me because one of my greatest joys is to hike in the wilderness. Our forests are an important ecosystem that stores carbon. Our forests define the Pacific Northwest. |
| Nancy | Ledeboer | Spokane | WA | Trees are essential habitats for wildlife and for healthy forests and the planet. I support thoughtful sustainable management of forests. Do not privatize our public lands. Bring back knowledgeable employees to be stewards of our public lands |
| Maia | Ostrom | Poulsbo | WA | Water is left. |
| Todd | Bohannon | Carnation | WA | |
| Evan | Wiederspan | Seattle | WA | |
| Laurie | Gogic | Kirkland | WA | Protecting forests is extremely important to me because trees provide so much to our ecosystems : 1) They absorb toxins from the air cutting air pollution . 2) Their roots absorb dangerous storm water toxins before these pollutants get into streams or ground water. 3) Their roots also stabilize the soil preventing mudslides and preventing erosion of valuable top soil. . 3) Tree canopies provide shade, cooling their surroundings during high temperatures. 4. Trees provide homes and food for a multitude of species ; insects, birds, mammals, lichen etc. Trees are critical to protecting and enhancing life for humans, animals and the environment! Please continue to protect mature and old growth forests across the Pacific Northwest! |
| Celia | Metz | Clinton | WA | |
| Lori | Aylesworth | Leavenworth | WA | We need these trees more than ever now! Whole ecosystems depend on them, including ours. |
| Christopher | Grannis | Bellingham | WA | |
| Steve | Knutzen | Anacortes | WA | |
| Sheri | Dotson Parker | Bonney Lake | WA | |
| Cheryl | Zimmerman | Deming | WA | My name is Cheryl Zimmerman and I urge protection of our forests. As an avid hiker and lover of the outdoors,prizing clean water and air, control of flooding and landslides I especially urge pursuing protections. |
| Stephen | Matera | Seattle | WA | |
| Shirley | Cooper | Bellingham | WA | |

| | | | | |
|-----------|------------|---------------|----|--|
| Renee | Stephan | Bellingham | WA | You cannot be that thoughtless and not protect old growth forests. Some of those trees are hundreds of years old, and deserve nothing but protection. Please think carefully before you act to take any protection away from the Northwest Forest Plan - nothing is worth that. Thank you!! |
| Julia | Booth | Bremerton | WA | |
| Donna | Musgrove | Lake Tapps | WA | |
| Grant | Low | Prosser | WA | |
| Julie | Caputo | Everett | WA | These forests are important to our children and future generations. We must preserve old growth forests for recreation and habitats for continued biodiversity that is necessary to keep the United States a place people want to visit. Increased logging and reducing our old growth forests takes away opportunity to keep and preserve nature for our future |
| Christine | Exline | Kirkland | WA | These old-growth forests are vital to our way of life and hugely important to my family and community. |
| Jesse | Jenks | Seattle | WA | We cannot allow these vital trees to be cut down |
| Jonathan | Thames | Seattle | WA | |
| Amy | Mower | Maple Falls | WA | |
| Karen | Loeser | Mercer Island | WA | |
| Yvette | Goot | Colville | WA | |
| Robert | Vanderkamp | Battle Ground | WA | |
| Shelly | Peterson | Anacortes | WA | |
| Jenina | Quinn | Edmonds | WA | If we take care of our environment, we take care of ourselves. |
| Cornelius | Partsch | Bellingham | WA | Please do not reduce your efforts to protect our forests for the future! |
| Derek | Benedict | Lynnwood | WA | We must expand our natural areas and protect them from humans! |
| H. Lehman | Holder Jr. | Vancouver | WA | I strongly believe that mature/old-growth forests in the Pacific NW should be protected. I've been fortunate to hike and enjoy many forest areas in Oregon and Washington that renewed my spirit. |
| Lisa | Cohen | LaConner | WA | |
| Kate | Lunceford | BOTHELL | WA | Manage our forests for our future. Let mature and old growth be our best carbon workhorses. Give the younger forests more time to sequester carbon before harvesting so we can respond to the hotter, drier weather. Be selective so the forests will be around for future generations. |

