Comments: I write again to support the Midas Gold project. I sent a letter to you a few weeks ago through snail mail in support of the project. Later I attended the early evening presentation you hosted in Boise about the Midas Gold project.

The Midas Gold effort would bring resources for site restoration otherwise never available. The Midas Gold effort would provide well paying jobs with benefits to local families.

Listening to the lengthy, complex, detailed review required for approval of the project, I do understand why people would want to spurn this opportunity to restore the land and support working people.
