AMENDMENT TO USDA COMPLAINT NUMBER: 2024-07-001654

My damage claim now totals \$33 million and counting.

On June 13, 2025, two U.S. Forest Service Law-Enforcement Officers guarding criminal activity damaging private property harassed and retaliated against me impeding my travel on the access road to private property established in or about 1932 after I explained I was going to get water, not interfere with the criminal activity. The discussions that followed established my rights and issues with their criminal acts. On my return home, they were stationed near the USFS trail gate and out of my way.

On May 12, 2025, the USFS surveyor postponed from October 2024 assured me that USFS Libby Supervisor's, et al, removal of original survey boundary markers in 1992 is illegal but it is the basis of today's criminal activities.
Etc. :

OBJECTION COMMENTS, RE:
LIBBY EXPLORATION PROJECT
CHAD BENSON Responsible Official, Supervisor
KOOTENAI NATIONAL FOREST, LIBBY RANGER DISTRICT.

"Finding of no significant impact" allows the project to violate Federally Protected Wilderness area established will of the People claiming it is "within established valid existing rights" and is flawed on its face for which federal courts historically block such decisions.

Previous blocking objections were based on: Noranda Minerals had a valid claim when Wilderness Protection was enacted so, under

Montana mining law was entitled to mine those ore deposits, however, gave up those rights to respect the Will of W & the People.

Mines Management Corporation bought rights after Wilderness Designation protected the grounds from being disturbed. Noranda leased right of way access across valid claims between what MMC bought and the ore deposits. MMC claim jumped rather than lease the right of way Noranda terminated, "controlled by MMC" by illegal means.

When Hecla bought out MMC, Montana DEQ refused granting the rights due to Hecla's history as a bad actor.

This decision is yet another USFS example "It's illegal but we don't care." screwing the Land screwing over the People policy.

Remedy: eliminate United States Forest Service for malfeasance in administering public land.

My prior objections are so prominently displayed in the public record that, when Army Corps of Engineers were shuffled into the deck, the leader personally requested my objection on his desk and got it with others inspired, content always on illegality.