| | | | | |
|------------------|------------------|------------|----|---|
| Joan | M Wagner | EVERETT | WA | Preserving legacy and old growth forest is crucial to our entire planet. It supports life to all living creatures. |
| MARK | GREENBERG | Stanwood | WA | As a hiker and bird-watcher I am very concerned about changes that might loosen restriction on use of USFS land. |
| Cory | Watkins | Marysville | WA | Hello! My name is Cory and I live in Marysville, WA. We moved here four years ago and at the time were surrounded by forest. In the last year much of this forest has been cleared for development, irrevocably changing the entire character of living here. When I think about the possibility these same changes could take place writ large in our state forests, I am saddened and fearful. I rely on forests personally for my own relaxation and recreation, but more I am concerned about the damage we create by ruining habitat and biodiversity. There are now coyotes and deer wandering city streets as they are pushed out of their natural habitats. We have seen in other states what the combination of climate change and human-interference with natural lands can cause. Why would we invite this upon ourselves and worsen what have already been historic wildfire seasons in Washington over the last few years? I urge you to protect at nearly any cost this vital habitat and precious jewel of Washington. |
| Robert and Julia | Glover and Kenny | Clinton | WA | <p>We strongly oppose proposed changes in the NW Forest Plan that would allow more logging. This irresponsible action will seriously threaten legacy forests. We want you to protect and preserve legacy and old growth forests.</p> <p>We moved to Washington 25 years ago because of its old growth forests. We are avid hikers and have made 1-3 day trips to visit even the forests that are outside of Washington. The forests attract countless visitors to our area and infuse visitor dollars upon which our community depends.</p> <p>These forests are critical for the health and welfare of our communities for many reasons, as we outline below. For example, the carbon sequestration they provide is crucial in these times of severe weather events related to climate change. The area in which we live is faced with significantly increased wildfire risk, and the number and intensity of wildfires have increased. The management of these forests must focus on effective, ecosystem based solutions, not on timber profits.</p> |
| Courtney | Thwaites | Brier | WA | |

| | | | | |
|---------|---------------|-------------|----|---|
| Erika | Palmer | Gold Bar | WA | As a lifelong Washington state resident, it is obvious to me that protecting our forests through science based, thoughtful management is a table stake priority. We are the EVERGREEN State. I am fortunate to live adjacent to forest service managed land where wildlife flourishes, mature trees thrive, and humans can visit to recharge their mental and physical health in a world that otherwise grows further and further away from nature. In 2022, the Bolt Creek fire erupted very near my home, we were evacuated, and to this day are not able to enjoy recreation areas that we previously visited nearly every weekend. The fire tore through harvested timberland quickly. All of the trees being the same age and type they are perfect fuel for a fire to spread, annihilating the earth and killing all vegetation. Washington?s forests are an important part of our tourism, economy, and culture ? protecting them should be important to every single citizen of this beautiful state. |
| Ann | Schmidt | Everett | WA | It is really important to preserve legacy and old growth forest lands. We need these uncut (or not cut for a long time) to keep our forests and environments healthy. |
| Robin | Vanlandingham | Everett | WA | As a lifelong PNW resident with children and a grandchild living in the area as well I value our natural lands! What a grand place to live with so much beauty accessible to so many. This past summer my husband and I spent time in the Sierra Nevada's marvelling and appreciating the committment to maintaining the old growth at Yosemite and Sequoia national parks. May we too maintain our committment to nurturing old growth forests and the value they bring to the land and creatures that inhabit them. |
| Sally | Radford | Tacoma | WA | |
| Colleen | Curtis | Bellingham | WA | Our health is entwined with the health of our forests, and they need to be protected and respected. |
| Graham | Golbuff | Seattle | WA | |
| Alan | Shurman | Maple Falls | WA | |
| Mary | Blackstone | Bellingham | WA | |
| Jan | Wachholz | Woodinville | WA | |
| Joel | Carlson | Lacey | WA | The American people impeached Donald Trump twice in his first term as President but it was not successful. Now third time is the charm as Trump is destroying our country and people like Greg Palast have proven that Kamala Harris actually won! We must finally discharge Trump from his second term in office as President! Donald Trump is a Putin supporter, lifelong criminal, con artist and liar so he must be impeached ASAP! |

