Subject: WWW Mail: APS High voltage line in Village of Oak Creek, AZ

This is to object to the installation of an overhead high voltage line by APS in the Village of Oak Creek, AZ. The line is a potential fire hazard in a time of extreme drought and staff reductions in the Forest Service, will increase home insurance rates and threaten the lives of area residents. This can be avoided by simply putting line underground. Smokey the Bear taught us that Only You Can Prevent Forest Fires. So Forest Ranger Martin, it seems that Smokey is talking directly to you. Only you can stop this. Will you? My neighbors and I surely hope so.
