Notes on other plants present:

Animals observed:

Birds Present: Chestnut backed chickadee , raven, more (didn't have bird recorder on this trip)

Notes:

This old growth stand runs for at least half a mile on both sides of the road, some very impressive trees, a Doug Fir Mother Tree– 308” diameter, an old growth Hemlock– 253”. The stand is pristine, the water is crystal clear, the old trees are protecting lots of wildlife habitat areas, and I am positive with a better survey a diversity of species live here.

Keeping Track of Your Forest Photos

Option 1: Before you take your forest photos, write down the forest visit name on the form and take a photo of the name. Then take the forest photos. Note that the photos **after** the forest visit name belong to that name.

Option 2: Take a screen shot while your GPS app is on before your forest and tree photos (I–Phone).

Optional (All information in the form will be viewable by the public)
