Comments: USFS Forsythe II Project

Dear Sirs,

I strongly object to the Forsythe II proposal because:

1. It will increase, not mitigate fire danger
2. It will destroy currently well functioning ecosystems and negatively impact local wildlife.
3. It will degrade, not improve forest health and resilience
4. It will increase downslope flooding danger, including flooding in Boulder City and County.
5. It will negatively and unfairly impact housing values for local residents and reduce recreational opportunities for both local residents and the general public.

Scrap the US Forest Service Forsythe II Project. Replace it with a minimalist, ecologically sound project, such as the one submitted by the Magnolia Forest Group.

My property looks directly at Forsythe Rock. The plans that are being proposed by the forest service will not accomplish the goals that they say are motivating them and will make the area ugly. The plans show little to no regard for those of us that call this home. Our great president Teddy Roosevelt, the creator of Forest Service would I am sure be appalled. Thank you for your time and consideration in this important matter.

Yours truly,

William Arntz