| | | | | |
|--------------------|-----------|-------------|----|--|
| Amy | Lourde | Seattle | WA | Please protect the forests. Once old growth trees are gone, they're gone. I am a hiker. People who hike spend money in local communities. The forest ecosystem is unique and needs protection. Thanks, Theresa Lourde |
| Alissa | Andersson | Mukilteo | WA | Protecting forests is important to me because it also protects the wildlife who live there. Our communities depend on clean water which is also dependent on forests. Any amendment must prioritize the health of the ecosystem and redress tribal exclusion. The Forest Service has added tribal inclusion components that were long overdue in these alternatives, but must ensure implementation of those inclusion provisions. |
| Virginia M. | Haver | Seattle | WA | I'm a trained scientist and avid hiker, and it's clear that trees help mitigate climate change. More logging is not fruitful with our present situation and robs future generations of wilderness. |
| Richard | Kolber | Vancouver | WA | |
| Larisa | Moore | BELLINGHAM | WA | Trees are essential to our survival, both our physical health (sequestering carbon, providing oxygen as well as shade in a warming climate) and also our mental health--I know from personal experience how much calmer and more connected to nature I feel after a walk through a forest. Old-growth forest needs to be protected for the health of our planet. |
| Trudy | Zimmerman | Burlington | WA | Please support the NWForest Plan. I have been an avid hiker for 50 years & praise those who had the foresight to protect our incredible forests. I want my grandchildren & the future generations to be blessed with the same ability to live with & enjoy nature. Thanks! |
| Maria | Jackson | Leavenworth | WA | Once these are gone they don't come back, they are gone forever. Please preserve this amazing gift we have. |
| Barbara | Scavezze | Woodinville | WA | |
| Chris | Ziobro | Edmonds | WA | Protect & conserve what we have left! |
| Lucinda and Donald | Wingard | Gig Harbor | WA | Here in Pierce County our forest system supports our standard of living. It is not a mere resource for lumber. It provides clean air, stormwater management, native habitat, recreation, and mental health. |
| Phyllis | Farrell | Olympia | WA | Please support and fund the Northwest Forest Plan. |

| | | | | |
|--------------|-----------|-------------------|----|---|
| | | | | I have lived in the state of Washington for my entire life, some 75 years now. Much of that time I have spent hiking and climbing and enjoying our natural wonders. I have seen the effects of the clearcutting of our National Forests in the 1980's and earlier and how the NW Forest Plan changed the scope of that, depending more on ecosystem health than before and reducing logging of old growth and mature forests and the species that depend on them. I am concerned that amendments to the original plan will weaken those standards. It may be okay to refine some of those policies to better meet ecosystem goals but we should NOT be "fixing" what isn't broken. As the climate changes, we are more than ever dependent on our forests to mitigate the environmental stressors whether that's carbon storage, providing clean water, helping wildlife to thrive and provide recreation. Please keep our forests standing. Don't go back to the days of old where all that mattered were board feet and lumber. |
| Harry | Romberg | Seattle | WA | |
| Tien | Vu | Renton | WA | |
| Tien | Vu | Renton | WA | |
| Kathleen and | Pugh | Seattle, WA 98109 | WA | Clean air is so important and we need trees for that. Also the beauty of the forests contributes to our mental health. |
| Stephen | Bragalone | Lynnwood | WA | Living in the PNW for over 20 years, I have observed the changes in our towns, cities, communities, and wild places. The momentum and awareness, I believe, is in place to restore and reconnect to our forests, our communities, and ourselves. Removal of trees goes much deeper and has longer lasting impacts than many realize and once its done, we cannot simply undo it. The more damage we do the environment the more we do to ourselves and no amount of "prosperity" or "development" will ever outweigh the significance of the natural world around us. Yes, these areas provide recreation, help clean our air, support wildlife habitat, and so much more but we are still discovering our true connection to these forests and wild places. The more we disengage, the more we lose our freedom to align with nature's wonder, beauty, and magic. So please, do whatever necessary to stand up and protect these areas as a steward for nature and humanity. |

