Comments: Ok folks, here we go again. We all know that the US Forest Service is run by Hippies & Planet saver groups. They tell you folks what to do. So instead of letting our forests get all grown up and dead from neglect, you need to go in and log the older trees and leave the reprod for future growth in our forests. It is pretty pathetic when you have to let them die, and then burn them down to apease the hippy enviromental groups. If they want this they need to pay for everything that burns ect. I saw this happen here in Okanogan county the last 2 years. We sure don't want it to happen again. This makes me sick and anybody who condones this is a sick and twisted person. This is my comment. Please share if you want.
