Page: 3 + 4

Line: 2 on P3; It 2 on P4

Comment: Using the State of NM as the region of Comparison for the Cibola NF is too broad. There is too big o difference in latitude and water shed/basin areas between the forests in Northern NM than in the sky island forests of the Cibola NF in central and southern NM. To narrow the area of consideration from 435 to 88 to seven is too narrow a focus. There are areas in the San Mateos.