| | | | | |
|-----------|------------|-------------------|----|--|
| Judy | Friesem | Bainbridge Island | WA | I moved from NYC to the west because of the grandeur of the forests. I have worked 3 summers with the U.S. Forest Service in Idaho fighting fire, have led U.S. Conservation Corps teens in work in the National Forests in Idaho, and was an Environmental Educator for 23 years. I have spent many years backpacking in our national forests. The forests are not just grand, they are the lungs of our planet. I will not stand by and watch them be imperiled. |
| Janice | Richardson | Bellingham | WA | I love our beautiful forests. Please save them for my grandkids. Our beautiful forest give us healthy air and protect wildlife. Our beautiful forest protect against erosion and purify our water. |
| Madeleine | Stephens | Redmond | WA | As a native Washingtonian, I take immense pride in our forests and trees. As a young child I explored the wilderness near my house, as an adult nothing brings more peace or joy than hiking through old growth forest. As a young adult I know that our future is precious and every action we take now is something that will protect our health and our planet for me, my future children, and generations to come. Promoting logging in our mature forests is irresponsible and dangerous. Destroying our environment is an irreversible decision. Short term profit is not worth the loss of life, habitat, and species. The advantages of mature forests are overwhelming: carbon sequestering, clean air, flood and erosion protections, wildfire control, the healing power of nature. Please do all you can to protect our forests, now before it is too late. |
| Lynn | Colson | Bellingham | WA | |
| Thomas | Gilmore | Bellingham | WA | Please do not allow commercial logging and salvage logging in our National Forests. |
| Elli | Harron | Bellingham | WA | We need our forests! We know how important they are and changing the NW Forest Plan to allow more logging is not what we want or need. Stop supporting Corporations and profit over communities. |
| Jennifer | Woodbridge | Shaw Island | WA | Forests are vitally important for so many reasons. It is imperative that we do all we can do protect our remaining forests. |
| Janis | Olson | Bellingham | WA | |

| | | | | |
|----------|---------------|------------|----|--|
| Dave | Errickson | Bellingham | WA | <p>Protecting our forests will improve the health of our communities. As a registered nurse for over 20 years, we need to protect our mature and old growth forests just like we need our mature and older people. They both contain a wealth of knowledge and are important to our balance of nature. Forests provide space to improve physical and mental health.</p> <p>I was a pandemic travel nurse and came to Washington during the height of it. Walking in old growth forests improved my mental and physical health.</p> <p>A friend of mine is an artist. She creates paintings in mature forests that sell for thousands of dollars, creating jobs, and bringing joy to others with her art.</p> |
| Laura | Rainey | Bellingham | WA | <p>Hello, I'm writing to you because I feel a deep connection to our forests: they have been a refuge to go and hang out and escape the city; the healthy forest environment provides both mental and physical health to people who recreate; the forest provides important habitat that needs to maintain biodiverse populations of species; the forest surrounds our watershed and its conservation and maintenance is critical for maintaining clean water.</p> |
| chris | covert-bowlds | Seattle | WA | <p>As a father, family doctor, and wanting to pass along a healthy climate to our children, I urge you to protect forests.</p> |
| Kristine | Clay | Poulsbo | WA | <p>Please protect our trees, our National and state forests. They are vital to our health and mental health,</p> |
| Eric | Hirst | BELLINGHAM | WA | |
| Nancy | Johnson | Edmonds | WA | <p>I grew up in a hiking and camping family and have passed that onto my children and grandchildren. Recreation isn't the only benefit - water and air filtering, animal habitat, and carbon sequestration are some others. It's important to upgrade the NWFP by including Tribes in the planning processes. But, Please reject the USFS amendment that promotes more commercial logging of any mature or old growth trees in National Forests.</p> |
| Carla | Carroll | Shoreline | WA | |
| Katy | Bigelow | Edmonds | WA | <p>PLEASE stand strong with the agreements we have in place to support our forests! Thank you for your work.</p> |
| Serena | Donnelly | Camas | WA | <p>Protecting our forests is important to me because they are where nature thrives, and they act as carbon sinks, not to mention it is critical to conserve these areas of great beauty.</p> |

