RE: Southern Tenmile Recreation Access Project

Dear Mr. Morris:

Summit County Government (“County”) is pleased to support the Southern Tenmile Recreation Access Project (STRAP). The area of the proposed plan is vital to sustaining the recreation and tourism economies of Summit County, as well as the quality of life for residents. As neighboring property owners and land managers, we support the project goals and have a vested interest in the project’s success.

With over 237,000 annual visitors to the project area, it is critical that the outcomes of this plan balance user experience and visitor access with the conservation and protection of natural resources. We believe the proposed plan lays the groundwork necessary to achieve this balance by establishing set capacities for the area and developing infrastructure to accommodate that capacity. The County also supports efforts to reduce traffic impacts on residents and ensure access for emergency responders through reserved parking and expanded shuttle services, when possible.

We look forward to continuing to refine the plan with our land-management partners at the U.S. Forest Service and Town of Breckenridge by incorporating public input and resource reports. Thank you for the opportunity to comment and for your continued partnership.

Sincerely,

The Summit County Board of Commissioners

Eric Mamula  
County Commissioner

Tamara Pogue  
County Commissioner

Nina Waters  
County Commissioner
