To whom it may concern:

As a longstanding homeowner in Teton Valley Id (30 + years) and an avid user of the bordering Wilderness Areas as well as Grand Targhee, I have studied the EIS proposed for Grand Targhee and wish to offer my opinion.

Given what I've read, along with some data that I wish was in the EIS but haven't seen within the proposals, I believe **"Alternative 3"** offers the best long-term options.

I very much looked at Alternate 5 as well but given the destruction of much of the forest as well as impact on the water in Mill Creek, opted against this option. As stated in the EIS: "Within the Mono Trees area, a road is proposed to overlap with a perennial stream (Mill Creek). This does not align with the CWA (Clean Water Act) as roads and facilities are proposed to be located in sensitive areas including riparian areas, wetlands, meadows, bogs, and fens. (p.348)"

Under Alternate 3, I am strongly questioning the restaurants proposed, especially on Fred's Mtn. County dark skies laws along with water, sewer and waste issues is concerning.

I won't go into further detail as I see many have raised the very specific concerns I have about other proposals.

Thank you.