| | | | | |
|----------|-----------------|--------------|----|--|
| Tory | Bykowski-Newton | Seattle | WA | The forests and wild areas in the PNW are so healing and I think this is our greatest resources. The fresh, clean water, the clean air- it all is important to maintaining a balance with nature that will sustain our own lives. |
| Autumn | Wagner | Port Orchard | WA | Trees are such a precious resource, our planet's breathing system! |
| Samantha | Schnittger | Yelm | WA | Please listen to our Indigenous people and positively update the NW Forest Plan to protect our old-growth forests. |
| Robin | Fitch | Dayton | WA | Please do all that you can to protect the old growth forests in the Pacific Northwest. These forests are irreplaceable. Further more, these forests are essential for providing essential ecosystem services that are basic to human survival- clean air and water. To open them up to commercial logging an salvage logging is invalid and scientifically unsound. |
| Janet | Nazy | Puyallup | WA | We have some of the most beautiful forests in the world in Washington and the northwest. They help keep our planet cool, they give us recreation, they protect animals, and they provide us peace and joy. We have so little old-growth left. It must be protected for now and the future. |
| Connie | Nelson | Vancouver | WA | |
| Patricia | Barnes | Kirkland | WA | As a grandmother, I am especially concerned with the world in which my grandchildren will spend their adult lives. It is my hope that my children and grandchildren as well as their children will not only have clean air and clean water but to experience old growth forests and see in person spotted owls and other currently endangered species. I urge you to continue and strengthen the work of preserving old growth forests and to put the health of the environment ahead of the greed that have become prevalent today. |
| W.C. | Mills | Seattle | WA | I have lived in Washington State for over 40 years, and hiking and camping and cross country skiing in our national forests has been a source of joy for me. I strongly feel that we have a duty to future generations to maintain our public lands. I believe the NW Forest Plan has been very successful, and that we need to protect our oldest forests and restrict logging, so that the forests exist for future generations. I strongly support maintaining the staff who are stewards of these tremendous resources. I want my tax dollars to be used to protect and enhance our federal lands. Thank you for taking my comments. |

| | | | | |
|-----------|-------------|--------------|----|--|
| sabra | noyes | Oakville | WA | Legacy and old growth forests cannot be replaced. Once they are gone, they are gone forever, taking with them not only thousands of species, but beauty that sustains the world. |
| Elizabeth | Keathley | TACOMA | WA | These beautiful old trees and the animals and birds to which they provide shelter and food are sacred to me. It is in these forests I most feel the presence of our creator, which inspires me to be my best self. We humans are not separate from God's creation, but rather a part of it, as our indigenous communities have recognized for a long time. Trees give us oxygen and shade, protect sensitive habitat, cleanse our air, and put us in touch with the divine. Our old growth forests are invaluable and deserve responsible stewardship based on the best available science. |
| Anna | Coghill | Seattle | WA | We can never get it back!!!! Do not sell or drill or cut. Keep them intact for future generations to enjoy. |
| Dave | Porter | BELLEVUE | WA | Please protect our forest for the recreational economy |
| Erinn | Zavaglia | Edmonds | WA | This should not be something on the table to cut. We must protect our mature and old growth forests. |
| Chris | Hagen | Lynnwood | WA | Trees and Kelp represent my favorite things living in the NW (3 generation WA resident). Protect our forests, please. |
| Samantha | Sommerville | Seattle | WA | |
| NED | VASQUEZ | Bellingham | WA | |
| Jeffrey | Dyer | Lopez Island | WA | |
| Ann | Skinner | ANACORTES | WA | Strong protections of old growth forests is important to me not because I enjoy recreating in the forests, but because I enjoy and care about the wildlife that depend on intact forests for their very existence. Humans also benefit from these wild places for their physical and mental well being. Once these forests are gone, they and all of the animals that depend on them are gone too. I don't want to live in a time that let that happen. |
| Barbara | King | Lummi Island | WA | Let science guide forest management NOT POLITICS. |
| Richard | King | Lummi Island | WA | |
| Kristine | Zellman | Seattle | WA | |
| Dan | Drais | Seattle | WA | Be strong! Stand up to lunacy and grift! The GOP will cut it all down if you let them. No compromises. |
| Jeffry | Steele | Eastsound | WA | |
| Clayton | Sasaki | Seattle | WA | Please protect old growth and mature forests as they are vital part of protecting our environment |

