First name: Brian

Last name: Hines

Organization:

Title:

Comments: * Restoring the natural flow of the East Fork of the South Fork of the Salmon River, repairing impacted waterways and adding critical riparian habitat will have a positive impact on water quality, fish and wildlife upstream and downstream.

* After 100 years of mining, most of which took place long before environmental standards were established that are in place today, the Stibnite mining district needs environmental repair and restoration.
