Comments: Dear Glen Cassamassa,

I respectfully write today to express my concerns about the Atlantic Coast Pipeline (ACP).

As a resident of the Shenandoah Valley, I take our forests and water sources seriously. Some are polluted and hurting, and some are abundant and thriving. I am concerned that the ACP Pipeline would create problems for the ecosystem and impact the aesthetic uses of our Natural Resources.

I understand that we need to slow the permitting process and take the proper time to allow the Fish and Wildlife Service to come to a conclusion on the safety and effects of this pipeline on habitats in our forests. How will landslides be prevented? How will we protect our water?

Concerned and sincere,

Shauna Frantz