| | | | | |
|----------|------------|--------------|----|---|
| Kathleen | Hesseltine | Everett | WA | I grew up in western Washington State where we have lots of trees probably because it rains so much. I grew up walking & hiking thru woods & walking trails. Besides trees being needed for climate change, personally they can provide a peaceful place for myself and my children and grandchildren. Anyone who has just walked thru a forest feels the impact nature has on our souls. |
| Lynn | Hiblar | Lake Stevens | WA | Hi! My name is Lynn and I have lived in Washington my whole life. My family is a joke my family and we have hiked most trails in the north Cascades over the years. My boys, as scouts, did many 50 mile hikes . We truly appreciate our natural old growth forests and understand the beauty and reality of their age. It would be devastating to see these logged. Once gone, we as a people will have no understanding the size and impact an old tree can have. I also am concerned about endangered species just as our owls that live in these old forests. Please do what you can to save these unique wonders of our world. Thank you! |
| Shannon | Leach | Everett | WA | As an avid hiker, Mom of 5 and children who would be DEVASTATED to see anything happen to our wildlife, I am urging you to do what you can to keep our old growth forests preserved! The proposed alternatives weaken protection for the region's forests, clean water, endangered and threatened species such as the Northern Spotted Owl, salmon and bull trout, and wildlife habitat, substantially weakening the science-backed, ecosystem-driven vision of the original plan. |
| Shannon | Ozog Somes | Monroe | WA | Hello! My name is Shannon and I grew up in Snohomish County, home to millions of acres of National Forest land. Some of my favorite hikes like Big Four Ice Caves and Lake 22 are managed by the Forest Service and deserve protection from logging and mining. I want future generations to be able to enjoy the same wilderness I am privileged to call my home. Please protect national forest wilderness from indiscriminate logging and mining operations, and especially protect our old growth and legacy forests! Once we lose these trees, they will take hundreds of years to grow back. They are valuable absorbers of CO2 and essential to combating the climate crisis. Thank you! |
| Suzanne | Grove | Marysville | WA | Old growth is a necessity for wildlife and it could cause that wildlife to become endangered or even extinct if we fail to act. When old growth is cut, massive amounts of CO2 is released into the air, so this could even eventually cause us to go extinct. We need to save these forests! |

| | | | | |
|----------|-------------|------------------|----|---|
| | | | | Please please pleas take care of our forests! There is no going back if old growth trees are taken away I live in an area where the builders left small swaths of forest with trails It gives us a taste of how the area looked before our houses were built and we love it! I thought there were some pretty big trees here...until I went to the Hoh Rainforest! I never imagined the awesomeness and pure majesty of those old growth trees. Then learning the science behind why we need them so desperately made me want to do everything I can to fight for them. Please don't let these old growth forests to be taken away. We all know it's WRONG. |
| Mary | Fuda | Snohomish | WA | |
| Hillary | Britt | Seattle | WA | |
| Devon | Kellogg | Redmond | WA | Please protect our old growth forests. They are sacred! |
| Lisa | Wiederspan | Seattle | WA | |
| Thaddeus | Rada-Bayne | Grafton | WI | |
| Sally | Drew | Madison | WI | I am more concerned about conservation than development or exploitation of resources. I want to see the environment protected and sustained. |
| Dan | Melton | Madison | WI | |
| Julia | Dewey | Madison | WI | |
| Kerry | Stevens | Milwaukee | WI | Please protect our oldest forests for our youngest generations |
| Tom | Schrader | Madison | WI | |
| Kurt | Robinson | Florence | WI | |
| Dave | Searles | Brodhead | WI | |
| Liz | Whitlock | Pleasant Prairie | WI | |
| John | Shelley | Plymouth | WI | |
| sharon | vorwalske | Madison | WI | |
| kathleen | king | Madison | WI | |
| Marjorie | Kozlowski | Brookfield | WI | |
| DARREN | BLANKENSHIP | Fitchburg | WI | |
| S | Bergen | Beaver Dam | WI | |
| Madolyn | Rogers | Cross Plains | WI | |
| Mary | Plummer | Whitefish Bay | WI | |
| Michael | Verveer | Madison | WI | |

| | | | | |
|-------------|-----------|-------------------|----|--|
| Roland | Hofman | New Berlin | WI | I have a great interest in the preservation of old growth forests. They are vital to maintaining a healthy ecosystem. We must continue to protect old growth forests if we are to have biodiversity for future generations. |
| Judith | Ormond | Glendale | WI | Walking through a forest is a magical, spiritual experience. I feel a reverence for the chain of life. Walking through you see interaction of trees, plants, insects, small animals, giving life to each other. All forms of life (including humans) dependent on other forms of life. |
| Susan | Navarro | Green Bay | WI | |
| Jan | Ketelle | Mineral Point | WI | This matters to me because we need intact ecosystems to preserve our planet and all it's inhabitants, including humans. |
| Christopher | Lawell | Kenosha | WI | |
| Thomas | Yackley | Wauwatosa | WI | |
| Paul | Kuhlmann | Saint Croix Falls | WI | |
| Louise | Elbaum | Madison | WI | My father ran a company, The National Wood Products Company, which produced, among other things, army cots during the war. But our forests meant more than a source of building materials to him, He was an avid, amateur ornithologist who recognized the value of natural forests for their contribution to the climate, to recreation, to breathable air, to drinkable water, and to maintaining our livable climate in general . It is important to all of us that we recognize the value of old growth forests and do our best to preserve them following the scientific knowledge we now have. It is counter-productive to fiddle with the management of our natural resources, particularly when they have been well managed by our forebarers and we have no evidence that we can do better. We would be well advised to honor the care and respect that the native Americans showed towards their environment and to follow their example in the gentle management of our valuable resources. |
| David | Rasmussen | Dousman | WI | |
| Ernie | Pearson | Baraboo | WI | |

