

April 27, 2025

The scoping/comment process was designed to consume the time and hope of the small group of people aware of it while yielding no meaningful change in Forest Service plans. It is a deceitful passive-aggressive abuse of those opposed to any aspect of WMNF's Logging Projects.

To limit as much as possible this abuse, I oppose the Forest Service's "proposed" Lost River Logging Project by incorporating by reference the objections raised by Standing Trees and others to the Lake Tarleton and Peabody West Logging Projects and state my intent to support any legal action that may be brought against the Forest Service to eliminate/reduce this project.

The Forest Service failed to clarify the connection of this project to Eversource's "proposed" demolition and reconstruction of the X-178 transmission line.
