Re: ACP

Have you been to the state of WV? Have you hiked the Appalachian Scenic Trails? Have you ever seen a 20% steep grade? Have you had your land stolen from you?

Please say NO to the Atlantic Coast Pipeline in our Forests! Please DO NOT weaken standards that protect precious ecosystems on which we all depend.

Dominion Company has admitted this project will cause harm. It has refused to meet requirements to provide information. "Public Convenience and Necessity" has not been met. We all know this gas is for export.

Once again rich white men in suits want to steal land and resources, benefiting only a very few while human lives and the environment will be impacted for decades, if not forever.

Help us draw the line! Stand with those of us who do not want our land polluted. Say NO to this project and set a new precedent for our children's future.

Thank you

Debbie Naeter