| Cynthia | Boock | Mequon | WI | |
| Nancy | Newbury | Burlington | WI | |
| Muriel | Pacheco | Milwaukee | WI | It has been shown that old growth forests are vital to the health of the planet. We must protect them to protect ourselves in the future. There is no way for us to bring them back if we cut them down and destroy the vast ecosystem that depends on them. |
| Justin | Meyer | Chippewa Falls | WI | |
| Deb | Muraro | Dousman | WI | |
| Ralph | James | Madison | WI | |
| Charles | Hoffman | Caledonia | WI | I have no problem with selective forest harvesting. But I am not in any way agree with or support clear cutting of forests or old growth forest. I feel Trumps actions are not to benefit healthy forests but to fill the pockets of timber executives who have donated to his coffers. |
| Kay | Schulz | Mount Pleasant | WI | Please do not destroy our beautiful trees! |

|------------------|-----------|-------------|----|--|
| Irena | Carlson | Mazomanie | WI | We will all die if the old growth dies. The whole planet will be off balance, as it already is. Now is the time to stop the destruction of our invaluable forests...the very air we breathe. Please hear us all! |
| Susan | Haebig | Wausau | WI | |
| Patrick | Papiernik | Bruce | WI | |
| George & Marilyn | Ash | Madison | WI | |
| Esther | Flakas | Delafield | WI | |
| Aleks | Kosowicz | Abrams | WI | Our forests, and especially our old growths, are the lungs of the Earth and the front line of maintaining climate stability. The health of our biodiversity depends on their good health. They feed our spirits and provide refuge for our bodies. We cannot fail to secure every last remaining forest we've got--they are simply too important to life on this planet. |
| Victor | Barger | Whitewater | WI | |
| Kristine | Gould | Delafield | WI | |

| Thomas | Yackley | Wauwatosa | WI | |
| Betsy Jaeger | Lawson | Morgantown | WV | Even though we're putting almost 11 billion tons of carbon into the atmosphere every year, the increase is only 4.7 billion tons. And the largest single place that's removing carbon dioxide from the atmosphere is forests. As trees get older, they absorb more carbon every year, and because they are bigger, they store more carbon. Our forests are the lungs of our country and the cheapest and most efficient way to protect us from climate change disasters. The trees are worth more standing. |
| Connie | Truman | Charleston | WV | I'm Connie Truman, and there's nothing more important to me than protecting these mature and old growth forests. Our way of life is dependent on the air we breathe, the clean water, the wildlife habitats and ecosystems are disappearing, and what is bad for wildlife and ecosystems is bad for human life. I've lived near woods nearly my whole life and I'm 72 years old. I can't tell you the last time I saw a frog, a lizard, or a turtle. They used to be everywhere. I still see the big black and yellow bumble bees, but hardly ever a honey bee. There's not even any earthworms!! Growing up we loved the little orange and black ladybugs, now I see nothing but the giant Japanese ladybugs that are bigger, red, with big black dots, and bite you! We used to have tons of robins, cardinals, bluebirds, and many other varieties. Now there are tons of big black crows and starlings all over residential areas. When I heard only 4% of wildlife still live in the wild. Shouldn't having a habitable world be#1 |
| Christopher | Craig | Harpers Ferry | WV | |
| Debbie | Naeter | Frankford | WV | |
| Jackson | Helling | Petersburg | WV | Protecting the forests is a long-term investment in our nation's wellbeing, and will reduce the costs of damaging storms and weather changes. |
