Dear Northwest Forest Plan Amendment Team,

Please accept these comments on behalf of members of the wider Oregon community. Our organization, Firefighters United for Safety, Ethics and Ecology, hosted a public education event to inform people about the NWFP amendment process.

**Each of these letters in this packet is a unique, individual comment letter.** We provided this template to support new folks in learning about the public comment process, but each contains unique values and insights from the writers.

Each letter contains the individual names and contacts for the comment submitters as well.

Thank you for your time,

Firefighters United for Safety, Ethics, and Ecology (FUSEE)

1. The first part of the report is a general introduction to the subject of the study.

2. The second part of the report is a detailed description of the methods used in the study.

3. The third part of the report is a discussion of the results of the study.

4. The fourth part of the report is a conclusion and a list of references.

5. The fifth part of the report is a list of appendices.

6. The sixth part of the report is a list of figures and tables.

7. The seventh part of the report is a list of footnotes.

8. The eighth part of the report is a list of references.

9. The ninth part of the report is a list of appendices.

10. The tenth part of the report is a list of figures and tables.

11. The eleventh part of the report is a list of footnotes.

12. The twelfth part of the report is a list of references.

# Northwest Forest Plan Amendment Public Comment

The following comments are my views on the key issues and impacts that the Draft Environmental Impact Statement (DEIS) for the Northwest Forest Plan (NWFP) failed to fully analyze or disclose. In brief, the U.S. Forest Service (USFS) needs the Final EIS to propose forward-looking forest management policies, plans, and projects suitable for a future with

- Clean drinking water, a stable climate*  
1. *support for many forest dwellers who balance our ecosystem.*

## CLIMATE CHANGE and MATURE/OLD-GROWTH FOREST ECOSYSTEMS

Mature/Old-Growth (M/OG) forests are a natural means of absorbing and storing carbon to mitigate climate change. They are more valuable for climate recovery and the many ecosystem services they provide than they are as *toilet paper + lumber* in commodity markets. The DEIS wrongly proposes to continue commercial logging that is the primary threat

to the ecological role and special values of M/OG forests. *We can log our private lands for lumber, public lands are just that they belong to all of us + offer more protection standing*

The gravest threat to M/OG forests is a revival of commercial logging under the

3. *false* claim that logging will protect rural communities from wildfire or restore forest resilience. The DEIS must analyze the vital, irreplaceable role of M/OG forests in mitigating climate change and propose permanent protection from logging in all existing M/OG stands. *We know mature + old growth trees are most resilient to fires. Monocrop small timber is what creates fast moving*

**TRIBAL INCLUSION and FIRE RESILIENCE** *Fires - they are kindling*

Indigenous cultural burning was, and still is, a vital means of sustaining resilience in fire-adapted forest and grassland ecosystems. Settler-colonialism forcibly removed Native peoples and prohibited their land stewardship practices, causing immense harm to

4. *community safety*. The DEIS failed to authorize revitalization of Indigenous cultural burning across the widest landbase range in the national forests in accordance with traditional ecological knowledge. The DEIS failed to fully analyze or disclose the ongoing and escalating impacts of wildfire suppression and fire exclusion.

## ENVIRONMENTAL JUSTICE

As a matter of environmental justice, Tribal representatives and Indigenous perspectives must have greater influence in the NWFP than special interest groups who represent

5. Logging + oil + gas interests The DEIS failed to adequately analyze the beneficial social, economic, and ecological effects of bringing back Indigenous cultural burning and other traditional land stewardship practices in comparison with the negative effects of continued commodity resource extraction and development.

## COMMUNITY SOCIOECONOMIC SUSTAINABILITY

The economy of the Pacific Northwest and other rural western regions has diversified over the last 30 years, and logging, grazing, or mining are no longer the dominant industries. Rural communities that formerly depended on resource extraction jobs are struggling, but there is tremendous potential for sustainable jobs in 6. outdoor recreation that the DEIS failed to fully analyze and disclose.

In conclusion, in the midst of intersecting climate, wildfire, and biodiversity crises, the DEIS for the NWFP failed to focus on 7. the crucial role our mature trees offer to help protect communities and restore ecosystem resilience. The FEIS must address the current flaws in analysis and disclosure of impacts, and failed to convey that the USFS is genuinely promoting a paradigm shift to fix the flaws of its past mismanagement of our forests.

Sincerely,
