Coronado National Forest

Mineral & Geology Staff

RE Hermosa-Taylor Exploration Plan - Arizona Minerals - Patagonia

Please allow the exploration permitting plan by Arizona Merals for Hermosa-Taylor to go forward without delay.

We desperately need these jobs to support our dieing little small town and community. We welcome them with open arms as they give financial support to our few struggling small businesses and commulity, keeping it alive. Please ignore the environmental extremists and help make ameria great again by approving their permits and plans. We need metals for industry, electronics, national security and more.

For a strong and free nation,

William Stack

Patagonia, AZ
